Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is an unsuitable location as there is already enough traffic congestion as it is. This intermodal will not only create even more traffic congestion but also air pollution therefore infecting the clean air that the residential families living in the area will be harmed by. There are primary schools, high school and day cares located in various spots around Wattle Grove, Holsworthy, Hamondville and Moorebank.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Adrian Capaldi Wattle Grove, New South Wales, 2173, Australia

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is hard to understand how SIMTA can propose stage 2 when they haven't finish modifying their concept plan.

It is even harder to believe that residents, the council and other impacted parties could be thought to be able to appropriately respond to a plan based on a non-existent concept.

It is frightening that SIMTA could ask for approval to build warehousing when the concept plan with its change of layout is still undecided. There's significant issues with the new layout and the way it invalidates so much of the existing EIS, especially noise, pollution, run-off, light spill and environmental impacts. These documents need to be rewritten from scratch with completely new information before it is possible to even start to understand the impact of this effectively brand new proposal.

This proposal is big, and it is being rushed through at a rate that local residents can't possibly respond to.

SIMTA are seeking permission to clear vegetation at a time when it has been revealed that their previous analysis is at best very deeply flawed since they were able to completely miss a critically endangered plant. It is essential that someone with a significantly higher level of knowledge and experience undertake a new survey of the endangered plants and animals on the SIMTA sites. It isn't good enough to use this light weight analysis doom the Liverpool area to pollution and noise and ecological disaster for the next 50 or 100 years. If we don't get this right now, there won't be another chance to fix it in our lifetimes. Don't let SIMTA rush the process through without proper consideration.

SIMTA has not consulted local residents on this 3 in one exhibition. Something as complex as this surely requires a very significant engagement. Even the local residents most aware of what is going on are being left confused and disoriented by the massive scale of this massive documentation drop. This is truly and completely unjust. Residents need protecting from this corporate greed. The planning process is supposed to be there to save us from uncontrolled development. Please hold SIMTA to account for their many failures in planning and consultation.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

this application seeks to increase the height of the area by 2 metres. this area is designated flood area. the altering of the land height will impact the ability of the area to deal with excessive water in times of torrential rain which causes this area to flood. the increasing of road height by 2 metres will further exaggerate this flooding problem and will in fact push water in the direction of homes. this is water which would have normally flowed to the river.

this is a tidal river which when all the stars are aligned rain for days on end, high tide including King tides flood this area impacting the ability for the water to escape into the river.

in fact this area has flooded on a regular basis over the last 30 years that I have been a resident of this area.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Construction of Approximately 300,000 square metres of warehousing and distribution facilities currently on display should not be approved. The site layout plan shows a large percentage of warehousing facing the western side of Wattle Grove. The concept plan clearly stated that the warehousing would be located on the eastern side of the MPE site to act as noise mitigation for the suburb of Wattle Grove which included the operations areas facing west into the site. The sneaky redirection of Moorebank Ave will further increase the noise impact on this suburb if allowed to go ahead, which it shouldn't. IE Wattle Grove is as close as 300 metres from the MPE site.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Moorebank Ave is a problem already and even if you widen and add extra lanes this will not compensate for the increase in heavy vehicle traffic along with the extra cars that will use this for people who work at the terminal.

The extra width will not decrease the congestion that will result at the M5 intersection with far to many trucks using this area.

There will be added local area traffic with trucks using local roads that are not designed for heavy vehicles such as trucks.

Also the local air quality will be considerably be reduced due to the increase in emissions from trucks and other associated vehicles.

Noise pollution will also increase from not only the trucks driving on the roads but by the cranes and forklifts used in the terminal. With the continuous beeping from reversing trucks, forklifts and other vehicles.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. There have been too many changes to this development to try and sneak it thru. I object 100% to this development it want work to many trucks 105 per hour on moorebank ave. plus local traffic it will be grid lock then what will happen. Stop this eye sore

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Responses to Moorebank Precinct East (MPE): Stage 2 Application – SSD 7628

Subdivision

I must be confused, but is this an application for an inland freight terminal? “Subdivision” sets off alarm bells for the potential sale of the subdivided plot for further developments that may not be bound by this application for purpose or time frame. Seemingly the proponents wish to utilise, sub-let or lease proportions of this site for whatever purpose. Will these subdivisions be contained under the same or similar regulation as the bona fide development application? Could subdivided plots apply for various usage – heavy industrial, commercial, business or mixed use for example –which could then bypass the requirement for PAC development approval?

Connection of internal road to public road network

The connection of the internal road network to the public network should not be permitted without upgrade of the public road network in the first instance. Given the proposed upgrade of Moorebank Avenue including drainage, and sufficient space for turning of A-double trucks for connecting roads, this work should be completed prior to internal road connection. Congestion and capacity on arterial road networks seems as though it would be alleviated by the staged operational rollout of the precinct with the promise to upgrade intersections as necessary and by agreement. Seems like a scenario which exhausts current infrastructure, with the promise to fix later scenario. Consent of staged development was granted such that it does not exceed the capacity of the transport network. Shareholder profits must be delineated from safety, obligation, amenity and development consent. Upgrading of infrastructure must be written as a prior condition to staged precinct operational rollou

t in accordance with the (preferentially Van der Boss) traffic modelling in an attempt to minimise the negative traffic impacts. “Consent authority must be satisfied that each stage of the project will not exceed the capacity of the transport network.”

Clearing of land and endangered species

With the rediscovery of the previously extinct *hibbertia fumana*, which is the opportunity of a lifetime to conserve this once thought extinct species, no clearing whatsoever must be done to impact this species and other species that the NSW Scientific Committee has identified as endangered found on site. It is not only the clearing of the land that endangers them due to direct or indirect threat through dust generation, it is the habitat in which the plants exist. Existing adjacent a pollution source is not conducive to a healthy outlook for individual plants or the limited numbers of the species itself. OEH Section 91 licence application should be applied for at the very least. No clearing should be admissible until appropriate management of this species is applied.

Housing

Even with whatever planned mitigation (which is by no means a commitment to world class, or best practice, or BATEA), the activity and nature of the precinct, the hours of operation, and the vehicular movements and activities to and within, the site will negatively impact property values and the comfort and amenity of the surrounds.

This development cannot coexist with a multitude of proximal residences and have no effect on the surrounding housing, leisure and commercial environment.

It certainly cannot coexist with a multitude of proximal residences and have a positive effect on the surrounding housing, leisure and commercial environment.

Standards benchmark

Even if planned projections of environmental effectors, benchmarks and indicators all are within legislative guidelines, there is limited effort to strive for a higher standards. There is no effort to strive for a policy that is world class in many aspects of health, environment, hydrology, amenity, social aspects and so on. Seemingly, the proposal is reaching to step above the line of legislature, rather than setting the standard for a world class facility, surpassing or exceeding the standards that legislature provides.

General Badgery's Creek has been dismissed as it has been estimated that Stage I would be operational by 2030. It is a poor argument to suggest that the site is not chosen because of the time frame. The best argument should be based on infrastructure. The cost of delaying an intermodal facility by a couple of years will be far outweighed by the right development in the right location. Savings can be found through infrastructure, human health, public amenity, etc. Not acceptable to indicate that there is no confirmation of a rail link to Badgery's Creek at this point in time. Now is the opportunity to investigate or propose. Given that it has been suggested as a site for over thirty years means that it has the potential, and with recent planning improvements for transport infrastructure by road and air, and the Western Sydney freight line proposed to be on line by 2030 gives this site the logistical edge. It is a more effective option in a more logical and suitable true tran

sport hub. You do not build such a hub amongst suburban Sydney. How many people do you wish to affect detrimentally? There is a belief that the hub will not affect significantly the health of the workers and residents. US studies have debunked this assumption, and the human health impacts will only be documented and realised once continuous, ubiquitous and pervasive medium to long term exposure has been gained. This does not belong in the Liverpool Local Government Area - air quality indices are not favourable as a baseline, and any development on this scale that increases the risk (which should have been risk assessed appropriately) to human health from carcinogenic emissions that have been well documented to be deleterious to human health, should be liable for the outfall.

One has to ask the question as to why more freight is coming through Port Botany. I question the clandestine dealings that have been undertaken to stunt the flourishing of Port of Newcastle, the volume of container handling and transport thereof.

Populations in regional areas are discriminated against by not using Port of Newcastle for the lack of opportunity for employment, growth prospects and investment in infrastructure. 80% of freight is apparently recognised to travel within 40km from Port Botany, but by road via Moorebank the figure leaps to 63km. Illogical.

I consent to my name being published as an objector.

I object to this application and the entire project at this location.

There is too much at risk in this community for this application to be approved. Numerous schools, aged care facilities, hard working men and women trying to secure there one asset, the family home, their one piece of property to bring up their families in this unique location, where the bush surrounds them and wildlife. This application will destroy this and impact on everyone. The M5 at Moorebank Ave, is a nightmare, risk your life now, with an influx of trucks there is no certainty of going anywhere on the most used road in Sydney. I strongly oppose this application.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Deborah Chant Holsworthy, New South Wales, 2173, Australia

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Since the original plan for this facility was mooted the area around it has undergone a lot of change. Large parts of the surrounding suburbs have been rezoned to medium and high density increasing the load on local roads and infrastructure which is already at saturation point.

Thirty story apartment blocks have been or are being built within 1.5km of this proposed facility and will have a wonderful view of this outrageous proposal as well as being adjacent to the freight rail line with an almost continuous line of trains passing them 24 hours a day.

This facility is within two km of Liverpool station and shopping centre and is far to close to an important business growth centre and will only stifle growth.

It has been proven time and again that there will be no reduction but an increase of trucks and general traffic in the area.

The original EIS did not allow for the amount of fill required or for retail, commercial or light industrial uses and therefore should be reassessed.

This type of facility should not be sited so close to an environmental sensitive area as the Georges River nor as close to residential areas.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Denis Muller Moorebank, New South Wales, 2170, Australia

The fact that you wish to clear vegetation to make way for your proposed freight village and everything else associated with this site is scandalous to say the least.

Nor do I wish to have warehousing and distribution facilities on this site should, heaven forbid, you get the go ahead to build this monstrosity.

Our roads are already at peak levels and no form of upgrades are going to remedy this situation.

I object most strongly to all your proposals and I can only hope and pray that this proposal is canned once and for all.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

If this project is allowed to proceed it will add so much congestion to the area. An independent study has not been carried out on the effects of these thousands of extra truck movements in the area surrounding this proposed terminal simply because it will show that this area is not suitable for such a project.

I would like to know why a study has not been carried out on this.

My objection related to why these studys have not been done and the level of honesty and integrity of the decision making process of this terminal.

Please do not destroy our local area. Do the right thing and put this project where it will actually be proven without a doubt to be a better location.

One man's golden parachute is not worth stealing the futures of 10s of 1000s of hard working citizens. Most especially when public funds are being used to subsidise this white elephant which will never live up to the hype; and not before billions in taxpayer funds are wasted.

One man's golden parachute is not worth more than an endangered native that was believed extinct for over 190 years, and may not exist anywhere else.

Raising the site by 2 metres, makes any "biobanking" a laughable and irrelevant prospect. Additionally the shifting of the Rail Corridor in order to "biobank" only creates other problems like and increase noise pollution from wheel squeal, which has no barrier to residents except the supposedly protected Cumberland Plain Woodland.

Worse still, by raising the site by 2 metres the Applicant actually nullifies all previous the studies and "mitigations" of environmental impacts, which has used to shoehorn the project this far along.

It's time to concede this a cancer shaped peg, that will never fit in a residential shaped hole. The DP&E ought to move on with its own Strategy Planning and jettison this horrendously wasteful project, which is set to retard everything it claims to fix.

Attn: Director
GPO Box 39, Sydney NSW 2001
Social & Other Infrastructure Assessments, Department of Planning

I would like to submit my objection to the following Development Applications:

MOOREBANK PRECINCT WEST (MPW): Rts Concept Plan Modification- SSD 5506 MOD1

The Amended Modification Proposal seeks:

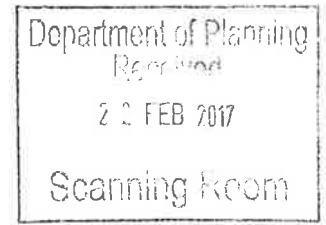

- 1 • Importation of 1.6million cubic metres of fill.
 - Altered Construction footprint including additional land parcels.
- 2 • Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
 - Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
 - Modify the staging of future applications
- 4 • Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- 3 • Increase to building heights and ground levels.
 - Subdivision.

I object to this modification:

1 - 2 - 3 - 4

Name: G. FORCONI Dated: 16-2-17
Address: 3 MONASH AVE WATTLE GROVE

Do you wish your name to be withheld from publication. (Please circle) No / Yes
Have you made any Political donations (please circle) No / Yes
I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2

The Amended Modification Proposal seeks:

- 1 • Increase the site area to include works proposed within the Moorebank
 - Avenue road corridor
- 2 • Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
 - Provide interim site access to warehousing from the Moorebank Avenue upgrade
- 3 • Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- 4 • Importation of 600,000 cubic metres of fill
- 5 • Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
 - Modify the staging of future applications

I object to this modification:

1 - 2 - 3 - 4 & 5

Name: G. FORCONI Dated: 16/2/17
Address: 3 MONASH AVE WATTLE GROVE

Do you wish your name to be withheld from publication. (Please circle) No / Yes
Have you made any Political donations (please circle) No / Yes

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. Does not belong amongst residential community where there are major schools, hospitals, nursing homes and simply homes!!!! There is insufficient capacity to support traffic and thoroughfare today. This will bring traffic to a standstill and significantly compound pollution levels of Moorebank (which already has one of the worse levels of pollution in the state). This is an environment travesty to waste prime realestate and resources. This is not a sustainable solution. This will have a short shelf life and you as Government/Community representatives have an opportunity to make the best decisions that support our nation and the community for today and into the future. Say No to locating the intermodal at moorebank. Relocate this where it will support growth and not impact local residents.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I am concerned that the current land on the proposed site will not be remediated adequately enough and will just be covered over with the fill. This concerns me due to the high number of chemicals and materials left behind by The Defence Department. The area is known for floods and should a big flood occur it could cause irreparable damage to the environment, in particular The Georges River and the critically endangered, assumed extinct plant of the *hibbertia fumana* species.

I am against the increase to height of Moorebank Ave for similar reasons to the above eg flooding and run off.

Talk of moving Moorebank Ave so it runs down the eastern side of this East Terminal brings this road closer to Wattle Grove residents adding more noise, light and pollution to these residents. I am opposed to the idea of this.

I believe the upgrading of intersections along Moorebank Avenue is insufficient for the increase in traffic the intermodal will produce. The upgrading of many more intersections around Liverpool and beyond is essential for this operation to operate smoothly as proven by independent and experienced road modellers.

It seems nobody whether in business or in politics seems willing to pay for this.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The residents of Wattle Grove, Moorebank, Chipping Norton and Holsworthy will be seriously affected if this project goes ahead. It would be a monstrous destruction of their good faith in building, developing and living in these suburbs. We will hear the trains and crash of containers beyond the Whitlam Centre. A travesty of trust.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, ian Bailey

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I cannot believe this project is still going ahead. It is in the wrong place , the area does not have the ability to handle the amount of trucks. It cannot handle the pollution.

No fill should be brought in on this site. The noise and the dust and pollution is harmful to residents.

Also Lifting the site by 2 meters will mean more noise carry to my residence and light spill.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

My primary concern relates to air quality for nearby residences. I am encouraged that the conclusion of the regional and local air quality results in the conclusion that "adverse impact on the surrounding environment from air pollutants generated by the project would be very low." This statement is fraught with vague use of the English language. Whatever the "very low" effects of the project, it does not make any logical sense to negatively impact, punish and make ill thousands of residents who reside adjacent this development. Thankfully, Table 5 and Table 6 of the PB EIS dated 20/04/2016 has an annualised emission quantification and qualification which in my opinion does not resemble "very low." There are many papers that indicate that there are increased health risks for populations residing adjacent source points of diesel fuel, (One being Matsuoka M, Hricko A, Gottlieb, R, and De Lara J Global Trade Impacts: Addressing the Health, Social and Environmental Consequences of Moving International Freight through Our Communities

. Occidental College and University of Southern California (Los Angeles, forthcoming, 2011)). There is scientific correlation of health risk within proximity to freeways, rail yards, and diesel emission sources, and sadly health considerations typically are not integrated into land use decision-making.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Our area is a booming area for younger families, this clear disregard for the communities health & well being is something all involved should be ashamed of, if they looked at the average age in the area you can see it is an up coming area for families, as well as being an affordable area without having to live a long way from the city, it also has rail facilities also in the area for commuting the thousands to work every day. The area has an opportunity to become a want to live area for everyone with affordable & higher class living with a large area that could be developed with breathe taking views of the glorious Georges river in view. Bringing extra trucks to the already congested M5 & local roads , the noise levels that come with this 24hr project in the middle of large residential areas all around this misplaced project. Eastern Creek with it's vast vacant land available with no large residential impact in the area, as well the large warehouses already built & running were a lot of this container stock will need to be sent to is a more viable option. Common sense needs to used in this decision for the sake of the thousands of young families in the area, as well as conserving the mighty Georges river for generations to come.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

There are major traffic issues that have yet to be resolved, and up-to-date state traffic modelling studies must be received and analysed before this application can be considered to be appropriately addressed.

There are major health impacts that include carcinogenic diesel particulate emissions that pose a grave concern in respect of the health of residents. Aerosol pesticides will be used to fumigate containers, and this will pose a risk to workers and residents alike. Runoff from the site containing these pesticides pose a major risk to aquatic life downstream.

The application states that "The MPE Stage 2 proposal would result in minor indirect (visual) impacts to the Glenfield Farm SHR item."

The applicants doubtless believe any impacts to Glenfield Farm are minor, however, where is the detailed study giving quantifiable indications of how "minor" these impacts, on an important historical viewpoint, will be. Such a study should be provided by the proponents forthwith.

I note that in Section 5.1 pg 22, tagged Historical Background Early Settlement at Liverpool, the proponents do not mention Glenfield Farm at all. They do not mention that Intermodal spur line site is part of Charles Throsby's land grant of 1810, and that the intention of the proponents is to ruin this land for good, land that, as important visual curtilage of Glenfield Farm, was to be returned to public use as recreational land. This entire development has been predicated on being allowed to ruin Glenfield Farm with excessive noise from the spur line, and to blight its important historical views with heavy industry.

This application is unacceptable, inadequately documented, and inaccurate, as further modification applications will change the scheme in major respects. It should be thrown out until a responsible masterplan is produced. _____

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reasons behind my objection is as follows:-

- A Construction Noise and Vibration Management Plan (CNVMP) needs to be prepared for the Proposal, considering all reasonable and feasible measures to reduce noise levels during and after construction. No use stating are predicted to comply with the established criteria. Either they do or they don't and if they don't something needs to done about it.
- The Proposal has the potential to increase road noise levels at sensitive receivers along the M5 Motorway, Moorebank Avenue and Anzac Road.
- On the basis of the assessments conducted by WM, it's not clear that noise and vibration impacts associated with the construction and operation of the Proposal are not expected to create significant annoyance to the nearby community.
- Over 2 years of construction hell, with trucks, coming and going 24/7. Dust, emissions, backhoes, excavators, mobile cranes, air compressors, jack hammers, dozers, the list goes on. All this machinery during the day makes for constant noise from 7am to 6pm Monday to Friday and 8am to 1pm Saturday!
- Bulk earthworks activities and construction works required to facilitate the Moorebank Avenue upgrade during peak construction periods will be undertaken outside of standard construction hours, ie anytime up to 10pm. This is a joke!
- Getting away with material being dropped off in the late hours of the day Such as:-
- Material Delivery – Weekdays (6am-10pm) Saturdays (7am-6pm)
- Direct placement – Weekdays (7am-10pm) Saturdays (8am -6pm)
- Stockpiling – Weekdays (7am-6pm) Saturdays (7am-6pm)
- Crushing – Weekdays (7am-6pm) Saturdays (8am-1pm)

Moorebank Avenue Upgrade - Weekdays (6am-10pm) Saturdays (7am-6pm)

The residents will not be happy with this.

- If approved residents will not be happy with the operational hours. Movement of freight between the IMT and warehouses within the Proposal site would be undertaken 24 hours per day, seven days a week. The warehouses would be operational for 24 hours per day, seven days a week. That means lots of noise, traffic and lights in the area.
- Constant noise of construction machinery, backhoes, loaders, scrappers, dozer and the list goes on.
- The amount of cars and trucks would entering the site throughout the day, bound for the warehouses will be approximately 1,936 cars (3,872 movements) and 282 trucks which accounts for (564 movements). These vehicles would need to enter the site each day which is just so disruptive, noisy and unacceptable in a residential area. This will not only be during the construction phase but ongoing.
- Transient noise events associated with the operation of the site have the potential to cause sleep disturbance include horns, tonal reversing alarms, pneumatic trailer brakes, and 'banging' noises associated with moving containers.
- The Proposal will generate additional traffic along the M5 Motorway west of Moorebank Avenue, along Moorebank Avenue from the Proposal site northwards and minor additional traffic along Anzac Road to the Yulong industrial estate.
- During the construction of the Proposal, an enormous amount all heavy and light vehicles, will need to travel to and from the site via the M5 Motorway and Moorebank Avenue. This is going to cause a traffic nightmare and hours on resident's journeys. Not to mention all the noise and pollution the additional vehicles are going to cause.
- Health issues such as asthma, lack of sleep due to the noise will increase stress levels of residents.
- A lot more traffic congestion/volume and accidents
- Increase in road noise levels during construction and operation.

Who wants to put up with that 24 hours a day 7 days a week? Not the residents of Moorebank, that's for sure. Say no to the Intermodal. It is not welcome in our Community.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Responses to Moorebank Precinct East (MPE): Stage 2 Application – SSD 7628

Subdivision

I must be confused, but is this an application for an inland freight terminal? “Subdivision” sets off alarm bells for the potential sale of the subdivided plot for further developments that may not be bound by this application for purpose or time frame. Seemingly the proponents wish to utilise, sub-let or lease proportions of this site for whatever purpose. Will these subdivisions be contained under the same or similar regulation as the bona fide development application? Could subdivided plots apply for various usage – heavy industrial, commercial, business or mixed use for example –which could then bypass the requirement for PAC development approval?

Connection of internal road to public road network

The connection of the internal road network to the public network should not be permitted without upgrade of the public road network in the first instance. Given the proposed upgrade of Moorebank Avenue including drainage, and sufficient space for turning of A-double trucks for connecting roads, this work should be completed prior to internal road connection. Congestion and capacity on arterial road networks seems as though it would be alleviated by the staged operational rollout of the precinct with the promise to upgrade intersections as necessary and by agreement. Seems like a scenario which exhausts current infrastructure, with the promise to fix later scenario. Consent of staged development was granted such that it does not exceed the capacity of the transport network. Shareholder profits must be delineated from safety, obligation, amenity and development consent. Upgrading of infrastructure must be written as a prior condition to staged precinct operational rollou

t in accordance with the (preferentially Van der Boss) traffic modelling in an attempt to minimise the negative traffic impacts. “Consent authority must be satisfied that each stage of the project will not exceed the capacity of the transport network.”

Clearing of land and endangered species

With the rediscovery of the previously extinct *hibbertia fumana*, which is the opportunity of a lifetime to conserve this once thought extinct species, no clearing whatsoever must be done to impact this species and other species that the NSW Scientific Committee has identified as endangered found on site. It is not only the clearing of the land that endangers them due to direct or indirect threat through dust generation, it is the habitat in which the plants exist. Existing adjacent a pollution source is not conducive to a healthy outlook for individual plants or the limited numbers of the species itself. OEH Section 91 licence application should be applied for at the very least. No clearing should be admissible until appropriate management of this species is applied.

Housing

Even with whatever planned mitigation (which is by no means a commitment to world class, or best practice, or BATEA), the activity and nature of the precinct, the hours of operation, and the vehicular movements and activities to and within, the site will negatively impact property values and the comfort and amenity of the surrounds.

This development cannot coexist with a multitude of proximal residences and have no effect on the surrounding housing, leisure and commercial environment.

It certainly cannot coexist with a multitude of proximal residences and have a positive effect on the surrounding housing, leisure and commercial environment.

Standards benchmark

Even if planned projections of environmental effectors, benchmarks and indicators all are within legislative guidelines, there is limited effort to strive for a higher standards. There is no effort to strive for a policy that is world class in many aspects of health, environment, hydrology, amenity, social aspects and so on. Seemingly, the proposal is reaching to step above the line of legislature, rather than setting the standard for a world class facility, surpassing or exceeding the standards that legislature provides.

General Badgery's Creek has been dismissed as it has been estimated that Stage I would be operational by 2030. It is a poor argument to suggest that the site is not chosen because of the time frame. The best argument should be based on infrastructure. The cost of delaying an intermodal facility by a couple of years will be far outweighed by the right development in the right location. Savings can be found through infrastructure, human health, public amenity, etc. Not acceptable to indicate that there is no confirmation of a rail link to Badgery's Creek at this point in time. Now is the opportunity to investigate or propose. Given that it has been suggested as a site for over thirty years means that it has the potential, and with recent planning improvements for transport infrastructure by road and air, and the Western Sydney freight line proposed to be on line by 2030 gives this site the logistical edge. It is a more effective option in a more logical and suitable true tran

sport hub. You do not build such a hub amongst suburban Sydney. How many people do you wish to affect detrimentally? There is a belief that the hub will not affect significantly the health of the workers and residents. US studies have debunked this assumption, and the human health impacts will only be documented and realised once continuous, ubiquitous and pervasive medium to long term exposure has been gained. This does not belong in the Liverpool Local Government Area - air quality indices are not favourable as a baseline, and any development on this scale that increases the risk (which should have been risk assessed appropriately) to human health from carcinogenic emissions that have been well documented to be deleterious to human health, should be liable for the outfall.

One has to ask the question as to why more freight is coming through Port Botany. I question the clandestine dealings that have been undertaken to stunt the flourishing of Port of Newcastle, the volume of container handling and transport thereof.

Populations in regional areas are discriminated against by not using Port of Newcastle for the lack of opportunity for employment, growth prospects and investment in infrastructure. 80% of freight is apparently recognised to travel within 40km from Port Botany, but by road via Moorebank the figure leaps to 63km. Illogical.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Since the original plan for this facility was mooted the area around it has undergone a lot of change. Large parts of the surrounding suburbs have been rezoned to medium and high density increasing the load on local roads and infrastructure which is already at saturation point.

Thirty story apartment blocks have been or are being built within 1.5km of this proposed facility and will have a wonderful view of this outrageous proposal as well as being adjacent to the freight rail line with an almost continuous line of trains passing them 24 hours a day.

This facility is within two km of Liverpool station and shopping centre and is far too close to an important business growth centre and will only stifle growth.

It has been proven time and again that there will be no reduction but an increase of trucks and general traffic in the area.

The original EIS did not allow for the amount of fill required or for retail, commercial or light industrial uses and therefore should be reassessed.

The public should not be expected to pay for the extensive road works and traffic control nor the rail link for this private facility.

This type of facility should not be sited so close to an environmental sensitive area as the Georges River nor as close to residential areas.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I have great concerns for the size of this Intermodal, would it not be better to have several small intermodals scattered around Sydney nearer to the areas where the goods are needed, therefore reducing the need to truck the goods from Moorebank to other areas of Sydney. There could be a rail link to Eastern Creek, where most of the goods are distributed.

I am also concerned with the import of such a large quantity of fill to raise the ground level, this area is close to the Georges river and any raising of land will only increase the height of floods in other areas.

Moorebank roads will not be able to cope with the increased truck movements for either the delivery of fill or the construction or the operation of the intermodal. These trucks will add to the large number of trucks with dogs attached that will be operating from the Benedicts Quarry at Sandy Point, when the Quarry resumes operation in March this year.

Please reconsider this Intermodal carefully.....it is in the WRONG area.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. Why is a project like this one being build so close to the City of Liverpool. The M5 can barely accommodate the current traffic flow let alone what will result to if the intermodal is built. As a tax payer I object totally to the project as it seem that it is only designed accommodate big business and to free up land in the inner city areas. The fact that it will operate 24 hours per day will have a detrimental effect on the local residents, the poor air quality will take a toll on the locals, children especially. Government and multi nationals please wake up!!!!!!!

I agree that RAID Moorebank is also acting on my behalf and that of the community

I am distressed about SIMTA'S official report 'Operational Traffic and Transport Assessment' which states that at this point in time there is a 20 fold higher crash rate, than the RMS threshold for blackspots, on Moorebank Avenue and Cambridge Ave. Already the SIMTA EIS has reported two fatalities over a five year period. I am even more distressed about MICL's EIS, which states that currently there is a 40 fold higher crash rate, than the RMS threshold for blackspots, on the M5 between Heathcote Road and the Hume Highway. This is the current situation. In the future, the reports state that between 75% and 85% of the trucks from the intermodals will use this M5 current black spot and 100% will use Moorebank Ave and 25% will use Sydney's worst accident hot spot. This will result in more deaths due simply, to bad planning. I am therefore highly opposed to this project and its amendments. I cannot understand this total disregard for human safety.

I consent to my name being published as an objector.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I strongly object to any clearing of vegetation and also to the construction of a freight village with other retail facilities to be made available. All these proposals in this application should be denied on the basis of the impact on local traffic, local residents, schools, aged care facilities, etc.

You cannot possibly allow such a project to operate 24/7 in such a high residential area and so close to a bio diverse area along the Georges River. So much has been done to clean up the river and make it a more beautiful area, and to have an intermodal terminal situated right on the banks of the river would be scandalous.

I vehemently object to this entire project.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I object to this whole development on the grounds that it would be completely out of line with the residential nature of the area. Already the roads are over 100% volume and cannot bear additional truck trips every day of the week, The pollution created would be detrimental to the health and welfare of all residents.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Pamela Browning

I object to this application and the entire project at this location.

In regards to non indigenous significance , there are many known military and local LEPs within and adjacent the proposed site. During the whole indigenous heritage process I believe that the hiring of third party non local peoples is questionable as the was no ceo or heritage officer involved with hired local council (Thurawal). The earmarking and cutting down of known scar trees is sacrilege.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The original EIS did not allow for the amount of fill required or for retail, commercial or light industrial uses and therefore should be reassessed.

The public should not be expected to pay for the extensive road works and traffic control nor the rail link for this private facility.

The area surrounding this monstrosity has changed considerably since first thought of, many areas have been rezoned to medium density and high density greatly increasing the population, traffic and strain on resources making the siting of this facility all the more unsuitable.

Multi story residential buildings up to thirty stories high have been or are being built within 1.5 km of the facility and adjacent to the freight rail line. What a lovely place to live and O what a view!

Attn: Director
GPO Box 39, Sydney NSW 2001
Social & Other Infrastructure Assessments, Department of Planning and Environment

I would like to submit my objection to the following Development Applications:

MOOREBANK PRECINCT WEST (MPW): RtS Concept Plan Modification- SSD 5506 MOD1

The Amended Modification Proposal seeks:

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

AND CONSTRUCTION

I object to this modification: AND TO THE BUILDING[^] OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE, 400M AWAY ADJACENT TO THE SITE WILL BE UNBEARABLE. I.E. POLLUTION, NOISE, HUGE INCREASE IN TRAFFIC, HUGE INCREASE IN TRUCK TRAFFIC, LAND VALUE DECREASE, TRAIN NOISE 24 HRS PER DAY ETC.

Name: ROBERT WILSON Dated: 23/2/2017
Address: 21 TORRENS COURT WATTLE GROVE 2173

RI agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The increase on traffic which will then increase on the pollution and with 3 young children and asthma we don't want the already compromised air worse. The loads of dirt proposed to be brought here with foreign matters, animals and bio hazards that home with that

The increased light pollution of a night time and trucks.

For the added pollution, traffic, disruption to the wildlife added pressure to m5 we oppose the intermodal and all its development.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I object to this stage and the entire project at this location because: it will affect thousands of family's and hundreds of thousands of commuters on a daily basis. Residents and young family's live in moorebank and surrounds because they like a quiet lifestyle. My home is my only asset, will the government reimburse me for any capital lost due to this development? Most politicians live on the northern suburbs, but I bet they wouldn't allow an intermodal to be built! Many residents have illnesses and a peaceful lifestyle with quiet and green surrounds aid recoveries and minimize symptoms. The government should think ahead to the future rather than coming up with bandaid solutions. Locate the intermodal closer to the new airport, in preparation for future growth instead of imposing it on existing residential areas. It is too close to family homes, meaning loud noise, dust, pollutants etc would affect residents. This would then lead to an increase in Medicare and hospital cost

s due to the increased number of people visiting the doctor with intermodal inflicted illnesses. Putting the intermodal in the moorebank will only COST the government money, and community lives. DO NOT BUILD the intermodal in moorebank.

Just because we are blue collar Australians doesn't mean we should get treated any different. We as Australians all deserve a safe healthy place to live. Are we still the lucky country? Or does that only exist for the politicians and rich people of our country. Shame!

Yours sincerely, Ross

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I oppose the imposition of the Moorebank Intermodal proposals on my community, I am disgusted that key information was withheld until after the approval process relating to the previously thought extinct species and would like to remind the government that this project will do enormous damage to the people and the environment of the Georges River. I am dismayed that such contempt is held for my neighbours and my community and resist outright the need to put this proposal in suburban Liverpool

It would be well worth considering the Greens proposal to place intermodal projects on the periphery of the cities and use both Port Kembla and Newcastle ports along with port Botany to distribute products fairly and will less environmental destruction where more could be transferred by rail and not put in jeopardy the health and well being of the people of Liverpool.

It is abhorrent to me that those tasked with the long term running of the intermodal will not be liable for the additional health costs associated with the pollutants being thrust on our community. It is abhorrent that again this government is happy to allow profits to be wrought by developers and all the long term health costs be borne by the community and tax payers generally.

It is time the Government of the day accepted they work for the community not big business and did what is right long term for the families that pay taxes and have the right to vote them in AND OUT.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Since the proposed project will affect traffic on the M5, and create an entirely new form of congestion and traffic throughout the entirety of the George's River and Botany Bay, no further progress should be made until stakeholders owning properties in affected council areas including the Sutherland Shire, Bayside Council, Georges River Council as well as the Bankstown and Canterbury areas are contacted and given consultation.

This proposal would affect a much wider number of stakeholders on a city-wide level who have been completely left out of consultation in any fair or meaningful way.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This project will increase traffic in an already congested area resulting in higher risks of accidents (in an area with many black spots already). In addition to the traffic, this project will result in sound and light pollution as well as the inevitable increase in air pollution as a direct result of the large numbers of trucks that the project will require.

The reconfiguration will also add congestion to this area and will not provide any reduction in the issues that the large amount of trucks will call, namely increased traffic and in turn, increased chance and/or incidence of accidents in an area with many black spots.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

To: DPE CSE Information Planning Mailbox; Craig Kelly; Anne Stanley; Lee Rhiannon; Gladys Berejiklian; Anoulack Chanthivong; Melanie Gibbons; Paul Lynch; Melinda Pavey; Mehreen Faruqi
Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reasons behind my objection is as follows:-

1. A Construction Noise and Vibration Management Plan (CNVMP) needs to be prepared for the Proposal, considering all reasonable and feasible measures to reduce noise levels during and after construction. No use stating are predicted to comply with the established criteria. Either they do or they don't and if they don't something needs to done about it.
2. The Proposal has the potential to increase road noise levels at sensitive receivers along the M5 Motorway, Moorebank Avenue and Anzac Road.
3. On the basis of the assessments conducted by WM, it's not clear that noise and vibration impacts associated with the construction and operation of the Proposal are not expected to create significant annoyance to the nearby community.
4. Over 2 years of construction hell, with trucks, coming and going 24/7. Dust, emissions, backhoes, excavators, mobile cranes, air compressors, jack hammers, dozers, the list goes on. All this machinery during the day makes for constant noise from 7am to 6pm Monday to Friday and 8am to 1pm Saturday!
5. Bulk earthworks activities and construction works required to facilitate the Moorebank Avenue upgrade during peak construction periods will be undertaken outside of standard construction hours, ie anytime up to 10pm. This is a joke!
6. Getting away with material being dropped off in the late hours of the day
7. Such as:-

• Material Delivery – Weekdays (6am-10pm) Saturdays (7am-6pm) • Direct placement – Weekdays (7am-10pm) Saturdays (8am -6pm) • Stockpiling – Weekdays (7am-6pm) Saturdays (7am-6pm) • Crushing – Weekdays (7am-6pm) Saturdays (8am-1pm) • Moorebank Avenue Upgrade – Weekdays (6am-10pm) Saturdays (7am-6pm)

The residents will not be happy with this.

1. If approved residents will not be happy with the operational hours. Movement of freight between the IMT and warehouses within the Proposal site would be undertaken 24 hours per day, seven days a week. The warehouses would be operational for 24 hours per day, seven days a week. That means lots of noise, traffic and lights in the area.
2. Constant noise of construction machinery, backhoes, loaders, scrappers, dozer and the list goes on.
3. The amount of cars and trucks would entering the site throughout the day, bound for the warehouses will be approximately 1,936 cars (3,872 movements) and 282 trucks which accounts for (564 movements). These vehicles would need to enter the site each day which is just so disruptive, noisy and unacceptable in a residential area. This will not only be during the construction phase but ongoing.

4. Transient noise events associated with the operation of the site have the potential to cause sleep disturbance include horns, tonal reversing alarms, pneumatic trailer brakes, and 'banging' noises associated with moving containers.
5. The Proposal will generate additional traffic along the M5 Motorway west of Moorebank Avenue, along Moorebank Avenue from the Proposal site northwards and minor additional traffic along Anzac Road to the Yulong industrial estate.
6. During the construction of the Proposal, an enormous amount all heavy and light vehicles, will need to travel to and from the site via the M5 Motorway and Moorebank Avenue. This is going to cause a traffic nightmare and hours on resident's journeys. Not to mention all the noise and pollution the additional vehicles are going to cause.
7. Health issues such as asthma, lack of sleep due to the noise will increase stress levels of residents.
8. A lot more traffic congestion/volume and accidents
9. Increase in road noise levels during construction and operation.

Who wants to put up with the operation of an Intermodal that is running 24 hours a day 7 days a week? Not the residents of Moorebank, that's for sure. Say no to the Intermodal. It is not welcome in our Community. It needs to be located in the bush away from Communities. We just want a fair go.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The project is ill conceived. The Enfield Intermodal already meets the capacity of the rail network and the quantity of containers arriving into Sydney making this Project obsolete before it already turns soil. The M5 and M7 are parking lots on a daily basis due to accidents and congestion. The Intermodal needs to be located at Eastern Creek or the new international airport where the wharshouses are located instead of contesting our roads even further.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

SIMTA lies!!!!

At first, they said there would be little impact from noise and then they said that the design of the project would reduce the amount of noise that impacted local residents. Gave us a design where warehousing on the perimeter of the development was meant to block all of the noise from their development.

But now their design shows their true intention and disregard for local residents as the trucks using this site to load docks and unload are now as close to houses as they could possibly get them. This will mean more of the associated noise, light and pollution will affect the local residents.

This is a truly disreputable company which all New South Wales residents should be protected from.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Tracey McDonald Wattle Grove, New South Wales, 2173, Australia

Attn: Director
GPO Box 39, Sydney NSW 2001
Social & Other Infrastructure Assessments, Department of Planning

I would like to submit my objection to the following Development Applications:

MOOREBANK PRECINCT WEST (MPW): Rts Concept Plan Modification- SSD 5506 MOD1

The Amended Modification Proposal seeks:

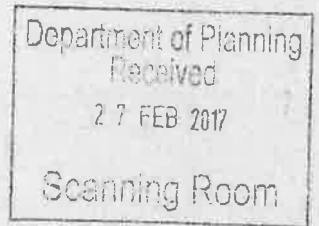

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

I object to this modification:

It should never be near residential housing. The land fill will destroy the ecology of the area and the quality of water in the Georges River Basin.

Name: [Redacted] Dated:..... 23-2-2017.....
Address..... [Redacted]

Do you wish your name to be withheld from publication. (Please circle) No / Yes
Have you made any Political donations (please circle) No / Yes
I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2

The Amended Modification Proposal seeks:

- Increase the site area to include works proposed within the Moorebank
- Avenue road corridor
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- Importation of 600,000 cubic metres of fill
- Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

I object to this modification:

Moorebank Avenue is already congested. The area cannot cope with more traffic flow. The M5 is a car park most of the time. It would destroy the flood plain.

Name: [Redacted] Dated:..... 23-2-2017.....
Address..... [Redacted]

Do you wish your name to be withheld from publication. (Please circle) No / Yes
Have you made any Political donations (please circle) No / Yes
I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Stage 2 Application – SSD7628

- Construction of Approximately 300,000 square metres of warehousing and distribution facilities
- Construction of a freight village comprising 8,000 square metres of retail, commercial and light industrial uses
- Construction of the internal road network and its connection to the public road network
- Construction of ancillary infrastructure such as drainage infrastructure and utilities relocation and installation
- Clearing of vegetation earthworks, remediation, landscaping and signage
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres, widening the road and upgrading infrastructure such as stormwater drainage
- Upgrading of intersections along Moorebank Avenue
- Subdivision to facilitate long term leases for future tenants.

I object to this application:

It is an abomination. Too many housing estates border
this area. Are you going to rehouse everyone in Wattle Grove
and the ne Glenfield Estate.

Name: [REDACTED] Dated:..... 23-2-2017.....
Address..... [REDACTED]

Do you wish your name to be withheld from publication. (Please circle) No / Yes

I object to this application and the entire project at this location.

Letter of objection: Name: Vivienne Age: 9 Hi, my name is Vivienne and I am David's daughter, and I do not like how you are wanting to take over our precious area because trees help us to breathe and if we chop them down, that will be harsh for the environment. So people who are trying to stop putting stuff in precious natured areas is a waste of God's work. So I am trying to encourage you to stop knocking over precious land and putting in buildings and stuff that some people might not think is right for Moorebank.

So me and my family would like to stop this invasion of buildings and trucks. I would like to let nature run through so people can appreciate the work that God had done for us and the world, and could even appreciate you for building our houses. Me and my family think it's enough because there are too many houses and would love your help if you could switch your brain on and think about the future. If you have pets at home they will probably be extinct in the future because you are giving this man money and knock down all nature and put in buildings so people who would like to stop this nonsense would really appreciate if you did.

Thank you.

I consent to my name being published as an objector.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I particularly worried that the terminal will be built so close to the Liverpool CBD and surrounding housing areas including Wattle Grove and Moorebank. Children studying in local schools and people going about their lives around the area will be subjected to constant polluted air from increased transport and work. Their health will be impacted and they will increase needs for health care at local clinics and hospitals.

At the moment Wattle Grove residents have enjoyed clean and fresh air from the greens along its streets and park land. The intermodal project will change all these and potentially put off residents and drive people and investors away.

On the other hand, if these waterfront lands are developed into beautiful residential and commercial properties, it will do good to the Liverpool and CBD precinct.

I am appealing to politicians and policy makers to take a close look at the suitability of this project and consider the effects it will have if it continues this path and the opposite effects if residential development is pursued.

I consent to my name being published as an objector.

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I am concerned that the current land on the proposed site will not be remediated adequately enough and will just be covered over with the fill. This concerns me due to the high number of chemicals and materials left behind by The Defence Department. The area is known for floods and should a big flood occur it could cause irreparable damage to the environment, in particular The Georges River and the critically endangered, assumed extinct plant of the *hibbertia fumana* species.

I am against the increase to height of Moorebank Ave for similar reasons to the above eg flooding and run off.

Talk of moving Moorebank Ave so it runs down the eastern side of this East Terminal brings this road closer to Wattle Grove residents adding more noise, light and pollution to these residents. I am opposed to the idea of this.

I believe the upgrading of intersections along Moorebank Avenue is insufficient for the increase in traffic the intermodal will produce. The upgrading of many more intersections around Liverpool and beyond is essential for this operation to operate smoothly as proven by independent and experienced road modellers.

It seems nobody whether in business or in politics seems willing to pay for this.

I agree that RAID Moorebank is also acting on my behalf and that of the community

The estimated levels of noise provided in the submission as being acceptable are contradicted by Transport for NSW and Sydney Trains Noise Logging reports of 2015. The non-reporting of the extinct flora until 4 days after the report points to this proponent doing anything it can to achieve its own interest and not the interest of the community. There is no community consultation.

The input of 2million tons of fill to raise the ground levels of the area above the flood plain will change the entire water flow and flood plain area. The re-direction of rainfall from the natural ground levels will cause Anzac and Harris Creeks to dry up. The natural water flows of the surrounding land and concreting with drainage towards Georges River means these creeks will die. There are no plans to create an alternate site for the backed up flood waters to retreat will mean other areas previously free from flooding could be endangered. The existing Concept plan submitted by SIMTA and MICL will be completely change by these new submissions and therefore all work should cease until there is a new PAC and community consultation. The three new submission make a joke of the Concept plan . The increase in sealed areas will stop normal water runoff soaking the ground and following the natural watercourses into Anzac and Harris Creeks. More must be done to protect these pristine creeks, their flora and fauna.

I have asked SIMTA/MICL to supply details of their policy when dealing with unexpected finds of flora and fauna which are on the endangered lists. Someone was supposed to get back to me, however I am still waiting. I am left to ponder what would happen if the found some significant archaeological find which would cause harm to the submissions. Would they be honest and report immediately or bury the find.? We need an independent investigation to be completed to confirm the findings of the submissions. PAC must do conduct a thorough investigation to back up the submissions estimates.

For the attention of the General Manager / Planning Manager / Planning Department

Application SSD 7628
 Address Moorebank Avenue, Moorebank, NSW
 Description The SIMTA site - Construction and operation of warehouses and distribution facilities on the SIMTA site at Moorebank. The proposal would also include the establishment of internal site roads, a freight village, ancillary supporting infrastructure (stormwater and drainage, utilities relocation and installation, vegetation clearing, remediation, earthworks, signage and landscaping, possible subdivision and activation of existing warehousing.
 Name of commenter Local Resident
 Address of commenter 26 Haughton Court, Wattle Grove
 Email of commenter redwolfoz@gmail.com

Comment

The intermodal is not appropriate to the area. It will place a huge burden on already overcrowded roads and will excessively increase noise.

Why is this not located at Badgerys Creek near the proposed airport?

I agree that RAID Moorebank is also acting on my behalf and that of the community.

I object to this application and the entire project at this location.

Sydney Trains have conducted Noise Level testing in 2010 and 2015 in Casula The reports are different to the levels supplied in the submission. The estimated levels of noise provided in the submission as being acceptable contradicted the findings of Transport for NSW and Sydney Trains Noise Logging reports of 2015. The non-reporting of the extinct flora until 4 days after the report points to this proponent doing anything it can to achieve its own interest and not the interest of the community. There is no community consultation.

The re-direction of rainfall from the natural ground levels will cause Anzac and Harris Creeks to dry up. The natural water flows of the surrounding land and concreting with drainage towards Georges River means these creeks will die. There are no plans to create an alternate site for the backed up flood waters to retreat will mean other areas previously free from flooding could be endangered. The existing Concept plan submitted by SIMTA and MICL will be completely change by these new submissions and therefore all work should cease until there is a new PAC and community consultation. The three new submission make a joke of the Concept plan . The increase in sealed areas will stop normal water runoff soaking the ground and following the natural watercourses into Anzac and Harris Creeks. More must be done to protect these pristine creeks, their flora and fauna.

We need an independent investigation to be completed to confirm the findings of the submissions. This Project is just too big and complicated to be fully understood by the community unless there is further Community consultation, which has been zero since consent was granted. PAC must do conduct a thorough investigation to back up the submissions estimates.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Tim Russell Casula, New South Wales, 2170, Australia

Subject: MOOREBANK PRECINCT EAST [MPE] : Stage 2 Application - SSD 7628

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This project will impact upon my family and them getting around the area and having to battle with truck and more traffic. The roads around here are not equipped to handle the increased amount of traffic.

I have not made any Political donations over \$1000.

Yours sincerely, Timothy McGuinness Wattle Grove, New South Wales, 2173, Australia
