

# **LIGHTING SUB PLAN**

Moorebank Precinct East Stage 2

13 OCTOBER 2022

# SYDNEY INTERMODAL TERMINAL ALLIANCE MOOREBANK PRECINCT EAST STAGE 2

# Lighting Sub Plan

The lighting design for the shared pathways within Area 1 was completed by Arcadis. The lighting design for Warehouse 1 was completed by Modcol Pty Ltd. The lighting design for Warehouses 3, 4 and 5 was completed by C-Level. The roads and shared pedestrian path lighting for Area 2 was completed by Ultegra.

This consolidated version of the LSP has been prepared by Aspect Environmental.

# **1 BACKGROUND**

The Project has been assessed by the Department of Planning and Environment (DPE) (formerly Department of Planning, Industry and Environment) under Part 4, Division 4.1 (now Division 4.7 as of 1 March 2018) of the *Environmental Planning and Assessment Act* 1979 (EP&A Act) as State significant development (SSD). The Planning Assessment Commission (now the Independent Planning Commission) granted approval for the Moorebank Precinct East (MPE) Stage 2 Project to the Sydney Intermodal Terminal Alliance (SIMTA) on 31 January 2018 subject to Conditions of Consent (CoC) (SSD 7628). DPE subsequently approved Modification 1 (MOD 1) in March 2022, MOD 2 on 31 January 2020, MOD 3 on 8 December 2020, and MOD 4 on 19 January 2021 under Section 4.55(1) of the EP&A Act.

The Lighting Sub-Plan (LSP) has been developed to manage impacts of light spill associated with the Project.

This LSP addresses the relevant requirements of the consolidated SSD 7628 development consent, including the Environmental Impact Statement (EIS), Response to Submissions (RtS) and CoC, and all applicable guidelines and standards specific to the management of light spill. This LSP forms part of the Urban Design and Landscape Plan (UDLP).

#### **1.1 Introduction**

The MPE Site, including the Project Site, is located approximately 27 km south-west of the Sydney Central Business District (CBD) and approximately 26 km west of Port Botany and includes the former Defence National Storage and Distribution Centre site. The MPE Site is situated within the Liverpool Local Government Area (LGA), in Sydney's south-west subregion, approximately 2.5 km from the Liverpool City Centre.

The MPE Project involves the development of an intermodal facility including warehouse and distribution facilities, freight village (ancillary site and operational services), stormwater, landscaping, servicing and associated works on the eastern side of Moorebank Avenue, Moorebank.

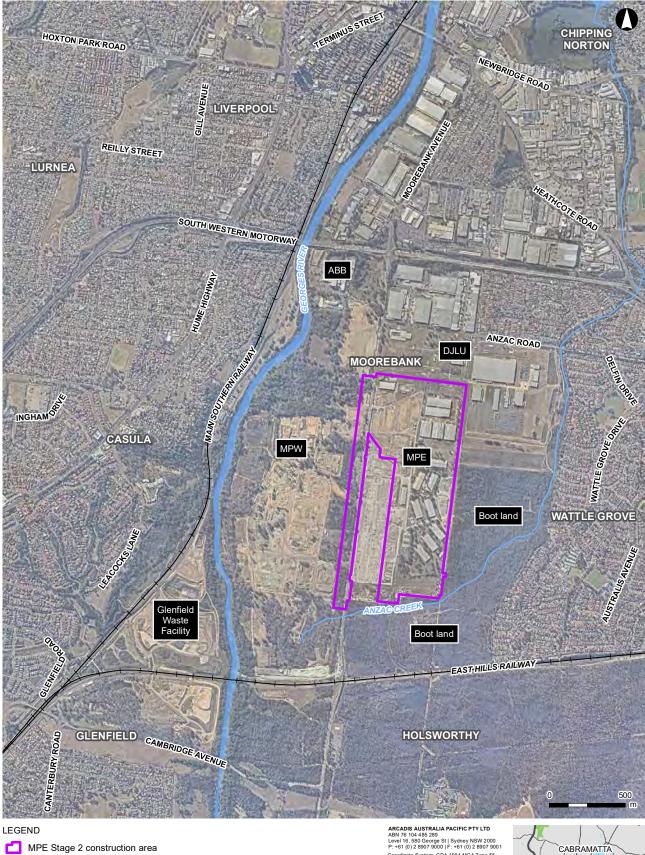

Stage 2 of the MPE Project (the Project) involves the construction and operation of warehousing and distribution facilities on the MPE Site and upgrades to approximately 1.5 km of Moorebank Avenue from approximately 35 m south of the northern boundary of the MPE Site to approximately 185 m south of the southern MPE Site boundary. The Project has been assessed by DPE under Part 4, Division 4.1 (now Division 4.7 as of 1 March 2018) of the *Environmental Planning and Assessment Act* 1979 (EP&A Act) as State significant development (SSD).

Key components of the Project include:

- approximately 300,000 m<sup>2</sup> gross floor area (GFA) of warehousing and ancillary offices
- freight village, 8,000 m<sup>2</sup> GFA of ancillary retail, commercial and light industrial land uses
- internal road network and hardstand across the site
- ancillary supporting infrastructure within the site, including:
  - stormwater, drainage and flooding infrastructure
  - fencing, signage, lighting, remediation and landscaping
- Moorebank Avenue upgrade including:
  - raising by about 2 m and some widening
  - embankments and tie-ins to existing Moorebank Avenue road levels
  - signalling and intersection works.

Refer to Figure 1-1 for site location.

#### **Urban Design and Landscape Plan**

MPE Stage 2 construction area Existing railway Watercourse

Coordinate System: GDA 1994 MGA Zone 56 Aerial imagery supplied by nearmap (May, 2018)

Figure 1-1: Site Location

# **1.2 Purpose and Application**

This consolidated LSP has been prepared to provide details of the common and individual lighting for the Project Site to reduce light spill and mitigate visual impact to residents in residential areas within the locality. This LSP has been developed to address the CoC B141(b) and (c) and FCMM 8C.

This LSP requires approval by the Secretary (DPE) and the approved plan must be implemented prior to occupation of Warehouse 1.

#### **1.3 Staging of this Plan**

Delivery of this LSP will be staged (in accordance with CoC A14 and A15) to allow for the commencement of warehouse construction. The proposed staging of the LSP is shown on Figure 1-2 and detailed within Table 1-1. This LSP must be implemented prior to occupation of the warehouses and/or freight village, once approved by the Secretary in consultation with the Government Architect New South Wales (GANSW). Plan staging has been undertaken as per Table 1-1.

Table 1-1: Staged submission of the LSP.

Works Area	Approximate Dates Plan Submission	Operational Area	Approximate Occupation Date
Area 1	Q2 2019	Warehouse 1 including area north of freight village	Interim OC 31/01/18
Area 2	Q2 2020	Warehouse 3, 4 and 5	Warehouse 3: Interim OC 20/03/20 Warehouse 4: Interim OC 22/05/20 Warehouse 5: Q4 2020
Area 3	Q2 2022	Warehouse 6 and 7	Q2 2023
Areas 4 – 6	ТВС	Warehouses 2, the freight village, Moorebank Avenue Upgrade	TBC <sup>1</sup>

Note:

<sup>1</sup> Construction and occupational timing for Areas 4 – 6 is subject to market demand and future approvals.

## 1.3.1 Activities for the Stages

The activities associated with the stages include, but are not limited to:

- all ground preparation activities such as earthworks, services, on-site detention construction across the warehouses (managed through the Construction Environmental Management Plan and sub-plans and Stormwater Management Plans)
- upgrade works to Moorebank Avenue
- construction and operation of the warehouses and freight village including:
  - construction and operation of parking facilities
  - construction and operation of internal road network and shared paths
  - installation of temporary solar lighting towers to illuminate roads and shared paths
  - landscaping
  - construction and operation of cycling and pedestrian facilities
  - installation of signage
  - construction and operation of end of trip facilities
  - construction and operation employee outdoor meal break areas.

The activities for the stages include construction activities such as bulk earthworks, landscaping, roads, pavements and carparks, and warehouse construction and fit-out.

Approval from DPE for staging of development activities has already been granted as a separate process aside from this plan.

#### 1.3.2 Relationship of Stages

Area 1 was the first stage addressed by this LSP and included Warehouse 1 and the immediate area surrounding Warehouse 1 (excluding the freight village).

Area 2 was the second stage of this LSP and included Warehouses 3, 4 and 5 and surrounds.

The final stage of the LSP consolidated all areas into a final UDLP document, in order to demonstrate that the scheme and specific requirements of SSD 7628 have been achieved across the MPE Stage 2 Site. At the time of preparing the consolidated document, the detailed design and tenanting requirements for Areas 3 to 6 were not finalised, and therefore lighting requirements could not be confirmed. Once details are available for these areas, the lighting scheme for each area should be developed based on what has been approved for Area 1 and Area 2, and the requirements of the UDLP and this subplan. Light calculations should be undertaken, and certification obtained prior to construction.

This LSP will be delivered as follows:

- Area 1 details were prepared and approved by DPE prior to commencement of permanent built surface works and landscaping of Warehouse 1. This allowed the Project to commence construction of Warehouse 1, prior to the finalisation of the design for the remainder of the Project and did not restrict or constrain delivery of a complaint final detailed design across the remainder of the MPE Stage 2 Site.
- Area 2 was prepared and approved by DPE prior to commencement of landscaping of Warehouses 3, 4 and 5. Again, this allowed the Project to commence construction of warehousing in this Area, prior to the finalisation of the design for the remainder of the Project.
- The consolidated LSP included details for Area 1 and 2, which were representative for Areas 3 to 6. It was approved by DPE on 5 February 2021, prior to the commencement of permanent built surface works and/or landscaping of Warehouses 2, 6, 7 and 8, the freight village (Area 4) and upgrade of Moorebank Avenue (Area 6).
- The consolidated UDLP, including this LSP, has been updated to reflect the amended layout for Area 3, reconfiguring Warehouses 6, 7 and 8 to two warehouses (Warehouses 6 and 7). Detailed lighting plans for Area 3 are yet to be confirmed, but will be consistent with approved lighting plans for Areas 1 and 2. This updated UDLP, including this updated LSP, has been submitted to DPE for information.

#### 1.3.3 Triggers

The trigger for submission of the future updates of this LSP will be one month prior to permanent built surface works and/or landscaping of the next works area.

#### **Urban Design and Landscape Plan**

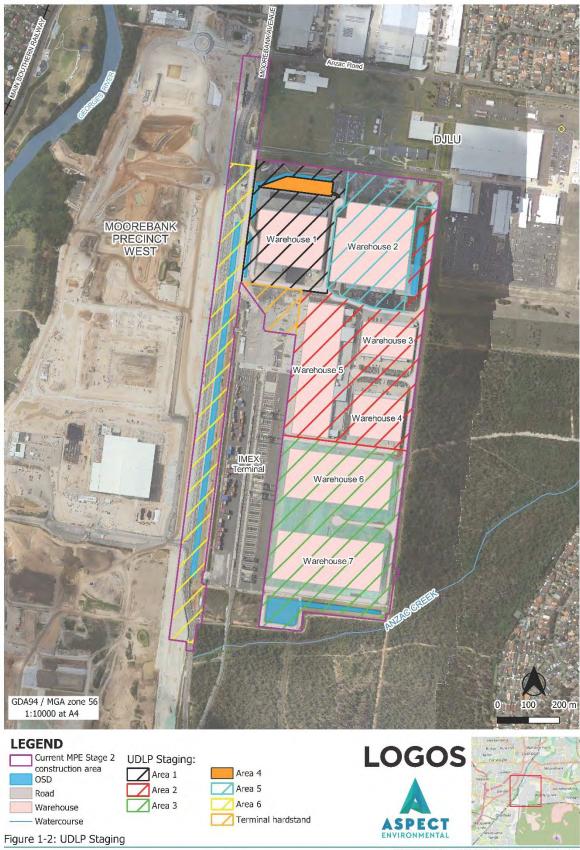

Figure 1-2 UDLP Staging

# **1.4 Compliance Matrices**

The Project is being delivered under Part 4, Division 4.7 (previously Division 4.1 prior to 1 March 2018) of the EP&A Act. The CoC include requirements to be addressed in this LSP. These requirements and how they are addressed are provided within Table 1-2. Note there are no specific CoC from approved modifications relating to this plan.

In Table 1-2, Primary Conditions are specific to the development of the management plans, while Secondary Conditions are conditions which are related to the environmental aspects associated with the plan.

Table 1-2 Conditions of Consent (CoCs)

CoC	Requirement	Document Reference	How Addressed			
Primary Condition						
B140	The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The UDLP must be approved by the Secretary, in consultation with the NSW Government Architect.	Author Details (page ii and iii) Section 1.2 Section 1.5 Appendix 1 Appendix 2 Appendix 3	This LSP has been prepared by a suitably qualified professional and in consultation with LCC, DPE and GANSW, as detailed in Section 1.5 and Appendix 0A.			
	A Lighting Sub Plan to assist in the control of lighting and reduce the visual impact of the 24 hour operational facility when viewed from residents within residential areas within the locality.	This plan Section 2.1	This LSP has been prepared to assist in the control of lighting and to reduce the visual impact of the Project Site when viewed from residents within residential areas within the locality.			
B141(b)	The Plan must provide an assessment of: the location, design specification and impacts of operational lighting associated with the development and measures proposed to minimise lighting impacts and standardise lighting design within the MPE development.	Section 2.4 Section 2.2 Section 2.3 Appendix 1 Appendix 2 Appendix 3	<ul> <li>Section 2.4 provides details of the light spill assessment undertaken for the Project Site which identifies the location of lighting at the Project Site and the impact it will have on the surrounding area.</li> <li>Section 2.2 identifies the design specification of lighting at the Project Site</li> <li>Section 2.3 identifies measures to minimise lighting impacts and a standardised lighting design which includes but is not limited to the following:</li> <li>lighting will be positioned to face downwards to eliminate upward light spill</li> <li>lighting will use shielded fittings</li> <li>lighting will be positioned to provide uniform lighting.</li> </ul>			
	The Plan must be prepared and approved by the Secretary.	Section 1.2	The consolidated UDLP, including this subplan, was approved by DPE on 5 February 2021.			

CoC	Re	quirement	Document Reference	How Addressed
	ligh	Applicant must ensure that the ting associated with the elopment:		
	(i)	complies with the latest version of AS 4282-2019 - Control of the obtrusive effects of outdoor lighting (Standards Australia, 2019);	Section 3.1 Appendix 1 Appendix 2 Appendix 3	The impact of light spill to residential properties from the solar tower lights in Area 1 is within the acceptable criteria specified in Australian Standard <i>AS4282-2019</i> <i>Control of Obtrusive Effects of Outdoor</i> <i>Lighting</i> .
				The light calculations detailed in the design for Warehouse 1 are in accordance with AS 4282, as stated in Section 3.1.1 and detailed in Appendix 1.
				The light calculations detailed in the design for Warehouses 3, 4 and 5 are in accordance with AS 4282, as demonstrated in Section 3.1.2 and detailed in Appendix 2.
				All external lighting within Area 3 shall be of downward facing distribution type and comply with the zero upward lighting requirements,
				Light calculations for Areas 4 and 5 will be completed during detailed design and confirmation of warehouse layouts, and will be consistent with Area 1, Area 2 and this LSP.
	(ii)	<ul> <li>is mounted, screened and directed in such a manner that it does not create a nuisance to surrounding properties or the public road network; and</li> </ul>	Section 2.2 Section 2.3 Appendix 1 Appendix 2 Appendix 3	Section 2.2 describes how lighting will be mounted and shielded to be angled in a downward direction to prevent any nuisance to surrounding properties or the public road network.
				Section 2.3 details the design mitigation measures for each of the individual areas.
				Appendix 1 shows the light spill assessment for the lighting at Warehouse 1 and the solar tower lights located near the shared paths, demonstrating that lighting associated with the development will not create a nuisance to surrounding properties.
				Appendix 2 shows the light spill assessment for the lighting of Warehouses 3, 4 and 5 and the road and shared paths within Area 2 which demonstrates that lighting associated with the development will not create a nuisance to surrounding properties.
				Lighting shall be mounted and shielded consistently with Areas 1 and 2 in Areas 3 to 5 in order to prevent nuisance to surrounding properties. Certification will be obtained confirming design and engineering is in accordance with the relevant provisions

# SIMTA STORY TERMONAL STORY

CoC	Requirement	Document Reference	How Addressed
			of the BCA and Australian Standards – as has been provided for Area 2 (Appendix 2).
	(iii) is designed to reduce light spill and mitigate the visual impact of the 24-hour facility when viewed from the residential areas in the locality and the Boot Land.	Section 2.2 Section 2.4 Appendix 1 Appendix 2 Appendix 3	The placement and design of lighting has been designed to reduce light spill and mitigate the visual impact of the 24-hour facility when viewed from residential areas within the locality and the Boot Land. Appendix 1 provides the light spill assessment for the lighting at Warehouse 1 and the solar tower lights located near the shared paths. No adverse effects in the form of light spill can be seen on the Boot Land or surrounding residential areas. Appendix 2 provides the light spill assessments for lighting at Warehouses 3, 4 and 5 and shared paths within Area 2. The assessments demonstrate that the measures incorporated into the lighting design will reduce light spill and mitigate visual impacts on surrounding residential
			<ul> <li>areas and the Boot Land. Subsequently</li> <li>these measures will be applied consistently</li> <li>across the site in all Areas to minimise</li> <li>adverse impacts from lighting.</li> <li>Certification for Area 2 has been obtained</li> <li>confirming design and engineering is in</li> <li>accordance with the relevant provisions of</li> <li>the BCA and Australian Standards</li> <li>(Appendix 2).</li> </ul>
	The Lighting Sub Plan must identify and provide details of the common and individual lighting throughout the development to reduce light spill and mitigate visual impact on the residential areas in the locality by:		
	(i) eliminating upward spill light;	Section 2.3	Upwards light spill is eliminated through use of shields and positioning of lights to face downwards.
B141(c)			Light spill modelling determined the Upward Light Output Ratio (LOR) for Area 1 to be close to 0% (i.e. less than both 3% and 5%), which is an ISCA requirement that will be prescriptive for the Construction Contractor.
			The Design Certificate for Area 2 has certified that the external lighting has been designed to face downwards, using specific cut off luminaires eliminating the upward spill light above the horizontal. External lighting throughout the remainder of the site shall be designed and sited consistently with Area 1 and Area 2 to eliminate upward spill light.

# SIMTA STEREY INTERVOLUL

CoC	Requirement	Document Reference	How Addressed
			After finalisation of detailed design, certification will be obtained confirming design and engineering is in accordance with the relevant provisions of the BCA and Australian Standards – as has been provided for Area 2 (Appendix 2).
	(ii) directing light downwards, not upwards;	Section 2.3	The beam angle of the solar light towers in Area 1 will be set at an angle of 40° and 10° for the warehouse yard lights.
			Also, as detailed in Section 2.3 lighting will be positioned to face downwards which will prevent horizontal light spill outside of the areas intended to be illuminated.
	(iii) using shielded fittings;	Section 2.3	The lights will be shielded to prevent light above the horizontal plane. The fittings selected have controlled optics with downward throw and zero up lighting.
	(iv) avoiding 'over' lighting;	Section 2.3	A design combination of positioning,
		Appendix 1	mounting height and shielding to achieve adequate and comprehensive light
		Appendix 2	coverage zones to suit the functional requirements of the area will be implemented.
			Refer to Appendix 1 for the light spill assessment for Area 1, demonstrating over lighting has been avoided.
			Refer to Appendix 2 for the light spill assessments for Area 2, demonstrating over lighting has been avoided.
			The lighting strategy for Area 1 and Area 2 shall be applied consistently across the site, in accordance with this LSP, in order to avoid over lighting.
	(v) switching lights off when not required;	Section 2.3	Lighting will have photoelectric sensors or be on a timer, so lighting is only on when required.
	(vi) using energy efficient bulbs;	Section 2.3	Light-emitting diode (LED) lights will be used for the solar tower lights and warehouse yard lights in Area 1.
			High quality LED luminaires will be utilised where possible in Areas 2, 3, 4 and 5.
			Using LED lights for external lighting reduces the energy demand by a factor of 10, providing an efficient lighting system solution.
	(vii) using asymmetric beams, where floodlights are used;	Section 2.3	Area 1 floodlights will be asymmetric beams or LED lights with shields to provide even light distribution over the areas intended to be lighted.

# SIMTA STEREY INTERVOLUL

CoC	Requirement	Document Reference	How Addressed
			Areas 2 to 5 floodlights, where required, will use asymmetric beams to provide an even light distribution over areas intended to be lit.
	(viii) ensuring lights are not directed towards reflective surfaces; and	Section 2.3 Appendix 1 Appendix 2	The position of the lighting and mounting height across the site will be adjusted so as to avoid light being directed towards reflective surfaces.
		Appendix 3	Refer to Appendix 1 for the locations of the lighting at Warehouse 1 and the shared pathways.
			Refer to Appendix 2 for the locations of the lighting at Warehouses 3, 4 and 5 and for the internal roads and shared pathways.
			Refer to Appendix 3 for the locations of the lighting at Warehouses 6 and 7 and for the internal roads and shared pathways.
	(ix) using warm white colours.	Section 2.3	Lighting for the solar towers in Area 1 will be fitted with filters to achieve warm white colours.
			For the warehouse lighting in Area 1, 5,000 Kelvins (k) fittings will be used which are the most efficient lighting for external purposes, and considered warmer in colour than 6000 k lighting.
			For the warehouse lighting in Area 2, 4000 k fittings will be used which are efficient lighting for external purposes and considered warmer in colour than 6000 k lighting. This will be applied similarly in Areas 3 to 5.
	The approved plan must be implemented prior to occupation of the warehouse and freight village.	Section 1.2	The approved plan will be implemented prior to occupation of warehouses and the freight village.
Seconda	ary Condition		
A14	With the approval of the Secretary, the Applicant may submit any strategy, plan or program required by this consent on a staged basis.	Section 1.3	The Secretary's approval for staging of this plan has already been obtained.
A15	If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage of the development to which the strategy, plan or program applies, the relationship of the stage to any future stages and the trigger for updating the	Section 1.3	This LSP will be updated and completed in stages as described in Section 1.3. This consolidated iteration of the LSP details the common and individual lighting for the MPE Site. As outlined in Section 1.3.3, this LSP will be submitted to DPE one month prior to permanent built surface works and/or
	stages and the trigger for updating the strategy, plan or program		permanent built surface works and/or landscaping of the next stage.

<ul> <li>B140(j)</li> <li>Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, an Urban Design and Landscape Plan (UDLP) must be prepared. The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The UDLP must be approved by the Secretary in consultation with the NSW Government Architect. The UDLP must present an integrated urban and landscape design for the development, and must include, but not be limited to:</li> <li>(i) the sub-plans identified in condition</li> </ul>	CoC	Requirement	Document Reference	How Addressed
B141.	B140(j)	<ul> <li>built surface works and/or landscaping, or as otherwise agreed by the Secretary, an Urban Design and Landscape Plan (UDLP) must be prepared. The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The UDLP must be approved by the Secretary in consultation with the NSW Government Architect. The UDLP must present an integrated urban and landscape design for the development, and must include, but not be limited to:</li> <li></li> <li>(j) the sub-plans identified in condition</li> </ul>		UDLP. This LSP has been prepared by suitably qualified and experienced persons as shown on the cover page. This LSP has been prepared in consultation with the relevant council(s) and NSW Government Architect, as outlined in Section 1.5. The consolidated UDLP, including this subplan, was approved by DPE on 5

The Final Compilation of Mitigation Measures (FCMMs) were prepared as part of the consolidated assessment clarification responses issued to DPE on 10 November 2017 (Arcadis 2017). A list of the FCMMs as relevant to the operational lighting and how they have been complied with in this plan are provided in Table 1-3.

Table 1-3 Final Compilation of Mitigation Measures (FCMMs)

FCMM	Requirement	Document Reference
8C	Light for the Amended Proposal would be designed to minimise any direct light spill and would comply with the requirements of <i>Australian Standard AS4282-2019 – Control of the Obtrusive Effects of Outdoor Lighting.</i>	Section 3

The Commonwealth Mitigation Measures (CMM) which are relevant to this plan are detailed in Table 1-4.

Issue	Requirement	Document Reference
	Lighting of the Principal proposal will be designed to meet the requirements of the Australian Standards:	
Light Spill	1. AS4282-2019 Control of the Obtrusive Effect of Outdoor Lighting.	Section 3
	2. AS1158.3.1 Lighting for roads and public spaces – Pedestrian area (Category P) lighting – Performance and design requirements	

The Revised Statement of Commitments (RSoC) includes the most recent compilation of SIMTA commitments to mitigate the environmental impacts, monitor the environmental performance and/or achieve a positive environmentally sustainable outcome. These RSoC (June 2017) were presented in the Moorebank Precinct East – Concept Plan Modification 2 Response to Submissions. The RSoC that are relevant to this plan are identified in Table 1-5.

Table 1-5 Revised Statement of Commitments (RSoC)

RSoC	Requirement	Document Reference
Visual and Urban Design	The Proponent will use lighting which is in accordance with Australian Standard AS4282-2019 "Control of Obtrusive Effect of Outdoor Lighting". The height of permanent light poles will be a maximum of 40 metres and reduced in height, where possible, to minimise potential light spill while maintaining appropriate safety standards.	Section 2.2 Section 3.1

#### **1.5 Consultation**

This LSP has been prepared in consultation with Liverpool City Council (LCC), DPE and GANSW as outlined in Table 1-6. Supplementary information to support the consultation undertaken is included in Appendix 0A of this subplan, and Appendix 0F of the UDLP document.

#### Table 1-6 Consultation summary.

# **2 LIGHTING DESIGN**

The lighting design is to enable vehicle and pedestrian traffic to move around the MPE Site during periods of low light while providing safety and security.

# **2.1 Site Description**

## 2.1.1 Urban Context

The Project is located approximately 2.5 km south of the Liverpool City Centre, 800 m south of the Moorebank Avenue/M5 Motorway interchange and one kilometre to the east of the Southern Sydney Freight Line providing convenient access to and from the site for rail freight (via a dedicated freight rail line) and for trucks via the Sydney Motorway Network.

A number of residential suburbs are located in proximity to the Project Site including:

- Wattle Grove 360m to the north-east
- Moorebank 1300m to the north
- Casula 820m to the west
- Glenfield 1830m to the south-west.

The majority of land surrounding the Project is owned and operated by the Commonwealth and comprises:

- the MPW Site, formerly the School of Military Engineering, on the western side of Moorebank Avenue directly adjacent to the MPE Site (subject to the MPW Concept Plan Approval)
- the Holsworthy Military Reserve, to the south of the MPE Site on the southern side of the East Hills Rail Corridor, which is owned and operated by Sydney Trains
- residual Commonwealth Land (known as the Boot Land), to the east of the MPE Site between the site boundary and the Wattle Grove residential area.

The area immediately south of the Project, known as the 'Southern Boot Land', includes an existing rail spur within heavily vegetated remnant bushland. The Southern Boot Land to the south of the Project and forming part of the MPE Stage 1 Site includes a range of vegetation, varying from remnant bushland to the north-east of the Sydney Trains East Hills Rail Corridor.

Refer to Figure 1-1 for relationship between the residential properties and the Project Site.

## **2.2 Design Specifications**

Lighting across the MPE Precinct will be standardised and has been designed and installed to ensure compliance with AS 4282-2019 - Control of the obtrusive effects of outdoor lighting and AS/NZS1158.3.1 Lighting for roads and public spaces – Pedestrian area (Category P) lighting – Performance and design requirements, meaning that lighting will be mounted, screened and directed in a manner that does not create a nuisance to surrounding properties, the Boot Land or the public road network. Notwithstanding, the following sections provide further details on the types of lighting in each area of the MPE Precinct.

Section 2.2 of the Signage Subplan (SSP) provides the following design specifications in relation to illumination of signage throughout the MPE Stage 2 Project:

- No general advertising and moving or flashing signs will be used
- Illuminated building signage will not be east or south facing, instead they will face the warehouses themselves
- Internally illuminated signs are not permitted.

Relevant signage drawings for Area 1 (PREC-RCG-AR-DWG-ASK-109), Area 2 (W3W4-NTT-AR-DWG-0101, WHP5-RCG-AR-DWG-UDLP1 and WHP5-RCG-AR-DWG-UDLP2) and Area 3 (MPE2-GNK-LN-DWG-3000) are provided in Appendices 1, 2 and 3 of the SSP which demonstrate signage locations and corresponding proximity to surrounding features and infrastructure on MPE.

Lighting associated with mobile transitory lighting (such as forklifts and vehicles) will generally have fixed downward facing lighting which is generally close to the ground, unlike the elevated pole mounted and warehouse mounted luminaires. For this reason, mobile transitory lighting is considered to have no additional light spill impacts.

## 2.2.1 Area 1

#### 2.2.1.1 Internal Roads / Share paths

Lighting for the internal road of Warehouse 1 will be provided in six different locations, and will be provided in three different locations along the north share path, to allow for 24-hour operations (refer to Appendix 1). The lighting will be provided with the use of solar light towers, which have a luminosity of 20,000 lumens and a beam angle of 40°.

The lighting is designed to reduce light spill and mitigate the visual impact when viewed from the residential areas. The pole positions, luminaire mounting heights, luminaire selection, shielding and luminaire aiming angles have been derived to eliminate any direct light spill from Area 1 (refer to Figure 2-1). Light spill modelling determined the Upward LOR to be between 0% and 3%, which is in accordance with Australian Standard *AS4282-2019 Control of Obtrusive Effects of Outdoor Lighting*.

The solar light towers located at the internal roads and share paths will have a height of around 6.5 m and will provide a consistent spread of lighting throughout Area 1. This is the maximum mast height for the solar light towers, which will provide an even lighting spread across Area 1 and is low enough to not cause any light spill issues.

#### 2.2.1.2 Common and Individual Lighting

Lighting will be located on Warehouse 1 and throughout the warehouse yard (including the carpark). The individual lighting for the warehouse yard will align with work health and safety standards for lighting to ensure safety and security for those accessing Warehouse 1. The lighting will be located at the following:

- access back, driveway and side
- access area front
- awning back and front
- carpark
- hardstand back and front
- landscape area east
- multi-tenant user road
- weighbridge.

The under-awning lights, building mounted flood lights and pole lights will be controlled by a timed clock, set to come off and on at the scheduled times. The security lights will be illuminated for all hours of darkness. The pole heights generally range from 6 m to 12 m and will be limited to 13.5 m to provide consistent lighting throughout Area 1, including the car park. Lights positioned in the warehouse yard will not exceed 13.5 m in height and will be directed downwards, using shielded fittings. The pole lights will have a beam angle of 10° and will consist of LED lights. Pole heights, pole light fittings and building mount fitting tilt angles are referenced on Drawing E002 found in Appendix 1.

The common and individual lighting for Warehouse 1 will consist of various luminaire schedules and the following types of lighting:

- 12 x Nikkon Hawk 300W FN MID BODY
- 27 x Nikkon Lite-Focus Per 150W 130-100 deg
- 12 x Nikkon Zeal T3 130 W r
- 24 x Nikkon Zeal T4 230 W r
- 11 x Nikkon Zeal T3 80 W r

- 3 x Nikkon Zeal T3 230 W r
- 2 x Nikkon Zeal FN 230 W r
- 1 x Nikkon Zeal T4 130 W r.

The light fitting types nominated are also reflected in Drawing E000 found in Appendix 1. The under-awning fitting (C1) for Warehouse 1 is the Phillips Green perform 155W Wide Beam.

## 2.2.2 Area 2, Area 3 and Area 5

#### 2.2.2.1 Internal Roads / Share paths

Appendix 2 (Drawing No. PIWE-ULT-EL-DWG-0102) provides details on the location of lighting on the internal roads and share paths within Area 2. Appendix 3 provides preliminary lighting details for Area 3, including lighting of the internal roads and share paths, with confirmation of tenant requirements to inform further detailed design for Area 3.

The tenanting requirements or detailed lighting design for Area 5 have not yet been confirmed, however lighting within this Area will be consistent with Area 1 and Area 2, and in accordance with the requirements of this sub plan.

Lighting for the multi-user tenant access roads and internal roads will be provided in numerous locations to allow for 24-hour operations. The lighting will be pole mounted with a high efficiency LED luminaire.

The lighting has been designed to reduce direct light spill which mitigates the visual impact when viewed from the residential areas and the Boot Land. This is as a result of appropriate selection and implementation of the pole positions, luminaire mounting heights, luminaire selection, shielding and luminaire aiming angles.

#### 2.2.2.2 Common and Individual Lighting

Lighting will be located on Warehouses 2 to 7 and throughout the warehouse yards, including the carparks. The individual lighting for the warehouse yards will align with work health and safety standards for lighting to ensure safety and security for those accessing warehouses. Lighting will be located in the following areas:

- awnings
- carparks
- fire truck access
- hardstand areas
- pedestrian pathways
- perimeter of Warehouses 2, 3, 4, 6 and 7 east and west.

External lighting within Area 2 will be controlled using a programmable lighting control system which has a timed clock that can turn the lights on and off at scheduled times, a photoelectric sensor and an override switch. The external lighting within the warehouse areas will be mounted at a height ranging from 3 m to 9 m, will be directed downwards and will use specific cut off luminaires which would eliminate upward light spill above the horizontal. The lights will have a tilt of between 0° to 20° and will consist of high efficiency and quality LED luminaires.

Appendix 2 Drawing No. MBP-WH34EX-R05-180719 shows the common and individual lighting for Warehouses 3 and 4 which will comprise various luminaire schedules and the following types of lighting:

- 24 x Nikkon Cervelli S5 FL MP 200W ASY
- 4 x Nikkon Cervelli S5 FL MP 150W ASY
- 3 x Nikkon Cervelli S5 FL MP 300W
- 39 x Nikkon Lite Focus Per 250W 130 100 deg
- 18 x Nikkon Zeal T4 160 W
- 27 x Nikkon Wallpack 30W (ASY)
- 6 x Campaq 30W Type 2

• 6 x Campaq – 100W Type 2.

Although detailed common and individual lighting needs for Warehouse 2, 6 and 7 cannot be confirmed at this stage, they are likely to be consistent with the above and will be in accordance with this sub plan.

Appendix 2 Drawing No. MBP-WH5EX-RO1-311019 shows the common and individual lighting for Warehouse 5 which will comprise various luminaire schedules and the following types of lighting:

- 17 x Nikkon Cervelli S5 FL MP 150W ASY
- 60 x Nikkon Lite Focus Vulcan 150W 60 deg
- 12 x Nikkon Zeal T3 130 W
- 8 x Nikkon Zeal T4 130 W
- 25 x Campaq 100W Type 4
- 3 x Campaq 30W Type 2
- 14 x Nikkon Wallpack 30W (ASY).

#### 2.2.3 Area 4

#### 2.2.3.1 Internal Roads / Share paths

The detailed design and tenanting requirements within the freight village are not yet finalised. However, lighting will be designed to be consistent with other areas of the site and minimise light spill and visual impacts to surrounding areas.

As for Area 1, lighting will be provided in locations along the north share path, to allow for 24-hour operations. The lighting will be designed to reduce light spill and mitigate the visual impact when viewed from residential areas. Pole positions, luminaire mounting heights, luminaire selection, shielding and luminaire aiming angles have been derived to eliminate any direct light spill, as per Area 1 (refer to Figure 2-1).

Any solar light towers located at the internal roads and share paths will provide a consistent spread of lighting, consistent with Area 1.

#### 2.2.3.2 Common and Individual Lighting

Common and individual lighting in Area 4 will be subject to the individual needs of future tenants. As for other Areas of the site, individual lighting will align with work health and safety standards for lighting to ensure safety and security for those accessing the freight village. The lighting will be located at minimum at:

- access points front, back, driveway and side
- awnings back and front
- carparks
- hardstand areas
- landscape areas
- internal roads and shared paths.

The under-awning lights, building mounted flood lights and pole lights will be controlled by a timed clock, set to come off and on at the scheduled times. The security lights will be illuminated for all hours of darkness. The pole heights generally range from 6 m to 12 m and will be limited to 13.5 m to provide consistent lighting throughout Area 4 car park areas.

Types of lighting at this stage cannot be confirmed, however will be consistent with those for other Areas.

## 2.2.4 Area 6

Area 6 is the Moorebank Avenue upgrade area. Lighting along the road and associated shared pathways will be designed in accordance with Transport for NSW (TfNSW) requirements and may be subject to their approval.

#### 2.3 Design Management Measures

#### 2.3.1 Area 1

The lighting will be installed and implemented throughout Area 1 to reduce light spill and mitigate visual impact on the residential properties from the Project Site. The following measures will be implemented:

- Lighting will be positioned to face downwards to eliminate upward light spill
- Lighting will use shielded fittings
- Lighting will be positioned to provide uniform lighting across the Project Site
- Lighting will be installed to avoid over lighting
- Lighting will have photoelectric sensors or be on a timer so lighting will only be on during night hours
- Solar light towers will be comprised of four 50 watt (W) LED lights for each solar light tower, which reduces the energy demand by a factor of 10 for external lighting when using LED lights
- Floodlights will be asymmetric beams or LED lights with fitted hoods to provide even light distribution over the areas intended to be lighted
- Position of lighting and mounting height will be adjusted so as to avoid light being directed towards reflective surfaces
- Filters will be applied to achieve warm white colours on the solar lighting.

# 2.3.2 Area 2, Area 3, Area 4 and Area 5

The lighting will be installed and implemented throughout Areas 2 to 5 to reduce light spill and mitigate visual impact on the residential properties from the Project Site. The following measures will be implemented:

- Lighting will be positioned to face downwards to eliminate upward light spill
- Lighting will use shielded fittings
- Lighting will be positioned to provide uniform lighting across the Project site
- Lighting will be designed and installed to avoid over lighting i.e. the design combines mounting height and shielding to achieve adequate and comprehensive light coverage
- A lighting control system will be implemented with programmable time clocks and a photoelectric sensor so lighting will only be on when required
- Lighting for warehouses/the freight village shall be designed to use high energy efficient LED lights
- Position of lighting and mounting height will be adjusted so as to avoid light being directed towards reflective surfaces
- Main floodlights for warehouses will use asymmetric beams, warm colours will be 4000k, within the industry standard for external lighting at warehouse facilities.

#### 2.3.3 Area 6

Area 6 is the Moorebank Avenue upgrade area. Lighting along the road may be designed in accordance with TfNSW requirements and subject to their approval.

#### 2.4 Light Spill Assessment

In accordance with CoC B141(b), light spill assessments for Areas 1 and 2 have been conducted to demonstrate the light spill associated with the development.

#### 2.4.1 Area 1

#### 2.4.1.1 Internal Roads / Shared Paths

The light spill of the solar light towers was modelled to demonstrate compliance with the relevant standards discussed in Section 3. As the solar lights are located closest to the perimeter of the Project Site and the Area 1 boundary, compliance of the solar light towers with the standards represents compliance for the broader lighting strategy for Area 1. Each solar light tower consists of four 50 W LED lights. The position of solar light towers around Area 1 is shown in Appendix A2.

An isolux plot for the solar light towers is shown in Figure 2-1. The isolux plot shows the following:

- distance of 10 m results in an approximate lux extent of 50
- distance of 20 m results in an approximate lux extent of 13
- distance of 30 m results in an approximate lux extent of 5
- distance of 40 m results in an approximate lux extent of 2
- distance of 50 m results in an approximate lux extent of 1.

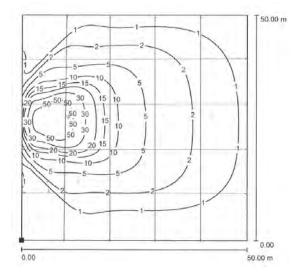

Figure 2-1 Isolux Plot

The solar light towers are the highest intensity lights that have been modelled for Area 1 and show that the lux extent from each solar light tower does not leave the Project Site boundary and is contained within Area 1 (refer to Appendix 1). In addition, the warehouse yard lighting for Warehouse 1 is not anticipated to cause a nuisance to surrounding properties due to landscape screening along the perimeter of Warehouse 1 and Moorebank Avenue, shielding of other site buildings and the orientation of the loading docks in a north-south direction which will limit impacts to Moorebank Avenue to the west and residential areas to the east and west.

As such, the assessment concludes that there will be little to no effect on adjacent properties and the environment through appropriate selection of light source, luminaire make and direction as well as pole positions and height from static site lighting.

#### 2.4.1.2 Common and Individual Lighting

A light spill assessment (refer to Appendix 1) has been conducted for the common and individual lighting associated with Warehouse 1. The light spill assessment, shown as plan view, outlines the overall lighting installation for Warehouse 1 in relation to the Boot Land and residential areas. The light spill simulation does not consider any obstruction in the form of surrounding buildings or trees that may be present. All nearby buildings are industrial and/or commercial in nature and the residential properties are located at a considerable distance away from the development (refer to Appendix 1).

The lighting installation shows light being controlled within the site boundary. As such, considering only the lighting on site, no adverse effect in form of light spill can be seen on Boot Land or residential properties as these areas are completely dark as shown on the light spill assessment (Appendix 1).

The vertical spill light level on residential boundaries is negligible.

#### 2.4.2 Area 2

#### 2.4.2.1 Internal Roads / Shared Paths

The light spill associated with Area 2 pole mounted lighting within shared paths and internal roads has been modelled to demonstrate compliance with the relevant standards discussed in Section 3.

Appendix 2, Drawing No. PIWE-UTL-EL-DWG-0102 shows the positions of the light towers around Area 2, while Drawing No. 1601, shows the lux extent of the lighting design of Area 2.

These drawings show that the light spill from lighting along the multi-tenant user access road will be mitigated through the appropriate design management measures detailed in Section 2.3 thereby minimising nuisance to surrounding residential properties and the Boot Land.

#### 2.4.2.2 Common and Individual Lighting

A light spill assessment has been conducted for the common and individual lighting associated with Warehouses 3 and 4 (Appendix 2 Drawing No. MBP-WH34EX-R05-170220) and Warehouse 5 (Appendix 2 Drawing No. MBP-WH5EX-R01-311019).

The light spill assessments outline the overall lighting installation for Warehouses 3, 4 and 5, but does not consider any obstruction in the form of surrounding buildings or trees that may be present. All nearby buildings are industrial and/or commercial in nature and the residential properties are located at a considerable distance away from the development (refer to Appendix 2).

The light spill assessment shows that light is being contained within the site boundary. As such, considering only the lighting on site, no adverse effect from light spill can be seen on Boot Land or residential properties as these areas are completely dark as shown on the light spill assessments (Appendix 2).

The vertical spill light levels on residential boundaries is negligible.

#### 2.4.3 Area 3, Area 4 and Area 5

The tenanting needs and detailed lighting design for warehouses within Areas 3 and 5 and the freight village (Area 4) are dependent upon tenanting requirements and are not confirmed at this stage. At the development application stage for these Areas, lighting design for internal roads/shared paths and common lighting, shall be consistent with that for Area 1 and Area 2, and this LSP, to mitigate impacts of light spill on surrounding residential properties and the Boot Land.

As discussed earlier, boundary screen planting will further assist in mitigating any adverse impacts from lighting.

# 2.4.4 Area 6

Area 6 is the Moorebank Avenue upgrade area. Lighting along the road may be designed in accordance with TfNSW requirements and subject to their approval. Lighting will be designed to mitigate adverse light spill impacts on surrounding sensitive receivers.

# **3 COMPLIANCE WITH RELEVANT LIGHTING STANDARDS**

#### 3.1 Compliance with AS 4282:2019

AS 4282-2019 – Control of the obtrusive effects of outdoor lighting includes recommended limits for the relevant lighting parameters. Table 2.1 in AS 4282-2019 outlines recommended maximum values of illuminance in vertical plane for commercial areas which equal to 25 lux for pre-curfew hours and 4 lux for curfew hours.

#### 3.1.1 Area 1

The lux extent ( $\geq$ 1 lux) from each solar light tower does not leave the Project Site boundary and is generally contained within Area 1. As such, the potential impact of light spill to residential properties is within the acceptable criteria specified in AS 4282.

The obtrusive light calculations for the warehouse lighting are provided in Appendix 1. The obtrusive light calculations have been demonstrated to comply with AS 4282 requirements for post-curfew requirements for an industrial area, given that the development is operational for 24 hours a day, 7 days a week. These calculations are presented for a general spill light evaluation only. As such, the obtrusive light limits set in AS 4282 apply only to nearby residents in the form of properties such as houses, hotels and hospitals, and additionally to users of nearby roads, with obtrusive light calculations required to be assessed on property boundary of the resident being affected by obtrusive light.

The lighting calculations detailed in the design are in accordance with AS 4282 as stated in Appendix 1.

## 3.1.2 Area 2

Appendix 2 (Drawings No. MBP-WH34EX-R05-180719 and MBP-WH5EX-ROI-311019) provides the obtrusive lighting calculations for Warehouses 3 and 4, and Warehouse 5 respectively.

Whilst the lux extent from some of the pole mounted lights may cause light to leave the Project Site along the multi-tenant user access road adjacent to the boundary of the Project Site, the impact of light spill to residential properties is considered to be within the acceptable criteria specified in AS 4282.

The obtrusive light calculations demonstrate compliance with AS 4282 for post-curfew requirements for an industrial area, given that the development is operational for 24 hours a day, 7 days a week. These calculations are presented for a general spill light evaluation only.

As such, the obtrusive light limits set in AS 4282 apply only to nearby residents in the form of properties such as houses, hotels and hospitals, and additionally to users of nearby roads, with obtrusive light calculations required to be assessed on property boundary of the resident being affected by obtrusive light.

The Warehouse 3, 4 and 5 Design Certificate (Appendix 2) confirms that the lighting calculations detailed in the design are in accordance with AS 4282.

## 3.1.3 Area 3, Area 4 and Area 5

The tenanting needs and detailed lighting design for warehouses within Area 3 and Area 5 and the freight village (Area 4) are not confirmed at this stage. Lighting design for internal roads/shared paths and common lighting shall be consistent with that for Area 1 and Area 2 and this LSP. Lighting design shall be completed in accordance with requirements of AS 4282 to maintain light spill and obtrusive light calculations that are within the acceptable criteria. After finalisation of detailed design, this should be supported with a Design Certificate confirming compliance with AS 4282, as has been provided for earlier stages of development.

Provided the lighting design for these areas is consistent with that for Area 1 and Area 2, and this LSP it is anticipated that lighting will have minimal adverse impacts on surrounding sensitive receivers and will predominately be limited to within the bounds of the site.

#### 3.1.4 Area 6

Area 6 is the Moorebank Avenue upgrade area. Lighting along the road may be designed in accordance with TfNSW requirements and subject to their approval. Lighting will be designed to mitigate adverse light spill impacts on surrounding sensitive receivers.

#### 3.2 Compliance with AS/NZS 1158:2005

#### 3.2.1 Area 1

The solar lighting solution is based on Roads and Maritime Services approved light structures, which are not covered under *AS/NZS 1158:2005 Australian and New Zealand Lighting for roads and public spaces, Part 1.1 Lighting for roads and public spaces – Vehicular traffic (Category V) lighting & Part 3.1: Pedestrian area (Category P) lighting – Performance and design requirements – for roadways and carpark lighting.* 

The external lighting for Warehouse 1 has been designed in accordance with AS 1158.3.1 as stated on the Lighting Drawing for Warehouse 1 (MBP-EXT-R09-230419) in Appendix 1.

#### 3.2.2 Area 2, Area 3, Area 4 and Area 5

The Warehouse 3, 4 and 5 Design Certificate (Appendix 2) confirms that the external lighting for Area 2 (Drawing No. 1601 Rev B) has been designed in accordance with AS1158.3.

The tenanting needs and detailed lighting design for warehouses within Area 3 and Area 5 and the freight village (Area 4) are not confirmed at this stage. At the development application stage for these Areas, lighting design shall be consistent with that for Area 1 and Area 2 and this LSP, and hence will be in accordance with AS 1158.3.

After finalisation of detailed design, this should be supported with a Design Certificate confirming compliance with AS 4282, as has been provided for earlier stages of development.

#### 3.2.3 Area 6

Area 6 is the Moorebank Avenue upgrade area. Lighting along the road may be designed in accordance with TfNSW requirements and subject to their approval. Lighting will be designed to mitigate adverse light spill impacts on surrounding sensitive receivers.

Qube Property Development Management Services Level 27, 45 Clarence Street Sydney NSW 2000

05/02/2021

Dear

#### Moorebank Precinct East Stage 2 (SSD 7628) Urban Design and Landscape Plan

I refer to your submission dated 4 November 2020 requesting approval of the consolidated Urban Design and Landscape Plan (UDLP), Revision 12, dated 18 December 2020, and associated Sub Plans required under condition B140 of SSI 7628. This plan has been staged with the approval of the Planning Secretary under condition A14 and A15 SSD 7628.

I acknowledge your response to the Department's review comments and requests for additional information. I note that these plans:

- have been reviewed by SMITA and no issues have been raised;
- have been prepared in consultation with Liverpool City Council; and
- have been reviewed by the Government Architect NSW.

I understand that the drawings accompanying the consolidated UDLP for the stages known as Areas 3 to 6 are indicative only and are subject to final detailed design. The consolidated UDLP and drawings for Areas 1 and 2 reflect the approved permanent built surface works and landscaping for these areas only.

I note that Liverpool City Council, and Government Architect NSW have been consulted on the indicative designs for Areas 3 to 6, and have provided comment, noting that these plans will need to be updated as the development of the site progresses. Further, I note your commitments to update the UDLP drawings and Sub Plans following detailed design.

Further, the consolidated UDLP and Sub Plans have satisfactorily demonstrated how Ecological Sustainable Development and Stormwater Management requirements have been incorporated into the overall design for MPE Stage 2, meeting the requirements for condition B140 (I) and (n).

I note that the UDLP has detailed how recommendations from the Heritage Interpretation Plan, required under condition B101, will be incorporated into the detailed design of the stage known as Area 4.

As nominee of the Planning Secretary, I approve the following documents under Condition B140 of SSD 7628 subject to you updating and resubmitting the UDLP and Sub-Plans for information with the detailed design for each future stage (Areas 3, 4, 5 and 6):

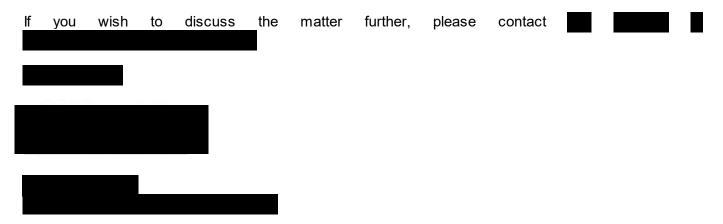

Document	Revision and date
Consolidated Urban Design and Landscape Plan	Rev 12, dated 18 December 2020
Cycling and Pedestrian Access and Facilities Sub Plan	Rev 7, dated 3 November 2020
Landscape Vegetation Management Sub Plan	Rev 8, dated 3 November 2020
Lighting Sub Plan	Rev 8, dated 3 November 2020
Employee Outdoor Meal Break Area Sub Plan	Rev 7, dated 3 November 2020
Signage Sub Plan	Rev 7, dated 3 November 2020

You must resubmit the updated UDLP and Sub-Plans, reflecting detailed design for each future stage, prior to commencement of permanent built surface works and/or landscaping for each stage, or as otherwise agreed by the Planning Secretary. The Department may request that you seek the Planning Secretary's approval of the UDLP and relevant sub-plans following detailed design for each stage if the 'for information' submission does not meet the requirements of the conditions of consent.

Further, I refer to the Planning Secretary nominee's letters dated 24 April 2020 and 4 September 2020 regarding the conditional approval for the MPE Stage 1 UDLP. These letters refer to the requirement for additional compensatory landscaping on MPE Stage 2. I note that the consolidated UDLP for MPE Stage 2 commits to delivering a minimum 14.2% of soft landscaping on the MPE Stage 2 site. When you have confirmed this following detailed design then the conditional approval of the UDLP for MPE Stage 1 will be resolved.

Please note, if there are any inconsistencies between the approved documents and the conditions of consent, then the requirements of the conditions of consent prevail.

Please ensure that the approved plans and drawing are placed on the project website at the earliest convenience.

As nominee of the Planning Secretary

Qube Property Development Management Services Level 27, 45 Clarence Street Sydney NSW 2000

04/09/2020

### Dear

## Moorebank Precinct East – Stage 2 (condition B140, SSI 7628) Urban Design and Landscape Plan

I refer to your submission dated 14 May 2020 requesting approval of the Urban Design and Landscape Plan (UDLP), Rev 9B dated 12 August 2020, and Sub Plans for Area 1 and Area 2 only in accordance with condition B140 of SSI 7628. I also acknowledge your response to the Department's review comments and requests for additional information. I note that these plans have been staged under condition A14 of SSD 7628.

The UDLP for Area 1 and Area 2 and associated Sub Plans have been reviewed and I note that these plans:

- have been reviewed by SIMTA and no issues have been raised
- have been prepared in consultation with Liverpool City Council
- have been reviewed by the Government Architect of NSW.

As nominee of the Planning Secretary, I approve the following documents under condition B140 and B141 for Area 1 and Area 2 only:

Document	Revision
Urban Design and Landscape Plan	Rev 9C, dated 12 August 2020
Landscape and Vegetation Management Sub Plan	Rev 6C, dated 31 July 2020
Lighting Sub Plan	Rev 6C, dated 31 July 2020
Cycling and Pedestrian Access and Facilities Sub Plan	Rev 5C, dated 12 August 2020
Employee Outdoor Meal Break Area Sub Plan	Rev 5C, dated 12 August 2020
Signage Sub Plan	Rev 5C, dated 31 July 2020

Please note that this approval does not extend to condition B140 (e)(vi) for Area 1, as this matter is still outstanding and has been referred to DPIE Compliance for review. I note that Area 2 meets the requirements of condition B140 (e)(vi).

I also note that the approved development layout plan has been amended (Reference: SSS2-RCG-AR-SKC-159, dated 11-08-2020). I approve the amended development layout under condition A22. I remind you that you must seek approval for any future changes made to the development layout of the site under condition A22.

You are also reminded that in my letter dated 24 April 2020, I approved the UDLP for MPE Stage 1 subject to you providing additional compensatory landscaping on MPE Stage 2. You must detail how this will be achieved in future stages of the MPE Stage 2 UDLP.

Further, in the subsequent consolidated UDLP and Sub Plans for the MPE Stage 2 site, you must satisfy all the requirements of condition B140 for the site overall, and must demonstrate that requirements not achieved in Areas 1 and 2 have been achieved overall. A copy of the review table containing outstanding matters will be provided to you for your reference.

Please note, if there are any inconsistencies between the approved documents and the conditions of consent, then the requirements of the conditions of consent prevail.

Please ensure that the approved plan is placed on the project website at the earliest convenience. If you wish to discuss the matter further, please contact

### Yours sincerely

As nominee of the Planning Secretary

Good afternoon

As per my earlier phone call today, I am just checking that you received the following email on Friday in relation to the MPE Stage 2 UDLP. In accordance with DPIE's RFI, responses to DPIE/GANSW comments, and the updated Lighting Subplan, Signage Subplan and Landscape Vegetation Management Subplan for Area 2 were provided to DPIE. Additionally, the documents were uploaded to the DPIE portal on Friday afternoon.

The remainder of the MPE Stage 2 UDLP documentation and responses to DPIE/GANSW comments will be sent through as soon as possible.

Please let me know if you have any trouble accessing the documentation.

Kind regards,

# From:

### B141(b) & (c) – Lighting Sub Plan

- SSD 7628 Mod 2 was approved on 31 January 2020 which included the removal of the requirement for maximum batters if 1V:4H for OSD 9 UDLP for Area 1 Rev 8, dated 11/03/20
- SSD 7628 Mod 1 includes amendment to allow internally illuminated signs

Note: Lighting Plan

- GA didn't comment specifically on Lighting sub-plan (DOC 18/761480) apart from noting that it wasn't provided as part of UDLP (this was their focus)
- Most Dwgs in from A2 onwards are upside down

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
A14	With the approval of the Secretary, the Applicant may submit any strategy, plan or program required by this consent on a staged basis/	Section 1.3	The Lighting Sub Plan (LSP) consists of Warehouse 1 Precinct (W1P) only.	<ul> <li>This LSP has been updated in Section 1.3 to include the different stages associated with this plan. The stages of this plan include:</li> <li>Area 1 – Warehouse 1 including area north of freight village</li> <li>Area 2 – Warehouse 3, 4 and 5</li> <li>Area 3 – Warehouse 6, 7 and 8</li> <li>Area 4 – Freight village</li> <li>Area 6 – Moorebank Avenue Works</li> <li>Section 1.3.2.outlines the following:</li> <li>"Area 1 is the first stage addressed by this LSP and includes Warehouse 1 and the immediate area surrounding Warehouse 1 (excluding the freight village). The detailed plans for future stages of this LSP are anticipated to be provided in multiple submissions as described in Table 1. Each future staged submission will be incremental</li> </ul>	Sec 1.3 and Table 1 updated with details of staging of the LSP, noting that the LSP is staged for Area 1. However, there is no formal request for the Secretary's approval to stage the LSP or the UDLP. 1. OUTSTANDING COMMENT: Approval to stage the LSP in accordance with condition A14, to be noted in the approval for the UDLP and sub-plans under B140.	Table 1-2 (Compliance table) states that the Secretary's approval for staging of this plan will be obtained by DPIE through the approval of this plan and will be noted in the approval for the UDLP and sub-plans under B140. Section 1.3 states that this plan will be delivered in stages in accordance with CoC A14 & A15 to allow for the commencement of warehouse construction. Table 1-1 advises of operation commencement as follows: - Area 1 (WH1 and area north of freight village) in Q2 2019, - Area 2 (WH3, WH4 & WH5) in Q2 2020 and - Areas 3-6 are to be confirmed Section 1.3 discusses staging with this Lighting subplan (LSP) with the current version addressing only Areas 1 & 2 that includes warehouses 1 as well as area north of the freight village as well as warehouses 3, 4 & 5. Areas 3 to 6 that includes warehouses 1, 3, 4 & 5 are to be submitted at a future date and include an update of this plan. Section 1.3.2 states that this plan was prepared and approved by DPIE prior to commencement of	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
				and present the detailed maintenance and monitoring requirements applicable to that stage." Reference to W1P has also been removed throughout the entire document. As outlined in Section 1.3.3, the trigger for updating this LSP will be submitted one month prior to permanent built surface works and/or landscaping of the next stage.		permanent both Area 1 & 2 which allowed the project to commence construction of warehouses in these areas (warehouses 1, 3, 4 & 5) prior to finalisation of the design for the remainder of the project. DPIE Comment: Please update - Table 1-1 to reflect accurate operational commencement dates for Areas 1 & 2. - Section 1.3.2 to reflect the accurate timing of staged submissions and approvals of this plan.	Table 1-1 has been updated accordingly and is based on most recent occupation information available. Section 1.3.2 has been updated to accurately reflect the relationship of stages, timing of submissions and approvals of this plan.
A15	If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage of the development to which the strategy, plan or program applies, the relationship of the stages and the trigger for updating the strategy, plan or program.		The plan is to be staged into Warehouse 1 Precinct, with the LSP – Remainder of the Site will consider the lighting solutions for warehouses in the remainder of the site (including Moorebank Avenue), not previously included in the LSP – W1P. The triggers for updating the LSP are: - Prior to installation of permanent lighting arrangements for the internal roads and sharepaths in W1P, and - Prior to installation of lighting arrangements for the freight village. Further action required The staging and trigger for this plan are not consistent with what is included in the UDLP. Will the staging of lighting be consistent	<ol> <li>See comment above. The staging of this LSP has been updated to be consistent with the UDLP and other UDLP sub-plans.</li> <li>This LSP will be updated following the outcomes of the modification.</li> </ol>	Noted as above that stages have been identified in Section 1.3. Section 1.3.2 describes the relationship of stages, noting that the LSP will be updated with a trigger being prior to commencement of permanent built surface works and/or landscaping for each of the remaining warehouses, freight village and Moorebank Avenue works. 2. OUTSTANDING COMMENT: Approval letter to note that the plan may need updating following outcomes of modification to the lighting design (backlit signage on site provision).	Noted as above that stages have been identified in Section 1.3. Section 1.3.2 describes the relationship of stages, noting that the LSP will be updated with a trigger being prior to commencement of permanent built surface works and/or landscaping for each of the remaining warehouses, freight village and Moorebank Avenue works. It is noted that the current Signage subplan (Rev 005B), Section 2.2 states that Illuminated building signage will not be east or south facing, instead they will face the warehouses themselves, resulting minimal expected light spill. This section also commits to internally illuminated signs not being permitted. It is noted that application for SSD 7628 Mod 1 has been submitted to DPIE, includes proposed amendments to signage in MPE to allow internally illuminated signage and is yet to determined.	

CoC	Requirement	Section Referen	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
		ce	(100 2) aatoa 0100/2010)			(101 0002), aatoa oo maron 2020)	
			with the Warehouse 1, Warehouse 1 + Freight Village (update), Remainder of Site proposed? If not, could the relationship to the overall UDLP staging be explained? Further to discussions held in the regular post approvals meeting on 25/02/2019, this plan may need updating following the outcomes of modification to the lighting design (backlit signage on site provision)			DPIE Comment: Please update this plan to cross reference the Signage subplan (Rev 005B) and relevant sections/drawings including Section 2.2 and Appendix B2 Drawing No. W3W4- NTTAR-DWG-0101)	Section 2.2 has been updated to include reference to illuminated signage, as detailed within the Signage Subplan. Relevant signage drawings for Areas 1 and 2 have also been referenced within Section 2.2.
B140	Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, and <b>Urban</b> <b>Design and Landscape</b> <b>Plan (UDLP)</b> must be prepared. The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The <b>UDLP</b> must be approved by the Secretary in consultation with the NSW Government Architect. The UDLP must present an integrated urban and landscape design for the development, and must include, but not be limited to:  (j) the sub-plans identified in condition B141.	Page ii	The plan has been authored by Shannon Blackmore, and Katrina Nestmann, with checking by Bruce Layzell. It isn't clear what company each author/checker works for, and is assumed to be Arcadis. Bruce Layzell is an experienced lead utilities engineer and has managed the design of electrical services. In the revisions table, the plan has been submitted to Liverpool City Council on the 9/08/2018. Appendix B does not include an evidence of stakeholder consultation with Liverpool City Council (LCC), however the UDLP W1P (Appendix A) includes an email that indicates that the Lighting Sub-Plan was provided to LCC on 14/08/2018. LCC	3. CoC B140(j) has also been added to the compliance matrices in Section 1.4. Section 1.5 has been updated to include the consultation with LCC for the UDLP and UDLP sub plans. Appendix A1 has also been added and includes the evidence of consultation with LCC. The qualifications and experience of the authors, checker and approver are detailed on the cover page. The companies of the authors, checkers and approvers are also detailed on the cover page.	<ul> <li>Table 2 has been updated with a reference to B140(j).</li> <li>Section 1.5 has been updated to include consultation with LCC. Evidence of LCC consultation is provided in Appendix A1 and includes LCC full submission, noting that in regard to the CoC B 141 (b) and (c) LCC has requested additional information that includes:</li> <li>Provide details of how the impact of truck lights on the surrounding area will be mitigated.</li> <li>Provide details and justification for only installing temporary lighting for share paths and roads at this stage.</li> <li>OUTSTANDING COMMENT:</li> <li>Please update the LSP with evidence of consultation with GANSW and include a discussion about the matters</li> </ul>	Table 1-2 (Compliance table) states that this plan (LSP) has been prepared: - as part of the Urban Design and Landscape Plan (UDLP). - by suitably qualified and experienced persons as shown on the cover page. - in consultation with the relevant council(s), as outlined in Section 1.5. It also states that this LSP will also be approved by the Secretary in consultation with the NSW Government Architect. Section 1.5 states that the LSP has been prepared in consultation with Liverpool City Council per the summary table (Table 1-6) with supplementary information contained in Appendix A1 of this LSP and appendix A1 of the UDLP. Table 1-6 notes consultation was closed with: LCC for: - Area 1 on 6 March 2019 and - Area 2 on 1 May 2020	Area 2 documentation has been reviewed by LCC, and LCC comments have been addressed. Consultation with LCC regarding Area 2 is now deemed closed.

			provided comment on the UDLP and Sub-plans but has not indicated any specific concerns with the Lighting Sub-plan. Further action required Update compliance table to include condition B140 (j), and provide a description of consultation undertaken with Liverpool City Council and the NSW Government Architect. (ensuring that the dates recorded are consistent with the actual consultation undertaken as evidenced in the UDLP). Provide a description of who prepared the plan, their qualifications, and the companies they work for in the table at the front of the document.		raised, how they have been addressed and how unresolved matters have been addressed, in accordance with condition A19(c). - Please update the LSP to include the responses to the requested information by LCC as mentioned above.	Government Architect (GANSW) for: - Area 1 on 18 April 2019 and However, Area 2 correspondence is stated as submitted on 5 May 2020 but remains open. Refer Appendix A1 is for Area 1 (WH1) only and comprises: - consultation with GANSW, dated (August 2019), and includes responses to GANSW comments - consultation with LCC (January 2019) includes response to LCC comments. DPIE Comment: Please update Appendix B2 to include consultation with LCC and include a discussion about the matters raised, how they have been addressed and how unresolved matters have been addressed, in accordance with condition A19(c).	Appendix B1 has been updated to include the final Area 2 UDLP comments from Council and how the matters raised by Council were addressed, as well as confirmation that LCC has assessed all conditions in relation to Area 2 and deem the UDLP to be satisfactory
B141( b)	A Lighting Sub Plan to assist in the control of lighting and reduce the visual impact of the 24- hour operational facility when viewed from residents within residential areas within the locality. The Plan must provide an assessment of the location, design specification and impacts of operational lighting associated with the development and measures proposed to	This plan Section 2.1 Section 2.2 Section 2.3	The plan has been prepared to assist in the control of lighting and to reduce the visual impact of the Project site when viewed from residents within residential areas within the locality. Further action required The plan does not adequately provide an assessment of location, as it doesn't demonstrate the options that were proposed, and why the locations in the plan	<ul> <li>4. Other options were not considered as the lighting needs to be designed in accordance with standards and other lighting options would not located a large distance away to make a difference to the light spill assessment.</li> <li>A light spill assessment has been completed for the shared paths of the warehouses (Appendix A2). A light spill assessment has also been completed for the common and individual lighting for Warehouse 1 (Appendix A2). The light spill assessments</li> </ul>	DPIE has reviewed the proponent response and the section 2.4 and notes that Light Spill Assessment has been completed for Internal Roads/Shared Paths and Common and Individual Lighting and the Light Spill Assessments demonstrates show light being controlled within the site boundary. 4. OUTSTANDING COMMENT: Include discussion about the relationship of the stage 1 Plan	Section 1 3 discusses the staging of the plan. It states that it has been staged in accordance with CoCs A14 and A15 to allow for the commencement of warehouse construction. It commits to implementing this plan prior to occupation of Warehouse 1 (WH1) once approved by the Secretary and GANSW within 12 months of the consent. Table 1-1 advises of operation commencement as follows: - Area 1 (WH1 and area north of freight village) in Q2 2019, - Area 2 (WH3, WH4 & WH5) in Q2 2020 and - Areas 3-6 are to be confirmed.	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
	minimise lighting impacts and standardise lighting design within the MPE development. The Plan must be prepared and approved by the Secretary. The Applicant must ensure that the lighting associated with the development:		were selected. Include a discussion in the plan that addresses each aspect of the condition, with consideration for the whole MPE development, and relationship to future stages (consistent with DPE and GA requests during consultation).	demonstrate shows light being controlled within the site boundary. Management measures have been proposed in Section 2.3 to minimise lighting impacts and standardise the lighting design. This LSP will be prepared and approved by DP&E as stated in Section 1.2.	with any future stages of the development (consistent with DPIE and GA), will there be any impact on future stages of the development from current LSP?	Section 1.3.2 states that this plan was approved by DPIE prior to commencement of surface works and landscaping of Areas 1 & 2 in order for the Project to commence construction of warehouses in these areas. It also states that this allowed the Project to commence construction prior to the finalisation of the design for the remainder of the Project and did not restrict or constrain delivery of a compliant final detailed design across the remainder of the MPE Stage 2 Site. Section 1.3.2 also notes that future staged (for Areas 3-6) is yet to be prepared and submitted with trigger for submission of future updates to this Plan one month prior to permanent built surface works and/or landscaping (Section 1.3.3). Section 2.2 states that the lighting has been designed to comply with <i>AS4282-2019</i> and <i>AS/NZS1158.31</i> meaning that lighting will be mounted, screened and directed. Section 2.1 details the context of the site and states that the lighting design enables vehicle and pedestrian movement around the Warehouses 1, 3, 4 and 5 during periods of low light while providing safety and security. Compliance Table 1-2 states that lighting assessment is contained in Sections 2.2-2.4 and Appendices A2 & B2. Assessments include Internal roads/shared paths and common and individual lighting and note that the simulation/modelling is worst case scenario as it doesn't consider obstruction surrounds (trees and buildings).	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
		се				Sections 2.4.1 (Area 1) notes solar lights located closest to property boundary, Boot Land and residential development is considerably distant as shown in Figure 1-1 - which has been omitted. The assessment concludes that there will be little to no effect on adjacent properties and the environment through appropriate selection of light source, luminaire make and direction as well as pole positions and height from static site lighting. Figure 2-1 shows lux levels for solar light towers in an isoplot raning from 50 lux at 10m down to 1 lux at 50m. Appendix A2 drawings details proposed lighting locations and includes MBP-EXT-R14- 310719_VIS) PIWE-ARC-EL-SKC- 0003 Issue 04 – a lighting simulation shows light being controlled within the site boundary with no adverse impacts on the Boot Land or residential properties. Also drawing PIWE-ARC-EL-SKC-0003-04, currently located in Appendix B2 (for Area 2) shows solar lighting tower positions and light spill is located largely within the boundary apart from the eastern most tower with minimal light spill internally into Area 2. Sections 2.4.2 (Area 2) states the light spill assessment shows that light is being contained within the site boundary with no adverse effect from light spill on Boot Land or residential properties as these areas are completely dark as shown on the light spill assessments (Appendix B2). The vertical spill light levels on residential boundaries is negligible.	The error in the document
						DPIE Comment: Please update	compilation as a pdf has been

Table 1-1 has been updated to reflect the most recent occupation information available. Section 1.3.2 has been updated to reflect the most recently available information regarding timing and staged submissions and approvals of this plan. Drawing PIWE-ARC-EL-SKC-0003- 04 has been relocated to Appendix A1.
(i)	complies with the latest version of AS 4282-1997 – Control of the obtrusive effects of outdoor lighting (Standards Australia, 1997)	Section 2.4	Further action required The plan states that it complies with the Standard, however, it doesn't demonstrate how it has complied with the Standard. Provide a description of the requirements and how the plan meets these requirements.	<ul> <li>5. Section 3.1 demonstrates that lighting towers located on the shared paths are in line with AS 4282. AS 4284 outlines the recommended maximum values of illuminance in vertical plane for commercial areas is equal to 25 lux for pre- curfew hours and 4 lux for curfew hours. The lux extent (≥1 lux) from each solar light tower does not leave the Project site boundary and is generally contained within Area 1. As such, the impact of light spill to residential properties are within the acceptable criteria specified in Australian Standard.</li> <li>The lighting calculations for Warehouse 1 have been designed in accordance with AS4282 as stated on the drawing provided in Appendix A2.</li> </ul>	<ul> <li>Section 3.1 and notes that</li> <li>The lux extent (≥1 lux) from each solar light tower does not leave the Project site boundary and is generally contained within Area</li> <li>1. As such, the impact of light spill to residential properties are within the acceptable criteria specified in AS 4282. The obtrusive light calculations for the warehouse lighting are provided in Appendix A2. The lighting calculations detailed in the design are in accordance with AS 4282 as stated in Appendix A2.</li> <li>5. Outstanding Comment</li> <li>DPIE has reviewed the Appendix A2 and notes that Drawing with REF: MBP-EXT-R09-230419 refers to lighting calculations are in accordance with AS 1158.3.1, DPIE request - clarification on the standard that's been used for the lighting calculations.</li> <li>To confirm that the lighting associated with the latest version of AS 4282-</li> </ul>	Section 2.2 states that the lighting has been designed to comply with <i>AS4282-2019</i> and <i>AS/NZS1158.31</i> meaning that lighting will be mounted, screened and directed a manner that does not create a nuisance to surrounding properties, the Boot Land or the public road network. Section 3.1.1 (Area 1) states that lighting calculations detailed in the design are in accordance with AS 4282 as stated in Appendix A2. Section 3.1.2 (Area 2) states that Warehouse 3, 4 and 5 Design Certificate (Appendix B2) confirms that the lighting calculations detailed in the design are in accordance with AS 4282. It is noted that Table 1-2 (Compliance table) states that both warehouses in Areas 1 & 2 are in accordance with the AS specified. Appendix A2 drawings for Area 1 note this compliance and Appendix B2 Design certificate confirms compliance for Area 2. However, the drawings referenced in the certificate do not align with the drawing numbers included in Appendix B2.	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
					1997 – Control of the obtrusive effects of outdoor lighting	Please update: - Appendix B2 to ensure consistency between the drawings and the design certificate.	The drawings as provided by the certifier, in accordance with the Design Certificate for Area 2, have been appended to Appendix B2.
(ii)	is mounted, screened and directed in such a manner that it does not create a nuisance to surrounding properties or the public road network; and	Section 2.3	The plan commits to implementing measures to reduce light spill and mitigate visual impact on the residential properties from W1P, such as positioning and mounting so as to avoid light being directed towards reflective surfaces, avoiding over lighting, eliminating upward light spill, and using shielded fittings. Section 2.4 contains a light spill assessment, which concludes that shielding and the orientation of the loading docks in a north-south direction will limits impacts to Moorebank Avenue. Further action required. To better demonstrate compliance with the condition, clearly describe in the plan how mounting, screening and direction does not create a	6. Drawing MPB-EXT-R03.1- 300718 has been included in Appendix A2 to show the warehouse and carpark lighting. Light spill calculations were also conducted to represent the light impacts along the boundaries from the common and individual lighting (refer to Appendix A2).	6. Outstanding Comment: DPIE has reviewed that Appendix A2 and notes that MPB-EXT-R03.1-300718 is not included. Please update the Appendix A2 to include the relevant drawings and clarify the standard used for the calculations as mentioned above. DPIE has reviewed the Appendix A2 and notes that the drawing -MBP-EXT-R09- 030519-VIS for visual impacts has been included, DPIE recommends updating the drawing indicating the site boundaries and boot land area/sensitive receivers.	OS#6 – Appendix A2 includes - MBP-EXT-R03.1-300718 which provides lux levels, calcs and types of lights and states that calcs are in accordance with AS4282:1997. - MBP-EXT-R09-030519-VIS which provides a lighting simulation for WH1 has not been updated to indicate site boundaries, Boot Land and sensitive receivers. However, Figure 1-1, which had been omitted from this version is referenced as showing this detail. Section 2.2 states that the lighting has been designed to comply with <i>AS4282-2019</i> and <i>AS/NZS1158.31</i> meaning that lighting will be mounted, screened and directed a manner that does not create a nuisance to surrounding properties, the Boot Land or the public road network. Section 2.2.1.2 (Area 1) lists lighting locations and states that lights (awning lights, mounted building flood lights and pole) will be controlled by a timed clock, set to scheduled times on and off times, with security lights illuminated for all hours of darkness. Pole heights	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
		Ce	nuisance to the public road network.			ranging from 6 to 12m and capped at 13.5m including the car park. LED pole lights in the warehouse yard will be directed downwards, using shielded fittings with a beam angle of 10°. Lighting types are listed and luminaire schedules differ. Details are referenced in Appendix A2. Section 2.2.2.2 (Area 2) lists lighting locations and states that control of external lighting will be via a programmable system which with a timed on/off clock, a photoelectric sensor and an override switch. Lighting types are listed together for WHs 3 & 4 and separately for WH5 and luminaire schedules differ. Within the warehouse areas lighting will be mounted at heights of 3 m to 9m, directed downwards and use specific cut off luminaires which would eliminate upward light spill above the horizontal. The high efficiency LED lights will tilt between 0° to 20°. Details are referenced in Appendix B2.	
						DPIE Comment: Please update plan to include Figure 1-1.	The LSP has been amended to include Figure 1-1.
(iii)	is designed to reduce light spill and mitigate the visual impact of the 24- hour facility when viewed from the residential areas in the locality and the Boot Land.	Section 2.2 Section 2.4 Appendi x A	Further action required. The plan doesn't demonstrate how the visual impact of the 24- hour facility is mitigated when viewed from the residential areas in the locality and the Boot Land. Provide analysis and demonstrate why the proposed lighting design will not impact on the Bootland and residential areas. This	<ul> <li>7. The light spill assessment in Appendix A2 demonstrates that the solar tower lights used for share paths will not impact nearby residents. This is discussed further in Section 2.4.1.</li> <li>A light spill assessment has also been completed for the common and individual lighting at Warehouse 1 to demonstrate no adverse effects in form of light spill can be seen on Bootland or</li> </ul>	DPIE has reviewed the section 2.4 and notes that light spill assessments have been conducted for the common and individual lighting associated with Warehouse 1. The lighting installation shows light being controlled within the site boundary. As such, considering only the lighting on site, no adverse effect in form of light spill can be seen on Bootland or residential properties as these areas are completely dark as	OS#7 – Refer response to OS#6 Section 2.2 states that the lighting has been designed to comply with <i>AS4282-2019</i> and <i>AS/NZS1158.31</i> meaning that lighting will be mounted, screened and directed manner that does not create a nuisance to surrounding properties, the Boot Land or the public road network. Section 2.3 discusses a range of design mitigation measures.	

CoC	ection eferen e	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
		could be demonstrated in an aerial map/diagram, or elevation figure (at appropriate scale) that shows the proposed modelling doesn't impact on the surrounding areas outside of the project boundary i.e. Bootland, neighbouring sites, and residential areas.	residential properties (refer to Appendix A2). This is demonstrated by the surrounding areas being dark in the light spill assessment. This is discussed further in Section 2.4.1. In addition, a lighting plan has been included in Appendix A2 to demonstrate locations and types of lighting to be installed on Warehouse 1. The design specifications of the lighting is listed and	shown drawing -MBP-EXT-R09- 030519-VIS (Appendix A2). 7. Outstanding Comment: As mentioned in the comment 6 DPIE recommends updating the drawing indicating the site boundaries and boot land area.	OS#8 –Refer OS#6 Section 2.4 contains light spill assessments for Areas 1 & 2 Appendices A2 (Area 1 and B2 (Area 2) include lighting simulations showing light being controlled within the site boundary and B2 also includes a design certificate for area 2. Section 2.4 also references Figure 1- 1 to show the distant location of residential properties. This figure has been omitted from this plan. It is further noted that Appendix B2 (Area 2) contains drawing PIWE-ARC-EL- SKC-0003-04 which pertains to Area 1 and Warehouse 1 light spillage from solar lighting. Section 4 for Area 1 states that there will be little to no effect on adjacent properties from internal road/shared path lighting and there is negligible light spill on residential boundaries from common individual lighting Section 4 for Area 2 states that design mitigation measures in Section 2.3 will be used which mitigate nuisance to surrounding residential properties and the Boot Land from internal road/share path lighting. This section states that there are no adverse effect from common/individual lighting spill on the Boot Land or residential properties with vertical spill on residential boundaries negligible. Section 3 discusses compliance with the above lighting standards which limit lighting illuminance in the vertical plane in commercial areas to 25 lux (pre-curfew) and 4 lux (curfew hours).	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
B141( c)	The Lighting Sub Plan must identify and provide details of the common and individual lighting throughout the development to reduce light spill and mitigate visual impact on the residential areas in the locality by:		Sections 2.2.1 provides a description of the lighting for the internal roads and sharepaths. Further action required. 1. It is unclear in the plan where consideration for common and individual lighting is described, and how the visual impact of each of these on residential areas will be mitigated. Include the W1P figure indicating where the residential areas, and the individual and common lighting areas are in relation to the site, and how the mitigation measures described in conditions (c) i-viii will be implemented to reduce visual impact.	<ul> <li>8. The common and individual lighting for Warehouse 1 has been included in Section 2.2.1.2.</li> <li>A site location drawing (Figure 1-1) has been added to this LSP to outline where the residential areas are in relation to the project site.</li> <li>The mitigation measures described in (c) i-vii will be implemented to reduce visual impact. This will be done through the types of lighting proposed and installation of the lighting. In accordance with the mitigation measures, the lighting will be directed downwards (but not towards reflective surfaces), have shielded fittings, use asymmetric beams, avoid over lighting and use timers (where applicable).</li> </ul>	DPIE has reviewed the section 2.2.1.2 and notes that common and individual lighting for Warehouse 1 has been included and section 2.4 addresses the light spill assessment for solar light towers and common and individual lighting associated with Warehouse 1. Light spill assessment showed that the lux extent from each solar light tower does not leave the Project site boundary and is contained within Area 1. DPIE has reviewed the section 2.3.1 and notes that mitigation measures described in (c) i-ix will be implemented in Area 1. 8. Outstanding Comment: DPIE has reviewed the Appendix A2 and notes that the drawing -MBP-EXT-R09- 030519-VIS for visual impacts for Area 1 has been included and recommends including drawing showing visual impacts of existing lighting on internal roads and shared paths on relevant sensitive receivers.	DPIE Comment: Please update plan to: - include Figure 1-1 - relocate drawing PIWE-ARC-EL- SKC-0003-04 from Appendix B2 to Appendix A2 as it pertains to WH1. Section 2.2 states that the lighting has been designed to comply with AS4282-2019 and AS/NZS1158.31 meaning that lighting will be mounted, screened and directed a manner that does not create a nuisance to surrounding properties, the Boot Land or the public road network. Lighting details are provided for both Areas ! & 2 in - Section 2.2 (Design Specifications) - Section 2.3 (Design Management Measures) - drawings are provided in Appendices A2 and B2 for both Areas 1 & 2. This includes lighting simulations for Area 1 shown in A2 drawing (REF: EXT-R14-310719- VIS) and Area 2 six shown in B2 drawing (REF: MBP-WH5EX-R01- 311019-REN). Both simulations demonstrate that lighting is maintained within the site but include proposed lighting only and Figure 1-1 referenced in Section 2.4 has been omitted. It is also noted that light spill for the solar towers for WH1 in Area 1 is shown in drawing PIWE-ARC-EL- SKC-0003-04 which is currently located in from Appendix B2 contains drawings for Area 2 DPIE Comment: Please update this LSP to	The LSP has been amended to include Figure 1-1. Drawing PIWE-ARC-EL-SKC-0003- 04 has been relocated to Appendix A1.
						- include Figure 1-1.	-

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
						- relocate drawing PIWE-ARC-EL- SKC-0003-04 from Appendix B2 to Appendix A2 as it pertains to WH1.	Drawing PIWE-ARC-EL-SKC-0003- 04 has been relocated to Appendix A1.
(i)	eliminating upward spill light	Section 2.3	Section 2.3 lists the management measures that will be implemented to reduce light spill and mitigate visual impact on the residential properties from W1P. The plan commits to positioning lighting to face downwards to eliminate upward light spill. See comment 8 above and demonstrate consideration of eliminating upward light spill for common and individual lighting	9. Light spill assessments have been completed for the lighting at in Area 1, and demonstrate no adverse effects in form of light spill can be seen on Bootland or residential properties.	DPIE has reviewed the response and has no further comments.	Sections 2.2.1.2 and 2.2.2.2 state that lighting is: directed downwards with shielded fittings and a beam angle of 10° for Area 1, and directed downwards include high efficiency LED lights tilted between 0° to 20° and use specific cut off luminaires which would eliminate upward light spill above the horizontal. Sections 2.3.1 and 2.3.2 state that both areas 1 & 2 state that lighting will be positioned to face downwards to eliminate upward light spill and shielding used. CLOSED	
(ii)	directing light downwards, not upwards;	Section 2.3	The plan commits to positioning lights facing downwards to prevent horizontal light sill outside of the areas intended to be illuminated. See comment 8 above.	10. Positioning of lights facing downwards will prevent horizontal light spill outside of the areas intended to be illuminated. Refer to Appendix A2 for the light spill assessments, demonstrating no adverse light impacts to the Bootland and surrounding residential areas.	DPIE has reviewed the response and has no further comments.	Sections 2.2.1.2 and 2.2.2.2, 2.3.1. & 2.3.2 state that lighting is directed downward in both Areas 1 & 2. CLOSED	
(iii)	using shielded fittings;	Section 2.3	The lights will be shielded to prevent light above the horizontal plane. See comment 8 above.	11. The lights will be shielded to prevent light above the horizontal plane. The fittings selected have controlled optics with downward throw and zero up lighting.	DPIE has reviewed the response and has no further comments.	Sections 2.2.1.2 and 2.2.2.2 state that lighting is: - shielded in Area 1 and - Area 2 uses specific cut off luminaires which would eliminate upward light spill above the horizontal. Sections 2.3.1 & 2.3.2 state that lighting will use shielded fittings CLOSED.	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
(iv)	avoiding 'over' lighting;	Section 2.3	The plan commits to a design that combines positioning, mounting height and shielding to achieve adequate and comprehensive light coverage zones to suit the functional requirements of the area. See comment 8 above.	<ul> <li>12. A design combination of positioning, mounting height and shielding combining to achieve adequate and comprehensive light coverage zones to suit the functional requirements of the area will be implemented.</li> <li>In addition, refer to Appendix A2 for the light spill assessments, demonstrating over lighting has been avoided.</li> </ul>	Please refer to response in comment 6	Table 1-2 (Compliance table) states that a design combination of positioning, mounting height and shielding achieves adequate and comprehensive light coverage in zones to suit the functional requirements of the area. Sections 2.3.1 (Area 1) and 2.3.2 (Area 2) include the design management measure that lighting will be installed to avoid over lighting. CLOSED.	
(v)	switching lights off when not required;	Section 2.2 Section 2.3	Lighting will have photoelectric sensors or be on a timer so that lighting is only on when required.	Noted.	DPIE has reviewed the response and has no further comments.	Table 1-2 (Compliance table) states that lighting will have photoelectric sensors or be on a timer so lighting is only on when required. Section 2.3.1 (Area 1) states that lighting will have photoelectric sensors or be on a timer so lighting will only be on during night hours. Section 2.3.2 (Area 2) states that the lighting control system includes programmable time clocks and a photoelectric sensor so lighting will only be on when required. CLOSED.	
(vi)	using energy efficient bulbs	Section 2.3	LEDs will be used for the solar tower lights and warehouse yard lights. See comment 8 above, and in addition, are there other types of lighting being used on site? What proportion of the lighting will be energy efficient?	13. LED lights will be used throughout the Project site. LED lights are identified as energy efficient lights.	DPIE has reviewed the response and has no further comments.	Section 2.3.1 (Area 1) states that solar light towers will be comprised of four 50 watt (W) LED lights, which reduces the energy demand by a factor of 10 for external lighting Section 2.3.2 (Area 2) states that WHs 3, 4 and 5 lighting has been designed to use high energy efficient LED lights. CLOSED.	

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
(vii)	using asymmetric beams, where floodlights are used;	Section 2.3	DPE notes that floodlights will be asymmetric beams or LED lights with shields to provide even light distribution over the areas intended to be lighted. See comment 8 above.	14. Lighting installed at the Project site will be equipped with asymmetric beams or LED lights with shields to provide even light distribution over the areas intended to be lighted.	DPIE has reviewed the response and has no further comments	<ul> <li>Table 1-2 (Compliance table) states that floodlights in both Areas 1 &amp; 2 will be asymmetric beams or Area 1 may also use LED lights with shields.</li> <li>Sections 2.3.1 (Area 1) includes a design management measure that floodlights will be asymmetric beams or LED lights with fitted hoods to provide even light distribution over the areas intended to be lighted lighting will be installed to avoid over lighting.</li> <li>2.3.2 (Area 2) include the design management measure that main floodlights for WHs 3, 4 and 5 will use asymmetric beams, warm colours will be 4000k, within the industry standard for external lighting at warehouse facilities. CLOSED</li> </ul>	
(viii)	(ix) ensuring lights are not directed towards reflective surfaces; and	Section 2.3	DPE notes the position of the lighting and mounting height will be adjusted so as to avoid light being directed towards reflective surfaces. See comment 8 above.	15. The lights will be directed downwards and not towards any reflective surfaces. Refer to Appendix A2 for the locations of the lighting at Warehouse 1 and the shared pathways.	Please refer to response in comment 6	Table 1-2 (Compliance table) states that the position of the lighting and the mounting in both Areas 1 & 2 will be adjusted to avoid light being directed towards reflective surfaces. Section 2.3.1 (Area 1) contains a specific design management measure that states the lighting position and mounting height will be adjusted so as to avoid light being directed towards reflective surfaces. However, Section 2.3.2 (Area 2) doesn't address this requirement. DPIE Comment: Please update Section 2.3.2 (Area 2) to include design measure that addresses this requirement.	Section 2.3.2 has been revised to include this design requirement, that the lighting position and mounting height will be adjusted so as to avoid light being directed towards reflective surfaces in Area 2.

CoC	Requirement	Section Referen ce	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response	DPIE Comment (Rev 003, dated 15 March 2019)	DPIE Comment (Rev 006B, dated 08 March 2020)	Proponent Response July 2020.
(x)	(xi) using warm white colours	Section 2.3	DPE notes that lighting will be fitted with filters to achieve warm white colours. See comment 8 above.	<ul> <li>16. Lighting installed at the Project site will be equipped with filters to achieve warm white colours.</li> <li>For the warehouse lighting, 5000k fittings will be used which are the most efficient lighting for external purposes, and considered warmer in colour than 6000k lighting.</li> </ul>	DPIE has reviewed the response and has no further comments	Table 1-2 (Compliance table) states that states that warm white will be achieved in: - Area 1 by fitting solar towers with filters and - both Areas 1 & 2 by providing warehouse lighting fittings of 5000 Kelvins (k) and 4000k, which is considered warmer in colour than less than 6000k fittings. Section 2.3.1 (Area 1) contains a specific design management measure that states that warm white colours will be achieved by applying filters. Section 2.3.2 (Area 2) includes design measure that states that main floodlights for Warehouses 3, 4 and 5 will be 4000k warm colours. CLOSED.	
	The approved plan must be implemented prior to occupation of the warehouse and freight village.	Section 1.2	The approved plan will be implemented prior to occupation of Warehouse 1. Satisfactory.	Noted.	DPIE has reviewed the response and has no further comments	CLOSED.	
	FCCM 8 Light for the Amended Proposal would be designed to minimise any direct light spill and would comply with the requirements of Australian Standard AS4282-1997 – Control of the Obtrusive Effects of Outdoor Lighting.	Section 2.5.1	DPE notes limited information in the plan demonstrating compliance with AS 4282:1997. Please provide the requirements for AS4282-1997 and demonstrate how the lighting design meets these requirements.	17. Section 3.1.1 demonstrates how the lights for the shared paths in Area 1 and the common and individual light for Warehouse 1 are in compliance with AS 4282.	Please refer to response in comment 5 and 6	Section 2.2 states that the lighting has been designed to comply with <i>AS4282-2019</i> and <i>AS/NZS1158.31</i> meaning that lighting will be mounted, screened and directed. Appendix A2 drawings for Area 1 note this compliance in MBP-EXT- R14-310719. Appendix B2 for Area 2 includes design certification dated 26 February 2020 (CLevel Design and Engineering) for Warehouses 3, 4 & 5 (in Area 2) and states that the external lighting has been designed to accord with <i>AS4282-1997</i> . However, the drawings referenced in

						the C-Level Design Certificate, dated 26 February 2020, do not align with the drawing numbers included in Appendix B2. DPIE Comments: Please clarify alignment of the drawings in Appendix B2 with the C-Level Design Certification dated 26 February 2020.	The drawings as provided by the certifier, in accordance with the Design Certificate for Area 2, have been appended to Appendix B2.

Qube Property Management Services Level 25, 45 Clarence Street SYDNEY, NSW, 2000

### 05/06/2020

Dear

## Approval of Urban Design and Landscape Plan – Moorebank Logistics Park East (SSD 7628)

I refer to your correspondence requesting the Planning Secretary's approval for the staged Urban Design and Landscape Plan (UDLP) for Area 1 only under condition B140 of SSD 7628. This plan has been staged with the approval of the Planning Secretary in accordance with the requirements of conditions A14 and A15.

The UDLP for Area 1 has been carefully reviewed and I note that the plan:

- has been reviewed by SIMTA and no issues have been raised
- has been prepared in consultation with Liverpool City Council
- has been reviewed by the Government Architect of NSW.

As nominee of the Planning Secretary, I approve the UDLP for Area 1 (Revision 8, dated 11 March 2020) only pursuant to condition B140, <u>excluding condition B140 (e)(vi)</u>.

I also approve the amended development layout plan (Reference: SSS2-RCG-AR-SKC-161A), including the amended layout of OSD 9 pursuant to condition A22 of SSD 7628.

I note that the landscaping for the as-constructed car park within Area 1 does not satisfy the requirements of condition B140(e)(iv) and has therefore not been approved. This matter has been referred to the Department's Compliance team for review.

I note that Area 1 does not achieve all the minimum landscaping requirements of condition B140. However, I note your commitment that future stages will achieve the minimum landscaping requirements of condition B140 for the MPE Stage 2 overall. You are also reminded that in my letter dated 24 April 2020, I approved the changes to the UDLP for MPE Stage 1 subject to you providing additional compensatory landscaping on MPE Stage 2. You must detail how this will be achieved in future stages of the MPE Stage 2 UDLP.

You are reminded that If there is any inconsistency between the approved documents and the conditions of consent, then the requirements of the conditions of consent will prevail.

If you require any further information please contact

Yours sincerely

As nominee of the Planning Secretary

#### DPE review comments - Condition B141 (b),(c) UDLP Lighting Sub Plan, Rev 3 dated 15/05/2019

Condition No.	Section Reference	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response
A14 With the approval of the Secretary, the Applicant may submit any strategy, plan or program required by this consent on a staged basis/	Section 1.3	The Lighting Sub Plan (LSP) consists of Warehouse 1 Precinct (W1P) only.	This LSP has been updated in Section 1.3 to include the different stages associated with this plan. The stages of this plan include:
			<ul> <li>Area 1 – Warehouse 1 including area north of freight village</li> </ul>
			• Area 2 – Warehouse 3, 4 and 5
			• Area 3 – Warehouse 6, 7 and 8
			Area 4 – Freight village
			Area 5 – Warehouse 2
			<ul> <li>Area 6 – Moorebank Avenue Works</li> </ul>
			Section 1.3.2.outlines the following:
			"Area 1 is the first stage addressed by this LSP and includes Warehouse 1 and the immediate area surrounding Warehouse 1 (excluding the freight village). The detailed plans for future stages of this LSP are anticipated to be provided in multiple submissions as described in Table 1. Each future staged submission will be incremental and present the detailed maintenance and monitoring requirements applicable to that stage."
			Reference to W1P has also been removed throughout the entire document.
			As outlined in Section 1.3.3, the trigger for updating this LSP will be submitted one month prior to permanent built surface works and/or landscaping of the next stage.
A15 If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or	Section 1.3	The plan is to be staged into Warehouse 1 Precinct, with the LSP – Remainder of the Site will consider the lighting solutions for warehouses in the remainder of the site	1. See comment above. The staging of this LSP has been updated to be consistent with the UDLP and other UDLP sub-plans.
program must clearly describe the specific stage of the development to which the strategy, plan or program applies, the relationship of the stage to any future stages and the trigger for updating the strategy, plan or program.		<ul> <li>(including Moorebank Avenue), not previously included in the LSP – W1P.</li> <li>The triggers for updating the LSP are: <ul> <li>Prior to installation of permanent lighting arrangements for the internal roads and sharepaths in W1P, and</li> <li>Prior to installation of lighting arrangements for the freight village.</li> </ul> </li> <li>Further action required <ul> <li>The staging and trigger for this plan are not consistent with what is included in the UDLP. Will the staging of lighting be consistent with the Warehouse 1, Warehouse 1 + Freight Village</li> </ul> </li> </ul>	2. This LSP will be updated following the outcomes of the modification.

Condition No.	Section Reference	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response
		<ul> <li>(update), Remainder of Site proposed? If not, could the relationship to the overall UDLP staging be explained?</li> <li>2. Further to discussions held in the regular post approvals meeting on 25/02/2019, this plan may need updating following the outcomes of modification to the lighting design (backlit signage on site provision)</li> </ul>	
<b>B140</b> Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, and <b>Urban Design and</b> <b>Landscape Plan (UDLP)</b> must be prepared. The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The <b>UDLP</b> must be approved by the Secretary in consultation with the NSW Government Architect. The UDLP must present an integrated urban and landscape design for the development, and must include, but not be limited to:  (j) the sub-plans identified in condition B141.	Page ii	The plan has been authored by L. It isn't clear what company each author/checker works for, and is assumed to be Arcadis. In the revisions table, the plan has been submitted to Liverpool City Council on the 9/08/2018. Appendix B does not include an evidence of stakeholder consultation with Liverpool City Council (LCC), however the UDLP W1P (Appendix A) includes an email that indicates that the Lighting Sub-Plan was provided to LCC on 14/08/2018. LCC provided comment on the UDLP and Sub-plans but has not indicated any specific concerns with the Lighting Sub-plan. Further action required 3. Update compliance table to include condition B140 (j), and provide a description of consultation undertaken with Liverpool City Council and the NSW Government Architect. (ensuring that the dates recorded are consistent with the actual consultation undertaken as evidenced in the UDLP). Provide a description of who prepared the plan, their qualifications, and the companies they work for in the table at the front of the document.	<ul> <li>3. CoC B140(j) has also been added to the compliance matrices in Section 1.4.</li> <li>Section 1.5 has been updated to include the consultation with LCC for the UDLP and UDLP sub plans. Appendix A1 has also been added and includes the evidence of consultation with LCC.</li> <li>The qualifications and experience of the authors, checker and approver are detailed on the cover page. The companies of the authors, checkers and approvers are also detailed on the cover page.</li> </ul>
<b>B141 (b)</b> A Lighting Sub Plan to assist in the control of lighting and reduce the visual impact of the 24- hour operational facility when viewed from residents within residential areas within the locality. The Plan must provide an assessment of the location, design specification and impacts of operational lighting associated with the development and measures proposed to minimise lighting impacts and standardise lighting design within the MPE development. The Plan must be prepared and approved by the Secretary. The Applicant must ensure that the lighting associated with the development:	This plan Section 2.1 Section 2.2 Section 2.3	<ul> <li>The plan has been prepared to assist in the control of lighting and to reduce the visual impact of the Project site when viewed from residents within residential areas within the locality.</li> <li>Further action required</li> <li>4. The plan does not adequately provide an assessment of location, as it doesn't demonstrate the options that were proposed, and why the locations in the plan were selected. Include a discussion in the plan that addresses each aspect of the condition, with consideration for the whole MPE development, and relationship to future stages (consistent with DPE and GA requests during consultation).</li> </ul>	<ul> <li>4. Other options were not considered as the lighting needs to be designed in accordance with standards and other lighting options would not located a large distance away to make a difference to the light spill assessment.</li> <li>A light spill assessment has been completed for the shared paths of the warehouses (Appendix A2). A light spill assessment has also been completed for the common and individual lighting for Warehouse 1 (Appendix A2). The light spill assessments demonstrate shows light being controlled within the site boundary.</li> <li>Management measures have been proposed in Section 2.3 to minimise lighting impacts and standardise the lighting design.</li> </ul>

Conditio	on No.	Section Reference	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response
				This LSP will be prepared and approved by DP&E as stated in Section 1.2.
(i)	complies with the latest version of AS 4282-1997 – Control of the obtrusive effects of outdoor lighting (Standards Australia, 1997)	Section 2.4	<ul> <li>Further action required</li> <li>5. The plan states that it complies with the Standard, however, it doesn't demonstrate how it has complied with the Standard. Provide a description of the requirements and how the plan meets these requirements.</li> </ul>	<ul> <li>5. Section 3.1 demonstrates that lighting towers located on the shared paths are in line with AS 4282. AS 4284 outlines the recommended maximum values of illuminance in vertical plane for commercial areas is equal to 25 lux for pre-curfew hours and 4 lux for curfew hours. The lux extent (≥1 lux) from each solar light tower does not leave the Project site boundary and is generally contained within Area 1. As such, the impact of light spill to residential properties are within the acceptable criteria specified in Australian Standard.</li> <li>The lighting calculations for Warehouse 1 have been designed in accordance with AS4282 as stated on the drawing provided in Appendix A2.</li> </ul>
(ii)	is mounted, screened and directed in such a manner that it does not create a nuisance to surrounding properties or the public road network; and	Section 2.3	<ul> <li>The plan commits to implementing measures to reduce light spill and mitigate visual impact on the residential properties from W1P, such as positioning and mounting so as to avoid light being directed towards reflective surfaces, avoiding over lighting, eliminating upward light spill, and using shielded fittings.</li> <li>Section 2.4 contains a light spill assessment, which concludes that shielding and the orientation of the loading docks in a north-south direction will limits impacts to Moorebank Avenue.</li> <li>Further action required.</li> <li>6. To better demonstrate compliance with the condition, clearly describe in the plan how mounting, screening and direction does not create a nuisance to the public road network.</li> </ul>	6. Drawing MPB-EXT-R03.1-300718 has been included in Appendix A2 to show the warehouse and carpark lighting. Light spill calculations were also conducted to represent the light impacts along the boundaries from the common and individual lighting (refer to Appendix A2).
(iii)	is designed to reduce light spill and mitigate the visual impact of the 24-hour facility when viewed from the residential areas in the locality and the Boot Land.	Section 2.2 Section 2.4 Appendix A	<ul> <li>Further action required.</li> <li>7. The plan doesn't demonstrate how the visual impact of the 24-hour facility is mitigated when viewed from the residential areas in the locality and the Boo Land. Provide analysis and demonstrate why the proposed lighting design will not impact on the Bootland and residential areas. This could be demonstrated in an aerial map/diagram, or elevation figure (at appropriate scale) that shows the proposed modelling doesn't impact on the surrounding areas outside of the project boundary i.e. Bootland, neighbouring sites, and residential areas.</li> </ul>	<ul> <li>7. The light spill assessment in Appendix A2 demonstrates that the solar tower lights used for share paths will not impact nearby residents. This is discussed further in Section 2.4.1.</li> <li>A light spill assessment has also been completed for the common and individual lighting at Warehouse 1 to demonstrate no adverse effects in form of light spill can be seen on Bootland or residential properties (refer to Appendix A2). This is demonstrated by the surrounding areas being dark in the light spill assessment. This is discussed further in Section 2.4.1.</li> <li>In addition, a lighting plan has been included in Appendix A2 to demonstrate locations and types of lighting to be</li> </ul>

Condition No.	Section Reference	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response
			installed on Warehouse 1. The design specifications of the lighting is listed and
(c) The Lighting Sub Plan must identify and provide details of the common and individual lighting throughout the development to reduce light spill and mitigate visual impact on the residential areas in the locality by:	Section 2.	<ul> <li>Sections 2.2.1 provides a description of the lighting for the internal roads and sharepaths.</li> <li>Further action required.</li> <li>8. It is unclear in the plan where consideration for common and individual lighting is described, and how the visual impact of each of these on residential areas will be mitigated. Include the W1P figure indicating where the residential areas, and the individual and common lighting areas are in relation to the site, and how the mitigation measures described in conditions (c) i-viii will be implemented to reduce visual impact.</li> </ul>	<ul> <li>8. The common and individual lighting for Warehouse 1 has been included in Section 2.2.1.2.</li> <li>A site location drawing (Figure 1-1) has been added to this LSP to outline where the residential areas are in relation to the project site.</li> <li>The mitigation measures described in (c) i-vii will be implemented to reduce visual impact. This will be done through the types of lighting proposed and installation of the lighting. In accordance with the mitigation measures, the lighting will be directed downwards (but not towards reflective surfaces), have shielded fittings, use asymmetric beams, avoid over lighting and use timers (where applicable).</li> </ul>
(i) eliminating upward spill light	Section 2.3	<ul> <li>Section 2.3 lists the management measures that will be implemented to reduce light spill and mitigate visual impact on the residential properties from W1P.</li> <li>The plan commits to positioning lighting to face downwards to eliminate upward light spill.</li> <li>9. See comment 8 above and demonstrate consideration of eliminating upward light spill for common and individual lighting</li> </ul>	9. Light spill assessments have been completed for the lighting at in Area 1, and demonstrate no adverse effects in form of light spill can be seen on Bootland or residential properties.
(ii) directing light downwards, not upwards;	Section 2.3	The plan commits to positioning lights facing downwards to prevent horizontal light sill outside of the areas intended to be illuminated. <b>10. See comment 8 above.</b>	10. Positioning of lights facing downwards will prevent horizontal light spill outside of the areas intended to be illuminated. Refer to Appendix A2 for the light spill assessments, demonstrating no adverse light impacts to the Bootland and surrounding residential areas.
(iii) using shielded fittings;	Section 2.3	The lights will be shielded to prevent light above the horizontal plane. 11. See comment 8 above.	11. The lights will be shielded to prevent light above the horizontal plane. The fittings selected have controlled optics with downward throw and zero up lighting.
(iv) avoiding 'over' lighting;	Section 2.3	<ul> <li>The plan commits to a design that combines positioning, mounting height and shielding to achieve adequate and comprehensive light coverage zones to suit the functional requirements of the area.</li> <li>12. See comment 8 above.</li> </ul>	<ul> <li>12. A design combination of positioning, mounting height and shielding combining to achieve adequate and comprehensive light coverage zones to suit the functional requirements of the area will be implemented.</li> <li>In addition, refer to Appendix A2 for the light spill assessments, demonstrating over lighting has been avoided.</li> </ul>

Condition No.	Section Reference	DPE Comment (Rev 2, dated 9/08/2018)	Proponent Response
(v) switching lights off when not required;	Section 2.2 Section 2.3	Lighting will have photoelectric sensors or be on a timer so that lighting is only on when required.	Noted.
(vi) using energy efficient bulbs	Section 2.3	<ul> <li>LEDs will be used for the solar tower lights and warehouse yard lights.</li> <li>13. See comment 8 above, and in addition, are there other types of lighting being used on site? What proportion of the lighting will be energy efficient?</li> </ul>	13. LED lights will be used throughout the Project site. LED lights are identified as energy efficient lights.
(vii) using asymmetric beams, where floodlights are used;	Section 2.3	DPE notes that floodlights will be asymmetric beams or LED lights with shields to provide even light distribution over the areas intended to be lighted. <b>14. See comment 8 above.</b>	14. Lighting installed at the Project site will be equipped with asymmetric beams or LED lights with shields to provide even light distribution over the areas intended to be lighted.
(viii)ensuring lights are not directed towards reflective surfaces; and	Section 2.3	DPE notes the position of the lighting and mounting height will be adjusted so as to avoid light being directed towards reflective surfaces. <b>15. See comment 8 above.</b>	15. The lights will be directed downwards and not towards any reflective surfaces. Refer to Appendix A2 for the locations of the lighting at Warehouse 1 and the shared pathways.
(ix) using warm white colours	Section 2.3	DPE notes that lighting will be fitted with filters to achieve warm white colours. <b>16. See comment 8 above.</b>	<ul><li>16. Lighting installed at the Project site will be equipped with filters to achieve warm white colours.</li><li>For the warehouse lighting, 5000k fittings will be used which are the most efficient lighting for external purposes, and considered warmer in colour than 6000k lighting.</li></ul>
The approved plan must be implemented prior to occupation of the warehouse and freight village.	Section 1.2	The approved plan will be implemented prior to occupation of Warehouse 1. Satisfactory.	Noted.
FCCM 8 Light for the Amended Proposal would be designed to minimise any direct light spill and would comply with the requirements of <i>Australian Standard</i> <i>AS4282-1997 – Control of the Obtrusive Effects of</i> <i>Outdoor Lighting.</i>	Section 2.5.1	<ul> <li>DPE notes limited information in the plan demonstrating compliance with AS 4282:1997.</li> <li>17. Please provide the requirements for AS4282-1997 and demonstrate how the lighting design meets these requirements.</li> </ul>	17. Section 3.1.1 demonstrates how the lights for the shared paths in Area 1 and the common and individual light for Warehouse 1 are in compliance with AS 4282.

# **UDLP – W1P CONSULTATION WITH LCC 3 OCTOBER 2018**

LCC Comment	Response	Updated Response with Current
The UDLP states it has been staged in accordance the CoC A14 and A15 to allow commencement of WP1 which includes construction and operation of Warehouse 1. However, no consideration is given to the freight village in the UDLP analysis. The freight village is co-located with	As stated in Section 1.4, the UDLP – W1P will be updated at a later stage with information regarding the freight village. Presently, the UDLP – W1P only includes information regarding Warehouse 1. It is important to note, that permanent built works for the freight village will not occur before approval by DP&E of the UDLP – W1P including the freight village.	Since the initial submission of the UDL incorporating the entire precinct and free layout and landscape plan of the freigh Drawings and figures are also in the pr
Warehouse 1 within WP1. The documents provided and the discussions therein are limited to deliberation for Warehouse 1.		by LCC, Government Architect, and De additional detail within W1P where ava All other information will be updated at the UDLP.
The UDLP should present an integrated urban and landscape design for all development within WP1, but should also include consideration for the larger precinct with respect to design and built form. LCC has not been	The UDLP – W1P is only applicable to the W1P and does not consider the larger precinct. As such, the UDLP – Remainder of Site will address the urban design and landscape plans for the Project, not previously stated in the UDLP – W1P.	The Moorebank Precinct East Stage 2 integrated landscape design for the lar
provided the revised site plan or layout for Stage 2, and therefore is not able to ascertain the full scope of the overall project, including the proposed actions for mitigating impacts (cumulatively) of the development.	The UDLP – Remainder of Site will include information on the integration of W1P with the remainder of site. However, Section 1.4 details the staging of the document, details of when the UDLP – W1P will be updated and the relationship to future stages i.e. the Remainder of Site.	
	Please also note that the design, objectives, and principals for the Remainder of Site will be consistent with that presented in the UDLP – W1P.	
There is insufficient information presented in the UDLP with regard to how the CoC A22, A23, and A24 are being met, as they relate the requirements under B140(k)(i)(ii). The documents provided do not	Section 6 outlines the recommendations from the UDLP – W1P that are to be incorporated into the final development layout plans, architectural plans, WSUD elements as required by CoC B140(k).	No change.
afford a comprehensive picture of the urban and architectural form for the overall development under Stage 2.	Please note that the WSUD plans are incorporated into the Stormwater Management Plan which have been provided to LCC previously, these are also available on the project website www.simta.com.au	
It is apparent from the limited site plans within the UDLP that the layout for the Stage 2 development has not sufficiently considered the placement of the warehouses and circulation of vehicular traffic within the	This UDLP – W1P only includes W1P which is located in the northwest corner, and not along the eastern boundary of the Project site. The UDLP – Remainder of Site will include the development along the eastern boundary, and will consider the placement of the warehouses	Drawings and figures are in the proces of Planning and Environment and GAN through the entire site.
larger precinct, and specifically on the eastern boundary which is closest to the established residential areas in Wattle Grove.	and circulation of vehicular traffic for the remainder of site. The UDLP – Remainder of the Site will also include information relating to the integration of W1P with the remainder of site.	Additional detail will be presented in th
The layout of the warehouses and arrangement of the roads within the precinct, as illustrated, would result in a poor design outcome and is likely to impact the nearby residences.	village and Warehouse 1 do not open up towards the nearby residences. Visual impacts associated with W1P are detailed within Section 3 and Section 4 of the plan. In particular, v	The Moorebank Precinct East Stage 2 layout of the freight village and wareho warehouses do not open up towards th include landscaping and tree canopies
The placement of warehousing should be on the perimeter of the site, but with an adequate buffer, including landscaping, tree canopy, and	Landscape Drawings.	Drawings for the Visual Impact Assess
appropriate screening to mitigate any impacts on nearby residences. Primary access should be contained internally and within the innermost areas of the site, so that the individual buildings (and accompanying uses) do not open up towards and impact the nearby residences.	The site layout has been developed in accordance with Condition of Consent B140 of SSD 7628.	detailed design of the current layout of
Condition A15 requires that if a plan describes a particular stage of the development, then that plan needs to clearly describe its relationship with any future stages and the triggers for updating that plan. Documents	Reference to Section 1.3.3 has been changed to Section 1.4.3. The UDLP – W1P will be updated with the urban design and landscape plans for the freight village, prior to commencement of permanent built surface works.	No change.
submitted indicate WP1 includes Warehouse 1 and the freight village. Reference is made to section 1.3.3 in the UDLP (p.4) but this is	Section 1.4.2 updated to state:	
somewhat unclear as to how it relates to the future update to UDLP - WP1 (and the considerations for the freight village). Reference is also made UDLP - Remainder of the Site, but the discussion lacks substance with regard to the future staging and considerations for the UDLP.	The UDLP – Remainder of the Site will be the second stage and will incorporate urban design and landscape plans for the remainder of site consistent with the design, principals and objectives outlined within this document.	
	The UDLP – Remainder of Site will be submitted to LCC for consultation.	
LLC requests an independent peer review of UDLP, that the matter be referred to Secretary, or the delegate, in consultation with the NSW Government Architect, to determine whether the materials within are in compliance with the CoC. Limiting the scope the UDLP to considerations for Warehouse 1 to identify how urban design and landscape design	Consultation with the NSW Government Architect is currently being undertaken for this UDLP – W1P and the sub-plans and is being managed by the Department of Planning and Environment.	Consultation has been undertaken with drawings (as discussed in the above co provided to GANSW.

<ul> <li>water sensitive urban design principles, be generally in accordance with relevant Council policies, plans and specifications, and address condition B40, to ensure that:</li> <li>(a) the stormwater drainage systems for the development will operate independently of any works proposed as part of the MPW Stage 2 development (SSD 7709) that have not been incorporated in this development, unless development consent has been</li> </ul>	works and fill importation". These details should be submitted to DP&E, with subsequent reviewby Council.	prior to commencement of early works and fill importation	There is n council ap Plans hav
granted to those A24. Prior to commencement of permanent built surface works and/or landscaping, the Applicant must prepare amended architectural plans that reflect updated plans required under the conditions.	Architectural plans submitted lack detail. The only plans submitted attached to the Urban Design and Landscape Plan. Elevations, sections, structural and civil details and photomontages from key vantage points are required. We note that the trigger is "prior to the commencement of permanent built surface works and/or landscaping." These plansshould be submitted to DP&E and provided to Council for review.	Prior to the commencement of permanent built surface works and/or landscaping full detailed architectural plans, elevations, sections, civil and structural details and photo montages from key viewpoints are to be submitted for approval. Council would prefer these be submitted as soon as possible, particularly photomontages, to provide a true representation of the proposed Warehouse 1 in the context of the other buildings proposed in Stage 2 and as viewed from the surrounding locality.	Updated A Layout Pla The UDLF from vario (Appendix There is n Warehous nor are th site for thi
A31. Prior to the issue of a Construction Certificate, the Applicant must pay a monetary levy of 1% of the development Capital Investment Value ((\$3,577,900) or other amount agreed to by Liverpool City Council for transport, drainage, community facilities, administration and professional and legal fees pursuant to Section 94B(2) of the EP&A Act 1979.	In their letter to Council dated 3/11/2017, the Applicant advised Council that the Capital Investment Value (CIV) used to calculate the contribution excluded various works, stating the following: "The proposed contributions for these applications have been calculated based on the Capital Investment Value (CIV) submitted to the Department of Planning and Environment (DP&E) on December 2016 (included at Attachment A and Attachment B of this letter). Linear infrastructure has been excluded from the CIV for the two proposals as the linear infrastructure has no impact on the public facilities the contributions levied under the Draft Liverpool City Council Contributions Plan could be applied to. In addition, the upgrades to Moorebank Avenue and the Moorebank Avenue /Anzac Road intersection would have a net benefit on the road network." The exclusion of linear infrastructure and the upgrades to Moorebank Avenue and the Moorebank Avenue /Anzac Road intersection from the Section 94 calculations is considered irregular and inequitable, as such works are not excluded items under Clause 25J of the Environmental Planning and Assessment Regulation 2000 or Council's Section 94 Plan 2009. Based on the wording of consent condition A31, we recommend that Council request that the cost of the approved 'linear infrastructure works' be included in the calculation of the CIV and the levy revised accordingly. This is on the basis that these works are directly related and required to support Stage 2 of the proposed	The Section 94 Contributions payable to Council be recalculated to include the costs of linear infrastructure and the Moorebank Avenue /Anzac Road intersection on the basis that these works are directly related and required to support Stage 2 of the proposed intermodal facility. We do not believe the reason given that "no impact on the public facilities the contributions levied under the Draft Liverpool City Council Contributions Plan could be applied to" is valid or supportable. <b>B40.</b> (b)(iii) ensure on site detention basins are visually unobtrusive and ensure public safety	Although we have not sighted the Stormwater Management details the Applicant refers to, if OSD 9 is flush with the final design ground levels covered by a mix of native grasses then this condition is satisfied.	Review of the Stormwater Management details to confirm OSD design.	Tactical: Drawing ' in Append
<b>B140.</b> Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, an Urban Design and Landscape Plan (UDLP) must be prepared. The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The UDLP must be approved by the Secretary, in consultation with the NSW Government Architect. The UD LP must present an integrated urban and landscape design for the development, and must include, but not be limited to:	Design principles have been included. We are unable to assess the project's response to a number of the Urban Design Principles provided due to the lack of detail provided with the Amended application documents. Particularly, we cannot assess the accuracy of the Statements: Responsive: the design will be both responsive and sympathetic to the form, colours and textures of the natural and cultural character of the existing landscape. The Project will integrate with and improve the existing site character to form a high performance and quality urban landscape feature. A development of this size cannot be considered to be "responsive and sympathetic" to the surrounding	Further architectural details, photo montages, mitigation measures and operational details demonstrating consistency with the Design Principles are required. The additional information is necessary as the submitted documents provided do not afford a comprehensive picture of the urban and architectural form or operation for the overall development under Stage 2.	The UDL revision. Plans are The Visua provides The objec drawings
	natural and built form character. This justification is inadequate. Community: while the Project will have limited access to the general public, the Project will include a provision for suitable and sufficient amenity which may be accessible by both the occupants and the public (albeit predominantly indirectly). This improved local amenity will incorporate landscaping, open spaces for employees, water sensitive urban design and environmental features, creating a 'sense of place' and conveying a feeling of community. We assume that the general community will be excluded from the Site for security reasons. Therefore this design principle is irrelevant and not met.		
	Considerate: landscape and urban treatments will be considerate of the need to provide visual and acoustic shielding in the form of vegetation, landform and structures. This has not been demonstrated. Require		
	photomontages. Visually Appealing: the urban design will be visually appealing to the public and surrounding areas to ensure continuity between the Project and surrounding areas.		
	This has not been demonstrated. Require photomontages.		
<ul> <li>(a) identification of design objectives, principles and standards based on - <ul> <li>(i) local environmental values,</li> <li>(ii) urban design context,</li> </ul> </li> <li>(iii) sustainable design and maintenance,</li> <li>(iv) community, visitor and worker safety, amenity and privacy,</li> </ul>	-	-	-

- CODE 6.1 = MONITORING SYSTEM MUST ACCURATELY AND CLEARLY PRESENT THE METERED DATA
- CODE 11.0 = MINIMUM LIGHTING COMFORT FLICKER - FREE LIGHTING A1&A2 BALLAST
- •• HIGH FREQUENCY BALLASTS ELECTRONIC BALLASTS IN HID LIGHTING
- CODE 11.1 = GENERAL ILLUMINANCE & GLARE REDUCTION •• LIGHTING MEETS THE LEVELS RECOMMENDED IN THE RELEVANT STANDARD.
- ALL BARE LIGHT SOURCES MUST BE FITTED WITH MEANS THAT OBSCURES THE DIRECT LIGHT •• SOURCE FROM ALL VIEWING ANGLES OF OCCUPANTS. • CODE 11.3 = LOCALISED LIGHTING CONTROL - DALI OR OTHER CONTROL FOR OFFICE AREAS.
- CODE 17B3 = LOW EMISSION VEHICLE INFRASTRUCTURE CODE 20.3 = PERMANENT CABLES - AT LEAST 90% OF ALL PERMANENT FORM WORK, CABLES.
- PIPES IS SOURCES FROM MANUFACTURER THAT MEET BEST PRACTICE GUIDELINES. CODE 27.0 = LIGHT POLLUTION TO NEIGHBORING BODIES - DEMONSTRATE THAT ALL OUTDOOR
- LIGHTING ON THE PROJECT COMPLIES WITH AS 4282,1997 CODE 27.1 = LIGHT POLLUTION TO NIGHT SKY - THE DIRECT ILLUMINANCE FROM EXTERNAL LUMINAIRES ON THE PROJECT PRODUCES A MAXIMUM INITIAL POINT ILLUMINANCE VALUE NO
- GREATER THAN •• 0.5 LUX TO THE SITE BOUNDARY •• 0.1 LUX TO 4.5 METERS BEYOND THE SITE INTO THE NIGHT SKY

•• CALCULATIONS SHOULD BE IN ACCORDANCE WITH AS 4282:1997

CONTRACTOR TO VERIFY ALL DIMENSIONS ON SITE BEFORE COMMENCING ANY WORK OR MAKING ANY SHOP DRAWING. FIGURED DIMENSIONS TO BE USED IN PREFERENCE TO SCALED DRAWINGS. THE INFORMATION ON THIS DRAWING REMAINS THE PROPERTY OF C-LEVEL PTY LTD DESIGN CONSULTANTS.

#### GREEN STAR • THIS PROJECT IS CURRENTLY COMPLIANT WITH 4 STAR SPECIFICATION. REFER TO FULL GREEN STAR SPECIFICATION FOR FURTHER DETAILS. CODE 6.0 = ENERGY METERING TO BE PROVIDED TO ALLOW FOR MONITORING OF THE RELEVANT CODE 6.1 = MONITORING SYSTEM MUST ACCURATELY AND CLEARLY PRESENT THE METERED DATA CODE 11.0 = MINIMUM LIGHTING COMFORT •• FLICKER - FREE LIGHTING A1&A2 BALLAST HIGH FREQUENCY BALLASTS ELECTRONIC BALLASTS IN HID LIGHTING CODE 11.1 = GENERAL ILLUMINANCE & GLARE REDUCTION •• LIGHTING MEETS THE LEVELS RECOMMENDED IN THE RELEVANT STANDARD. ALL BARE LIGHT SOURCES MUST BE FITTED WITH MEANS THAT OBSCURES THE DIRECT LIGHT SOURCE FROM ALL VIEWING ANGLES OF OCCUPANTS. CODE 11.3 = LOCALISED LIGHTING CONTROL - DALI OR OTHER CONTROL FOR OFFICE AREAS. CODE 17B3 = LOW EMISSION VEHICLE INFRASTRUCTURE CODE 20.3 = PERMANENT CABLES - AT LEAST 90% OF ALL PERMANENT FORM WORK, CABLES, PIPES IS SOURCES FROM MANUFACTURER THAT MEET BEST PRACTICE GUIDELINES. CODE 27.0 = LIGHT POLLUTION TO NEIGHBORING BODIES - DEMONSTRATE THAT ALL OUTDOOR LIGHTING ON THE PROJECT COMPLIES WITH AS 4282.1997 CODE 27.1 = LIGHT POLLUTION TO NIGHT SKY - THE DIRECT ILLUMINANCE FROM EXTERNAL

LUMINAIRES ON THE PROJECT PRODUCES A MAXIMUM INITIAL POINT ILLUMINANCE VALUE NO GREATER THAN •• 0.5 LUX TO THE SITE BOUNDARY •• 0.1 LUX TO 4.5 METERS BEYOND THE SITE INTO THE NIGHT SKY •• CALCULATIONS SHOULD BE IN ACCORDANCE WITH AS 4282:1997

	KEY	
CONTRACTOR TO VERIFY ALL DIMENSIONS ON SITE BEFORE COMMENCING ANY WORK OR MAKING ANY SHOP DRAWING. FIGURED DIMENSIONS TO BE USED IN PREFERENCE TO SCALED DRAWINGS. THE INFORMATION ON THIS DRAWING REMAINS THE PROPERTY OF C-LEVEL PTY LTD DESIGN CONSULTANTS.

1.	ALL WORKS TO COMPLY WITH THE RELEVANT STANDARDS & CODES
	INCLUDING BUT NOT LIMITED TO AS2293, AS3000, AS3008.
2.	ALL SUBMAIN CABLING TO BE INSTALLED IN UNDERGROUND CONDUITS OR
	SUPPORTED ON CABLE TRAYS.
3.	ALL POWER & COMMUNICATIONS CABLING SHALL BE INSTALLED WITH
	SEGREGATION IN ACCORDANCE WITH AS3000 & RELEVANT APPLICABLE

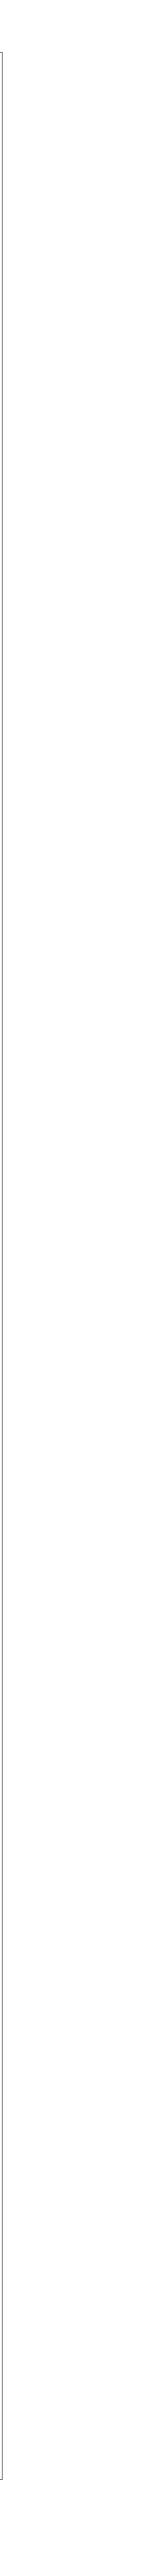

- ONDUIT TYPES FOR ALL COMMUNICATION LEAD IN & NBN SERVICES ISQ CU TO BE USED FOR ALL SUBCIRCUIT CABLING.
- T LIGHTING SHALL BE CERTIFIED TO AS2293 & ERTIFIED TEST CERTIFICATES.
- LIGHTS TO BE TESTED, LABELED & LOGGED. AFFIX FIXTURES CORRESPONDING TO LOG BOGS.
- LIGHTING & POWER CIRCUITS PER AS3000. HALL BE 4000K COLOUR OUTPUT UNLESS
- SHALL BE 5000K COLOUR OUTPUT UNLESS
- ENCE SENSORS TO BE TESTED & COMMISSIONED. CIFICATIONS, TIMES UNIFORMLY MATCHED PER
- TO BE INSTALLED WITHIN A 1.2M SPACE FROM ROOF
- MINIMUM DISTANCES AWAY FROM FIRE SPRINKLERS SKETS TO BE EARTHED PER AS3000.
- ISQ CU TO BE USED FOR ALL SUBCIRCUIT CABLING. NG TO BE SIZED WITH A MAXIMUM OF 2.75% VOLTAGE TO MAINTAIN STANDARDS PER AS3000.

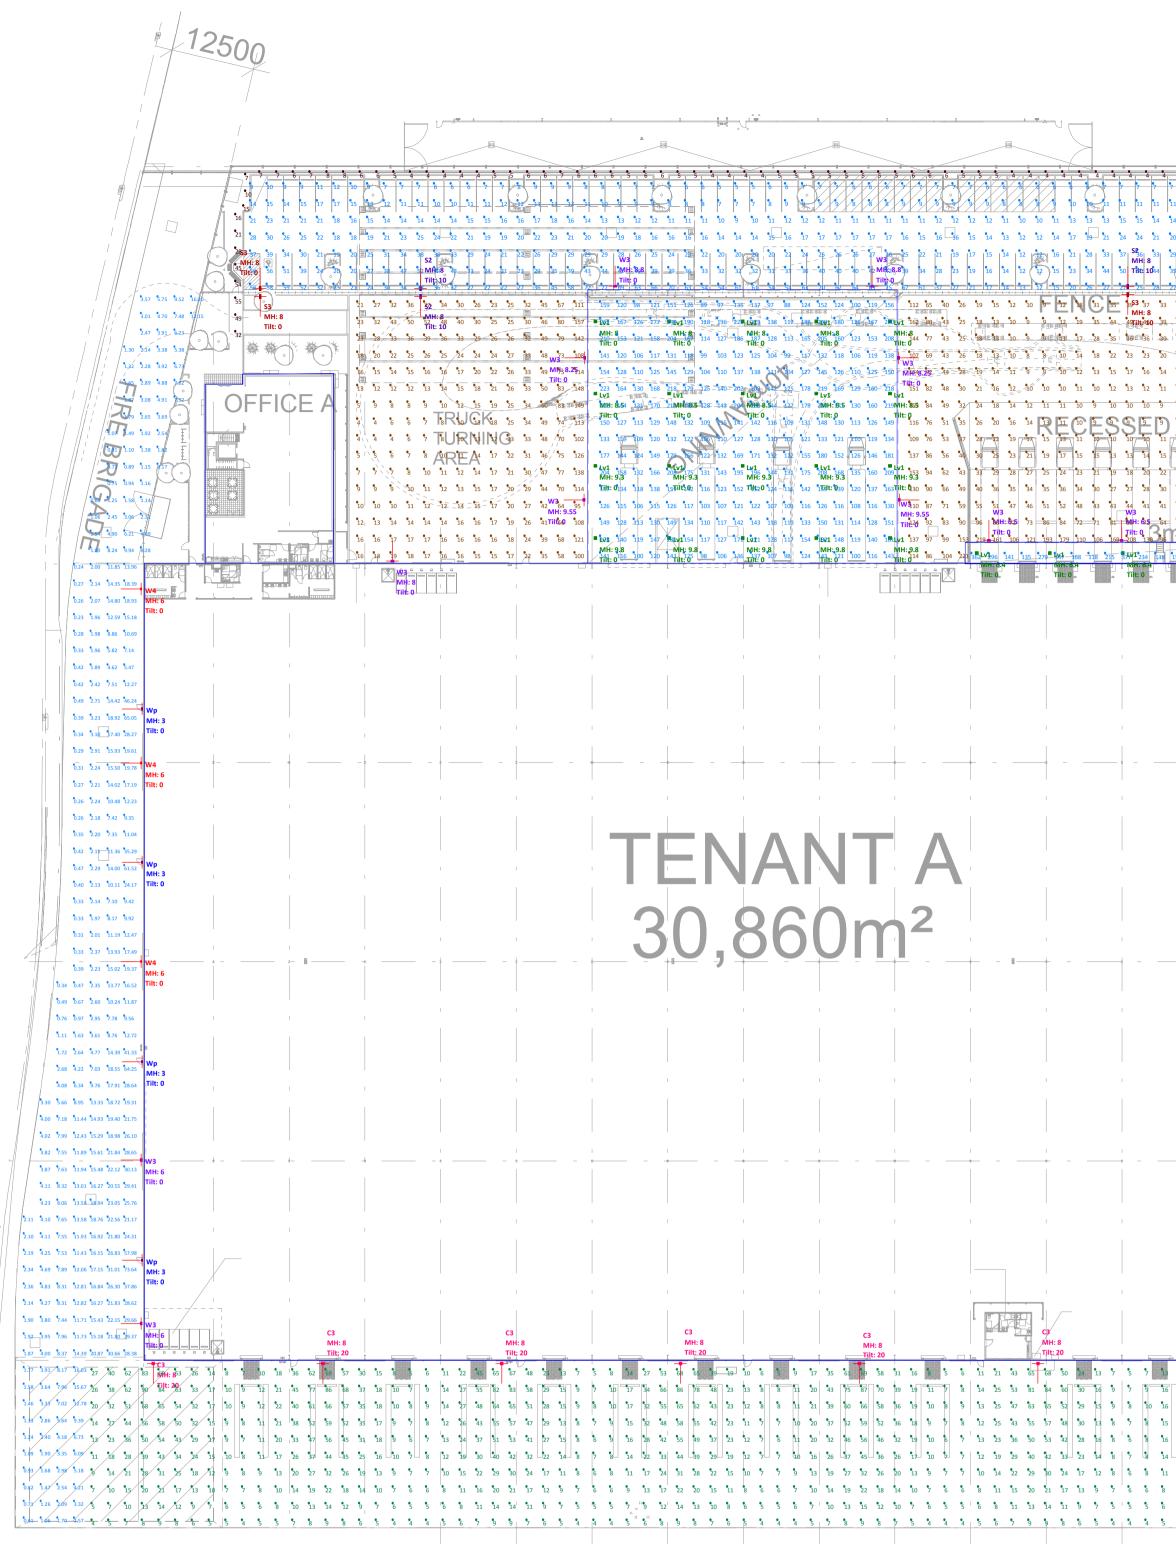

#### POWER NOTES 1. REFER ARCHITECTURAL & JOINERY DETAIL NOTES FOR OUTLET MOUNTING

- HEIGHTS. 2. SURFACE MOUNTED GPO'S TO BE INSTALLED ON SOLID MOUNTING BLOCKS
- &/OR BE WEATHERPROOF TYPE IN APPROPRIATE AREAS. 3. ALL ACCESSORIES TO BE INSTALLED IN ACCORDANCE WITH THE
- MANUFACTURERS INSTRUCTIONS. 4. ENSURE PHASE ROTATION AT EACH 3PHASE OUTLET & ISOLATOR IS
- CORRECT DURING TESTING. 5. MECHANICAL PROTECTION TO BE PROVIDED TO ALL CONDUITS RISING FROM THE GROUND, FLOOR, ENTRIES INTO SWITCHBOARDS & PANELS.
- 6. PROVIDE SEGREGATED CABLING ACCESS FOR POWER & DATA SERVICES TO SKIRTING DUCTS AT APPROX 5M SPACES OR WHERE PRACTICAL.
- 7. CABLES SHALL BE GROUPED ON TRAYS & CATENARIES IN MAXIMUM QUANTITIES OF 6X CABLES PER GROUP.
- 8. ALL CABLING INSTALLED ABOVE CEILINGS SHALL BE SUPPORTED OR FIXED, BE KEPT CLEAR FROM CEILINGS.
- 9. ALL CABLING SHALL BE INSTALLED PER AS3000, CABLING CONCEALED WHERE PRACTICAL, INSTALLED SQUARE TO BUILDING LINES IN A NEAT & TIDY PROFESSIONAL MANNER. THE ENVIRONMENT TYPE CONSIDERED &
- MECHANICAL PROTECTION PROVIDED WHERE REQUIRED. 10. HAND DRYER'S SHALL BE HARD WIRED WITH ISOLATING SWITCH INSTALLED DIRECTLY ABOVE HAND DRYER AT 2100MM & LABELED ACCORDINGLY.

#### Re:

#### Warehouse 3,4, 5 Moorebank Logistics Park, 400 Moorebank Ave, Moorebank NSW 2170.

We hereby certify that the electrical design & engineering, external lighting for the project as detailed on plans noted below has been designed per requirements of the Building Code of Australia & relevant Australian Standards. In particular, in accordance with:

- Relevant Australian Standards:
  - AS1158.3-2005
  - AS1680-2009
  - > AS4282-1997
- Relevant clauses of the Building Code of Australia:
  - Part J6 of BCA 2016 Amendment 1
  - > Part J8.3 of BCA 2016 Amendment 1
- DA Conditions & UDLP : AS4282-2019,
  - External lighting designed facing downwards, using specific cut off luminaires, eliminating upward spill light above the horizontal.
  - > Main floodlights using asymmetric beams & using warm colours (4000k & below)
  - High efficiency & high quality LED luminaires used for external lighting, installed on programmable lighting control systems inc, timeclocks, PE Cell & over-ride switches.
  - installed in a manner that does not create a nuisance to surrounding properties & or public roads.
- Engineering Plan Drawings: Warehouse 3.
  - ≻ 0000-5
