Moorebank Precinct East (SSD 7628)

Stage 2: Construction Compliance Report – #14

October 2022 - March 2023

Limitations on use and reliance

Aspect Environmental Pty Ltd has prepared this report solely for the use of the Client and those parties with whom a warranty / end user agreement or licence has been executed, or with whom an assignment has been agreed. Should any third party wish to use or rely upon the contents of the report, written approval must be sought from Aspect Environmental Pty Ltd; a charge may be levied against such approval.

Aspect Environmental Pty Ltd accepts no responsibility or liability for:

- a) the consequences of this document being used for any purpose or project other than for which it was commissioned, and
- b) this document to any third party with whom an agreement has not been formally executed.

The work undertaken to provide the basis of this report comprised a study of available documented information from a variety of sources (including the Client).

Should additional information become available which may affect the opinions expressed in this report, Aspect Environmental Pty Ltd reserves the right to review such information and, if warranted, to modify the opinions accordingly.

1. Introduction

This six-monthly construction compliance report, as required by condition of consent (CoC) C21 of the Moorebank Precinct East (MPE) Stage 2 State significant development consent 7628 (SSD 7628), has been prepared on behalf of LOGOS for the compliance reporting period October 2022 to March 2023.

1.1 Moorebank Logistics Park Overview

The MPE Project and Moorebank Precinct West (MPW) developments are being developed into the Moorebank Intermodal Precinct (MIP). When completed, the MIP will have a throughput of 1.55 million shipping container equivalents.

1.2MPE Stage 2 Development

Consent for the construction and operation of the Moorebank Precinct East Stage 2 (SSD 7628) Development was received on 31 January 2018, the second stage of development under the MPE Concept Approval (MP10_0193). The consent instrument is Development Consent SSD 7628 and SSD partial consent (Subdivision) SSD 7628.

MPE Stage 2 has been subject to the following modification applications:

- MPE Stage 2 Modification 2 (SSD 7628-Mod 2), approved on 31 January 2020
- MPE Stage 2 Modification 3 (SSD 7628-Mod 3), approved on 18 December 2020
- MPE Stage 2 Modification 4 (SSD 7628-Mod 4), approved on 19 January 2021
- MPE Stage 2 Modification 1 (SSD 7628-Mod 1), approved on 14 March 2022.

Figure 1-1 shows the MPE Stage 2 site layout, including the delineation between construction and operational areas. Scope of works for the MPE Stage 2 development are detailed in Section 1.4 below.

1.3 Site Location

The MPE Stage 2 development is located on Moorebank Avenue, Moorebank in NSW. The site is situated within the Liverpool LGA 30km south-west of the Sydney CBD and approximately 4km south of Liverpool CBD. The site is generally described as the land immediately to the east of Moorebank Avenue and to the north of the East Hills passenger rail line. The site comprises the following lots:

- Lot 1 DP1048623
- Part Lots 1, 2 and 4 DP 1197707
- Moorebank Avenue
- Lot 1 DP 825352
- Lot 21 DP1048263 (registered as 21/1253673)
- Lot 22 DP1048263 (registered as 22/1253673)
- Lot 23 DP1048263 (registered as 12/1251885)
- Lot 12 DP1048263 (formerly part of Lot 24 and registered as 12/1251885)
- Lot 13 DP1048263 (formerly part of Lot 24 and registered as 13/1251885)

Lot 26 DP1048263 (formerly Lot 25 and registered as 26/1253673).

1.4 Scope of Works

The MPE development involves the construction and operation of an intermodal terminal facility, including an intermodal rail terminal (IMEX), rail link connection to Southern Sydney Freight Line, warehouse and distribution facilities, freight village (ancillary site and operational services), stormwater, landscaping, servicing and associated works on the eastern site of Moorebank Avenue, Moorebank.

The MPE Stage 2 (SSD 7628) development includes the following key components:

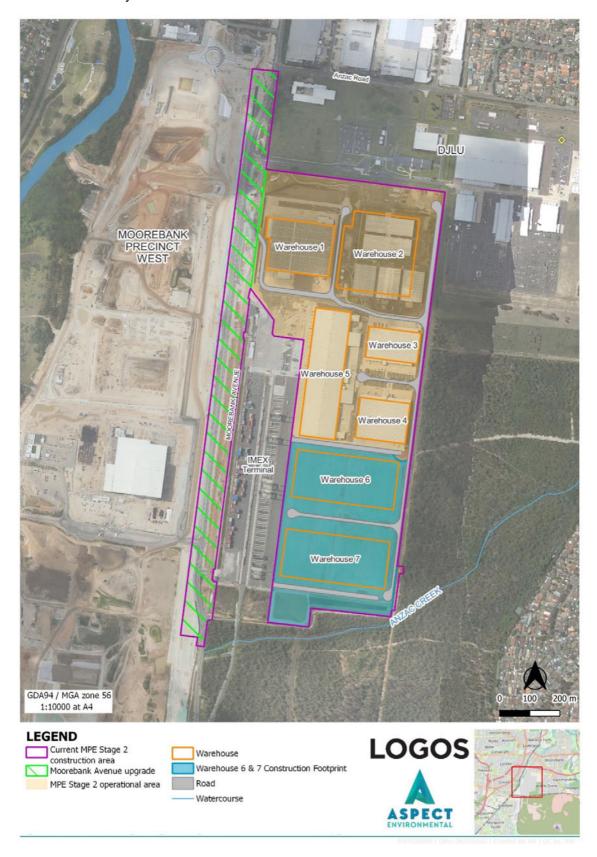

- Earthworks, including the importation of 600,000m³ of fill and vegetation clearing
- Approximately 300,000m² gross floor area (GFA) of warehousing and ancillary offices
- Warehouse fit-out
- Freight village, with 8,000m² GFA of ancillary retail, commercial and light industrial land uses
- Internal road network and hardstand across site
- Ancillary supporting infrastructure within the site, including:
 - o stormwater, drainage and flooding infrastructure
 - utilities relocation / installation
 - o fencing, signage, lighting, remediation and landscaping
- Moorebank Avenue upgrade including:
 - o raising by about two metres and some widening
 - o embankments and tie-ins to existing Moorebank Avenue road levels
 - signalling and intersection works
- Intersection upgrades along Moorebank Avenue including:
 - Moorebank Avenue/MPE Stage 2 access
 - Moorebank Avenue/MPE Stage 1 northern access
 - o Moorebank Avenue/MPE Stage 2 central access
 - MPW Southern Access/MPE Stage 2 southern emergency access
- Operation 24 hours a day, seven days per week.

1.5Works Undertaken October 2022 – March 2023

The following construction works have been undertaken during the reporting period:

- installation of inground and high-level services, sewer rising main and screw piles
- delivery and installation of structural steel
- pole removal
- infilling of borrow pits
- office 6A&6B preparatory works
- warehouse strip-footing
- roof sheeting and wall cladding
- pre-cast installation works.

Figure 1-1 MPE 2 site layout

1.6 Scope and Purpose

Compliance tracking and reporting requirements for MPE Stage 2 are specified in CoC C21 and are summarised in Table 1-1. In addition to tracking compliance with the CoC, the Compliance Tracking Program (CTP) tracks conformance with the Final Compilation of Mitigation Measures (FCMMs) arising from the MPE Stage 2 Response to Submissions.

This report represents the fourth six-monthly report required under CoC C21(c)(ii) (as modified by SSD-7628-Mod-3) and the 14th compliance report since the commencement of construction. This report documents compliance against the relevant construction requirements outlined in the MPE Stage 2 CoC and FCMMs for the period October 2022 – March 2023.

Table 1-1 Requirements for compliance reporting (updated to reflect SSD-7628-Mod-3)

CoC	Condition	Reference		
C21	The Proponent must prepare and implement a Compliance Tracking Program (CTP) to track compliance with the requirements of this approval. The Compliance Tracking Program must be submitted to the Secretary for approval prior to the commencement of	The CTP has been prepared to satisfy this condition. CTP (Rev 5) dated 24 May 2018 was approved by the Department of Planning and Environment on 8 June 2018 prior to the commencement of construction.		
	construction.	An updated CTP (rev 7) was submitted to DPE		
	The Compliance Tracking Program must include, but not be limited to:	on 19 April 2021 to reflect the approval of SSD 7628 MOD 3 and 4 applications.		
(c)	provision for periodic reporting of compliance status to the Secretary, including but not limited to: (i) a Pre-Construction Compliance Report (PCCR) prior to the commencement of construction,	The final PCCR was issued to the DPE on 29 August 2018.		
	(ii) Six-monthly Construction Compliance Reports (CCR), for the duration of construction,	This six-monthly compliance report has been prepared to satisfy this condition and identifies a description of the compliance status of the MPE Stage 2 Development for the period from October 2022 to March 2023.		
	(iii) a Pre-Operation Compliance Report (POCR) prior to the commencement of operation, and six-monthly operational	POCR documents for MPE Stage 2 are being issued progressively to the DPE, in accordance with the approved Program for Operational Documentation (rev 3, dated 22 Mach 2019).		
	compliance reports;	The compliance status of pre-operational and operational conditions is detailed in separate operational compliance reports.		

1.7 Six-monthly Compliance Report Structure

This compliance report has been prepared in accordance with the CTP (2021). The Compliance Reporting – Post Approval Requirements (CRPAR) (Department of Planning, Industry and Environment, June 2018) have also been referenced in the preparation of this report. The structure of the compliance report is as follows:

- Section 1 Introduction: Provides a brief overview of the MPE Project, a brief summary of the MPE Stage 2 works and the works undertaken during the reporting period and the scope and purpose of this report.
- Section 2 Project Compliance: This includes detail of any environmental incidents and non-compliances, internal and external audit results, progress against previous compliance report actions and response to any complaints or enquiries.
- Section 3 Compliance Summary: Provides a conclusion of the report.

Appendix A contains the compliance tracking table for SSD 7628 Minister's Conditions of Consent.

Appendix B contains the compliance tracking table for SSD 7628 Partial Consent Subdivision.

Appendix C contains the compliance tracking table for SSD 7628 Final Compilation Mitigation Measures.

1.8 Methodology for Data Collection

This compliance report has been prepared with input from Tactical Group, BMD, Knight Frank, Hansen Yuncken and LOGOS, in accordance with the CTP requirements.

This report integrates information collated from regular compliance activities, such as progress meetings, inspections, surveillance and monitoring undertaken in accordance with the relevant Construction Environmental Management Plan and sub-plans.

2. Project Compliance

2.1 Previous Actions

No non-compliances are outstanding from the previous construction compliance report (CCR #13, 19 December 2022).

No independent audits were conducted during the reporting period. The next independent audit is scheduled to be completed in 2024.

2.2 Environmental Incidents

No reportable environmental incidents occurred during the reporting period.

2.3 Conditions of Consent

Compliance against the CoC is outlined in Appendix A and Appendix B. The status of each compliance requirement during the reporting period is recorded using the descriptors prescribed by the CRPAR (DPE, 2020). These are provided in Table 2-1.

Table 2-1 Compliance status descriptors (CRPAR 2020)

Status	Description
Compliant	The proponent has collected sufficient verifiable evidence to demonstrate all elements of the requirement have been complied with.
Non-compliant The proponent has identified a non-compliance with one or more end of the requirement.	
Not triggered	A requirement has an activation or timing trigger that has not been met at the phase of the development when the compliance assessment is undertaken, therefore an assessment of compliance is not relevant.

2.4 Non-Compliance

Two non-compliances were identified during the reporting period. The detail of the non-compliances and their current status are provided in Table 2-2.

Table 2-2 Non-compliances identified by CCR #14

CoC Ref	Туре	Detail	Proposed or Completed Action	Current Status
B84	Non- compliance	Construction works on WH6 and 7 commenced in advance of the noise assessment for mechanical plant and other noisy equipment being submitted to the Planning Secretary.	Submit required documentation to the Planning Secretary.	Noise Assessment was submitted to the Planning Secretary on 28 June 2023. Closed.

CoC Ref	Туре	Detail	Proposed or Completed Action	Current Status
C16	Non- compliance	The Applicant failed to notify DPE within 7 days of becoming aware of the noncompliance identified under B84. The Applicant was made aware of the non-compliance on the 28 March 2023.	Provide notification of non-compliance to DPE.	Notification provided by this CCR. Closed.

2.5 Complaints Management

Complaints and enquiries are managed in accordance with the Community Communication Strategy (Rev 11, 19 March 2021).

No complaints relevant to MPE Stage 2 works were received during the reporting period. Complaint details and subsequent responses are recorded within the community complaints register, which is maintained across the entire MIP Precinct. The register does not differentiate between development consents or work stages. Due to this, some complaints may be duplicated within the compliance reporting documentation across the MIP.

3. Compliance Summary

At the completion of this compliance reporting period works have generally been undertaken in compliance with the CoC, FCMMs and approved CEMP and subplans.

Periodic review of compliance against the CoC will continue to be undertaken.

Compliance Report Declaration

Project Name	Moorebank Logistics Park – MPE Stage 2
Project Application Number	SSD 7628
Description of Project	Development of an intermodal facility, including warehouse and distribution facilities, freight village (ancillary site and operational services), stormwater, landscaping, servicing and associated works on the eastern side of Moorebank Avenue, Moorebank.
Project Address	Moorebank Logistics Park
Proponent	LOGOS Property
Title of Compliance Report	Six-monthly Construction Compliance
Date	29/11/2023

I declare that I have reviewed relevant evidence and prepared the contents of the attached Compliance Report and to the best of my knowledge:

- the Compliance Report has been prepared in accordance with all relevant conditions of consent:
- the Compliance Report has been prepared in accordance with the Compliance Reporting Post Approval Requirements;
- the findings of the Compliance Report are reported truthfully, accurately, and completely;
- due diligence and professional judgement have been exercised in preparing the Compliance Report;
- the Compliance Report is an accurate summary of the compliance status of the development.
 Notes:
- Under section 10.6 of the Environmental Planning and Assessment Act 1979 a person must not include false or misleading information (or provide information for inclusion) in a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is false or misleading in a material respect. The proponent of an approved project must not fail to include information (or provide information for inclusion) in a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is materially relevant to the monitoring or audit. The maximum penalty is, in the case of a corporation, \$1 million and for an individual, \$250,000; and
- The Crimes Act 1900 contains other offences relating to false and misleading information: section 307B (giving false or misleading information – maximum penalty 2 years' imprisonment or 200 penalty units, or both).

A8	The container freight road volume must not exceed 250,000 TEUs p.a., subject to the exception identified in condition A9, which may only be considered under condition A9 after the facility has been in operation.	Operation	This compliance report relates to construction only.				
	and the facility has been in operation.						

A9	The movement of container freight by road may exceed the 250,000 TEU limit p.a. by up to a further 250,000 TEU p.a., if the Secretary is satisfied that traffic monitoring and modelling of the operation of the facility demonstrate that traffic movements resulting from the proposed increase in TEU will achieve the objective of not exceeding the capacity of the transport network.	Operation	This compliance report relates to construction only.		
A10	In determining the TEU limit, the Secretary may take account any roadworks or mitigation measures proposed under a Voluntary Planning Agreement to minimise traffic impacts.	At all times	Noted.		
A11	The maximum GFAs for the following uses apply: a) 300,000m ³ for the warehousing and distribution facilities; and b) 8,000m ³ for the freight village.	Operation	This compliance report relates to construction only.		
A12	The warehousing and distribution facilities must only be used for activities associated with freight using the MPE Stage 1 intermodal terminal.	Operation	This compliance report relates to construction only.		
A13	Freight village tenants and occupations are restricted to those activities that provide: a) ancillary support for the development, its tenants, worker population and visitors; b) a nexus with activities undertaken in relation to the warehouse, logistics functions of the IMT development and/or: c) provide aligned services to the intermodal functions. Prior to occupancy of any freight village tenancy, and every subsequent occupation of these tenancies, details of the tenant and occupation activity is to be submitted to the Secretary demonstrating that the proposed activity complies with this condition.	Operation	This compliance report relates to construction only.		
	Staged Submission of Strategies, Plans or Programs				
A14	With the approval of the Secretary, the Applicant may submit any strategy, plan or program required by this consent on a staged basis.	At all times	Management plans for early works and construction were delivered in accordance with the approved Document Delivery Strategy (rev 5, dated 22 February 2018). The Program for Operational Phase Documentation (POPD), approved by DPE on 21 May 2019, outlines the operational plans proposed to be combined under both the MPE Stage 1 (SSD 6766) and (SSD 7628) consents. Compliance with operational conditions is reported in the Pre-Operational Compliance reports for Area 1 and Area 2.		
A15	If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage of the development to which the strategy, plan or program applies, the relationship of the stage to any future stages and the trigger for updating the strategy, plan or program.	At all times	Management plans for early works and construction were delivered in accordance with the approved Document Delivery Strategy (rev 5, dated 22 February 2018). The Program for Operational Phase Documentation (POPD), approved by DPE on 21 May 2019, outlines the operational plans proposed to be combined under both the MPE Stage 1 (SSD 6766) and (SSD 7628) consents. Compliance with operational conditions is reported in the Pre-Operational Compliance reports for Area 1 and Area 2.		

	Combined Submission of Strategies. Plans or Programs				
A16	Combined Submission of Strategies, Plans or Programs With the approval of the Secretary, any strategy, plan or program required by this consent may be combined.	At all times	Management plans for early works and construction were delivered in accordance with the approved Document Delivery Strategy (rev 5, dated 22 February 2018). The Program for Operational Phase Documentation (POPD), approved by DPE on 21 May 2019, outlines the operational plans proposed to be combined under both the MPE Stage 1 (SSD 6766) and (SSD 7628) consents. Compliance with operational conditions is reported in the Pre-Operational Compliance reports for Area 1 and Area 2.		
A17	In seeking the Secretary's approval, a clear relationship must be demonstrated between the strategies, plans or programs that are proposed to be combined.	At all times	Management plans for early works and construction were delivered in accordance with the approved Document Delivery Strategy (rev 5, dated 22 February 2018). The Program for Operational Phase Documentation (POPD), approved by DPE on 21 May 2019, outlines the operational plans proposed to be combined under both the MPE Stage 1 (SSD 6766) and (SSD 7628) consents. Compliance with operational conditions is reported in the Pre-Operational Compliance reports.		
	Notification of Commencement		is reported in the Fre-Operational Compilance reports.		
A18	The of commencement of each of the following phases of the development must be notified to the Department, at least one month before that date: a) early works; b) fill importation; c) construction; d) operation; and e) occupation. If the construction, operation or occupation of the development is to be staged, then the Applicant must notify the Department in writing at least one month before the commencement of each stage, and clearly identify the development to be carried out in that stage.	At all times	DPE notified via email for early works and construction on 27 February 2018. DPE notified via email for commencement of progressive occupation and operations on 18 June 2019. DPE will be notified of commencement of future phases of development. Operational compliance is reported on in a separate compliance report.		
A19	Evidence of Consultation Where conditions of this consent require a document to be prepared in consultation with an identified party, the Applicant must: (a) consult with the relevant party prior to submitting the subject document to the Secretary for approval; (b) provide evidence that at least two weeks was provided for the relevant party to comment on the document; and (c) include in the document: (i) details of the consultation undertaken; (ii) a description of how matters raised by those consulted have been resolved to the satisfaction of both the Applicant and the party consulted; and (iii) details of any disagreement remaining between the party consulted and the Applicant and how the Applicant has addressed the matters not resolved.	At all times	Stakeholder consultation and outcomes are detailed in each approved management plan and document as required.		
	Statutory Requirements				
A20	All licences, permits, approvals and consents as required by law must be obtained and maintained as required for the development. No condition of this consent removes the obligation for the Applicant to obtain, renew or comply with such licences, permits, approvals and consents.	At all times	Specific licence/permit requirements are addressed in all relevant management plans for construction and operations. MPE Stage 2 Construction Environmental Management Plan (CEMP) (rev 4) dated 5 April 2018, approved by DPE 8 June 2018. The revised CEMP (rev 17, 18 August 2022) is currently being implemented on site. MPE Operational Environmental Management Plan (OEMP) was approved by DPE on 9 September 2019. The revised OEMP (rev 16, 19 February 2021) is currently being implemented on site.		
	Demolition				

A21	All demolition work must be carried out in accordance with the latest version of Australian Standard AS 2601-2001: The	Pre-Construction	No demolition work was undertaken during the reporting period.		$\overline{}$	$\overline{}$	
	Demolition of Structures (Standards Australia, 2001) and the requirements of the Work Health and Safety Regulation 2011.	The constitution	no demonstrative and the date of the control of the			1	
			Section 1.3.3 of the revised CEMP (rev 17, 18 August 2022) describes requirements relating to demolition and is currently being	l i		1	
			implemented on site.	i i	4	1	
	Design Master Plans						
	Prior to construction, the Applicant must prepare amended Development Layout Plans and Design Plans to the satisfaction of the Secretary which achieve the improvements and revisions referred to in conditions B139 and 140, including integration of Water Sensitive Urban Design (WSUD) and landscape design.	Pre-Construction	Development Layout Plans and Design Plans for Warehouse Precinct 1 (issue B and C) dated 20 June 2010 were approved by the DPE on 3 July 2018.				
	water Jerishtve Gruan Design (w300) and landscape design.		Revised Development Layout Plans were approved by DPE on 4 September 2020 as part of the Urban Design and Landscape Plan for Areas 1 and 2 (rev 9C, dated 12 August 2020).				
			The revised MPE Stage 2 Consolidated UDLP (rev 12, dated 18 December 2020), including revised development layout plans and design plans, was approved by DPE on 5 February 2021.				
A23	Water Sensitive Urban Design	la a:		-		-	
	Prior to commencement of early works and fill importation, the Applicant must prepare Amended WSUD plans that incorporate water sensitive urban design principles, be generally in accordance with relevant Council policies, plans and specifications, and address condition 840, to ensure that: a) the stormwater and drainage systems for the development will operate independently of any works proposed as part of the	Pre-Construction	The Stormwater Management Plan (SMP) was approved by DPE to be submitted as part of a suite of phased documentation. SMP-W1P (rev 2) - 28 June 2018 was for the construction and operation of Warehouse 1 Precinct and demolition and completion of bulk earthworks for the remainder of the site.				
	MPW Stage 2 development application (SSD 7709) that have not been incorporated in this development, unless development consent has been granted to those works under SSD 7709 prior to commencement of early works and fill importation;		The SMP-W1P (rev 2) - 28 June 2018, was approved by DPE on 2 July 2018.				
	b) adequate overland flow paths have been provided in the event of stormwater system blockages and flows in excess of the 1% ARI rainfall event; c) on site detention basins are visually unobtrusive; d) that the designs of the basins, and associated setbacks and fencing, ensures public safety;		The SMP – Balance of Site (SMP – BoS), prepared by Costin Roe, was approved by DPE on 18 March 2020 on the condition that all the onsite detention basin outlets to natural drainage lines must be constructed of natural materials to facilitate natural geomorphic processes and to include vegetation as necessary.				
	d) that the designs of the basins, and associated setbacks and tencing, ensures public safety; e) adequate site area has been provided for stormwater treatment; f) design of stormwater treatment systems minimises the risk of failure; and g) setback of drainage work and fencing has been finalised in consultation with RMS.		Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev D, dated 17 August 2020) was conditionally approved by DPE on 14 September 2020.				
	Note: Notwithstanding modification application SSD-7628-Mod-2, all drainage on the site must comply with this condition.		Following confirmation that TfNSW accepted the final design drawings for OSD 10 as part of the Moorebank Avenue Upgrade Works, the Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev D, dated 17 August 2020) was revised and resubmitted in accordance with the conditional approval.				
			The revised Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev E, dated 18 February 2021) was approved by DPE on 19 March 2021.

A28	Prior to operation of the development, a compliance certificate for water and sewerage infrastructure servicing of the site under section 73 of the Sydney Water Act 1994 must be obtained.	Pre-Operation	Sydney Water provided the following compliance certificates on 18 August 2019: *Case 144792 (WW and PW) — Stage 1: Comprises an intermodal terminal facility, rail corridor including a link to the SSFL. *Case 144793 — insertion of WW and PW TEE (from 144792): An intermodal terminal (IMT), warehouse and distribution facilities and a freight village . *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and distribution facilities and ancillary offices. *Case 178032 — Target Warehouse: Approximately 300,000m² of warehousing and dist		
	Protection of Public Infrastructure				
A29	Before the commencement of construction, the Applicant must: (a) consult with the relevant owner and provider of utility services that are likely to be affected by the development to make suitable arrangements for access to, diversion, protection, and support of the affected infrastructure; (b) prepare a dilapidation report identifying the condition of all public infrastructure between the M5 and the site and any local roads identified in the Heavy Vehicle Route Plan required under condition B2 (including roads, gutters and footpaths); and (c) submit a copy of the dilapidation report to the Secretary and Council.	Pre-Construction	Dilapidation surveys were undertaken prior to commencement of construction of the MPES1 and MPWS1 Project. Dilapidation surveys are applicable to the whole Precinct. The reports were resubmitted to DPE, via email on 8 June 2018, prior to commencement of construction of the MPES2 Project.		
A30	Unless the Applicant and the applicable authority agree otherwise, the Applicant must: (a) repair, or pay the full costs associated with repairing any public infrastructure that is damaged by carrying out the development; and (b) relocate, or pay the full costs associated with relocating any infrastructure that needs to be relocated as a result of the development.	At all times	No damage to public infrastructure has occurred during the reporting period and no relocation of public infrastructure has been necessary.		
	Local Development Contributions				
A31	Prior to the issue of a Construction Certificate, the Applicant must pay a monetary levy of 1% of the development Capital Investment Value (\$3,577,900) or other amount agreed to by Liverpool City Council for transport, drainage, community facilities, administration and professional and legal fees pursuant to section 94B(2) of the EP&A Act 1979.	Pre-Construction	Monetary levy was paid by Qube on 2 April 2019.		
	Operation of Plant and Equipment				
A32	All plant and equipment used at the site or to monitor the performance of the development must be: (a) maintained in a proper and efficient condition; and (b) operated in a proper and efficient manner.	At all times	All plant maintained and operated in accordance with this condition.		
	*Writing in coloured font represents additions and changes made to the conditions due to the approval of: SSD-7628-Mod-2 - Approved 31 January 2020 SSD-7628-Mod-3 - Approved 18 December 2020 SSD-7628-Mod-4 - Approved 19 January 2021

B1	The Applicant must: (a) prepare each plan, program and other documents in consultation with the specified stakeholders; (b) not commence each phase of the project until the plans, programs and other documents required under this consent are approved by or, where not required to be approved, submitted to the Secretary specified within the timeframes; and (c) implement the most recent version of the required plans and programs approved by the Secretary for the duration of the development.	At all times	Record of consultation included in all approved plans, programs and documents, as required. The most recent approved versions of plans are implemented in accordance with this condition.			
	Traffic and Access	D	CTAMP - Phase A (rev 9, dated 15 June 2018) was approved by the DPE on 15 June 2018.			
	Prior to commencement of early works and construction, the Applicant must prepare a Construction Traffic and Access Management Plan (CTMP) to the satisfaction of the Secretary. The Plan must form part of the CEMP required by condition C1 and must: (a) be prepared by a suitably qualified and experienced person whose appointment has been endorsed by the Secretary; (b) be prepared in consultation with Council, TRNSW and RMS; (c) include details of all transport routes and traffic types to be used for development-related traffic, access and parking arrangements; (i) include a protocol for undertaking dilapidation surveys to assess the existing condition of the transport routes prior to construction works; and (ii) condition of the transport routes following construction works; (d) include a protocol for the repair of any roads identified in the dilapidation surveys to have been damaged during construction and demolition works; (e) include details of: (i) staging of construction works; (ii) construction twice routes; (iii) construction twice routes; (iv) construction traffic generation; (v) hours of construction; (vi) parking for workers; and (vii) access arrangements. (f) include a Heavy Vehicle Route Plan detailing: (i) the origin and destination of spoil / fill and demolition material; and (iii) details of the heavy vehicle routes to and from the site within the Campbelltown and Liverpool Local Government Areas (LGAs). (g) Include details of the measures to be implemented to minimise traffic safety issues and disruption to local road users including pedestrians / cyclists during construction works, including: (i) temporary traffic controls, including detours and signage; (ii) how two lanes of traffic on Moorebank Avenue will be available at all times during construction (unless otherwise approved by RMS); (iii) temporary traffic controls, including detours and signage; (iv) notifying the local community about development-related traffic impacts; (v) responding to any emergency repair requirements or maintenance	Pre-construction	CTAMP-B (rev K, dated 6 December 2019) was approved by the Secretary on 13 December 2019. The revised CTAMP-B (rev O, 18 August 2022) is currently being implemented on site.			
В3	The Applicant must: (a) not commence early works or construction until the Construction Traffic Management Plan required by condition B2 is approved by the Secretary; and (b) carry out the development in accordance with the most recent version of the Construction Traffic Management Plan approved by the Secretary.	Pre-construction	CTAMP - Phase A (rev 9, dated 15 June 2018) was approved by the DPE on 15 June 2018. CTAMP-B (rev K, dated 6 December 2019) was approved by the Secretary on 13 December 2019. The revised CTAMP-B (rev O, 18 August 2022) is currently being implemented on site.			
B4	A Road Occupancy Licence is to be obtained from the Transport Management Centre for any works that may impact on traffic flows on Moorebank Avenue or the adjoining State road network during construction activities.	Pre-construction	Road Occupancy Licences are in place for all works that may impact the surrounding traffic network, including for the Moorebank Ave upgrade works. Addressed in Section 2.2.1 of the CTAMP-B (rev O, 18 August 2022). A Works Agreement Deed (WAD) is also in place for MPE Stage 1 and MPE Stage 2. The WAD was executed on 25/05/2020.			

B5	A construction zone will not be permitted on Moorebank Avenue without the express approval of RMS.	Pre-construction	Prior to the establishment of construction zones on Moorebank Ave, approval will be sought from TfNSW. Addressed in Section 2.2.1 of the CTAMP-B (rev O, 18 August 2022). A WAD is also in place for MPE Stage 1 and MPE Stage 2. The WAD was executed on 25/05/2020.	
B6	All demolition and construction vehicles must be contained wholly within the site and vehicles must enter the site before stopping.	Construction	There is adequate space on the internal access road for construction vehicles to park/queue as required. This is addressed in Section 3.1.5 of the CTAMP-B (rev O, 18 August 2022).	
В7	All vehicles are to enter and leave the site in a forward direction.	Construction	Management measure (TA-25) addressed this requirement and is outlined in Section 3.2.21 of the CTAMP-B (rev O, 18 August 2022).	
B8	All trucks entering or leaving the site with loads must have their loads covered and must not track dirt onto any public road.	At all times	This condition is addressed in the Driver's Code of Conduct, located in Appendix B of the CTAMP-B (rev O, 18 August 2022).	
	Road Safety Audit			
B9	Prior to commencement of any importation of site fill, the Applicant must undertake a Road Safety Audit for heavy vehicle movements associated with the importation of fill, for construction vehicle sweep paths in and out of the development site via the proposed temporary construction access points along Moorebank Avenue, and for motorists and construction vehicle movements along Moorebank Avenue during the staged road upgrade works identified in condition B13. The Road Safety Audit is to be prepared by an independent TRISW accredited road safety auditor in accordance with the relevant Austroads guidelines to identify any safety issues. The Road Safety Audit must consider road safety issues for the proposed construction access arrangements and affected vehicle movements during upgrade works on Moorebank Avenue. The Applicant must recommend corrective actions for the identified safety issues and propose appropriate traffic management measures (i.e. temporary traffic signals and other traffic management measures) in consultation and with the approval of the relevant Council, TfNSW and RMS. Site Access and Layout Design Plans	Pre-construction	A Road Safety Audit was undertaken (dated 19 February 2018) and no corrective actions were identified.	
B10	The swept path of the longest vehicle entering and exiting the subject site, as well as manoeuvrability through the site, must be in accordance with Austroads requirements. Prior to commencement of construction on permanent infrastructure a plan must be submitted to the Secretary and RMS for approval, which shows that the proposed development complies with this requirement.	Pre-construction	Section 2.1.1 of the CTAMP-B (rev O, 18 August 2022) addresses this condition.	
B11	The layout of the proposed car parking areas associated with the subject development (including driveways, grades, turn paths, sight distance requirements in relation to landscaping and/or fencing, aisle widths, aisle lengths, and parking bay dimensions) must be in accordance with AS2890.1-2004 Parking facilities Off-street parking, AS2890.6-2009 Parking facilities Off-street parking for people with disabilities and AS2890.2-2002 Parking facilities Off-street commercial vehicle facilities for heavy vehicle usage.	Detailed Design	The Urban Design and Landscape Plan (UDLP) for Area 1 (revision 8, dated 11 March 2020) was approved on 5 June 2020 excluding condition B140 (e)(vi). The MPE Stage 2 UDLP for Area 2 (rev 9C, dated 12 August 2020) was approved 4 September 2020. The revised MPE Stage 2 consolidated UDLP (rev 12, dated 18 December 2020) was approved by DPE on 5 February 2021.	
B12	The development is to be designed so that: (a) all vehicles are wholly contained on site before being required to stop; (b) adequate parking for heavy vehicles is provided on-site to accommodate any potential delays in schedule time; (c) all loading and unloading of materials is carried out on-site; and (d) site roads accommodate buses, bus infrastructure and cyclist use for employees.	Detailed Design	The Urban Design and Landscape Plan (UDLP) for Area 1 (revision 8, dated 11 March 2020) was approved on 5 June 2020 excluding condition B140 (e)(vi). The MPE Stage 2 UDLP for Area 2 (rev 9C, dated 12 August 2020) was approved 4 September 2020. The revised MPE Stage 2 consolidated UDLP (rev 12, dated 18 December 2020) was approved by DPE on 5 February 2021.	

	Road Infrastructure Upgrades

			Addressed in the WAD executed on 25/05/2020.		
	Operating Traffic				

B25	The Applicant must ensure: (a) internal roads, driveways and parking (including grades, turn paths, sight distance requirements, aisle widths, aisle lengths and parking bay dimensions) associated with the development are constructed and maintained in accordance with the latest version of As 2890.1:2004 Parking facilities Off-street car parking (Standards Australia, 2004) and AS 2890.2:2002 Parking facilities Off-street commercial vehicle facilities (Standards Australia, 2002); b) the final configuration of the internal road network is established and available for use prior to occupation of the freight village or any warehousing; c) the swept path of the longest vehicle entering and exiting the site, as well as manoeuvrability through the site, is in accordance with the relevant Austroads guidelines; d) the development does not result in any vehicles queuing on the public road network; e) heavy vehicles and bins associated with the development are not parked on local roads or footpaths in the vicinity of the site; f) all vehicles are wholly contained on site before being required to stop; g) all loading and unloading of materials is carried out on-site; h) all trucks entering or leaving the site with loads have their loads covered and do not track dirt onto any public road; and i) the proposed turning areas in the car park are kept clear of any obstacles, including parked cars, at all times	Detailed Design	The OTAMP (Rev 13, dated 15 May 2020) is currently being implemented on site and addresses the requirements of this condition. In addition, where applicable, the requirements of this condition are addressed in the revised MPE Stage 2 Consolidated UDLP (revision 12, dated 18 December 2020) which was approved by DPE on 5 February 2021.		
	Operational Traffic and Access Management Plan				
B26	The Applicant must prepare an Operational Traffic and Access Management Plan to the satisfaction of the Secretary. The Plan is to be developed in consultation with the relevant Council, TfNSW and RMS. The plan must be approved by the Secretary prior to the commencement of operation. The Plan must be prepared by a suitably qualified and experienced person(s), and must: (a) demonstrate how the development will be managed during operation to meet the requirements of this development consent; (b) detail numbers and frequency of truck movements, sizes of trucks, vehicle routes and hours of operation; (c) detail access arrangements for the site to ensure road and site safety, and demonstrate there will be no queuing on the road network; (d) detail measures to ensure turning areas and internal access roads are kept clear of any obstacles, including parked cars, at all times; (e) set out procedures for collecting the information required to prepare the Biannual Trip Origin and Destination Report required under condition B28; (f) incorporate the Workplace Travel Plan as required under condition B29;	Pre-operation	Operational Traffic and Access Management Plan (OTAMP) (Rev10, dated 13 November 2019) was approved by DPE on 6 December 2019. The OTAMP (Rev 13, dated 15 May 2020) is currently being implemented on site. Implementation of the OTAMP is reported as part of operational compliance reporting. This compliance report relates to construction only.		
B27	The Operational Traffic and Access Management Plan required by condition B26 must be implemented by the Applicant for the duration of operations.	Pre-operation	The OTAMP (Rev10, dated 13 November 2019) was approved by DPE on 6 December 2019. The revised OTAMP (Rev 13, dated 15 May 2020) is currently being implemented on site. Implementation of the OTAMP is reported as part of operational compliance reporting. This compliance report relates to construction only.		

B28	The Applicant is to prepare a Biannual Trip Origin and Destination Report each six months following commencement of any operation (in a format agreed with TfNSW and RMS) that advises:	Pre-operation	A framework Biannual Trip Origin and Destination Report was prepared in consultation with TfNSW and RMS and is being implemented onsite.		
	a) the number of actual and standard twenty foot equivalent shipping containers despatched and received during the period;				
	 b) the number of days in the period that the truck gate was open for despatching trucks 24 hours a day, 7 days a week and detail any exceptions to this and advise actual hours of operation; 		This compliance report relates to construction only.		
	c) records of vehicle numbers accessing the site; and				
	d) representative vehicle origins and destinations; based on a cordon in the surrounding network.				
	A framework for recording and reporting on the data required for the report, prepared to the satisfaction of Tens and RMS, is				
	to be submitted to the Secretary three months prior to the commencement of operation.				
	The report is to be submitted within one month of its preparation throughout operation of the project, starting six months from the commencement of operation, unless otherwise agreed by the Secretary, TfNSW and RMS.				
	The cordon count at (d) above will:				
	i) apply to all classes of vehicles; and				
	ii) cover the intermodal terminal, the warehousing facility and any other uses such as the freight village.				
	Workplace Travel Plan				
B29	Prior to the issue of any Occupation Certificate, the Applicant must prepare a Workplace Travel Plan to the satisfaction of the	Pre-operation	A Workplace Travel Plan (WTP) was prepared in consultation with TfNSW and RMS. Conditional approval of the WTP was received		
	Secretary. The Workplace Travel Plan must form part of the Operational Traffic and Access Management Plan required by		by the DPE on 14 June 2019. Approval of the WTP and OTAMP was received by DPE on 6 December 2019.		
	condition C3, and must:		TI 11777 (42 2044 2022);		
	(a) be prepared in consultation with TfNSW;(b) outline facilities and measures to promote public transport usage, such as car share schemes and employee incentives;		The WTP (rev 12, 26 March 2020) is currently being implemented on site.		
	(c) describe pedestrian and bicycle connections and linkages to and from the site from Moorebank Avenue and within the site		This compliance report relates to construction only.		
	including between warehouses and the freight village;				
	(d) describe end of trip facilities available on-site which are to include under cover bike storage, showers and change facilities -				
	the layout, design and security of bicycle facilities must comply with the minimum requirements of Australian Standard AS 2890.3 – 1993 Parking Facilities Part 3: Bicycle Parking Facilities; and				
	(e) include the results of negotiations with the relevant agencies/ authorities as required to facilitate the staged delivery of the				
	public transport infrastructure including:				
	(i) construction of a covered bus drop off/ pick up facility within the site to encourage the use of buses for employees;				
	(ii) review and rationalisation of the locations of Route 901 bus stops in the vicinity of the site to match the proposed northern				
	terminal entry location and enhance accessibility; (iii) peak period and SIMTA shift work responsive express buses to /from the site and Liverpool Station via Moorebank Avenue				
	and Newbridge Roads with frequency dependent on the development of the site;				
	(iv) peak period express buses to/ from the site and Holsworthy rail station via Anzac Road, Wattle Grove Drive and Heathcote				
	Road with frequency dependent on the development of the site;				
	(v) potential to extend the Route 901 bus through the site via the light vehicle road and increasing peak period bus service frequencies to better match the needs of existing and future employees of the locality with frequency dependent on the extent				
	of development of the site; and				
	(vi) changes to existing bus stop locations and the identification of new bus stop locations if required.				
B30	The Applicant must ensure that the Workplace Travel Plan is implemented for the life of the development.	Operation	This compliance report relates to construction only.		
	Concrete Batching Plant				
B31	The applicant must prepare must prepare a Concrete Batching Plant Management Plan to the satisfaction of the Secretary. The	Pre-construction	The Construction Environmental Management Plan (rev 4, dated 5 April 2018)) was approved by DPE on 8 June 2018. The revised		
	plan must be approved by the Secretary prior to the establishment of Concrete Batching Plant and form part of the CEMP		CEMP (rev 17, 18 August 2022) is currently being implemented on site and has considered the requirement for a Concrete Batching		
	required by condition C1.		Plant (CBPMP) (Appendix F) should it arise. The requirement for CBPMP has not been triggered.		
	The Plan must be prepared by a suitably qualified and experienced person(s) and detail the establishment and operation of the Plant including:				
	Plant including: (a) demonstrate how the development will be managed during construction to meet the requirements of this development				
	consent;				
	(b) a description of the works proposed to be undertaken;				
	(c) a description of the plant, equipment and materials to be used and/or stored on each site, including dangerous and				
	hazardous goods; (d) a summary of the potential environmental impacts associated with the establishment and operation of the facility;				
	(a) a summary of the potential environmental impacts associated with the establishment and operation of the facility; (e) details of the mitigation, monitoring and management procedures specific to the plant that would be implemented to				
	minimise environmental and amenity impacts during both site establishment and operation;				
	(f) include a program to monitor the effectiveness of these measures;				

	Geotechnical				
B32	A Site Specific Earthworks Specification must be prepared by a suitably qualified and experienced person(s) in accordance with the Geotechnical Interpretive Report prepared by Golder Associates, dated 11 November 2016.	Detailed Design	The Warehouse 1 Area - Filling and Earthworks Requirements for the Warehouse 1 Area was prepared on 6 September 2018 by Golder Associates Pty Ltd. MPE Earthworks Specification (dated 7 June 2019) was prepared by Golder Associates to cover the technical requirements and construction standards for earthworks for the MPE Site, excluding the Warehouse 1 Area.		
В33	Prior to construction of permanent built works, a geotechnical engineer must prepare a works-as-executed report detailing encountered geotechnical conditions and how residual geotechnical constraints can be accommodated within the structural designs for the development. The structural design must be confirmed or amended by the structural engineer based on the works-as-executed geotechnical report.	Pre-construction	The Warehouse 1 Area Earthworks Completion Report was submitted on 16 April 2019 by Golder Associates Pty Ltd. Warehouse 3 and 4 Earthworks Completion Report (dated 9 September 2019) was prepared by Golder Associates. Warehouse 5 Earthworks Completion Report (dated 9 November 2019) was prepared by Golder Associates. Warehouse 6 Earthworks Completion Report (dated 20 January 2021) was prepared by Golder Associates. Warehouse 7 Earthworks Completion Report (dated 30 March 2021) was prepared by Golder Associates. Warehouse 8 Earthworks Completion Report (dated 30 March 2021) was prepared by Golder Associates. Completion reports for the remainder of the MPE S2 Site will continue to be provided when earthworks activities have concluded. A Works-As-Executed Report will be provided for Area 6 (MAUW) upon the completion of earthworks activities.		
B34	Prior to early works, fill importation or any other surface disturbance, the Applicant must prepare a Soil and Water Management Plan (SWMP) to the satisfaction of the Secretary. The plan must form part of the CEMP required by condition C1 and must include: (a) measures to verify the properties of fill imported to the site (see condition (b)); (b) plans showing limits of clearing, filling and other earthworks and vegetation to be retained and protected; (c) plans showing the location of stockpilled fill and other materials and storage areas (see condition (c)); (e) An Erosion and Sediment Control Plan (see condition B40); (f) measures to minimise dust, erosion and prevent migration of soil off site and migration into constructed and natural drainage lines (see condition B39); (g) details on design and maintenance of temporary stormwater drainage infrastructure including sediment basins and temporary diversion channels around temporary work obstructions to allow low and normal flows to safely bypass the work areas and to separate clean and dirty water flows (see condition B39); (h) details of existing stormwater infrastructure to be retained, including upgrades to meet design criteria, and design and maintenance of proposed new infrastructure (see condition B39); (i) evidence that agreement has been obtained: (i) to discharge stormwater through adjacent sites; (ii) for any necessary upgrade works to be constructed; (iii) for undertaking maintenance activities; (iv) use of OSD basins on other sites, such as the MPW site, for this development, and (v) evidence that a drainage easement has been obtained or is currently in place to discharge water through adjacent sites; (j) evidence that a drainage easement is in place to discharge stormwater through the MPW site, and to provide OSD basins within the MPW site, for this development, and that drainage infrastructure within the MPW site, and to provide OSD basins within the MPW site, including provision of scour protection at discharge points; (l) demons		The Construction Soil and Water Management Plan (CSWMP) (rev 6, dated 7 June 2018) was approved by the DPE on 8 June 2018. The Revised CSWMP (rev 19, 18 August 2022) is currently being implemented on site.		
B35	Spoil Management The Applicant must ensure that only VENM or ENM, or other material approved in writing by EPA is brought onto the site.	Construction	The Construction Soil and Water Management Plan (CSWMP) (rev 6, dated 7 June 2018) was approved by the DPE on 8 June 2018.		
D35	i ne дуршант must ensure that only venior or enior, or other material approved in writing by ePA is brought onto the site.	Construction	The Revised CSWMP (rev 19, 18 August 2022) is currently being implemented on site.		

B36	Prior to the commencement of importation of spoil, the Applicant must prepare a Spoil Management Plan to the satisfaction of	Pre-construction	The Construction Spoil Management Plan (CSpMP) (rev 4, dated 5 April 2018) was approved by the DPE on 8 June 2018. The revised	
	the Secretary. The Spoil Management Plan must incorporate detailed information on the handling and transport of spoil,		CSpMP (rev 14, 19 March 2021) is currently being implemented on site.	
	including stock pile management. The Spoil Management Plan must be approved by a NSW EPA Accredited Site Auditor prior to			
	submission to the Secretary, to ensure that imported material will be assessed including with regard to the waste classification			
	and site suitability. The Spoil Management Plan is to be prepared separate to, but consistent with the CEMP required by			
	conditions C1 and must:			
	(a) be prepared by a suitably qualified and experienced person(s);			
	(b) include:			
	(i) a protocol for recording the volume, type and source of fill imported to site and vehicle registrations on a daily basis;			
	(ii) quality assurance and quality control measures to ensure compliance with condition B35;			
	(iii) a protocol for dealing with unexpected finds including material contamination; and			
	(iv) independent auditing by a suitably qualified and experienced specialist.			
	(c) be consistent with Volume 1 of Managing Urban Stormwater: Soils and Construction ('the Blue Book') (Landcom 2004) and			
	include:			
	(i) Details on and the location of fill sorting, crushing and stockpiling;			
	(ii) Plans and details on the progressive formation of stockpiles, placement and stabilisation of placed fill;			
	(iii) Stockpiles not to exceed 10m in height with stockpiles over 4m in height to be benched, with maximum of 1V:3H slopes;			
	(iv) Monitoring of stockpile moisture content and stockpile watering;			
	(v) Stabilisation of stockpiles if not worked on for more than 10 days; and			
	(vi) Stabilisation of placed fill if construction does not commence within 10 days.			
	(v) submission of placed in a constitution does not commence that in 20 days.			
B37	The handling of spoil during construction of the development is to be conducted in accordance with the Spoil Management	Construction	Section 3.5 of the CSpMP (rev 14, 19 March 2021) outlines the procedures for handling of spoil during construction.	
1337	Plan.	Constitution	3.5 of the copies (rev 24, 15 March 2021) outlines the procedures for handling of spondaring construction.	
	riali.			
B38	Permanent fill batters to adjacent lands to be a maximum of 1V:4H and details to be provided on methods of slope stabilisation.	Detailed Design	The Urban Design and Landscape Plan (UDLP) for Area 1 (revision 8, dated 11 March 2020) was approved on 5 June 2020 excluding	
			condition B140 (e)(vi).	
			The MPE Stage 2 UDLP for Area 2 (rev 9C, dated 12 August 2020) was approved 4 September 2020.	
			The revised MPE Stage 2 consolidated UDLP (rev 12, dated 18 December 2020) was approved by DPE on 5 February 2021.	
			The revised wit 2 stage 2 consolidated obt. (rev 12, dated 10 beceinder 2020) was approved by bit 2 on 3 residually 2021.	
	Erosion and Sediment Control Plan			
B39	Prior to commencement of early works and fill importation an Erosion and Sediment Control Plan required as part of the Soil	Pre-construction	The Construction Erosion and Sedimentation Control Plan (CESCP) (rev 4, dated 11 February 2018), included as Appendix A of	
	and Water Management Plan must:		CSWMP (rev 6, dated 7 June 2018), was approved by the DPE on 8 June 2018.	
	(a) be prepared by a suitably qualified person;			
	(b) be prepared in accordance with Volume 1 of Managing Urban Stormwater: Soils and Construction ('the Blue Book')			
	(Landcom 2004), Managing Urban Stormwater: Soils and Construction – Installation of Services, Volume 2A (OEH 2008) and			
	Managing Urban Stormwater: Soils and Construction – Main Road Construction, Volume 2D (OEH 2008). The plan must			
	consider likely stages of the works and provide for appropriate control of sediment and erosion for each stage. The plan must			
	show:			
	(i) location and extent of all necessary sediment and erosion control measures for the site;			
	(ii) catchment plan;			
	(iii) sediment basin(s) locations including details showing how runoff from the entire site will be directed to the sediment			
1	basin(s);			
1	(iv) all relevant details and calculations of the sediment basins including sizes, depths, flocculation, outlet design, all relevant			
	sections, pump out systems, and depths;			
	(v) all details of basement and other excavation pump out and dewatering treatment systems including flocculation and any			
	proposed discharge from the site from dewatering and pump out systems;			
	(vi) identification and management of any stormwater run-on to the site from adjacent sites; (vii) location of any temporary			
	stockpiles (soil, spoil, top soil or otherwise) and accompanying sediment and erosion control measures;			
	(viii) location and details of all vehicle wash down bays and associated erosion and sediment control measures such as earthen			
	bunds; and			
1	(ix) a daily and weekly site inspection checklist consistent with IECA Best Practice Erosion and Sediment Control documents.			1

Stormwater Management Plan		
B40 Prior to commencement of early works and fill importation, an amended Stormwater Management Plan must be submitted	and Pre-construction The Stormwater Management Plan (SMP) was approved by DPE to be submitted as part of a suite of phased documentation. SMP-	
approved by the Secretary. The plans must be prepared by a suitably qualified person, and independently reviewed, to ensu		
meets the following criteria for:	earthworks for the remainder of the site.	
(a) Drainage:		
(i) convey flows from low order events (up to and including the 10% AEP event from the main part of the site within the forr	mal The SMP-W1P (rev 2, dated 28 June 2018) was approved by DPE on 2 July 2018.	
drainage system, with flows from rarer events (up to the 1% AEP event) conveyed in controlled overland flow paths;		
(ii) show the location and width of controlled overland flow paths; and	The SMP – Balance of Site (SMP – BoS), prepared by Costin Roe, was approved by DPE on 18 March 2020 on condition that all the	
(iii) provide levels to AHD confirming building floor levels are a minimum of 150 mm above the maximum design flow path	onsite detention basin outlets to natural drainage lines must be constructed of natural materials to facilitate natural geomorphic	
levels.	processes and to include vegetation as necessary.	
(b) Water Sensitive Urban Design:		
(i) incorporate water sensitive urban design principles, be generally in accordance with relevant Council policies, plans and	Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev D, dated 17 August 2020) was conditionally approved by	
specifications	DPE on 14 September 2020.	
(ii) ensure that adequate overland flow paths have been provided in the event of stormwater system blockages and flows in		
excess of the 1% ARI rainfall event;	Following confirmation that TfNSW accepted the final design drawings for OSD 10 as part of the Moorebank Avenue Upgrade	
(iii) ensure on site detention basins are visually unobtrusive and ensure public safety;	Works, the Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev D, dated 17 August 2020) was revised and	
(iv) ensure rainwater harvesting is provided for each warehouse;	resubmitted in accordance with the conditional approval.	
(v) ensure adequate site area has been provided for stormwater treatment; and		
(vi) ensure design of stormwater treatment systems minimises the risk of failure.	The revised Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev E, dated 18 February 2021) was approved by	
(vii) develop concept options for how 20% of the average annual volume of stormwater from the site can be reused via	DPE on 19 March 2021.	
rainwater capture and reuse for activities including but not limited to:		
- irrigation,		
- all internal non-potable uses,		
- washdown		
- cooling towers,		
- heating, ventilation, and air conditioning, and		
- ground source heat exchange.		
The Applicant is to brief the Department on how these initiatives will be implemented prior too the completion of the		
Stormwater Management Plan.		
(c) Water quantity:		
(i) on site detention is to be provided to attenuate peak flows from the development such that both the:	wa .	
 1 in 1 year ARI event post development peak discharge rate is equivalent to the pre-development (un-developed catchmer in 1 year ARI event 	11) 1	
- 1 in 100 year ARI event post development peak discharge rate is equivalent to the predevelopment (un-developed catchm	ant)	
1 in 100 year ARI event;	ent)	
(ii) no new drainage infrastructure work within the Defence Joint Logistics Unit (DJLU) site;		
(iii) all on site detention basins to have maximum batter slopes of 1V:4H;		
(iii) all off site detertion basins to flave maximum batter stopes of 19.441, (iv) siting and design of on site detention basins to eliminate/ minimise excavation within the southern ordinance burial pits		
and		
(v) maintenance access to be provided to each on site detention basin.		
(d) Connection to natural creeklines:		
(i) on site detention basin outlets to natural drainage lines must be constructed of natural materials to facilitate natural		
geomorphic processes and to include vegetation as necessary (gabion baskets and gabion mattresses are not acceptable).		
(e) Stormwater Quality		
(i) have a stormwater quality treatment train comprised of gross pollutant traps and biofiltration/ bioretention systems		
L Programme and the second of		l l

	designed to meet the following criteria compared to a base case if there were no treatment systems in place:				
	- reduce the average annual load of total nitrogen by 45%; - reduce the average annual load of total phosphorus by 65%; and - reduce the average annual load of total suspended solids				
	by 85%.				
	(ii) all stormwater quality elements are to be modelled in MUSIC as per the NSW MUSIC Modelling Guide.				
	(iii) all stormwater quality elements are to be installed upstream of stormwater detention basins, unless it can be demonstrated				
	that biofiltration/ bioretention systems within the OSD basins will not suffer damage from design flows and can be maintained				
	to achieve the water quality criteria.				
	(iv) the area of biofiltration / bioretention systems is to be at least 1% of the catchment draining to the system, to ensure there				
	is no short-circuiting of the system.				
	(v) bioretention systems which are greater than 1,000m2 in area, are to be divided into cells with no individual cell greater than 1,000m2.				
	(vi) all filter media used in stormwater treatment measures must:				
	- be loamy sand with an appropriately high permeability under compaction and must be free of rubbish, deleterious material,				
	toxicants, declared plants and local weeds, and must not be hydrophobic;				
	have an hydraulic conductivity = 100-300 mm/hr, as measured using the ASTM F1815-06 method				
	 - have an organic matter content less than 5% (w/w) - be provided adequate solar access, considering the design and orientation of OSD basins. 				
	A copy of the independent review must be submitted with the Plan. A statement from the reviewer confirming their				
	independence and declaring any actual, potential or perceived conflicts of interest must be provided as part of the reporting of				
	the findings and recommendations of the review.				
	Note: The development must comply with section 120 of the POEP Act, Which Prohibits the pollution of waters.				
B40A.	OSD 9 as described in the modification application SSD-7628-Mod-2 must comply with the conditions of this consent,	Pre- Construction	The approved Balance of Site SMP was updated to include OSD9.		
	including Condition B40, except for Condition B40(c)(iii).				
			Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev D, dated 17 August 2020) was conditionally approved by		
			DPE on 14 September 2020.		
			The revised Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev E, dated 18 February 2021) was approved by		
			DPE on 19 March 2021.		
B41	Not withstanding condition B40, the Stormwater Management Plan does not require the Secretary to approve drainage works	Pre- Construction	Addressed in Section 1.3.1 in SMP-W1P (rev 2) - 28 June 2018, approved by the DPE on 2 July 2018. The revised SWP- WIP (rev 3, 3		
	that would be designed, approved by RMS, and delivered, in accordance with condition B13. However, the Stormwater		July 2018) is currently being implemented on site.		
	Management Plan must: a) include confirmation that any such works are proposed to be designed and delivered in accordance with condition B13; and		Interim and Ultimate OSD 9 & OSD 10 Stormwater Management Plan (Rev D, dated 17 August 2020) was conditionally approved by

	the MPW site to the Georges River unless the maintenance of this infrastructure is included in an operational environmental		The revised SIOMP (rev 7, 26 March 2020) is currently being implemented.		
	management plan approved by the Secretary for the MPW site.		This compliance report relates to construction only		
			This compliance report relates to construction only.		
B51	The annual independent audit must be undertaken by a suitably qualified professional with demonstrable experience in WSUD.	Operation	This compliance report relates to construction only.		
	The audit is to verify the condition of the treatment system(s), verify and document that the system(s) is working as intended,				
	verify the system(s) has been cleaned adequately, verify there is no excessive build-up of material in the system(s) and identify				
	any issues with the treatment system(s) which require rectification for the system(s) to adequately perform its intended				
	function.				
	Flood Management				
B52	Before the commencement of construction, the Applicant must prepare a Flood Emergency Response Plan to the satisfaction of		Flood Emergency Response Plan (FERP) (rev 5, dated 16 April 2018) was approved by the DPE on 1 June 2018. The revised FERP (rev		
1	the Secretary. The Plan must form part of the CEMP and OEMP required by conditions C1 and C3 and must:	Operation	13, 18 August 2022) is currently being implemented on site.		
	(a) be prepared by a suitably qualified and experienced person(s) whose appointment has been endorsed by the Secretary;				
	(c) address the provisions of the Floodplain Risk Management Guideline (OEH, 2007) (as may be updated or replaced from time				
	to time);				
I	(d) include details of:				
1	the flood emergency responses for both construction and operation phases of the development;				
1	predicted flood levels;				
	flood warning time and flood notification;				
	assembly points and evacuation routes;				
	evacuation and refuge protocols; and				
<u></u>	awareness training for employees and contractors.				
B53	The Applicant must:	Pre- Construction	Flood Emergency Response Management Plan (FERP) (rev 5, dated 16 April 2018) was approved by the DPE on 1 June 2018. The		
1	(a) not commence construction until the Flood Emergency Response Plan required by condition B51 is approved by the		revised FERP (rev 13, 18 August 2022) is currently being implemented on site.		
	Secretary; and				
I	(e) implement the most recent version of the Flood Emergency Response Plan approved by the Secretary for the duration of the		Area 6 (MAUW) will be constructed in accordance with the FERP.		
	development.	1			

	Dust Minimisation				
B54	Best practice reactive and proactive management measures must be implemented to minimise dust generated during all works authorised by this consent.	At all times	The Construction Air Quality Management Plan (CAQMP) (rev 4, dated 11 May 2018) was approved by DPE on 1 June 2018. The CAQMP (rev 17, 18 August 2022) is currently being implemented on site. Best practice reactive and proactive mitigation measures are outlined in Section 3.3 of CAQMP (rev 17, 18 August 2022).		
B55	Deposited dust must not exceed an increase of 2g/m2/month or maximum of 4g/m2/month at the closest off site sensitive receiver.	At all times	No exceedances of deposited dust criteria were recorded during the reporting period. Monitoring determined that onsite dust is being successfully mitigated.		
B56	During construction: (a) fill importation must not exceed 22,000m3 per day; (b) exposed areas and stockpiles must be watered regularly to minimise dust emissions; (c) water carts must be used to control dust emissions from vehicles travelling on unpaved surfaces, and graders and dozers pushing fill material; (d) grader and bulldozer travel routes and the fill material being handled must be suitably moist; (e) water must be used as appropriate to maintain moisture in the fill material being bulldozed, such that dust emissions would be halved relative to not applying the water; (f) water may be applied prior to fill being delivered to site, provided that the same effect is achieved as in (e) above; (g) all trucks entering or leaving the site with loads must have their loads covered; (h) trucks associated with the development must not track dirt onto public roads; (i) public roads used by trucks associated with the development must be kept clean; and (ji) land stabilisation works must be carried out progressively on site to minimise exposed surfaces.	Construction	Section 3.3. of the CAQMP (rev 17, 18 August 2022) describes the air quality controls to be implemented. The 22,000m³ limit on fill importation has been modified by CoC A9 of SSD 10431 (MPW 3) which was approved by the Independent Planning Commission on 11 May 2021. Appropriate notice was provided to the Minister for Planning and Public Spaces under cl 97(1) of the Environmental Planning and Assessment Regulation 2000 (NSW) on the 19 July 2021. The daily importation limit has been amended to 13,000m³. Fill importation did not exceed 13,000m³ per day during the reporting period.		
B57	Construction Air Quality Management Plan The Applicant must prepare a Construction Air Quality Management Plan (AQMP) to the satisfaction of the Secretary. The AQMP must be prepared by a suitably qualified and experienced person(s). The Construction AQMP must form part of the CEMP required by condition C1. The AQMP must include: (a) a Construction Air Quality Monitoring Program; (b) identification of sources (including stockpiles and open work areas) and quantify airborne pollutants; (c) best practice reactive and proactive control measures that will be implemented for each emission source including measures to prevent the emission of visible dust from the site as listed in condition B56; (d) provisions for the implementation of additional mitigation measures in response to issues identified during monitoring and reporting; (e) for all emission sources at the site: (i) key performance indicator(s); (ii) monitoring method(s); (iii) location, frequency and duration of monitoring; (v) compliants register; (vi) response procedures; and (vii) compliance monitoring.	Pre-Construction	The CAQMP (rev 4, dated 11 May 2018) was approved by DPE on 1 June 2018. The CAQMP (rev 17, 18 August 2022) is currently being implemented on site.		
B58	Air quality monitoring must be undertaken during early works, fill importation and construction.	Construction	During the reporting period, dust monitoring was conducted in accordance with Section 4 of the CAQMP (rev 17, 18 August 2022). No exceedances were reported during the reporting period.		

	Operational Air Quality Management Plan				
B59	The Applicant must prepare an Operational AQMP to the satisfaction of the Secretary for the entire precinct (MPE + MPW), unless this has been prepared and approved under an approval for the MPW site. The AQMP must be prepared by a suitably qualified and experienced person(s) and must form part of the OEMP required by condition C3. The AQMP must include: (a) identification of sources and quantify airborne pollutants; (b) best practice reactive and proactive control measures that will be implemented for each emission source; (c) provisions for the implementation of additional mitigation measures in response to issues identified during monitoring and reporting; (d) for all emission sources associated with site operations: (i) key performance indicator(s); (ii) monitoring method(s); (iii) location, frequency and duration of monitoring; (v) crecord keeping; (v) complaints register; (vi) response procedures; and (vii) compliance monitoring.	Pre-Operation	This compliance report relates to construction only.		
B60	The Applicant must ensure the development does not cause or permit the emission of any offensive odour (as defined in the POEO Act).	At all times	Management measures outlined in Section 3.4 of the CAQMP (rev 17, 18 August 2022) are implemented during construction to avoid and minimise dust and odour impacts to surrounding sensitive receivers. Appropriate implementation of these controls reduce the risk of dust and odour impacts during construction of the Project. No issues related to odour were captured in the Environmental Inspection Checklist used to maintain compliance and effectiveness of controls. No complaints received or incidents raised related to odours during the reporting.		
B61	Equipment must be installed and operated in accordance with best practice to ensure that the development complies with all load limits, air quality criteria, air emission limits and air quality monitoring requirements as specified under this consent.	At all times	Section 3.4 of the CAQMP (rev 17, 18 August 2022) details management measures regarding the installation and operation of equipment. Equipment checks were completed as part of the regular environmental inspections conducted on site.		
	Noise Monitoring				
B62	Prior to early works, the Applicant must undertake noise monitoring in accordance with INP to verify RBLs for the closest sensitive receivers.	Pre- Construction	Noise monitoring was undertaken from 05 December 2017 to 18 December 2017. Monitoring conducted and is presented in the Wilkinson Murray 12186-M2 Report version C, dated January 2018. No additional management measures nor adjustments to the NMLs were required.		
B63	Prior to early works and fill importation, the Applicant must submit a Noise Monitoring Report detailing the results of background noise monitoring, any resulting adjustment of NMLs for the development and any additional noise mitigation measures to be include in the CEMP required under condition C1.	Pre- Construction	The Noise Monitoring Report submitted 06 February 2018. DPE acknowledged receipt on 20 February 2018.		
B64	Continuous noise monitoring at sensitive receivers must be undertaken during early works, fill importation, construction and for at least 12 months following occupation of the entire site.	At all times	Four continuous noise monitors were installed at sensitive receivers in May 2019. Continuous noise monitoring recorded exceedances of trigger NMLs during standard work hours during the reporting period. Reasonable and feasible mitigation measures were implemented as per the CNVMP (rev 17, dated 18 August 2022).		
	Construction Hours				
B65	The construction hours detailed in Table 2 must be complied with, except where they may be undertaken under condition B66. See Table 2: Table 2: Hours of Work Activity: Early works and Construction Days & Times: Monday – Friday (7am to 6pm) Saturday (7am to 1pm) Time: 7 am to 6 pm 7 am to 1 pm Activity: Moorebank Avenue upgrade Days & Times: Monday – Friday (7am to 6pm) Saturday (7am to 1pm)	Construction	The Out Of Hours (OOH) protocol is included as Appendix A of the CNVMP (rev 17, dated 18 August 2022) and outlines the requirements for works undertaken outside the construction hours specified in Table 2 of the Consent. The following OOHW permits were issued during the reporting period: * OOHW 58 (BMD045) - Spray Binder MBK Ave diversion road batters * OOHW 59 - Sewer Main installation * OOHW 60 - Sewer Main works * OOHW 61 (BMD051) - MADR Fence Repair and Replacement * OOHW 62 (BMD053) - Installation of traffic signs and line marking to temp roundabout.		
B66	Except as permitted by an EPL, activities resulting in high noise impact (including impulsive or tonal noise emissions) must only be undertaken: (a) between the hours of 8:00 am to 5:00 pm Monday to Friday; (b) between the hours of 8:00 am to 1:00 pm Saturday; and (c) in continuous blocks not exceeding three hours each with a minimum respite from those activities and works of not less than one hour between each block. Note: For the purposes of this condition, 'continuous' includes any period during which there is less than a one hour respite between ceasing and recommencing any of the work that is the subject of this condition.	Construction	The Construction Noise and Vibration Management Plan (CNVMP) (rev 5, dated 8 June 2018) was approved by DPE 15 June 2018. The CNVMP (rev 17, dated 18 August 2022) is currently being implemented on site.		

B67	Works may be undertaken outside the hours detailed in Table 2 in the following circumstances:	Construction	The Out Of Hours Works (OHHW) protocol is included as Appendix A of the CNVMP (rev 17, dated 18 August 2022) .	
	(a) for the delivery or dispatch of materials as requested by the NSW Police Force or other public authorities for safety reasons;			
	(b) where it is required in an emergency to avoid the loss of lives, property and/or to prevent environmental harm;		The following OOHW permits were issued during the reporting period:	
	(c) where different construction hours are permitted or required under an EPL in force in respect of construction, in which case		* OOHW 58 (BMD045) - Spray Binder MBK Ave diversion road batters	
	these construction hours must be complied with;		* OOHW 59 - Sewer Main installation	
	(d) where they are undertaken in accordance with an Out-Of-Hours Work Protocol detailing the assessment, management and		* OOHW 60 - Sewer Main works	
	monitoring of noise as part of the Construction Noise and Vibration Management Plan.		* OOHW 61 (BMD051) - MADR Fence Repair and Replacement	
			* OOHW 62 (BMD053) - Installation of traffic signs and line marking to temp roundabout.	
B68	The Applicant must prepare an Out-Of-Hours Work Protocol for any work undertaken outside the hours specified in condition	Pre- Construction	The Out Of Hours (OHH) protocol is included as Appendix A of the CNVMP (rev 17, dated 18 August 2022).	
	B64 or outside the circumstances specified under condition B67. An Out-Of-Hours Work Protocol must provide for the			
	assessment, management and monitoring of out of hours work noise including:			
	(a) where works are shown to be inaudible at the nearest sensitive receivers and vibration levels do not exceed those stipulated			
	by Table 2.2 and Table 2.4 of Assessing Vibration: a technical guideline (DEC, 2006);			
	(b) where a negotiated agreement has been arranged with affected receivers;			
	(c) where noise can be shown to satisfy the noise management levels specified in the Interim Construction Noise Guideline			
	(ICNG, DECC, 2009) at non residential land uses; or			
	(d) where works are undertaken as part of an Extended Hours Work Plan approved as part of the Out Of Hours Work Protocol.			
	(a) where works are undertaken as part of an extended Hours work Plan approved as part of the Out Of Hours work Protocol.			
DCO.	As Extended Users Week Place will be accounted for any construction understand design the party 1.11. 7.11. 7.11.	Ctt	The Federal of Users Medic (FUM) Plan is considered as Association of CNMAD (see 4.7 debted 4.0 Association 2002)	_
B69	An Extended Hours Work Plan will be prepared for any construction undertaken during the extended hours detailed in Table 3	Construction	The Extended Hours Work (EHW) Plan is provided as Appendix B of CNVMP (rev 17, dated 18 August 2022).	
1	as required by condition B68(d). The Extended Hours Work Plan must provide for:			
1	(a) a three month assessment period, commencing at the start of extended hours construction works;			
1	(b) implementation of the Construction Noise and Vibration Management Plan;			
	(c) noise monitoring at a representative number of sensitive receivers (including closest and furthest) to confirm the predicted			
	noise levels;			
	(d) targeted consultation with the noise affected sensitive receivers;			
	(e) notification of the relevant Council, local residents and other affected stakeholders and sensitive receivers of the timing and			
	duration at least 48 hours prior to the commencement of the works.			
	(f) construction work timeframes and methods for investigation of noise complaints;			
	(g) submission of monthly complaints reports to the Department for the life of extended hours activities;			
	(h) continual refinement of mitigation measures based on consultation with the noise affected sensitive receivers;			
	(i) implementation of work practices set out in section 5.2 of the ICNG;			
	(j) a final summary report submitted to the Secretary at the end of the assessment period in subcondition (a), detailing the			
	outcomes of the assessment period, the resolution of complaints during the assessment period, and demonstrate the			
	acceptability of works outside standard hours. See Table 3.

	Construction Traffic Noise				
B74	Where feasible and reasonable, construction traffic movements on public roads must aim to limit any increase in existing road	Construction	The Construction Noise and Vibration Management Plan (CNVMP) (rev 5, dated 8 June 2018) was approved by DPE 15 June 2018.		
	traffic noise levels to no more than 2 dB LAeq, period, where 'period' is defined in the EPA's Road Noise Policy (RNP) for both		The CNVMP (rev 17, dated 18 August 2022) is currently being implemented on site.		
	day and night.				
B75	The Applicant is to ensure that construction contractor's vehicles operate so as to minimise impacts. Measures that could be	Construction	The Construction Noise and Vibration Management Plan (CNVMP) (rev 5, dated 8 June 2018) was approved by DPE 15 June 2018.		
	used include:		The CNVMP (rev 17, dated 18 August 2022) is currently being implemented on site.		
	(a) toolbox talks;				
I	(b) contracts that include provisions to deal with unsatisfactory noise performance for the vehicle and/or the operator; and		Construction contractor's vehicles operate to minimise impacts and measures which have been implemented as required.		
1	(c) specifying non-tonal movement alarms in place of reversing beepers or alternatives such as reversing cameras and proximity				
	alarms, or a combination of these, where tonal alarms are not mandated by legislation.				
	Use of compression brakes for construction vehicles associated with the project that are on site or on nearby roads is not	Construction	Management measure (NV11) is outlined in Section 3.4 of the CNVMP (rev 17, dated 18 August 2022) to address this condition.		
	permitted (e.g. Anzac Avenue).				
	Construction Noise and Vibration Management Plan				
B77	A Construction Noise and Vibration Management Plan (CNVMP) must be prepared for the development to the satisfaction of	Pre- Construction	The Construction Noise and Vibration Management Plan (CNVMP) (rev 5, dated 8 June 2018) was approved by DPE 15 June 2018.		
	the Secretary. The plan must form part of the CEMP required by C1 and detail how construction noise and vibration impacts will		The CNVMP (rev 17, dated 18 August 2022) is currently being implemented on site.		
I	be minimised and managed. The Plan must be consistent with the guidelines contained in the ICNG (DECC, 2009). The plan must	:			
	be developed in consultation with the EPA and include:		CTAMP-B (rev K, dated 6 December 2019) was approved by the Secretary on 6 December 2019. This approval was subject to		
	(a) identification of the work areas, site compounds and access points;		updates provided in Attachment 1 of the approval letter. The CTAMP- B (rev O, dated 18 August 2022) is currently being		
	(b) identification of the type and number of plant and equipment expected on site at the same time;		implemented on site.		
	(c) identification of sensitive receivers (including heritage structures if relevant) and relevant construction noise and vibration				
	goals applicable to the project as stipulated in condition B71;				
	(d) details of construction activities and an indicative schedule for construction works, including the identification of key noise				
	and/or vibration generating construction activities (based on representative construction scenarios) that have the potential to				
	generate noise and/or vibration impacts on surrounding sensitive receivers, particularly residential areas; (e) an Out-of-hours Work Protocol as referenced in condition B68 for the assessment, management and approval of works				
	outside standard construction hours, for the Secretary's approval. The Out-of-hours Work Protocol must:				
	(i) detail assessment of out-of-hours works against the relevant noise and vibration criteria;				
	(ii) provide detailed mitigation measures for any residual impacts (that is, additional to general mitigation measures), including				
	extent of at-receiver treatments;				
	(iii) include proposed notification arrangements; and				
	(iv) include an Extended Hours Work Plan as required by condition B69.				
	(f) identification of feasible and reasonable measures to be implemented to minimise and manage construction noise impacts,				
	including, but not limited to, acoustic enclosures, erection of noise walls (hoardings), respite periods;				
	(g) management of the number of trucks accessing the site;				
	(h) a truck driver protocol addressing designated routes, acceptable delivery hours, speed limits on site, no engine braking in				
I	the vicinity or on site, no extended periods of engine idling, avoiding queuing in or around the site and limiting the need for				
	reversing on site;				
	(i) identification of feasible and reasonable procedures and mitigation measures to ensure relevant vibration criteria are				
	achieved, including applicable buffer distances for vibration intensive works, use of low vibration generating equipment/				
	vibration dampeners or alternative construction methodology, and pre and post construction dilapidation surveys of sensitive structures where vibration is likely to result in damage to buildings and structures (including surveys being undertaken				
	immediately following a monitored exceedance of the criteria);				
	(j) a description of how the effectiveness of mitigation and management measures would be monitored during the proposed				
	works, clearly indicating how often this monitoring would be conducted, the locations where monitoring would take place, how				
	the results of this monitoring would be recorded and reported, and, if any exceedance is detected, how any non-compliance				
	would be rectified;				
	(k) noise and vibration monitoring procedures (routine and complaints triggered monitoring);				
B78	Blasting is not permitted on the site.	Construction	No blasting has occurred on site.		
	Hours of Operation

	Unexpected Finds Protocol				
B97	Before commencement of construction, the Applicant must prepare an Unexpected Finds Protocol for the development in consultation with the Registered Aboriginal Parties, OEH and the NSW Heritage Division and must implement the Protocol in accordance with its terms.	Pre- Construction	EWEMP / EWHMP superseded by CHMP (rev 6, dated 12 June 2018) approved by the DPE on 15 June 2018. The CHMP (rev 16, dated 18 August 2022) is currently being implemented on site. * Figure 3-10 Unexpected find procedure (Aboriginal heritage) * Figure 3-11 Unexpected find procedure (skeletal material) *Figure 3-12 Unexpected find procedure (Non-Aboriginal heritage)		
	Discovery of Human Remains or Aboriginal Objects or Places				
в98	If human remains are discovered on site, then all work surrounding the area must cease, and the area must be secured. The Applicant must immediately notify NSW Police and OEH, and work must not recommence in the area until authorised by NSW Police and OEH.	Construction	EWEMP / EWHMP superseded by CHMP (rev 6, dated 12 June 2018) approved by the DPE on 15 June 2018. The CHMP (rev 16, dated 18 August 2022) is currently being implemented on site. No unexpected finds have occurred during the reporting period.		
	If any Aboriginal object or Aboriginal place is identified on site, or suspected to be on site: (a) all work in the immediate vicinity of the object or place must cease immediately; (b) a 10m buffer area around the object or place must be cordoned off; and (C) OEH must be contacted immediately.	Construction	EWEMP / EWHMP superseded by CHMP (rev 6, dated 12 June 2018) and approved by the DPE on 15 June 2018. The CHMP (rev 16, dated 18 August 2022) is currently being implemented on site. No unexpected finds have occurred during the reporting period.		
	Work in the immediate vicinity may only recommence if: (a) the object or place is confirmed by OEH upon consultation with the Registered Aboriginal Parties, not to be an Aboriginal object or Aboriginal Place; or (b) an Aboriginal Cultural Heritage Management Plan is prepared in consultation with the Registered Aboriginal Parties and OEH to include the object or place and appropriate measures in respect of it, and the Plan is approved by the Secretary; or (c) OEH is satisfied as to the measures to be implemented in respect of the object or place and makes a written direction in that regard.	Construction	EWEMP / EWHMP superseded by CHMP (rev 6, dated 12 June 2018) approved by the DPE on 15 June 2018. The CHMP (rev 16, dated 18 August 2022) is currently being implemented on site. No unexpected finds have occurred during the reporting period.		
	Heritage Interpretation Plan				
B101	Prior to commencement of operation, the Applicant must prepare a Heritage Interpretation Plan based on the recommendations contained in the Heritage Interpretation Strategy (artefact, 2017) approved under MPE Stage 1. The plan must be prepared for the entire Moorebank Intermodal Precinct (MPE and MPW sites).	Pre-Operation	A Heritage Interpretation Plan (HIP) (Artefact, 2019) was approved by the DPE on 9 September 2019.		
	The plan must form part of the OEMP required by condition C3 and must: (a) be prepared by a suitably qualified and experienced person(s); (b) be prepared in consultation with NSW Heritage Division, Council, relevant landowners and stakeholders including the Moorebank Heritage Group (MHG), Department of Defence, as well as the Relevant Aboriginal Parties (RAPs) should themes relating to Aboriginal heritage be included for interpretation; and (c) be approved by the Secretary prior to the commencement of operation.	Pre-Operation	A Heritage Interpretation Plan (HIP) (Artefact, 2019) was approved by the DPE on 9 September 2019.		
	Biodiversity				
B103	The Applicant must: (a) ensure that no more than 4.88 hectares of native vegetation is cleared for the development; and (b) minimise: i. the impacts of the development on hollow-bearing trees ii. the clearing of native vegetation and key habitat within the approved disturbance footprint.	Construction	Construction Flora Fauna Management Plan (CFFMP) was approved by DPE on 1 June 2018 and addresses clearing requirements including minimising impacts to habitat. The revised CFFMP (rev 17, 18 August 2022) is currently being implemented on site.		
	Prior to the commencement of construction, unless the Secretary agrees otherwise, the Applicant must retire biodiversity credits of a number and class specified in Tables 6, 7A and 7B and provide evidence to the satisfaction of the Secretary. The retirement of credits must be carried out in accordance with the NSW Biodiversity Offsets Policy for Major Projects, and can be achieved by (a) acquiring or retiring credits under the Biobanking scheme established under the-then Threatened Species Conservation Act 1995 (b) making payments unto an offset fund that has been established by the NSW Government; or (c) providing suitable supplementary measures. See Table 6 and 7. Table 6: Ecosystem credit requirements Site: MPE Stage 2 (excluding Moorebank Avenue site) Plant community type: Hard-leaved Scribbly Gum - Parramatta Red Gum heathy woodland of the Cumberland Plain, Sydney Basin (ME003) Area to be impacted: 0.29ha Credits Required; 7 Site: MPE Stage 2 (excluding Moorebank Avenue site) Plant community type: Broad-leaved Ironbark - Melaleuca decora shrubby open forest on clay soils of the Cumberland Plain, Sydney Basin Bioregion (ME002) Area to be Impacted: 0.05 ha 3 Credits required: 3 Site: Moorebank Avenue site Plant Community Type: Hard-leaved Scribbly Gum - Parramatta Red Gum heathy woodland of the Cumberland Plain, Sydney Basin (ME003) Area to be Impacted: 3.73 ha Credits required: 167 Site: Moorebank Avenue site Plant community Type: Parramatta Red Gum woodland on moist alluvium of the Cumberland Plain, Sydney Basin (ME005)	Construction	All credits associated with B104 have been retired. There has been ongoing communication with DPE regarding retirement of biodiversity credits, the last letter received from the Secretary was dated 30 June 2020. The Secretary acknowledged retirement of credits was satisfactory and requested evidence of retirement of credits. This evidence was provided on 5 June 2020 and was acknowledged by the Secretary in a letter dated 22 June 2020.

Construction Flora and Fauna Management Plan Prior to clearing of native vegetation, the Applicant must prepare a Construction Flora and Fauna Management Plan (CFFMP) in consultation with OEH. The CFFMP must form part of the CEMP required by condition C1 and must include the following: (a) measures to minimise the loss of key fauna habitat, including tree hollows; (b) measures to minimise the impacts on fauna on site, including conducting fauna pre-clearance surveys prior to vegetation clearing and building demolition; (c) controlling weeds and feral pests; (d) an Unexpected Finds Procedure detailing procedures and management measures to be implemented in the event that flora and fauna is uncovered in any area not identified in the updated Biodiversity Assessment (BAR); (e) to ensure biodiversity values not intended to be impacted are protected. These measures may include barriers and mapping of protected/'no-go' areas; and (f) a program to monitor the effectiveness of the measures in the CFFMP. Prior to removing/clearing any vegetation, pre-clearing surveys and inspections for threatened species, populations and ecological communities must be undertaken to confirm the on-site location of those entities. The surveys and inspections, and any subsequent relocation of species and associated management measures, must be undertaken under the guidance of	Pre-Construction	requirements including minimising impacts to habitat. The revised CFFMP (rev 17, 18 August 2022) is currently being implemented on site. Construction Flora and Fauna Management Plan (CFFMP) was approved by DPE on 1 June 2018 and addresses clearing requirements including minimising impacts to habitat. The revised CFFMP (rev 17, 18 August 2022) is currently being implemented on site. Construction Flora and Fauna Management Plan (CFFMP) was approved by DPE on 1 June 2018 and addresses clearing		
B108	(a) develop a Biodiversity Monitoring Strategy to identify any changes between upstream and downstream sites as a result of the construction and operation of the development; and (b) set the stormwater water quality and quantity performance criteria referred to in condition B40. Any unavoidable indirect impacts as identified through the Biodiversity Monitoring Strategy required under condition B105, e.g. impacts of change hydrology on vegetation in boot land/ biobank site must be identified and measures to address this must be developed in consultation with OEH and implemented to the satisfaction of the Secretary. Measures may include additional offsetting. Construction Flora and Fauna Management Plan Prior to clearing of native vegetation, the Applicant must prepare a Construction Flora and Fauna Management Plan (CFFMP) in consultation with OEH. The CFFMP must form part of the CEMP required by condition C1 and must include the following: (a) measures to minimise the loss of key fauna habitat, including tree hollows; (b) measures to minimise the impacts on fauna on site, including conducting fauna pre-clearance surveys prior to vegetation clearing and building demolition; (c) controlling weeds and feral pests; (d) an Unexpected Finds Procedure detailing procedures and management measures to be implemented in the event that flora and fauna is uncovered in any area not identified in the updated Biodiversity Assessment (BAR); (e) to ensure biodiversity values not intended to be impacted are protected. 27 March 2020) is currently being implemented on site. The Asset Protection Zones are presented in the Operational Emergency Response Plan (OERP). The OERP (rev 14, 26 March 2020) is currently being implemented on site and was approved by OPE on 8 April 2020. This compliance report relates to construction only. Dangerous Goods as defined in the Australian Code for the Transport of Dangerous Goods as defined in the Australian Code for the Transport of Dangerous Goods as defined in the Australian Standards; and (b) the NSW EPA's Storing and Handling of Liquids: Environmental Protection — Participants Handbook if the chemicals are liquids. In the event of an inconsistency between the requirements shall prevail to the extent of the inconsistency between the requirements that for liquids, a minimum bund volume of 110% of the volume of the largest single stored volume within the bund is required. The Applicant (the operator/occupant of each premises) must ensure compliance with the Environment Protection Manual for Authorised Officers: Bunding and Spill Management – technical bulletin (EPA, 1997 and that for liquids, a minimum bund volume of 110% of the volume of the largest single stored volume within the bund is required. Dangerous Goods present at any time within each premises or transported from and to the development must be kept below the screening threshold quantities listed in the Department's Hazardous and Offensive Development Guidelines Applying SEPP 33 (January 2011), as stated in Section 3.4 (SW46 and SW48) of the CSWMP (Rev 19, 18 August 2022).
The Applicant (the operator/occupant of each premises) must store and handle all chemicals, fuels and oils, including Dangerous Goods as defined in the Australian Code for the Transport of Dangerous Goods by Road & Rail, in accordance with: (a) the requirements of all relevant Australian Standards; and (b) the NSW EPA's Storing and Handling of Liquids. Environmental Protection — Participants Handbook if the chemicals are liquids. In the event of an inconsistency between the requirements listed above, the most stringent requirement shall prevail to the extent of the inconsistency. B113 The Applicant (the operator/occupant of each premises) must ensure compliance with the Environment Protection Manual for Authorised Officers: Bunding and Spill Management — technical bulletin (EPA, 1997 and that for liquids, a minimum bund volume of 110% of the volume of the largest single stored volume within the bund is required. B114 The quantities of Dangerous Goods present at any time within each premises or transported from and to the development must be kept below the screening threshold quantities listed in the Department's Hazardous and Offensive Development Guidelines Application Guidelines Applying SEPP 33 (January 2011), as stated in Section 3.4 (SW46 and SW48) of the CSWMP (Rev 19, 18 August 2022).
Authorised Officers: Bunding and Spill Management – technical bulletin (EPA, 1997 and that for liquids, a minimum bund volume of 110% of the volume of the largest single stored volume within the bund is required. B114 The quantities of Dangerous Goods present at any time within each premises or transported from and to the development must be kept below the screening threshold quantities listed in the Department's Hazardous and Offensive Development Guidelines Application Guidelines Applying SEPP 33 (January 2011). Construction Quantities of Dangerous Goods must be kept in accordance with the Department's Hazardous and Offensive Development Guidelines Applying SEPP 33 (January 2011), as stated in Section 3.4 (SW46 and SW48) of the CSWMP (Rev 19, 18 August 2022).
must be kept below the screening threshold quantities listed in the Department's Hazardous and Offensive Development Guidelines Application Guidelines Applying SEPP 33 (January 2011), as stated in Section 3.4 (SW46 and SW48) of the CSWMP (Rev 19, 18 August 2022).
SEED 22 was repealed as of 1 March 2022 and State Environmental Planning Policy (Posilionce and Hazards) 2021 replaced it
Prior to occupation of each premises and in each instance of occupation by a new occupant, a report must be submitted to the Secretary confirming that the premises will be operated so as to comply with the requirements of conditions B112 and B114. Notes: The total quantity of DG within a warehouse must be considered as part of the screening, not the size of one container and separation distances must be based on the Applying SEPP 33 guideline. Pre-Operation The reports will be developed as so ccupation of warehouse occurs and forms part the Warehouse Operational Environmental Management Plans for each warehouse or tenancy required by Condition C6. WOEMPs are in place for all current tenancies. This compliance report relates to construction only.
Emergency Response Plan
Six months prior to operation, the Applicant must prepare an Emergency Response Plan, in consultation with FRNSW and NSW Police Force. The Emergency Response Plan must include, but not be limited to: (a) protocols and procedures to be followed during emergency situations associated with the operation of the project (including fires and explosions). The protocols and procedures are to take into account the needs of people with a disability or who may experience access problems in emergency situations; (b) details of traffic management measures to address the potential for escalation of the emergency; (c) design and management measures to address the potential environmental impacts of an emergency situation, including measures for containment of contaminated fire-fighting water, fuel spills and gaseous combustion products; and (d) details of a training and testing program to ensure that all operational staff are familiar with the Emergency Response Plan (ERP) was prepared and included in the BEEP, BMP and FERP. Approval to combine the documents was granted by DPE on 21 May 2019. The Operational Emergency Response Plan (DERP) was approved by DPE on 10 December 2019. The revised OERP (rev 14, 26 March 2020) is currently being implemented on site. Operation
Construction and Demolition Waste Management
B117 All waste generated by the project must be assessed, classified and managed in accordance with the Waste Classification Construction The Construction and Demolition Waste Management Plan (CDWMP) was approved by the DPE on 1 June 2018. The revised

	Operational Waste Management				
B120	Prior to the commencement of operation, the Applicant must prepare a Waste Management Plan for the development to the	Pre-Operation	Approval to combine the waste and resource management plans was granted on 21 May 2019.		
	satisfaction of the Secretary. The Waste Management Plan must form part of the OEMP required by condition C3 and be prepared in accordance with condition C7. The Plan must: (a) detail the type and quantity of waste to be generated during operation of the development; (b) describe the handling, storage and disposal of all waste streams generated on site, consistent with the Protection of the Environment Operations Act 1997, Protection of the Environment Operations (Waste) Regulation 2014 and the Waste		An Operational Waste and Resources Management Plan (OWRMP) was approved by the DPE on 9 September 2019. The revised OWRMP (rev 10, 27 March 2020) is currently being implemented on site. This compliance report relates to construction only.		
	Classification Guidelines Part 1: Classifying Waste (EPA, 2014) (as may be updated or replaced from time to time); (c) detail the materials to be reused or recycled, either on or off site; and (d) include the Management and Mitigation Measures included in APPENDIX B.				
B121	Waste must be secured and maintained within designated waste storage areas at all times and must not leave the site or be deposited on or otherwise enter neighbouring public or private properties.	Operation	This compliance report relates to construction only.		
	Statutory Requirements				
B122	All waste materials removed from the site must only be directed to a waste management facility or premises lawfully permitted to accept the materials.	At all times	Addressed in Section 3.6.2, 3.6.4 and 3.8 of the CDWMP (rev 13, 18 August 2022). Addressed in Table 3-5 - WR4 of the OWRMP (rev 10, 27 March 2020).		
B123	The Applicant must assess and classify all liquid and non-liquid wastes to be taken off site in accordance with the latest version of EPA's Waste Classification Guidelines Part 1: Classifying Waste (EPA, 2014).	At all times	Addressed in Section 3.1, 3.8 and Table 11 of the CDWMP (rev 13, 18 August 2022). Addressed in Table 3-5 - WR5 of the OWRMP (rev 10, 27 March 2020).		
B124	Waste generated outside the site must not be received at the site for storage, treatment, processing, reprocessing, or disposal unless it satisfies these condition	At all times	Addressed in Section 3.1 and 3.8 of the CDWMP (rev 13, 18 August 2022). Addressed in Table 3-5 - WR6 of the OWRMP (rev 10, 27 March 2020).		
B125	The Applicant must retain all sampling and waste classification data for the life of the development in accordance with the requirements of EPA.	At all times	Addressed in Section 3.1, 3.6 and 3.8 of the CDWMP (rev 13, 18 August 2022). Addressed in Table 3-5 - WR7 of the OWRMP (rev 10, 27 March 2020).		
B126	The collection of waste generated during operation of the development must be undertaken between 7 am to 10 pm Monday to Friday.	Operation	This compliance report relates to construction only.		
	Pests, Vermin and Noxious Weed Management				
B127	The Applicant must: (a) take all reasonable steps to manage pests and vermin on the site; (b) manage declared noxious weeds on the site in accordance with the requirements of the Noxious Weeds Act 1993; and (c) inspect the site on a regular basis, no less than every 3 months, to ensure that these measures are working effectively, and that pests, vermin or noxious weeds are not present on site in sufficient numbers to pose an environmental hazard, or cause the loss of amenity in the surrounding area.	Construction	Appendix B of the CFFMP (rev 17, 18 August 2022) sets out the Weed, Pest and Vermin Management Protocol.		
	Note: For the purposes of this condition, noxious weeds are those species subject to an order declared under the Noxious Weed Act 1993.				

	Contamination			
B128	The Applicant must provide the NSW EPA with a copy of all reports to date relating to the assessment of per- and poly- fluoroalkyl substances including perfluorooctanoate (PFAS) undertaken for the Site.	Construction	The following reports were submitted as part of the EP Risk Letter to satisfy CoC B128 (dated 15 January 2018): GHD Intrusive Site Investigations, DNSDC Moorebank, 10 September 2015 (GHD 2015); GHD Environmental Management Plan, Former DNSDC, Moorebank NSW, September 2016 (GHD 2016); JBS&G Australia Pty Ltd (JBS&G') Site Audit Statement and Report 0503-1611 Part Lot 1 in DP 1048263 Former DNSDC, Moorebank Avenue Moorebank NSW, 12 October 2016 (ref: 51732- 104288, rev 1) (JBSG 2016); and GHD review of Per- and Poly-fluoroalkyl substances (PFAS) Sources and Testing, Former DNSDC Site, Moorebank NSW, 6 December 2016 (GHD 2016a).	
B129	Prior to the commencement of early works or construction on site, the Applicant must engage a Site Auditor accredited under the EPA Contaminated Land Management Act 1997 NSW Site Auditor Scheme.	Pre- Construction	The Site Auditor was endorsed by EPA on 15 February 2018.	
B130	Prior to an occupation certificate being issued, the Applicant must submit to the Secretary a Site Audit Statement, prepared in accordance with the NSW Contaminated Land Management - Guidelines for the NSW Site Auditor Scheme (3rd Edition, 2017), which demonstrates that the site is suitable for its intended land use (i.e. Section 'A'). The Site Auditor must consider the most up to date PFAS guidance.	Operation	DPE approved staging of Site Audit Statement under CoC A14 on 2 April 2019. The Site Audit Statements will be progressively prepared and submitted to the Secretary one month prior to the issue of an occupation certificate for that relevant stage. Site Audit Statement for Lot 24 (Northwest Limited Works Stage) prepared by EPA accredited auditor was submitted to the Secretary on 20 May 2019. Site Auditor certified that the Statement was prepared "with due regard to relevant laws and guidelines". Site Audit Statement for Lot 23 prepared by EPA accredited auditor on 21 July 2020 was submitted to the Secretary. The Site Auditor certified that the Statement was prepared "with due regard to relevant laws and guidelines".	
B131	If the Site Auditor determines that further assessment of PFAS contamination, the Applicant must contact the NSW EPA as soon as practicable to discuss requirements for community consultation and long term management.	Pre- Construction	Per- and Poly-Fluoroalkyl Substances ('PFAS') Preliminary review, Moorebank Precinct East ('MPE'), 400 Moorebank Avenue, Moorebank NSW. Site Audit Statement for Lot 24 (Northwest Limited Works Stage) prepared by EPA accredited auditor was submitted to the Secretary on 20 May 2019. Site Auditor did not indicate that further PFAS assessment was required. Site Audit Statement for Lot 23 prepared by EPA accredited auditor on 21 July 2020 was submitted to the Secretary. The Site Auditor did not indicate that further PFAS assessment was required.	
B132	Should the Applicant identify a potential risk to off-site receptors due to PFAS contamination, the Applicant must contact the NSW EPA as soon as practicable to discuss requirements for community consultation and long term management.	Pre- Construction	Not triggered.	
B133	Prior to any demolition on the site, and entry and any subsurface activities within the southern burial pits, an UXO, EO and EOW Site Assessment Survey must be undertaken by an UXO contractor listed on the Defence Panel of suitably qualified UXO consultants and contractors and submitted to the Secretary.	Pre- Construction	G-tek Australia Pty Limited (G-tek) reviewed previous reports and activities with particular emphasis on the potential for remnant unexploded ordnance (UXO), explosive ordnance (EO) and explosive ordnance waste (EOW) within the overall Site and the area referred to as the "southern burial pits". Letter dated 15 January 2018 indicated that that no additional UXO, EO or EOW Site Assessment Surveys are required within the southern burial pits area is required prior to any demolition, entry or subsurface activities within the area. This was submitted to DPE as part of the CMP and approved on 30 May 2018. The MPW PFAS Management Plan was updated on 25 June 2019 (rev H) to include MAUW which bisects MPE and MPW.	

B134	Prior to early works and fill importation, a Contamination Management Plan must be prepared to the satisfaction of the Secretary and form part of the CEMP required under condition (1.1 The Contamination Management Plan is to be based on the Environmental Management Plan prepared by GHD (2016) and results of the UXO, EO and EOW Site Assessment Survey and must take into account additional risks posed by the proposed works and in particular: (a) excavation within the southern burial pits; (b) removal/remediation of underground storage tanks; (c) disturbance of soil containing asbestos material; and (d) demolition of buildings containing asbestos materials. The Contamination Management Plan must include:	Pre- Construction	The Contamination Management Plan was prepared by EP Risk (CMP - Version 5, dated 17 April 2018), and approved 30 May 2018 as a staged CMP. A secondary CMP was prepared by EP Risk for the completion of Moorebank Avenue Upgrade Works (MAUWCMP - Version 7, dated 26 May 2021). The CMP (Rev11, dated 22 February 2022) is being implemented under Appendix N of the MPE S2 CEMP (rev 17, dated 18 August 2022). The Contamination Management Plan was prepared by EP Risk (CMP - Version 5, dated 17 April 2018), and approved 30 May 2018		
B135	The Contamination Management and remediation plan, prepared by a qualified person(s) listed on the Defence Panel; (b) an Asbestos Management Plan; and (c) Unexpected Finds Procedure. The Contamination Management Plan must be approved by a NSW EPA Accredited Site Auditor prior to submission to the Secretary.	Pre-Construction	as a staged CMP. A secondary CMP was prepared by EP Risk for the completion of Moorebank Avenue Upgrade Works (MAUWCMP - Version 7, dated 26 May 2021). The CMP (Rev11, dated 22 February 2022) is being implemented under Appendix N of the MPE S2 CEMP (rev 17, dated 18 August 2022).		
B136	Following demolition, a supplementary UXO, EO and EOW Site Assessment Survey is to be undertaken and an updated Contamination Management Plan is to be prepared to the satisfaction of the Secretary to address any additional contamination issues identified. Remediation works must only be carried out by suitably qualified and experienced contractor(s) including a contractor listed on the Defence Panel in the case of UXO, EO and EOW.	Construction	The CMP (Version 5, dated 17 April 2018) was approved on 30 May 2018 and includes: * Appendix C - UXO, EO and EOW management and remediation plan * An unexpected finds program is included in Table 8 * Appendix E - Accredited site auditor. The CMP (Rev11, dated 22 February 2022) is being implemented under Appendix N of the MPE S2 CEMP (rev 17, dated 18 August 2022). The MAUWCMP (MAUWCMP - Version 7, dated 26 May 2021) includes: * Appendix C - UXO, EO and EOW management and remediation plan * An unexpected finds program included in Table 10 * Endorsement of an Accredited Site Auditor in Appendix E.		
B137	Details of any contaminated cells located on the site following remediation shall be provided to the Secretary, including relevant	Construction	No containment cells identified to date.		
B138	GPS data on the extent of the cell and details of the long term management of the cells. All contaminant cells located on the site following remediation shall be registered on title including, details of relevant	Construction	No containment cells identified to date.		
5150	Contamination Management requirements.	construction	no containment cens identified to date.		
	Urban Heat Island Mitigation Strategy				
8139	Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, an Urban Heat Island (UHI) Mitigation Strategy must be prepared and submitted to the Secretary for approval, in consultation with the NSW Government Architect. The UHIMS must be prepared by a suitably qualified and experienced person(s). The UHI Mitigation Strategy must (a) review the current architectural details, building layout, landscaping provision, shading provision, landscape irrigation, stormwater water detention and WSUD, as well as building and paving material specifications; (b) make recommendations to mitigate the UHI effects generated by the development including but not limited to: (i) provision of WSUD elements; (ii) street tree planting; (iii) landscape coverage and screening; (iv) use of building material including reflectivity; NSW Government 25 Moorebank Intermodal Precinct East Stage 2 Department of Planning and Environment SSD 7628 (ivi) improved green space maintained by independent, climate resilient water supplies, to achieve increased amenity and urban cooling; and (vii) heat generation from operations; and (c) include a design strategy with the goal to achieve a 4°C degree decrease in temperature compared to neighbouring industrial developments; (d) details of where and how recommendations from the UHI Mitigation Strategy have been incorporated into the: (i) updated final Development Layout Plans and WSUD Plans required by conditions A22 and A23; (ii) UDIP required by condition B140; (iv) CEMP required by condition C1; and (v) OEMP required by condition C3.	Pre-Construction and Pre- Operation	The Urban Heat Island Mitigation Strategy (rev 7, 11 June 2019) was approved by DPE on 21 June 2019.		

	Urban Design and Landscape Plan				
B140	Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, an	Pre- Construction and Pre-	The Urban Design and Landscape Plan (UDLP) and associated subplans (under B141 below) were submitted to DPE for review and

	experienced person(s), in consultation with the relevant council(s). The UDLP must be approved by the Secretary, in				
	consultation with the NSW Government Architect. The UDLP must present an integrated urban and landscape design for the		The Urban Design and Landscape Plan (UDLP) for Area 1 (revision 8, dated 11 March 2020) was approved by DPE on 5 June 2020		
	development, and must include, but not be limited to:		excluding condition B140 (e)(vi). A Modification Application (MOD4) for revision to B140(e)(vi) (landscaping car parking bays for		
	(a) identification of design objectives, principles and standards based on -		Area 1) was submitted to DPE 8 September 2020.		
	(i) local environmental values,				
	(ii) urban design context,		The MPE Stage 2 UDLP (rev 9C, dated 12 August 2020) for Area 2 was approved by DPE on 4 September 2020.		
	(iii) sustainable design and maintenance,				
	(iv) community, visitor and worker safety, amenity and privacy, including 'safer by design' principles where relevant,		The revised MPE Stage 2 Consolidated UDLP (rev12, dated 18 December 2020) was approved by DPE on 5 February 2021.		
	(v) relevant design standards and guidelines,				
	(vi) addressing the visual amenity and values of adjoining receivers,				
	(vii) minimising and addressing the footprint of the project (including at operational facilities), and				
	(viii) the urban design principles outlined in the documents referred to in condition A2;				
	(b) landscaping and building design opportunities to mitigate the visual impacts of buildings and infrastructure particularly				
	when viewed from Moorebank Avenue, Wattle Grove, and Casula);				
	(c) details on the location of existing vegetation and proposed landscaping (including use of endemic and advanced tree species				
	where practicable). Details of species to be replanted/revegetated must be provided, including their appropriateness to the				
	area and habitat for threatened species. Where feasible and reasonable, top soil and vegetation to be removed must be reused;				
	(d) details of pedestrian movement through the site and to surrounding areas for employees;				
	(e) incorporate the following:				
	(i) a minimum landscaped width of 10m within the 18m setback from Moorebank Avenue;				
	(ii) the footprint of the warehouses along the eastern boundary must be reduced so that the car parking area and warehouse				
	can be setback a minimum of 5m from the eastern internal road to provide visual screening of the building, and adequate				
	landscape width to support canopy trees;				
	(iii) landscaping located around the car parking areas is to support sufficient canopy trees to provide visual screening to the				
	warehouse buildings;				
	(iv) 15% of the site landscaped at ground level, 10% of which must include soft landscaping and not include land set aside for				
	future access ways;				
	(v) minimum rate of 1 canopy tree per 30m2 of landscaped area; (vi) a 2.5 m wide landscaped bay every 6-8 car spaces incorporating canopy trees for shade, with the exception of Area 1 as				
	identified in the UDLP;				
	(vii) perimeter site screening using advanced shrubs and canopy trees;				
	(viii) perimeter and on site detention and biofiltration/bioretention basin fences higher than 1.2m must be transparent and				
	dark in colour but not constructed of chain wire.				
	(f) include a planting schedule including details of the soil specification and depth and irrigation systems as well as tree and				
	shrub species, expected mature height, pot sizes and planting densities) and deep soil areas containing soil (not spoil);				
	(g) a description of the retaining walls, including the graphics such as sections, perspective views and material details;				
	(h) details of the landscaped areas and solid fencing required to screen waste bin or other outside storage areas;				
	(i) graffiti management commitments and provisions;				
	(j) the sub-plans identified in condition B141;				
	(k) details of where and how recommendation from the UDLP and sub plans have been incorporated into the:				
	(i) updated final Development Layout Plans and WSUD Plans required by conditions A22 and A23;				
	(ii) updated Architectural Plans required by condition A24, including architectural elements to articulate				
	building facades and minimise large expanses of blank walls				
	(iii) updated OEMP required by condition C3;				
	(I) details of how the principles of Ecologically Sustainable Development listed at condition B142, in particular rainwater capture				
	and reuse and energy efficiency have been incorporated into the UDLP and final Stormwater Management Plan plans required				
	by Condition B40;

			1		

The Urban Design and Landscape Plan must include the following sub-plans: Pre- Construction and Pre-The UDLP including the subplans required by this condition were submitted to DPE for review and approval on 7 June 2019. The (a) a Landscape Vegetation Management Sub Plan to assist in the monitoring and maintenance of landscape elements required delivery of these plans has been staged in accordance with CoC A14. to be delivered as part of the approval. The Plan must be prepared and approved by the Secretary within twelve months of the date of this approval, unless otherwise agreed by the Secretary. The Urban Design and Landscape Plan (UDLP) for Area 1 (revision 8, dated 11 March 2020) was approved by DPE on 5 June 2020 The Plan must provide details of the monitoring and maintenance procedures for the landscape vegetation elements, excluding condition B140 (e)(vi). rehabilitated vegetation and landscaping (including weed and pathogen control) including performance indicators, The MPE Stage 2 UDLP (rev 9C, dated 12 August 2020) for Area 2 was approved by DPE on 4 September 2020. identification of commitments, identification of the responsibilities of each entity involved in the management of the intermodal precinct including the overarching management responsibilities and obligations for common land and tenant responsibilities, timing and duration, as well as contingencies where rehabilitation of vegetation The Landscape Vegetation Management Subplan (Rev 6C, dated 31 July 2020), Lighting Subplan (Rev 6C, dated 31 July 2020), Cycling and landscaning measures fail and Pedestrian Facilities Subplan (Rev 5C, dated 12 August 2020), Employee Outdoor Meal Break Area Subplan (Rev 5C, dated 12 The approved plan must be implemented prior to occupation of the warehouse and freight village. August 2020) and the Signage Subplan (Rev 5C, dated 31 July 2020) for Areas 1 and 2 were approved by DPE on 4 September 2020. (b) a Lighting Sub Plan to assist in the control of lighting and reduce the visual impact of the 24 hour operational facility when viewed from residents within residential areas within the locality. The Plan must provide an assessment of the location, design The Consolidated UDLP (including the consolidated subplans) was submitted to DPE and Council on 26 June 2020 for consultation. specification and impacts of operational lighting associated with the development and measures proposed to minimise lighting impacts and standardise lighting design within the MPE development. The Plan must be prepared and approved by the The revised MPE Stage 2 Consolidated UDLP (rev12, dated 18 December 2020) was approved by DPE on 5 February 2021. Secretary. The Applicant must ensure that the lighting associated with the development: (i) complies with the latest version of AS 4282-1997 - Control of the obtrusive effects of outdoor lighting (Standards Australia, The Landscape Vegetation Management Subplan (Rev 7, dated 3 November 2020), Lighting Subplan (Rev 8, dated 3 November (ii) is mounted, screened and directed in such a manner that it does not create a nuisance to surrounding properties or the 2020), Cycling and Pedestrian Facilities Subplan (Rev 7, dated 3 November 2020), Employee Outdoor Meal Break Area Subplan (Rev public road network: and 7, dated 3 November 2020) and the Signage Subplan (Rev 7, dated3 November 2020) for Areas 1 and 2 were approved by DPE on 5 (iii) is designed to reduce light spill and mitigate the visual impact of the 24-hour facility when viewed from the residential areas February 2021. in the locality and the Boot Land. (c) The Lighting Sub Plan must identify and provide details of the common and individual lighting throughout the development to reduce light spill and mitigate visual impact on the residential areas in the locality by: (i) eliminating upward spill light; (ii) directing light downwards, not upwards: (iii) using shielded fittings; (iv) avoiding 'over' lighting; (v) switching lights off when not required; (vi) using energy efficient bulbs; (vii) using asymmetric beams, where floodlights are used: (viii) ensuring lights are not directed towards reflective surfaces; and (ix) using warm white colours. The approved plan must be implemented prior to occupation of the warehouse and freight village. (d) Cycling and Pedestrian Access and Facilities Sub Plan to assist in safe cycling and pedestrian connectivity through the MPE precinct by providing dedicated linkages between the warehouses, the freight village and Moorebank Avenue that will contribute to the quality and safety of the pedestrian and cyclist environment associated with the development. The Plan must be prepared by a suitably qualified and experienced person(s) and approved by the Secretary within twelve months of the date of this approval, unless otherwise agreed by the Secretary. The Plan must be prepared by a suitably experienced and qualified person(s) in the design and provision of Cycling and Pedestrian Access and Facilities. The Plan must detail the construction, timing and responsibility for the delivery of Cycling and Pedestrian Access and Facilities and take into account the following considerations: (i) all relevant policies, guidelines and plans; (ii) provide details for the provision of safe and efficient pedestrian and cyclist access connectivity within the development and include integration with the existing and future pedestrian and cycling access in the locality;

(iii) provide details of end of trip facilities available on-site at each warehouse which are to include under cover bike storage,

	snowers and change racinities sufficient to accommodate the needs of the forecast number of employee; and				
	(iv) the layout, design and security of bicycle facilities must comply with the minimum requirements of Australian Standard AS				
	2890.3 – 1993 Parking Facilities Part 3: Bicycle Parking Facilities.				
	The approved plan must be implemented prior to occupation of the warehouse and freight village.				
	(e) Employee Outdoor Meal Break Area sub plan to provide employee amenity associated with the development. The Plan must				
	identify and facilitate the construction and establishment of employee outdoor meal break area and be prepared by a suitably				
	experienced and qualified person(s) and submitted to the Secretary for approval.				
	The Plan must be prepared by a suitably experienced and qualified person(s) in the design and provision of outdoor open space.				
	The Plan must detail the construction, timing and responsibility for the delivery and maintenance of an individual employee				
	outdoor meal break areas for each warehouse and a communal employee/visitor eating area at the freight village and take into				
	account the following considerations:				
	(i) all relevant policies, guidelines and plans;				
	(ii) the type of facilities to be provided having regard to forecast future employee and visitor needs;				
	(iii) provide detail of the siting and design of outdoor eating areas including seating, lighting, paving, landscaping, screening,				
	shading, vermin proof waste storage and security; and				
	(iv) include details of the maintenance and waste collection responsibilities.				
	Where it can be demonstrated to the satisfaction of the Secretary, that an outdoor break area cannot be accommodated on				
1	site for each warehouse, an internal eating/sitting area is to be provided within each warehouse and details provided within this				
1	subplan.				
	The approved plan must be implemented prior to occupation of the warehouse and freight village.				
	(f) Signage Sub Plan to assist in the management of individual building wavfinding and common directory signage associated				
B141A	No east or south facing illuminated building signage is to be visible from residences, and internally illuminated signs that are	Pre- Construction and Pre-	The revised MPE Stage 2 Consolidated UDLP (rev12, 18 December 2020) was approved by DPE on 5 February 2021.

	Construction Environmental Management Plan				_	i
C1	Before the commencement of construction, a Construction Environmental Management Plan (CEMP) must be prepared to the satisfaction of the Secretary. The CEMP must: (a) identify the statutory approvals required to carry out the development; (b) outline all environmental management practices and procedures to be followed during construction works associated with the development; (c) describe all activities to be undertaken on the site during construction of the development, including a clear indication of construction stages; (d) detail how the environmental performance of the construction works will be monitored, and what actions will be taken to address identified adverse environmental impacts; (e) describe the roles and responsibilities for all relevant employees involved in construction works associated with the development; and (f) include the management plans required under this approval, including: (i) Construction Traffic and Access Management Plan; (ii) Construction Traffic and Access Management Plan; (iii) Soil and Water Management Plan; (iv) Flood Emergency Response Plan; (v) Construction Air Quality Management Plan; (vii) Construction Noise and Vibration Management Plan; (viii) Heritage Management Plan; (viii) Construction Flora and Fauna Management; (ix) Construction And Demolition Waste Management Plan; (x) Contamination Management Plan; and (xi) Bushfire Emergency and Evacuation Plan.	Pre-construction	CEMP (rev 4) dated 5 April 2018, approved by DPE 8 June 2018 CTAMP - Phase A (rev 9) - approved by DPE 15 June 2018 CTAMP - Phase B (rev K) - approved by DPE 13 December 2018 SWMP (rev 6) - approved by DPE 8 June 2018 FERP (rev 5) - approved by DPE 1 June 2018 CAQMP (rev 4) - approved by DPE 1 June 2018 CNVMP (rev 5) - approved by DPE 15 June 2018 CHMP (rev 6) - approved 15 June 2018 CFFMP (rev 5) - approved by DPE 1 June 2018 CFFMP (rev 5) - approved by DPE 1 June 2018 CDWMP (rev 6) - approved by DPE 1 June 2018 CMP - approved by DPE 30 May 2018 BEEP (rev 3) - approved by DPE 8 June 2018 The CEMP and sub-plans have been revised throughout the progression of construction at the site, and the current revisions of these documents are noted against the relevant conditions of consent.			
C2	The Applicant must: (a) not commence construction until the CEMP is approved by the Secretary; and (b) carry out the construction of the development in accordance with the most recent version of the CEMP approved by the Secretary, unless otherwise agreed by the Secretary.		CEMP (rev 4) dated 5 April 2018, approved by DPE 8 June 2018. The CEMP (rev 17, dated 18 August 2022) is currently being implemented on site.			

	Operational Environmental Management Plan				
C3	Before the commencement of operations, a Precinct Operational Environmental Management Plan (OEMP) must be prepared to the satisfaction of the Secretary. The OEMP must: (a) be prepared by a suitably qualified and experienced expert; (b) provide the strategic framework for environmental management of the development; (c) identify the statutory approvals required to carry out the development; (d) Identify the infrastructure to be managed under the Precinct OEMP which is to include pavements, stormwater detention and water quality treatment structures and devices; and landscaping. (e) describe the role, responsibility, authority and accountability of all key personnel involved in the environmental management of the development including the overall responsibility for the operational environmental management of the freight village; (f) describe the procedures to be implemented to: (i) keep the local community and relevant agencies informed about the operation and environmental performance of the development; (ii) receive, handle, respond to, and record complaints; (iii) resolve any disputes that may arise; (iv) respond to emergencies; and	Pre-operation	OEMP approved by DPE on 9 September 2019 ONVMP approved by DPE on 9 September 2019 OAQMP approved by DPE on 9 September 2019 OFFMP approved by DPE on 9 September 2019 HIP approved by DPE on 9 September 2019 SIOMP approved by DPE on 9 September 2019 OWRMP approved by DPE on 9 September 2019 OWRMP approved by DPE on 28 May 2020 WTP approved by DPE on 28 May 2020 WTP approved by DPE on 28 April 2020 OERP (incorporating BEEP, BMP and FERP to manage operational bushfire, flood and general emergency response) approved by DPE on 10 December 2019. A Long-term Contamination Management Plan (LTCMP) is not required as the Site Auditor issued a Site Audit Statement without the need for a LTCMP (as noted in DPE letter dated 9 September 2019).		
	(g) include the management plans required under this approval, including: (i) Operational Traffic and Access Management Plan; (ii) Workplace Travel Plan; (iii) Stormwater Infrastructure Operation and Maintenance Plan; (iv) Flood Emergency Response Plan; (v) Operational Air Quality Management Plan; (vi) Operational Air Quality Management Plan; (vii) Operational Noise and Vibration Management Plan; (viii) Heritage Interpretation Plan; (viii) Operational Flora and Fauna Management Plan; (ix) Waste Management Plan; (ix) Waste Management Plan; (x) Long-term Contamination Management Plan; and (xi) Bushfire Emergency and Evacuation Plan.				
C4	The Applicant must: (a) not commence operation of the development until the OEMP is approved by the Secretary; and (b) operate the development in accordance with the most recent version of the OEMP approved by the Secretary, unless otherwise agreed by the Secretary.	Pre-operation	OEMP approved by DPE on 9 September 2019. The revised OEMP (rev 16, 19 February 2021) is currently being implemented on site. This compliance report relates to construction only.		
C5	Overall responsibility of the development, including the freight village environmental management during operation, must be by the entity responsible for the Precinct environmental management.	Operation	This compliance report relates to construction only.		
	Occupation Environmental Management Plan				
C6	Prior to occupation of individual warehouses, a Warehouse OEMP must be submitted to the Secretary for approval and must: (a) be generally in accordance with the precinct OEMP required under condition C3; (b) demonstrate compliance with condition B114 regarding maintenance of quantities of dangerous goods below the screening threshold; and (c) include auditing requirements.	Pre-operation	Approved Warehouse OEMPs (WOEMPs) are in place for all current warehouse tenancies. Implementation of the WOEMPs is reported on in the operational compliance report. This compliance report relates to construction only.		

	Management Plan Requirements				
C7	The Applicant must ensure that the environmental management plans required under this consent are prepared in accordance	At all times	All approved management plans are prepared in accordance with this		
C/	with any relevant guidelines, and include:	At all tilles	requirement.		
	(a) detailed baseline data;		requirement.		
	(b) a description of:				
	(i) the relevant statutory requirements (including any relevant approval, licence or lease conditions); (ii) any relevant limits or				
	performance measures/criteria; and				
	(iii) the specific performance indicators that are proposed to be used to judge the performance of, or guide the implementation				
	of, the development or any management measures;				
	(c) a description of the management measures to be implemented to comply with the relevant statutory requirements, limits				
	or performance measures/criteria;				
	(d) a program to monitor and report on the:				
	(i) impacts and environmental performance of the development; and				
	(ii) effectiveness of any management measures (see (c) above);				
	(e) a contingency plan to manage any unpredicted impacts and their consequences;				
	(f) a program to investigate and implement ways to improve the environmental performance of the development over time;				
	(g) a protocol for managing and reporting any:				
	(i) incidents and non-compliances;				
	(ii) complaints;				
	(iii) non-compliances with statutory requirements; and				
	(h) a protocol for periodic review of the plan.				
	Note: The Secretary may waive some of these requirements if they are unnecessary or unwarranted for a particular				
	management plan.

The revised CEMP (rev 17, 18 August 2022) is currently being implemented on site. OEMP was approved by DPE on 9 September 2019. The revised OEMP (rev 16, 19 February 2021) is currently being implemented on site. All management plans are prepared in accordance with this requirement.		

	Annual review				
C10	Each year, the Applicant must submit a review the environmental performance of the development (including all tenants and occupants) to the to the Department. The review must: (a) describe the development that was carried out in the previous calendar year, and the development that is proposed to be carried out over the next year; (b) include a comprehensive review of the monitoring results and complaints records from the previous year, including a comparison of these against the: (i) the relevant statutory requirements, limits or performance measures/criteria; (ii) requirements of any plan or program required under this consent; (iii) the monitoring results of previous years; and (iv) the relevant predictions in the EIS, Submissions Report, Consolidated assessment clarification responses; Modification Assessment, or conditions of this consent; (c) identify any non-compliance over the previous year, and describe what actions were (or are being) taken to ensure compliance; (d) identify any trends in the monitoring data over the life of the development; (e) identify any discrepancies between the predicted and actual impacts of the development, and analyse the potential cause of any significant discrepancies; and (f) describe what measures will be implemented over the next year to improve the environmental performance of the development. The Applicant must ensure that copies of the Annual review are submitted to Council and are available to the CCC and any interested person upon request.	At all times	The Annual Review #04 (January 2021 - December 2021) was submitted to DPE on 7 June 2022. A subsequent Annual Review will be submitted for the period January 2022 - December 2022.		
	Incident Notification, Reporting and Response				
C11	The Department must be notified in writing to compliance@planning.nsw.gov.au immediately after the Applicant becomes aware of an incident. The notification must identify the development (including the development application number and the name of the development if it has one), and set out the location and nature of the incident.	At all times	DPE are sent notifications of incidents on site when required. Incident response is addressed in Section 2.8.3 of the CEMP (rev 17, 18 August 2022) and Section 4.6.4 of the OEMP (rev 16, 19 February 2021). There were no incidents during the reporting period.		
C12	A written incident notification addressing all requirements for such notification set out in Appendix D of this consent, must also be emailed to the Department at the following address: compliance@planning.nsw.gov.au within 7 days after the Applicant becomes aware of an incident. Notification is required to be given under this condition even if the Applicant fails to give the notification required under condition or, having given such notification, subsequently forms the view that an incident has not occurred.	At all times	DPE are sent notifications of incidents on site when required. Incident response is addressed in Section 2.8.3 of the CEMP (rev 17, 18 August 2022) and Section 4.6.4 of the OEMP (rev 16, 19 February 2021).		
C13	Within 30 days of the date on which the incident occurred or as otherwise agreed to by the Secretary the Applicant must provide the Secretary and any relevant public authorities (as determined by the Secretary) with a detailed report on the incident addressing all requirements for such reporting set out in Appendix C of this consent, and such further reports as may be requested.	At all times	DPE are sent notifications of incidents on site when required. Incident response is addressed in Section 2.8.3 of the CEMP (rev 17, 18 August 2022) and Section 4.6.4 of the OEMP (rev 16, 19 February 2021).		
C14	Any written requirements of the Secretary or relevant public authority (as determined by the Secretary) which may be given at any point in time, to address the cause or impact of an incident must be complied with and within any timeframe specified by the Secretary or relevant public authority.	At all times	DPE are sent notifications of incidents on site when required. Incident response is addressed in Section 2.8.3 of the CEMP (rev 17, 18 August 2022) and Section 4.6.4 of the OEMP (rev 16, 19 February 2021).		
C15	If statutory notification is provided to EPA as required under the POEO Act in relation to the development, such notification must also be provided to the Secretary within 24 hours after the notification was provided to EPA.	At all times	DPE are sent notifications of incidents on site when required. Incident response is addressed in Section 2.8.3 of the CEMP (rev 17, 18 August 2022) and Section 4.6.4 of the OEMP (rev 16, 19 February 2021).		
	Non Compliance Notification and Reporting				

C16	The Department must be notified in writing to compliance@planning.nsw.gov.au within 7 days after the Applicant becomes aware of any non-compliance.	At all times	DPE are sent notifications of non-compliances on site when required. Non-compliance and actions are addressed in Section 4.4 of the CEMP (rev 17,		
			dated 18 August 2022).		
			The Applicant failed to notify DPE of a non-compliance against CoC B84. The Applicant became aware of the non-compliance on the 28 March 2023 and is reporting the non-compliance against CoC B84 within this CCR.		
C17	The notification must identify the development and the application number for it, set out the condition of consent that the development is non-compliant with, the way in which it does not comply, the reasons for the non-compliance (if known), and what actions have been, or will be, undertaken to address the non-compliance.	At all times	DPE are sent notifications of non-compliances on site when required. Non-compliance and actions are addressed in Section 4.4 of the CEMP (rev 17, dated 18 August 2022).		
	Independent Environmental Audit				
C18	Within one year of the commencement of any development under this consent, and every three years thereafter, unless the Secretary directs otherwise, the Applicant must commission and pay the full cost of an Independent Environmental Audit (Audit) of the development. Audits must:		Sections 4.3.2 of the CEMP (rev 17, 18 August 2022) and 6.3.1 of the OEMP (rev 16, 19 February 2021) address this requirement.		
	(a) be led and conducted by a suitably qualified, experienced and independent team of experts whose appointment has been endorsed by the Secretary; (b) be carried out in consultation with the relevant agencies and the CCC;		The second Independent Environmental Audit was conducted by WolfPeak in December 2021. The report is available on the Project website.		
	(c) assess the environmental performance of the development (and tenancies) and assess whether it is complying with the relevant requirements in this consent, and any strategy, plan or program required under this consent; (d) review the adequacy of any approved strategy, plan or program required under this consent; and		The next Independent Environmental Audit is due in late 2024.		
	(e) recommend appropriate measures or actions to improve the environmental performance of the development, and/or any strategy, plan or program required under this consent.				
C19	Within three months of commencing an Independent Environmental Audit, or unless otherwise agreed by the Secretary, a copy of the audit report must be submitted to the Secretary, and any other NSW agency that requests it, together with a response to any recommendations contained in the audit report, and a timetable for the implementation of the recommendations. The		Sections 4.3.2 of the CEMP (rev 17, 18 August 2022) and 6.3.1 of the OEMP (rev 16, 19 February 2021) address this requirement.		
	recommendations must be implemented to the satisfaction of the Secretary.		The second Independent Environmental Audit was conducted by WolfPeak in December 2021. The Audit report and response were submitted to DPE on 8 March 2022 and are available on the Project website.		
	Access to Information		The next Independent Environmental Audit is due for late 2024.	_	
C20	At least 48 hours before the commencement of construction until the completion of all works under this consent, including demolition and remediation, the Applicant must: (a) make copies of the following publicly available on its website: (ii) the documents referred to in condition A2 of this consent; (iii) all current statutory approvals for the development; (iii) all approved strategies, plans and programs required under the conditions of this consent; (iv) regular reporting on the environmental performance of the development in accordance with the reporting arrangements in	At all times	The Project website is being progressively updated as documents are approved for each stage of the construction and operation activities.		
	any plans or programs approved under the conditions of this consent; (v) a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs; (vi) a summary of the current stage and progress of the development;				
	(vii) contact details to enquire about the development or make a complaint; (viii) a complaints register updated on a monthly basis; (ix) the Annual reviews of the development;				
	 (x) audit reports prepared as part of any independent environmental audit of the development and the Applicant's response to the recommendations in any audit report; (xi) any other matter required by the Secretary; and (b) keep such information up to date, to the satisfaction of the Secretary. 				

	Compliance Monitoring and Tracking				
C21	The Proponent must prepare and implement a Compliance Tracking Program to track compliance with the requirements of this approval. The Compliance Tracking Program must be submitted to the Secretary for approval prior to the commencement of construction. The Compliance Tracking Program must include, but not be limited to: (a) provision for the notification of the Secretary prior to the commencement of construction and prior to the commencement of operation of the development (including prior to each stage, where works are being staged); (b) provision for periodic review of the compliance status of the development against the requirements of this approval and the environmental management measures committed to in the documents referred to in condition A2; (c) provision for periodic reporting of compliance status to the Secretary, including but not limited to: (i) a Pre-Construction Compliance Report prior to the commencement of construction, (ii) Six Monthly Construction Compliance Reports, for the duration of construction, and (iii) a Pre-Operation Compliance Report prior to the commencement of operation, and six monthly operational compliance reports; (d) a program for independent environmental auditing; (e) mechanisms for recording environmental incidents during construction and actions taken in response to those incidents; (f) provision for reporting environmental incidents to the Secretary during construction; (g) procedures for rectifying any non-compliance identified during environmental auditing, review of compliance or incident management; and (h) provision for ensuring all employees, contractors and sub-contractors are aware of, and comply with, the conditions of this approval relevant to their respective activities.	At all times	Compliance Tracking Program CTP (rev 5, dated 24 May 2018) was approved by DPE on 8 June 2018. DPE were notified of the expected commencement of operations on 18 June 2019 and two Pre-Operations Compliance Reports have been submitted to DPE, in accordance with the POPD. In addition, the status of compliance for pre-operational conditions continues to be detailed in the compliance table submitted with each CCR. A revised CTP, updated to reflect DPE's Compliance Reporting - Post Approval Requirements 2020, was submitted on 25 September 2020.		
	Environment Representative				
C22	A suitably qualified and experienced ER who is independent of the development must be nominated by the Applicant, approved by the Secretary and engaged for the duration of construction of the development in accordance with the Environmental Representative Protocol (DPE 2017). Additional ERs may be engaged for the purpose of this condition in which case the obligations to be carried out by an ER under the terms of this consent may be satisfied by any ER that is approved by the Secretary. The details of nominated ER(s) must be submitted to the Secretary for approval no later than one month prior to the commencement of works, or within another timeframe agreed with the Secretary. This condition does not preclude the same ER for MPW projects being considered by the Secretary.	Pre-construction	The ER was appointed 14 February 2018. An alternate ER was appointed on 22 November 2021.		
C23	Construction must not commence until an ER nominated under C22 has been approved by the Secretary.	Pre- construction	The ER was appointed 14 February 2018. An alternate ER was appointed on 22 November 2021.		

C24	From commencement of any works until completion of construction, the approved ER must:	Pre-construction	The ER was appointed 14 February 2018.		
	(a) on behalf of the Applicant, receive and respond to communication from the Secretary in relation to the environmental		,		
	performance of the development;		An alternate ER was appointed on 22 November 2021.		
	(b) consider and inform the Secretary on matters specified in the terms of this consent;				
	(c) consider and recommend any improvements that may be made to work practices to avoid or minimise adverse impact to				
	the environment and to the community;				
	(d) review the following documents required to be prepared under the terms of this consent, ensure they are consistent with				
	requirements in or under this consent and if so, endorse them prior to submission to the Secretary(if required to be submitted				
	to the Secretary) or prior to implementation (if not required to be submitted to the Secretary):				
	(i) CEMP;				
	(ii) OEMP; and				
Ì	(iii) the other plans and sub-plans required by these conditions, and referenced in conditions C1 and C3;				
	(e) regularly monitor the implementation of all documents required to be prepared under the terms of this consent to ensure				
	implementation is being carried out in accordance with what is stated in the document and the terms of this consent;				
	(f) as may be requested by the Secretary, help plan, attend or undertake Department audits of the development including				
	scoping audits, programming audits, briefings, and site visits, but not independent audits required under condition C18 of this				
	consent;				
	(g) if conflict arises between the Applicant and the community in relation to the environmental performance of the				
	development, attempt to resolve the conflict, and if it cannot be resolved, notify the Secretary;				
	(h) consider any minor amendments to be made to the CEMP, CEMP sub-plans and monitoring programs that comprise				
	updating or are of an administrative nature, and are consistent with the terms of this consent and the CEMP, CEMP sub-plans				
	and monitoring programs approved by the Secretary and, if satisfied such amendment is necessary, approve the amendment.				
	This does not include any modifications to the terms of this consent; and				
	(i) prepare and submit to the Secretary and other relevant regulatory agencies, for information, a monthly Environmental				
	Representative Report detailing the ER's actions and decisions on matters for which the ER was responsible in the preceding				
	month (or other timeframe agreed with the Secretary). The Environmental Representative Report must be submitted within				
	seven (7) days following the end of each month for the duration of construction of the development, or as otherwise agreed				
	with the Secretary.				
	*Writing in coloured font represents additions and changes made to the conditions due to the approval of:				
	SSD-7628-Mod-2 - Approved 31 January 2020

Approval	Condition	Timing	Evidence and comments	ance	Non ance	Not Triggered
Compliance	Requirement			ם	Inpli	rigs
Part A Admi	inistrative Conditions			ð	Cor	Ħ
	Obligation to Minimise Harm to the Environment					ž
A1	In addition to meeting the specific performance measures and criteria established under this consent, all reasonable measures must be implemented to prevent, and if prevention is not reasonable, minimise, any harm to the environment that may result from the construction and operation of the development, and any rehabilitation required under this consent.	At all times.	There were no non-compliances notified within the reporting period.			
	Terms of Consent					
A2	The development may only be carried out:	At all times.	Approved Subdivision Plan: ('Condition A6 - Lot 24 staged subdiv memo_1 Rev5_Incl Attachments.pdf') 31 July 2019).			
	(a) in compliance with the conditions of this consent;					
	(b) in accordance with all written directions of the Planning Secretary		Approval of the staged subdivision plan for Lot 24 provided by the Planning Secretary on 9/8/2019 (ref: DOC19/661522).			
	(c) in accordance with the EIS and Response to Submissions; and (d) in accordance with Subdivision Ancillary Report- Moorebank Precinct East Stage 2 (SSD 7628) (Aspect Environmental, August 2018), MPE		Staged Subdivision Plan Approval (DPIE; 3 December, 2019. Ref: DOC19/982214). An updated Subdivision Plan (Land Partners, March 2020) was provided to the Planning Secretary in June 2020 as part of SSD 7628 Modification 3.			
	Stage 2 Subdivision Application (SIMTA, 12 December 2018), MPE Stage 2 SSD 7628- Subdivision (SIMTA, 19 December 2018), and Plan of Proposed Final Subdivision (Tactic Group, 12 February 2019) inclusive of the Subdivision Plan.		Arcadis Statement of Compliance: ('Final_MPE_Subdivision_ Compliance_Letter_B3_20190626.pdf') 26 June 2019) provided to Certifying Authority: (email 26 June 2019).			
	Consistent with the requirements in this consent, the Planning Secretary may make written directions to the Applicant in relation to: (a) the content of any strategy, study, system, plan, program, review, audit, notification, report or correspondence submitted under or otherwise made in relation to this consent, including those that are required to be, and have been, approved by the Planning Secretary: and (b) the implementation of any actions or measures contained in any such document referred to in condition A3(a).	At all times.	No written directions received from Secretary during the reporting period.			
A4	The conditions of this consent and directions of the Planning Secretary prevail to the extent of any inconsistency, ambiguity, or conflict between them and a document listed in condition A2(c) or A2(d). In the event of an inconsistency, ambiguity or conflict between any of the documents listed in condition A2(c) or A2(d), the most recent document prevails to the extent of the inconsistency, ambiguity or conflict. Note: For the purposes of this condition, there will be an inconsistency between documents if is not possible to comply with both documents, or in the case of a condition of consent or direction of the Planning Secretary, and a document, if it is not possible to comply with both the condition or direction and the document.	At all times.	For reference.			
	Limits of Consent					
A5	This partial consent does not authorise the carrying out of any construction works.	At all times.	For reference.			
A6	This partial consent allows staging of subdivision (Appendix 2) provided that, prior to the issue of any subdivision certificate (including the first and any subsequent subdivision certificates), the Applicant provides a revised Subdivision plan and supporting information to the Planning Secretary for approval that clearly identifies that relevant estate workers (including but not limited to site services, internal roads, pedestrian paths, landscaping, lighting of common areas, emergency services including bushfire mitigation, OSD and Water Sensitive Urban Design elements) for the proposed lot(s) have been completed.	At all times.	For reference. Approval of the staged subdivision plan for Lot 24 was provided by the Planning Secretary on 9 August 2019 (ref: DOC19/661522).			
	The Applicant must not commence subdivision of the development until the revised Subdivision Plan and supporting information is approved by the Planning Secretary.		An updated Subdivision Plan (Land Partners, March 2020 was) provided to the Planning Secretary in June 2020 as part of SSD 7628 Modification 3. MPE Stage 2 Subdivision Partial Consent – Condition A6 Staged Subdivision Supporting Information – Lot			
			22 (Stage 4) (Tactical Group 07 May 20).			<u> </u>
	Applicability of Guidelines					
A7	References in the conditions of this consent of any guideline, protocol, Australian Standard or policy are to such guidelines, protocols, Standards or policies in the form they are in as at the date of this consent.	At all times.	For reference.			

	However, consistent with the conditions of this consent and without altering any limits or criteria in this consent, the Planning Secretary may,	At all times.	For reference.		
	when issuing directions under this consent in respect of ongoing monitoring and management obligations, require compliance with an updated or revised version of such a guideline, protocol, Standard or policy, or replacement of them.				
	Incident Notification, Reporting and Response				
A9	The Department must be notified in writing to compliance@planning.nsw.gov.au immediately after the Applicant becomes aware of an incident. The notification must identify the development (including the development application number and the name of the development if it has one), and set out the location and nature of the incident. Subsequent notification requirements must be given and reports submitted in accordance with the requirements set out in Appendix 4.	At all times.	For reference.		
	Non Compliance Notification				
	The Department must be notified in writing to compliance.gov.au within seven days after the Applicant becomes aware of any non-compliance.		There were no non-compliances with SSD 6628 Partial Consent Subdivision reported during the reporting period.		
	A non-compliance notification must identify the development and the application number for it, set out the condition of consent that the development is non-compliant with, the way in which it does not comply and the reasons for the non-compliance (if known) and what actions have been, or will be, undertaken to address the non-compliance.		*See A10		
A12	A non-compliance which has been notified as an incident does not need to also be notified as a non-compliance.	At all times.	*See A10		
Advisory No					
	All licences, permits, approvals and consents as required by law must be obtained and maintained as required for the development. No condition of this consent removes any obligation to obtain, renew or comply with such licences, permits, approvals and consents.	At all times.	Updated legal requirements register applicable to the site and phase of works (i.e. construction/operation)

	Requirements of Environmental Planning and Assessment Act 1979- Application for a Part 4A Certificate			၁)	ž
B1	In undertaking of the subdivision approved under this consent, the Applicant must comply with the requirements of Part 4A of the Environmental Planning and Assessment Act 1979 in relation to the issue of a Subdivision Certificate. For the purposes of this approval, the issue of a subdivision certificate is restricted to the subdivision defined by Condition A2.	At all times.	MPE Stage 2 SSD-7628 Staged Subdivision (A6) Memorandum: Section 4.3 Information / Response provided i) including Attachment 5: Baker Ryan Stewart Letter. Copies of the Subdivision Certificates will be retained, as they are received.			
	Subdivision Certificate					
В2	Before granting any Subdivision Certificate, the Certifying Authority must be satisfied that the Applicant has complied with all conditions of this consent that are required to be complied with and the relevant estate works (including but not limited to site services, internal roads, pedestrian paths, landscaping, lighting of common areas, emergency services including bushfire mitigation, OSD and Water Sensitive Urban Design elements) have been completed.	Prior to issue of Subdivision Certificate.	For Information.			
	Statement of Compliance- Completion in Accordance with a Project Approval/ Development Consent					
В3	Prior to the issue of a Subdivision Certificate, a Statement of Compliance shall be provided to the Certifying Authority demonstrating that the proposed subdivision is consistent with relevant conditions of any relevant planning approval/development consent (to the extent that they are relevant and required for that stage), including but not limited to MPE Stage 1 development consent, MPE Stage 2 development consent, the conditions of this consent, and MPE Concept Plan Approval.	Prior to issue of Subdivision Certificate.	Arcadis Statement of Compliance: ('Final_MPE_Subdivision_Compliance_Letter_B3_20190626.pdf') dated 26 June 2019. Arcadis Statement of Compliance Lots 13, 12, 26 and 24: ('MPE Site Subdivision Statement of Compliance CoC B3') dated 9 August 2019. Partial Development Consent SSD 7628- Statement of Compliance for Subdivision of Lot 22 (8/04/2020).			
	Easements					
B4	The Applicant must create and display on the subdivision plan those particular easements as required, inclusive of the requirements of conditions B5-B9 of this consent. The easements must include those easements, described for the whole of the MPE site in the 'Form of easement Instrument for subdivided lots of Lot DP1048263 included in Appendix B of the Subdivision Ancillary Report- Moorebank Precinct East Stage 2 (SSD 7628) (Aspect Environmental, August 2018) and updated in Plan of Proposed Final Subdivision (Tactical Group, 12 February 2019).	At all times.	Approved Subdivision Plan: ('Condition A6 - Lot 24 staged subdiv memo_1 Rev5_Incl Attachments.pdf') Attachment 1, dated 31 August 2019 . Staged Subdivision Plan Approval (DPIE; 3 December, 2019. Ref: DOC19/982214). An updated Subdivision Plan (Land Partners, March 2020) was provided to the Planning Secretary in June 2020 as part of SSD 7628 Modification 3: Subdivision partial consent modification.			
B5	The drainage easements must be consistent with the final drainage details approved by the Planning Secretary in relation to conditions A22, A23 and A24 of the MPE Stage 2 of the development consent.	At all times.	Staged Subdivision Plan Approval (DPIE; 3 December 2019. Ref: DOC19/982214). An updated Subdivision Plan (Land Partners, March 2020) was provided to the Planning Secretary in June 2020 as part of SSD 7628 Modification 3: Subdivision partial consent modification.			
В6	The access easements must be consistent with the final access details approved by the Planning Secretary in relation to condition A22 of the MPE Stage 2 development consent.	At all times.	Staged Subdivision Plan Approval (DPIE; 3 December 2019. Ref: DOC19/982214).			
В7	Survey of drainage works (including OSD, channels and pipes and pits) and access works confirming the location of the works required in relation to the final approved versions of the amended development layout plans and design plans, amended WSUD plans and amended architectural plans required conditions A22, A23 and A24 of the MPE Stage 2 development consent shall be undertaken prior to the registration of the plan of subdivision.	At all times.	Arcadis Statement of Compliance: ('Final_MPE_Subdivision_Compliance_Letter_B3_20190626.pdf') dated 26 June 2019. 	Management				
B16	Site must be prepared and submitted to the Secretary for approval. The OEMP must; (a) specify that Qube, or another nominated single entity named in the OEMP, retains sole responsibility for delivery and	Prior to issue of Subdivision Certificate.	The POEMP was submitted to DPIE on 7 May 2019 (82068449_9). DPIE approval of the POEMP was received on the 26 July 2019.		
	ongoing maintenance of estate works (including but not limited to site services, internal roads, pedestrian paths, landscaping, lighting of common areas, emergency services including bushfire mitigation, OSD and Water Sensitive Urban design elements) across the entirety of the Site; and				
	(b) prescribes the management and maintenance measures appliable to the estate works described at (a) above. Note: The OEMP required under this condition may be incorporated within the OEMP prepared and implemented in				
	accordance with condition C3 of the development consent SSD7628 (MPE Stage 2), granted by the then Planning Assessment Commission on 31 January 2018, and the OEMP prepared and implemented in accordance with condition F4 of the development consent SSD 6766 (MPE Stage 1), granted by the Land and Environment Court per orders made on 13 March 2018.				
B17		Prior to Operation or Subdivision.	DPIE Approval of POEMP letter dated 26 July 2019.		
	(b) carry out the operation of the development in accordance with the OEMP approved by the Planning Secretary and as revised and approved by the Planning Secretary from time to time.				
B18		Prior to Operation or Subdivision.	Satisfied by Subdivision Plan s88b instrument and easement plan provided for B10 which includes a covenant to comply with the OEMP.		

Appendix C - SSD 7628 Final Compilation Mitigation Measures Tracking Table

No.	Condition	Development Phase	Evidence and Comments	Compliant	on Compliant	Not Triggered
Compliance	Requirement				ž	z
0A	Pre-construction works would be undertaken subject to Environmental Work Method Statement (EWMS) (Appendix I of this RtS). Pre-construction works include the following: • works within Works period A (pre-construction activities), including: - establishment of site access points - importation of fill for site preparation activities - installation of site fencing - remediation and UXO, EO or EOW management where required. • survey; acquisitions; or building/ road dilapidation surveys; fencing; investigative drilling, excavation or salvage • clearing any native vegetation within the Amended construction area , with the exception of the southern and eastern swales located outside of the SIMTA site • establishment of site compounds and construction facilities • installation of environmental mitigation measures • utilities adjustment and relocation that do not present a significant risk to the environment, as determined by the Environmental Representative • other activities determined by the Environmental Representative to have minimal environmental impact • all works as described in Works period A in Section 4 of the EIS and Appendix I of this RtS.	Pre-construction	CEMP (rev 4, dated 5 April 2018) approved by DPE 8 June 2018.			
OB	The Construction Environmental Management Plan (CEMP), or equivalent, for the Amended Proposal would be based on the PCEMP (Appendix G of the EIS), and include the following preliminary management plans: • Preliminary Construction Traffic Management Plan (PCTMP) (Appendix K of the EIS) • Air Quality Management Plan (AQMP) (Appendix M of the EIS) • Erosion and Sediment Control Plans (ESCPs) and Bulk Earthworks Plans (Appendix P of the EIS). As a minimum, the CEMP would include the following sub-plans: • Construction Traffic Management Plan (CTMP) • Construction Noise and Vibration Management Plan (CNVMP), prepared in accordance with the Interim Construction Noise Guideline • Construction Air Quality Management Plan • Flora and Fauna Management Plan • A Soil and Water Management Plan (SWMP) and Erosion and Sediment Control Plan • Contamination Management Plan • Flood Emergency Response and Evacuation Plan • UXO, EO, and EOW Management Plan • Asbestos Management Plan • Asbestos Management Plan • Heritage (Indigenous and Non-Indigenous) Management Plan/s • Bushfire Management Strategy • Community Information and Awareness Strategy.	Construction	* CEMP (rev 4) dated 5 April 2018, approved by DPE 8 June 2018 * CTAMP - Phase 8 (rev 4) - approved 15 June 2018 * CTAMP - Phase B (rev K) - approved 13 December 2019 * SWMP (rev 6) - approved 8 June 2018 * FERP (rev 5) - approved 1 June 2018 * CAQMP (rev 4) - approved 15 June 2018 * CNVMP (rev 5) - approved 15 June 2018 * CHMP (rev 6) - approved 15 June 2018 * CHMP (rev 6) - approved 1 June 2018 * CFFMP (rev 5) - approved 1 June 2018 * CDWMP (rev 6) - approved 1 June 2018 * COMP MAUW- (rev 7, 26 May 2021) * CMP MPE- (rev 11, 22 February 2022) * BEEP (rev 3) - 8 June 2018			

00	71.0 11.15 1.11.11.11.11.11.11.11.11.11.11.11.11.1	0 1:		, ,	-	
UC .	The Operational Environmental Management Plan (OEMP), or equivalent, for the Amended Proposal would be based on the following preliminary management plans: • Preliminary Operational Traffic Management Plan (POTMP) (Appendix K of the EIS) • Air Quality Management Plan (Appendix M of the EIS) • Stormwater Drainage Design Drawings (Appendix P of the EIS) As a minimum the OEMP would include the following sub-plans: • Operational Traffic Management Plan (OTMP) • Operational Noise and Vibration Management plan (ONVMP) • Air Quality Management Plan • Flora and Fauna Management Plan • Flooding and Emergency Response Plan • Emergency Response Plan in accordance with the requirements of Clause 153C of the POEO Act and the POEO (General) Regulation (CI. 98B) • Operational Hazard and Risk Management Plan • Bushfire Management Strategy • Community Information and Awareness Strategy.	Operation	This compliance report relates to construction only.			
OD	The construction and/or operation of the Amended Proposal may be delivered in a number of stages. If construction and/or operation is to be delivered in stages a Staging Report would be provided to the Secretary prior to commencement of the initial stage of construction and updated prior to the commencement of each stage as that stage is identified.	Construction	The CTP (rev 5) dated 24 May 2018, was approved by DPE on 8 June 2018 Document Delivery Strategy (DDS). The Program for Operational Phase Documentation (POPD) outlines the operational plans proposed to be combined under both the MPE Stage 1 (SSD 6766) and (SSD 7628) consents. The POPD was approved by DPE on 21 May 2019. Plans subsequently combined and approved by DPE include: Operation Environmental Management Plan (OEMP) – required by both consents Operational Noise Management Plan (ONMP) – required by both consents Operational Traffic and Access Management Plan (OTAMP) – required by both consents Operational Waste and Resources Management Plan (OWRMP) to include SSD 6766 resources and SSD 7628 waste management requirements *Stormwater Infrastructure and Operational Management Plan (SIOMP) to include SSD 6766 soil and water management requirements *Operational Emergency Response Management Plan (OERP) to include BEEP, BMP and FERP required by one or both consents *Operational Flora and Fauna Management Plan (OFFMP) to include stormwater management plan. DPE approved staging of Site Audit Statement under CoC A14 on 2 April 2019. Site Audit Statements will be progressively prepared and submitted to the Secretary one month prior to the issue of an occupation certificate for that relevant stage.			
1A	A Construction Traffic Management Plan (CTMP) would be prepared, based on the PCTMP prepared as part of the EIS (refer to Appendix K of the EIS). The CTMP would detail the management controls to be implemented to avoid, minimise and mitigate impacts of construction of the Amended Proposal to traffic performance on the surrounding road network, pedestrian and cyclist access, and the amenity of the surrounding environment and would include the following key initiatives: • review of speed restrictions along Moorebank Avenue and additional signposting of speed limitations to reinforce reduced speed limits during construction of the Amended Proposal • Restriction of haulage routes through signage and education to ensure, where possible, that construction vehicles do not travel through nearby residential areas to	Construction	CTAMP - Phase A (rev 9, dated 15 June 2018) was approved by the DPE on 15 June 2018. CTAMP-B (rev K. dated 6 December 2019) was approved by the Secretary on 13 December 19. This approval was subject to updates provided in Attachment 1 of the approval letter.			

	 Inform local residents (in conjunction with the Community Information and Awareness Strategy) of the proposed construction activities and road access restrictions that the construction traffic must adhere to and establish communication protocols for community feedback on issues relating to construction vehicle driver behaviour and construction related matters Installation of specific warning signs on approach to, and at entrances to, the construction site to warn existing road users of entering and exiting construction traffic Establishing pedestrian exclusion zones and walking routes/crossing points which integrate within the existing pedestrian network Distribution of day warning notices to advise local road users of scheduled construction activities and associated traffic movements. Installation of appropriate traffic controls and warning signs for areas identified where potential safety risk issues exist The promotion of car-pooling for construction staff and other shared transport initiatives during the construction phase Management and coordination of the transportation of materials to maximise vehicle loads and therefore minimise vehicle movements Monitoring of traffic on Moorebank Avenue during peak periods to ensure that queuing at intersections does not impact on other road users Reducing, where reasonable and feasible, the volumes of construction vehicles travelling during peak periods, especially if the increase in traffic generated by construction activities impedes on the operation of Moorebank Avenue 				
1B	A road Safety Audit on Cambridge Avenue to be undertaken prior to the commencement of the construction of the Amended Proposal to identify the traffic safety risks and determine appropriate mitigations.	Construction	A Road Safety Audit dated 19 February 2018 has been undertaken. No corrective actions were identified.		
10	Moorebank Avenue would be upgraded for approximately 1.5 kilometres from approximately 35 metres south of the northern boundary of the MPE site to approximately 185 metres south of the southern MPE site boundary. The following intersections would also be upgraded as part of the Amended Proposal: • Moorebank Avenue / MPE Stage 2 • Moorebank Avenue / MPE Stage 1 northern access • Moorebank Avenue / MPE Stage 1 central access • Moorebank Avenue / MPE Stage 1 southern emergency access. The funding of these upgrades would be clarified through discussions with SIMTA, Roads and Maritime and Transport for NSW.	Construction	Advisory note.		
1D	It is intended that the POTMP would be further progressed and integrated into the OEMP for the Amended Proposal. Specifically, the following key aspects would be addressed in the OTMP: Heavy vehicle route management Safety and amenity of road users and public Congestion management on Moorebank Avenue Road user delay management Information signage, distance information and advance warning Driver code of conduct Incident management	Operation	This compliance report relates to construction only.		
1E	Bicycle and end of trip facilities would be provided in accordance with the City of Sydney Section 3 – General Provisions.	Detailed design and Operation	This compliance report relates to construction only.		
1F	Consultation would be undertaken with relevant bus provider(s) regarding the potential to extend the 901 bus service (or equivalent) and additional regular service bus stops with the aim of maximising public transport accessibility to, from and within the Amended operational area.	Operation	This compliance report relates to construction only.		

	Importation of fill to site during construction of the Amended Proposal is to not exceed a total of 22,000 m3 of material per day. This limit is	Pre-construction	Addressed within the CEMP.		
	to be further reduced by an amount equivalent to any fill being imported to the MPW Stage 2 Proposal (SSD 7709) on the same day such that	& construction			
1G	the combined importation of fill to the Amended Proposal site and MPW site does not exceed 22,000 m3 on any given day.				
2A	A Construction Noise and Vibration Management Plan (CNVMP), or equivalent, would be prepared for the Amended Proposal in accordance	Construction	CNVMP (rev 5, dated 8 June 2018) was approved by DPE on 15 June 2018.		
	with the Interim Construction Noise Guideline (DECC, 2009) (or equivalent), and will include the following:				
	Identification of nearby residences and other sensitive land uses				
	Description of approved hours of work				
	Description and identification of construction activities, including work areas, equipment and duration				
	Description of what work practices (generic and specific) will be applied to minimise noise and vibration				
	Consider the selection of plant and processes with reduced noise emissions				
	A complaints handling process				
	Noise and vibration monitoring procedures				
	Overview of community consultation required for identified high impact works				
	• Induction and training will be provided to relevant staff and sub- contractors outlining their responsibilities with regard to noise				
	Procedure for approval of any works undertaken outside of the following hours:				
	- Standard hours of 07:00 am to 18:00 pm Monday to Friday, and 08:00am to 13:00 pm Saturday,				
	- Out of hours (OOH) work periods:				
	o OOH Period 1 is 6:00am – 7:00am weekdays;				
	o OOH Period 2 is 6:00pm – 10:00pm weekdays,				
2B	Any works undertaken outside of the hours prescribed in mitigation measure 2A would be undertaken in consultation with relevant	Construction	CNVMP (rev 5, dated 8 June 2018) was approved by DPE on 15 June 2018.		
	authorities. Works outside these hours that may be permitted would include:	construction	Civini (ievs) dated distinct 2010) has approved by 51 2 on 15 tane 2010.		
	Any works which would not result in audible noise emissions at any nearby sensitive receptors.				
	• The delivery of oversized plant and/or structures that police or other authorities determine require special arrangements to transport along				
	public roads				
	Emergency work to avoid the loss of lives, property and/or to prevent environmental harm				
	Maintenance and repair of public infrastructure where disruption to essential services and/or consideration of worker safety do not allow				
	work within standard				
	construction hours.				
	Public infrastructure works that shorten the length of the project and are supported by noise-sensitive receivers.				
	 Public Illinastructure works that shorten the length of the project and are supported by hoise-sensitive receivers. Construction works where it can be demonstrated and justified that these works are required to be undertaken outside of standard 				
	• Construction works where it can be demonstrated and justified that these works are required to be undertaken outside of standard construction hours.				
	Any other work as approved through the CNVMP.				
	In the event of any noise or vibration related complaint or adverse comment from the community, noise and ground vibration levels (as	Pre-construction,	CNVMP (rev 5, dated 8 June 2018) was approved by DPE on 15 June 2018.		
	relevant) would be investigated. Remedial action would be implemented where feasible and reasonable. The procedures for managing	construction and	(, , , , , , , , , , , , , , , , , , ,		
2D	complaints would be provided within the Community Information and Awareness Strategy.	operation			
	,				
2E	An Operational Noise Management Plan (ONMP) would be prepared which includes a framework for regular monitoring of operational noise.	Operation	This compliance report relates to construction only.		
	Monitoring would begin at the commencement of the operation of the Amended Proposal and would be conducted on an annual basis for up	Орегилоп	This compliance report relates to constituction only.		
	to 2 years (after commencement of operations of the Amended Proposal).				
	to 2 years (after commencement of operations of the American Proposar).				
3A	The Air Quality Management Plan (Ramboll, 2016), included within Appendix M of the EIS, would be further progressed and incorporated into	Construction	CAQMP (rev 4, dated 11 May 2018) approved by DPE 1 June 2018.		
1	the CEMP for the Amended Proposal. Specifically, the following key aspects would be addressed in the CEMP:				
1	Procedures for controlling/managing dust				
	Roles, responsibilities and reporting requirements				
	Contingency measures for dust control where standard measures are deemed ineffective.				
3B	The Air Quality Management Plan (Ramboll, 2016), included within Appendix M of the EIS would be further progressed and integrated into	Operation	This compliance report relates to construction only.		
	the OEMP for the Amended Proposal. In accordance with the Air Quality Management Plan the following key aspects would be addressed in				
	the OEMP:				
	Implementation and communication of anti-idling policy for trucks				
	Complaints line for the community to report on excessive idling and smoky vehicles				
	t t t t t t t t t t t t t t t t t t t				
	Procedures to reject excessively smoky trucks visiting the site based on visual inspection.			1	

3C	During construction and appealing and time boundary manifesting would be used to many use its emissions and alast rite appearant when	Construction and	CAOMB (roy 4 dated 11 May 2018) was approved by DDE 1 June 2018	T	
30	During construction and operation, real-time boundary monitoring would be used to measure site emissions and alert site personnel when dust triggers are breached. This monitoring would determine if the best practice measures are effective and/or if additional reactive controls	Construction and	CAQMP (rev 4, dated 11 May 2018) was approved by DPE 1 June 2018. OAQMP approved by DPE on 9 September 2019.		
	are needed on any particular day.	Орегация	OAQIVIF approved by DFL 0119 September 2019.		
	are needed on any particular day.				
4A	A Construction Flora and Fauna Management Plan (CFFMP) would be prepared as part of the CEMP for the Amended Proposal. Native	Construction	CFFMP (rev 5, dated 2 May 2018) was approved by the DPE on 1 June 2018.		
	vegetation clearing for southern and eastern swales located outside of the MPE site would not occur until the Flora and Fauna Management				
	Plan is approved. This would include the following:				
	Clear identification of vegetation exclusion zones				
	• Site induction procedure, including briefings regarding the local threatened flora and local fauna of the site and protocols to be undertaken				
	if they are encountered				
	A pre-start up check for sheltering native fauna of all infrastructure, plant and equipment and/or during relocation of stored construction				
	materials				
	Application of speed limits in areas adjacent to native vegetation.				
	The threatened plant populations identified within the Boot lands (to the south) would be protected by a minimum 10 metre buffer between	Pre-construction	CFFMP (rev 5, dated 2 May 2018) was approved by the DPE on 1 June 2018.		
	the edge of the area of occupied habitat and the Amended construction area.	and construction			
4B					
4C	Potential bat roosting locations in buildings to be demolished would be checked, as far as is practicable, by a qualified ecologist or wildlife	Construction	CFFMP (rev 5, dated 2 May 2018) was approved by the DPE on 1 June 2018.	Ī	
	carer for presence of bats prior to demolition. Any bats found would be relocated.		All buildings on site were inspected for bats by Biosis (Project Ecologist) prior to demolition.		
			Pre-clearance survey reports outline checks for bats prior to demolition.		
			Preclearance assessment of Moorebank PEDR Stage 2 (dated 4 April 2018) undertaken by		
			Biosis.		
4D	A two-stage approach would be undertaken to clearing:	Construction	CFFMP (rev 5, dated 2 May 2018) was approved by the DPE on 1 June 2018.		
	Remove non-hollow bearing trees at least 48 hours before habitat trees are removed.		6 pre-clearance surveys have been undertaken by Arcadis Ecologists for the MPE Stage 2		
	 Hollow bearing trees are to be knocked with an excavator bucket or other machinery to encourage fauna to evacuate the tree immediately 		Site.		
	prior to felling.		Pre-clearance survey undertaken on 4 September 2019 by Arcadis Ecologists. No threatened		
	• Felled trees must be left for a short period of time on the ground to give any fauna trapped in the trees an opportunity to escape before		or non-threatened fauna were identified. No hollow-bearing trees were identified.		
	further processing of the				
	trees. • Felled hollow bearing trees must be inspected by an ecologist as soon as possible (not longer than 2 hours after felling).				
	• reflect flottonger than 2 flours after felling).				
4E	Directional lighting will be used where lighting is required in construction areas to avoid impact on fauna.	Construction	CFFMP (rev 5, dated 2 May 2018) was approved by the DPE on 1 June 2018.		
	Should any animal be injured, the relevant local wildlife rescue agency (e.g. WIRES) and/or veterinary surgery would be contacted as soon as	Pre-construction	CFFMP (rev 5, dated 2 May 2018) was approved by the DPE on 1 June 2018.		
	practical. Until the animal can be cared for by a suitably qualified animal handler, if possible minimise stress to the animal and reduce the risk	and construction			
	of further injury by:				
4F	Handling fauna with care and as little as possible.				
46	 Covering larger animals with a towel or blanket and placing in a large cardboard box. 				
	Placing small animals in a cotton bag, tied at the top.				
	Keeping the animal in a quiet, warm, ventilated and dark location.				
4G	A Flora and Fauna Management Plan would be prepared as part of the OEMP for the Amended Proposal. This FFMP would focus on	Operation	The Operational Flora and Fauna Management Plan (OFFMP) was approved by DPE on 9	-	
	minimising impacts on biodiversity values on the adjacent Boot land.	operation.	September 2019.		
	•	•			

5A	A Soil and Water Management Plan (SWMP) and Erosion and Sediment Control Plan (ESCP), or equivalent, would be incorporated into the CEMP for the construction of the Amended Proposal. The SWMP and ESCPs would be developed in accordance with the principles and requirements of Managing Urban Stormwater – Soils & Construction Volume 1 ('Blue Book') (Landcom, 2004) and Volume 2 (DECC 2008). and consider the Preliminary ESCPs (Appendix P of the EIS). The following aspects would be addressed within the SWMP and ESCPs: • Construction traffic restricted to delineated access tracks, and maintained until construction complete • Appropriate sediment and erosion controls to be implemented prior to soil disturbance • Stormwater management to avoid flow over exposed soils which may result in erosion and impacts to water quality • Location of stockpiles outside of flow paths on appropriate impermeable surfaces as well as outside of riparian corridors • Inspection of all permanent and temporary erosion and sedimentation control works prior to and post rainfall events and prior to closure of the construction area • Wheel wash or rumble grid systems installed at exit points to minimise dirt on roads.	Construction	The Construction Erosion and Sediment Control Plan (CERSEDP) (rev 4) - 11 May 2018, included as Appendix A of CSWMP (rev 6) - 7 June 2018, which was approved by the DPE on 8 June 2018. CSWMP was resubmitted to DPE on 5 June 2019 following updates associated with RfMAs 006, 007, 012, 015 and MPW approvals relevant to the Moorebank Avenue upgrade works.		
5B	To minimise potential flood impacts as a result of construction of the Amended Proposal, the following measures would be implemented and documented in the SWMP: • The existing site catchment and sub-catchment boundaries would be maintained as far as practicable • To the extent practicable, site imperviousness and grades should be limited to the extent of existing imperviousness and grades under existing development conditions.	Construction	SWMP (rev 6), dated 7 June 2018) was approved by the DPE on 8 June 2018.		
5C	A Flood Emergency Response and Evacuation Plan, or equivalent, would be prepared and implemented for the construction phase of the Amended Proposal to allow work sites to be safely evacuated and secured in advance of flooding occurring at the Amended construction area.	Construction	FERP (rev 5, dated 16 April 2018) was approved by the DPE on 1 June 2018.		
5D	Stormwater quality improvement devices management measures would be designed and installed on site as presented in the Stormwater and Flooding Environmental Assessment (Appendix P of the EIS), including: • Gross pollutant traps (GPTs) at Section 6.2.1 • Rain gardens in the base of the OSD channels, as shown in Figure 6-1 of Appendix P of the EIS. Stormwater quality improvement devices would be designed to meet the performance targets identified in Georges River Estuary CZMP.	Detailed design and construction	SWMP (rev 6, dated 7 June 2018) was approved by the DPE on 8 June 2018.		
5E	A water quality monitoring program for the operational phase of the Amended Proposal would be prepared as part of the OEMP for the Amended Proposal and would detail: • The frequency and duration of sampling • Background water quality conditions • Sampling methodology • Reporting requirements Water quality monitoring would be undertaken for both Anzac Creek and the Georges River and would include the following parameters: • Total suspended solids • Total phosphorous • Total nitrogen	Operation	This compliance report relates to construction only.		
5F	A Flood Emergency Response Plan (FERP) would be developed for the operational phase of the Amended Proposal. The FERP would take into consideration, site flooding and broader flood emergency response plans for the Georges River and Anzac Creek floodplains and Moorebank area. The FERP would also include the identification of an area of safe refuge within the Amended Proposal site that would allow people to wait until hazardous flows have receded and safe evacuation is possible.	Operation	An Emergency Response Plan (ERP) has been prepared and includes the BEEP, BMP and FERP. Approval to combine the documents was granted by DPE on 21 May 2019. Submitted to DPE for review and approval on 6 June 2019. DPE comments received on 15 July 2019. Comments to be addressed and the plan resubmitted on 6 September 2019. OERP approved by DPE on 10 December 2019.		
6A	Excavated material would be reused on site where possible. Any excavated material that requires disposal would be subject to waste classification under the Waste Classification Guidelines 2014 (NSW EPA, 2014) and would be disposed of at an appropriately licensed facility.	Construction	CDWMP (rev 6, dated 27 April 2018), approved by the DPE on 1 June 2018.		
6B	Stockpile sites established during construction are to be managed in accordance with stockpile management principles set out in Appendix G of this RtS.	Pre-construction & construction	SWMP (rev 6, dated 7 June 2018) was approved by the DPE on 8 June 2018. Construction Spoil Management Plan (rev 4) - 5 April 2018, approved by the DPE on 8 June 2018.		

6C	A Contamination Management Plan (CMP) (or equivalent) would be prepared and included within the CEMP for the Amended Proposal. The CMP would be prepared in consideration of the outcomes of the Environmental Management Plan (GHD, 2016) and Site Audit Statement and Site Audit Report (JBS&G, 2016) and would contain procedures on the following: • Handling, stockpiling and assessing potentially contaminated materials encountered during the development works. • A management tracking system for excavated potentially contaminated materials to ensure the proper management material movements at the Amended construction area, particularly during excavation • Assessment, classification and disposal of waste in accordance with relevant legislation • A contingency plan for unexpected contaminated materials (unexpected finds protocol), such as materials that are odorous, stained or containing anthropogenic materials, that may be encountered during construction.	Construction	A staged CMP was approved 30 May 2018. The most recent CMP was approved by the DPE as Appendix N of the MPE S2 CEMP (rev 15, dated 23 July 2020). Site Audit Statement for Lot 24 (Northwest Limited Works Stage) prepared by EPA accredited auditor was submitted to the Secretary on 20 May 2019. Site Audit Statement for Lot 23 prepared by EPA accredited auditor was submitted to the Secretary on 21 July 2020.	
6D	A site-wide UXO, EO, and EOW Management Plan (or equivalent) would be developed for the Amended construction area. This plan would be included within the CEMP and address the unexpected discovery of UXO, EO or EOW during construction.	Construction	A staged CMP was approved 30 May 2018. The CMP (Rev11, dated 22 February 2022) is being implemented under Appendix N of the MPE S2 CEMP (rev 17, dated 18 August 2022).	
6E	An Emergency Response Plan would be prepared and implemented. The plan would meet the requirements of Clause 153C of the POEO Act and the POEO (General) Regulation (CI. 98B) and specify the procedure to be followed in the event of a spill, including the notification requirements and use of absorbent material to contain the spill. A spill kit would be provided on the Amended operational area at all times.	Operation	An Emergency Response Plan (ERP) has been prepared and include the BEEP, BMP and FERP. Approval to combine the documents was granted by DPE on 21 May 2019. Submitted to DPE for review and approval on 6 June 2019. DPE comments received on 15 July 2019. Comments addressed and plan resubmitted on 6 September 2019. OERP approved by DPE on 10 December 2019.	
6F	In order to accept fill material onto site, the following will be undertaken: • Material characterisation reports/certification showing that the material being supplied is VENM/ENM must be provided. • Each truck entry will be visually checked and documented to confirm that only approved materials that are consistent with the environmental approvals are allowed to enter the site. Only fully tarped loads are to be accepted by the gatekeeper. Environmental assurance of imported fill material will be conducted to confirm that the materials comply with the NSW EPA Waste Classification Guidelines and the Earthworks Specification for the MPW site. The frequency of assurance testing will be as nominated by the Environmental assurancy/auditor.	Pre-construction & construction	Construction Spoil Management Plan (rev 4) - 5 April 2018, approved by the DPE on 8 June 2018. Area 6 (MAUW) will be constructed in accordance with the Spoil MP.	
6G	The CEMP would include an Earthworks Specification, which would include details on earthworks material criteria, handling and placement requirements, embankment and cutting formation (including foundation, batter and benching requirements), unsuitable material and bridging layer requirements, conformance testing methods and acceptance criteria (e.g. for material acceptance and compaction control).	Construction	CEMP (rev 4, dated 5 April 2018), approved by DPE 8 June 2018.	
7A	Hazards associated with operation of the Amended Proposal would be identified through a Hazard and Operability Study (HAZOP), which would be undertaken as part of the detailed design.	Operation	This compliance report relates to construction only.	
7B	The following measures would be included in the CEMP (or equivalent) to minimise hazards and risks: Construction works, including the storage, handling and use of hazardous construction materials would be undertaken in accordance with the provisions of the Work Health and Safety Act 2011 and Work Health and Safety Regulation 2011. All demolition activities would be undertaken in accordance with Australian Standard AS2601-1991 — Demolition of Structures Safe operational access and egress for emergency service personnel and workers will be provided at all times, and specified in the CEMP. Regular maintenance and inspection of all environmental and safety protection controls would be undertaken.	Construction	CEMP (rev 4, dated 5 April 2018), approved by DPE 8 June 2018.	

7C	An Asbestos Management Plan would be prepared for the Amended Proposal in accordance with the Code of Practice: How to Manage and Control of Asbestos in the Workplace (WorkCover NSW, 2011). The plan would include, but not be limited to: • Identification of potential (suspected or confirmed) asbestos areas • an outline of how asbestos risks would be controlled • the identification of each person with responsibilities and details of their responsibilities under this plan • Reference the asbestos register and risk assessment, which would also be prepared prior to construction being undertaken.	Construction	A staged CMP was approved on 30 May 2018. The CMP (Rev11, dated 22 February 2022) is being implemented under Appendix N of the MPE S2 CEMP (rev 17, dated 18 August 2022).	
7D	All asbestos removal works, including the demolition of the eight structures identified as containing asbestos (refer to Figure 14-1 of the EIS) will be undertaken in accordance with the Environmental Management Plan (GHD, 2016) and the following: • The Code of Practice for the Safe Removal of Asbestos (NOHSC, 2005) • Code of Practice: How to Safely Remove Asbestos (WorkCover NSW, 2011) Asbestos removal would be carried out by an appropriately licensed asbestos removalist. The licensing requirements for asbestos removal are specified in the Code of Practice How to Safely Remove Asbestos (WorkCover NSW, 2011).	Construction	A staged CMP was approved 30 May 2018. The CMP (Rev11, dated 22 February 2022) is being implemented under Appendix N of the MPE S2 CEMP (rev 17, dated 18 August 2022).	
7E	Dangerous goods entering or leaving the Stage 2 site must be notified in advance in accordance with the International Maritime Organisation (IMO) and regulations pertaining to the International Convention for the Safety of Life at Sea (SOLAS).	Operation	An Operational Traffic and Access Management Plan (OTAMP) was approved by DPE on 6 December 2019. Also addressed in the Operational Emergency Response Plan (OERP) has been prepared and includes the BEEP, BMP and FERP. Approval to combine the documents was granted by DPE on 21 May 2019. OERP approved by DPE on 10 December 2019.	
7F	Handling of dangerous goods including unpacking from containers and storage within warehouses on the Amended operational area would be undertaken in accordance with the Storage and Handling of Dangerous Goods Code of Practice (WorkCover NSW, 2005).	Operation	This compliance report relates to construction only.	
7G	Staff involved in the transport and handling of dangerous goods within the Amended Proposal site would receive training regarding the contents of the dangerous goods provisions and their roles and responsibilities. All training would be recorded and maintained in accordance with the appropriate competent authority (SafeWork NSW).	Operation	An Operational Traffic and Access Management Plan (OTAMP) was initially approved by DPE on 6 December 2019. Staged OTAMP and WTP (IMEX/Area 1, Area 2) approved on 28 April 2020. Also addressed in the Emergency Response Plan (ERP) that includes the BEEP, BMP and FERP. Approval to combine the documents was granted by DPE on 21 May 2019. Submitted to DPE for review and approval on 6 June 2019. DPE comments received on 15 July 2019. Comments addressed and plan resubmitted on 16 August 2019.	
7H	Design, installation and maintenance of gas reticulation infrastructure would be undertaken in accordance with Australian Standard AS 2944-1 (2007): Plastic pipes and fittings for gas reticulation – Polyamide pipes and Australian Standard AS 2944-2 (2007): plastic pipes and fittings for gas reticulation – Polyamide fittings.	Operation	Considered in detailed design.	
71	Storage of flammable/combustible liquids within the Amended operational area would be carried out in accordance with Australian Standard AS 1940: The Storage and Handling of Flammable and Combustible Liquids. Secondary containment measures would be implemented in a location away from waterways and drainage paths/infrastructure.	Detailed design and Operation	Addressed in the Emergency Response Plan (ERP) that includes the BEEP, BMP and FERP. Approval to combine the documents was granted by DPE on 21 May 2019. OERP approved by DPE on 10 December 2019.	
7)	An Operational Hazard and Risk Management Plan would be developed for the Amended operational area and be implemented as part of the OEMP for the Amended Proposal. This plan would be reviewed regularly and updated should goods entering the site change. As a minimum, the plan would adopt the requirements of the Code of Practice for Storage and Handling of Dangerous Goods (WorkCover NSW, 2005).	Operation	This compliance report relates to construction only.	
7K	Appropriate testing, alarm systems and work, health and safety (WHS) precautions would be implemented for the safety of personnel and infrastructure. No hazardous or regulated wastes would be disposed of on site.	Detailed design and Operation Pre-construction	Will be monitored and managed by warehouse occupants. CDWMP (rev 6. dated 27 April 2018), approved by the DPE on 1 June 2018.	
7L		& construction	Area 6 (MAUW) will be constructed in accordance with the CDWMP.	

	·				
8A	The following mitigation measures would be implemented, where reasonable and feasible, to minimise the visual impacts of the Amended Proposal: • Existing vegetation around the perimeter of construction sites would be retained • The early implementation of landscape planting would be considered in order to provide visual screening during the construction of the Amended Proposal • Elements within construction sites would be located to minimise visual impacts, e.g. setting back large equipment from site boundaries • Construction lighting, on both ancillary facilities and plant and equipment, would be designed and located to minimise the effects of light spill on surrounding sensitive receivers, including residential areas and the proposed conservation area • Design of site hoardings would consider the use of artwork or project information • Regular maintenance would be undertaken of site hoardings and perimeter areas including the prompt removal of graffiti • Re-vegetation/landscaping would be undertaken progressively • Where required for construction works, cut-off and directed lighting would be used and lighting location considered to ensure glare and light spill are minimised.	Pre-construction & construction	CEMP (rev 4, dated 5 April 2018), approved by DPE 8 June 2018.		
8B	The following mitigation measures would be implemented, where reasonable and feasible, for the landscaping of the Amended Proposal: • Use of native shrubs and ground covers to form a screening barrier when mature. • A landscaping corridor of screening vegetation to provide informal street character along Moorebank Avenue. • Use of local species as understory planting to support and enhance local habitat values • Use of seeds collected within the local area for planting to reinforce the genetic integrity of the region, where possible.	Construction & operation	Addressed by Section 4.1 and Appendix A3 of the UDLP. UDLP for Area 1 and associated subplans submitted to DPE for review and approval on 7 June 2019. The delivery of the MPE S2 will be staged (in accordance with CoC A14 and A15). UDLP for Area 6 is currently being prepared. The MPE Stage 2 UDLP for Area 1 was updated and re- submitted to DPE 30 March 2020. The update related to the approval of MOD2 (in particular, regarding the changes to OSD 9). The revised MPW Stage 2 Consolidated UDLP was approved by DPE on 5 February 2021.		
8C	Light for the Amended Proposal would be designed to minimise any direct light spill and would comply with the requirements of Australian Standard AS4282-1997- Control of the Obtrusive Effects of Outdoor Lighting.	Detailed design and Operation	Lighting sub-plan for the UDLP. Submitted to the DPE for review and approval on 11 June 2019. Lighting sub-plan (Rev 8, dated 3 November 2020) was approved by DPE on 5 February 2021 and is being implemented on site. The MPE Stage 2 UDLP for Area 1 was updated and re- submitted to DPE 30 March 2020. The update related to the approval of MOD2 (in particular, regarding the changes to OSD 9). The revised MPW Stage 2 Consolidated UDLP (rev 12, dated 18 December 2020) was approved		
9A	An exclusion zone would be provided around previously identified MPE Isolated Artefacts 2, 3 and 4 (refer to Figure 16-2) to avoid potential disturbance of these artefacts during construction of the Amended Proposal.	Pre-construction & construction	CHMP (rev 6, dated 12 June 2018), approved by the DPE on 15 June 2018. Section 3.3. (HM7) outlines that high visibility fencing will be installed at 10m around the Aboriginal isolated finds. Artefacts 2, 3 and 4 are located within an existing EEC area which is delineated as a 'no-go area' in the CEMP and by flagging and sediment fencing on site. Area 6 (MAUW) will be constructed in accordance with the CHMP.		
9B	Management of Aboriginal heritage would be included in the CEMP for the Amended Proposal. Information within the CEMP would include: • A summary of the findings of the Aboriginal Heritage Impact Assessment Report (provided at Appendix S of the EIS) • Guidance on unexpected archaeological and cultural finds (including human remains).	Construction	CHMP (rev 6, dated 12 June 2018), approved by DPE on 15 June 2018.		
9C	All relevant personnel and contractors involved in the design and construction of the Amended Proposal would be advised of the relevant heritage considerations, legislative requirements and recommendations in the Aboriginal Heritage Impact Assessment Report (provided at Appendix S of the EIS).	Detailed design, Pre- construction & construction	CHMP (rev 6, dated 12 June 2018), approved by DPE on 15 June 2018.		
10A	A Heritage Management Plan in adherence to NSW Heritage Council guidelines would prepared as part of the CEMP for the Amended Proposal.	Construction	CHMP (rev 6, dated 12 June 2018), approved by DPE on 15 June 2018.		
10B	Archaeological monitoring and recording would be conducted at PADs V and W, which have the potential to contain archaeological remains of local significance. Monitoring and recording would be undertaken by a suitably qualified archaeologist, who would assess the likely significance of any archaeological deposits encountered, and provide advice regarding appropriate further action. If highly significant remains were identified during monitoring, it would be appropriate to conduct further monitoring for additional sites of former structures or test excavations.	Construction	CHMP (rev 6, dated 12 June 2018), approved by the DPE on 15 June 2018. Archaeological Method Statement (AMS) (Artefact, 0218) outlines the archaeological approach and methodology for test excavations and archaeological monitoring within previously identified Potential Archaeological Deposits (PAD) V and W at the Moorebank Precinct East (MPE) Stage 2 site, Moorebank. Archaeological monitoring and test excavations undertaken between 19 - 20 March 2019 by Artefact.		

Reritage Interpretation Strategy should be prepared prior to the commencement of construction, outlining appropriate interpretive asure for the Amended construction area in the context of the MPE site as a whole. Inexpected finds are located during works an archaeological consultant would be engaged to assess the significance of the finds and the W Heritage Council notified. Inexpected finds are located during works an archaeological consultant would be engaged to assess the significance of the finds and the W Heritage Council notified. In a specific planting would be investigated, where practicable as part of the detailed design process in order to reduce energy if the consumption. In a specific planting would be undertaken to ensure that the site vehicle movements and construction activities are efficient, to avoid double adding of materials and unnecessary fuel use where possible. In a specific planting would be undertaken to ensure that the site vehicle movements and construction activities are efficient, to avoid double adding of materials and unnecessary fuel use where possible. In a specific planting would be undertaken to ensure that the site vehicle movements and construction activities are efficient, to avoid double adding of materials and unnecessary fuel use where possible. In a specific planting appropriate interpretive as a whole.	Pre-construction Pre-construction Construction Pre-construction Pre-construction Construction	CHMP (rev 6, dated 12 June 2018), approved by the DPE on 15 June 2018. Area 6 (MAUW) will be constructed in accordance with the CHMP. CHMP (rev 6, dated 12 June 2018), approved by the DPE on 15 June 2018. Area 6 (MAUW) will be constructed in accordance with the CHMP. MLP Sustainability Strategy (dated 14 July 2019) quantifies energy efficiency and GHG savings that will be achieved as a result of the MLP. Strategy also identified measures to be considered to further improve energy efficiency and reduce GHG emissions. Fuel efficiency of plant and equipment is managed by site construction contractors. CHMP (rev 6, dated 12 June 2018), approved by the DPE on 15 June 2018. Area 6 (MAUW) will be constructed in accordance with the CHMP. Noted - fuel efficiency of plant and equipment is managed by site construction contractors. The Moorebank Logistics Park (MLP) Sustainability Online Data Capture Tool (SODCT) has		
Wheritage Council notified. Lergy efficiency design aspects would be investigated, where practicable as part of the detailed design process in order to reduce energy if fuel consumption. Light planning would be undertaken to ensure that the site vehicle movements and construction activities are efficient, to avoid double adding of materials and unnecessary fuel use where possible. Let efficiency of the construction plant/equipment will be assessed prior to selection, and where practical, equipment with the highest fuel ciency and which uses lower GHG intensive fuel (e.g. biodiesel) will be used.	& construction Detailed design Pre-construction & construction	will be constructed in accordance with the CHMP. 12B	Measures to mitigate the effect of the operational waste streams would be incorporated into the Amended Proposal's OEMP, including the following information:	Operation	This compliance report relates to construction only.		
	Addressing waste management requirements and goals in staff inductions				
	Providing staff access to documentation outlining the facility's waste management requirements				
	Appropriate areas shall be provided for the storage of waste and recyclable material including:				
	- Locating recycling bins in kitchen areas beside general waste bins to prevent contamination of recycling				
	- Positioning paper recycling bins close to printer / photocopying equipment				
	- Establishing bays or containers for recyclable waste generated through de-stuffing				
	- Minimising general waste bins at desks but providing adequate container and paper recycling to encourage sorting of recyclables				
	Ensuring warehouse tenants are providing adequate bin storage for the expected quantity of waste				
	Standard signage on how to use the waste management system and what materials are acceptable in the recycling will be posted in all				
	waste collection and storage				
	areas				
	Waste management planning incorporating principles of the waste hierarchy				
	All domestic waste shall be collected regularly and disposed of at licensed facilities				
	By ensuring bins are placed in the correct location and access ways are clear waste collection vehicles will be able to service the				
	development efficiently and				
	effectively				
	• An education programme and on-going monitoring will to be implemented for training personnel to properly sort and transport waste into the right components				
	and destinations				
	Sewage waste will be discharged to Sydney Water sewerage infrastructure in accordance with Sydney Water requirements				
	Trade waste will be discharged to the sewer through a trade waste agreement with Sydney Water				
	Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for operational waste				
	management.				
13A	A bushfire management strategy, or equivalent, will be prepared as part of the CEMP for the Amended Proposal. The strategy will include:	Construction	The BEEP (rev 3, dated 14 June 2018) is included as Appendix O of CEMP (rev 4) dated 5 April		
	Emergency response plans and procedures		2018, approved by DPE 8 June 2018.		
	• Restrictions on activities (namely hot works) that cannot be undertaken on total fire ban days within areas of high Bushfire Hazard Rating,				
	unless otherwise advised		A Bushfire Management Plan (rev 3, dated 14 June 2018) has been prepared and approved		
	by the NSW Rural Fire Service.		by DPE.		
	• All construction site offices and temporary buildings will be located outside buffer areas to ensure minimum setbacks of 10 m.				
	• All construction site offices will be accessible via access roads suitable for firefighting appliances similar to NSW Rural Fire Service category				
	1 tankers.				
13B	A bushfire management strategy, or equivalent, would be prepared as part of the OEMP for the Amended Proposal. In particular, the strategy	Operation	An Emergency Response Plan (ERP) has been prepared and include the BEEP, BMP and FERP.		
	would ensure management of landscaped areas within the Stage 2 site would be undertaken to maintain minimum dry fuel loads.		Approval to combine the documents was granted by DPE on 21 May 2019.		
			OERP approved by DPE on 10 December 2019.
