SSD	State significant development

#### 1. Introduction

The Moorebank Precinct East Stage 2 (MPE Stage 2) Development was assessed by the Department of Planning, Housing and Infrastructure (DPHI) (formerly Department of Planning and Environment (DPE)) under Part 4.7 (Division 4.1 prior to 1 March 2018) of the *Environmental Planning and Assessment Act 1979* (EP&A Act) as State significant development (SSD). The Planning Assessment Commission granted approval for the MPE Stage 2 Project on 31 January 2018. In addition, the SSD 7268 Subdivision Partial Development Consent was approved in April 2019.

SSD 7628 has been subject to the following modifications:

- MPE Stage 2 Modification 2 (SSD 7628-Mod 2) application, which was approved on 31 January 2020
- MPE Stage 2 Modification 3 (SSD 7628-Mod 3) application, which was approved on 18 December 2020
- MPE Stage 2 Modification 4 (SSD 7628-Mod 4) application, which was approved on 19 January 2021
- MPE Stage 2 Modification 1 (SSD-7628-Mod 1) which was approved on 14 March 2022
- MPE Stage 2 Modification 5 (SSD-7628-Mod 5) which was approved on 4 September 2023.
- MPE Stage 2 Modification 6 (SSD-7628- Mod 6) which was approved on 22 February 2024.

The SSD 7628 consolidated Conditions of Consent (CoCs) and subdivision CoC have been used to inform the content of this compliance monitoring and reporting program.

CoC C21 of the SSD 7628 development consent states:

The Proponent must prepare and implement a **Compliance Tracking Program** to track compliance with the requirements of this approval. The Compliance Tracking Program must be submitted to the Secretary for approval prior to the commencement of construction.

The Compliance Tracking Program must include, but not be limited to:

- (a) provision for the notification of the Secretary prior to the commencement of construction and prior to the commencement of operation of the development (including prior to each stage, where works are being staged);
- (b) provision for periodic review of the compliance status of the development against the requirements of this approval and the environmental management measures committed to in the documents referred to in condition A2;
- (c) provision for periodic reporting of compliance status to the Secretary, including but not limited to:
  - (i) a Pre-Construction Compliance Report prior to the commencement of construction.
  - (ii) quarterly Construction Compliance Reports, for the duration of construction, and
  - (iii) a Pre-Operation Compliance Report prior to the commencement of operation, and six-monthly operational compliance reports;

- (d) a program for independent environmental auditing;
- (e) mechanisms for recording environmental incidents during construction and actions taken in response to those incidents;
- (f) provision for reporting environmental incidents to the Secretary during construction; and
- (g) procedures for rectifying any non-compliance identified during environmental auditing, review of compliance or incident management; and (h) provision for ensuring all employees, contractors and sub-contractors are aware of, and comply with, the conditions of this approval relevant to their respective activities.

This document has been prepared by Aspect Environmental Pty Limited (Aspect) to satisfy CoC C21 of SSD 7628 development consent, including subdivision and associated modifications.

The purpose of compliance reporting is to monitor and report on the compliance status of a development. A compliance report communicates the status of a development's performance in relation to compliance with the CoC.

The NSW DPHI Compliance Reporting Post Approval Requirements (CRPAR) (2020) describes minimum requirements to be met when preparing compliance monitoring and reporting programs and compliance reports pursuant to CoC. These requirements apply to State significant projects where compliance monitoring and reporting is required by the CoC. Compliance reporting enables:

- All requirements in the CoC that apply to each phase of a development to be identified and the approach for assessing compliance to be considered, and where possible, documented, before the commencement of development.
- The development's performance in terms of compliance with CoC to be evaluated on the basis of monitoring data and communicated at various stages during the carrying out of the development.
- The reporting obligations required by the CoC to be met.
- Opportunities for improvement to be identified and adopted where appropriate.

These requirements do not replace the obligation to comply with specific requirements in CoC in respect of compliance monitoring and reporting. Where there is any inconsistency between the requirements in CoC and the CRPAR, the CoC prevail.

### 2. Development Background

The MPE Stage 2 Development Site, is located within the Liverpool Local Government Area, in Sydney's south- west subregion, approximately 2.5km from the Liverpool City Centre, 27 kilometres (km) south-west of the Sydney Central Business District (CBD) and approximately 26km west of Port Botany.

The MPE Stage 2 Development involves the construction and operation of warehousing and distribution facilities and upgrades to approximately 1.5 kilometres of Moorebank Avenue. The key components of the development include:

- Earthworks, including the importation of 600,000m<sup>3</sup> of fill and vegetation clearing
- Approximately 300,000m<sup>2</sup> gross floor area (GFA) of warehousing and ancillary offices
- Warehouse fit-out
- Freight village 8,000m<sup>2</sup> GFA of ancillary retail, commercial and light industrial land uses
- Internal road network and hardstand across the site
- Ancillary supporting infrastructure within the site, including:
  - stormwater, drainage and flooding infrastructure
  - utilities relocation/installation
  - fencing, signage, lighting, remediation and landscaping
- Moorebank Avenue upgrade including:
  - raising by about two metres and some widening
  - embankments and tie-ins to existing Moorebank Avenue road levels
  - signalling and intersection works
- Intersection upgrades along Moorebank Avenue including:
  - Moorebank Avenue/MPE Stage 2 access
  - Moorebank Avenue/MPE Stage 1 northern access
  - Moorebank Avenue/MPE Stage 2 central access
  - Moorebank Precinct West (MPW) Southern Access/MPE Stage 2 southern emergency access.

## 3. Compliance Monitoring and Reporting Program Requirements<sup>1</sup>

Compliance monitoring and reporting includes:

- A compliance monitoring and reporting schedule
- Compliance tables identifying:
  - requirements of the CoC for each phase of the development
  - the monitoring methodology used to assess compliance for each compliance requirement
  - type and nature of data (evidence) to be collected to demonstrate compliance.

The scope of compliance monitoring and reporting requirements has been prepared with reference to CoC C21 and the environmental management measures included in relevant assessment and approval documentation, described in condition A2, which includes the following:

- MPE Stage 2 (SSD 7628) Consolidated development consent, as modified
- MPE Stage 2 Partial development consent (SSD 7628), as modified
- MPE Stage 2 Environmental Impact Statement (Arcadis, December 2016)
- MPE Stage 2 Response to Submissions (Arcadis, July 2017)
- Consolidated Assessment Clarification Responses
- Biodiversity Assessment Report (Arcadis, December 2016)
- Amended Development Layout Plans and Design Plans
- Amended WSUD plans
- Amended architectural plans
- The compliance requirements of the Final Consolidated Mitigation Measures (FCMMs) (The FCMMs will be reported on only when non-compliant)
- MPE Stage 2 Modification 2 (SSD7628\_MOD2) application and supporting documentation
- MPE Stage 2 Modification 3 (SSD7628\_MOD3) application and supporting documentation

<sup>&</sup>lt;sup>1</sup> CoC C21 references the requirement to prepare and implement a "Compliance Tracking Program". The DPE CRPAR document refers to this program as a "Compliance Monitoring and Reporting Program". In this revision of the Compliance Tracking Program, the document title has been maintained as per previous revisions and as per the wording used in the CoC itself i.e. Compliance Tracking Program. However, the internal referencing within the document aligns to the DPIE's current naming convention for this program i.e. "Compliance Monitoring and Reporting Program"

- MPE Stage 2 Modification 4 (SSD7628\_MOD4) application and supporting documentation
- MPE Stage 2 Modification 1 (SSD7628\_MOD1) application and supporting documentation
- MPE Stage 2 Modification 5 (SSD7628\_MOD5) application and supporting documentation.

This Compliance Tracking Program (CTP) under CoC C21 has been revised to align with DPHI's CRPAR (June 2018) and the more recently issued CRPAR (May 2020), where able to be applied consistently with the conditions of SSD 7628.

It is noted that the CRPAR (May 2020) requirements do not replace the obligation to comply with specific requirements in conditions of consent in respect of compliance reporting and if there is any inconsistency between the requirements in conditions of consent and the requirements in the CRPAR (May 2020) document, the conditions of consent prevail.

There are a number of conditions within the consent instrument that are inconsistent with the CRPAR (May 2020), including the requirement to undertake construction compliance reporting itself. Although this Compliance Tracking Program has not been fully aligned with the CRPAR (May 2020), where possible any improvements that do not conflict with the CoC have been adopted.

### 4. Compliance Monitoring and Reporting Schedule

The frequency of submission of compliance reports to the DPHI must comply with any specific requirements in the CoC. Condition 21 (c) (ii) of SSD 7628 requires the submission of quarterly Construction Compliance Reports (CCR) for the duration of construction. The first construction compliance report was issued for the period July to September 2018 and consecutive reports have been issued for each period every three months thereafter.

MPE Stage 2 Modification 3 sought to adjust the compliance reporting frequency from quarterly reporting to six-monthly to align with the other consents in place for the Moorebank Logistics Park. The modification was approved by DPHI (then Department of Planning, Industry and Environment) on the 18 December 2020. Construction compliance reports for the MPE Stage 2 development are now undertaken at six-monthly intervals.

## 5. Compliance Monitoring and Reporting Tables

The compliance monitoring and reporting program contains compliance tables that:

- Identify the requirements in all CoC that must be complied with during each phase of the development, referred to as a "compliance requirement"
- Set out the type of data or evidence that is to be collected to assess whether compliance has been achieved.

The tables have been developed to reflect the project phase. Appendix A - SSD 7628 Compliance Tracking Table contains all requirements from the CoC, including:

- Part A Administrative Conditions
- Part B Environmental Performance and Management
- Part C Environmental Management, Reporting and Auditing.

Appendix B - SSD 7628 Subdivision Compliance Tracking Table contains all requirements from the Partial Development Consent that relate to the subdivision of SSD 7628 including:

- Part A Administrative Conditions
- Part B Specific Environmental Conditions.

Appendix C - SSD 7628 Final Compilation Mitigation Measures Tracking Table contains all requirements of the FCMMs. FCMMs will be reported on by exception i.e. only when they are assessed as non-compliant, as many of the conditions in the actual consent already capture the FCMMs directly and indirectly (e.g. within content of Construction Environment Management Plan (CEMP) and CEMP Sub-plan documentation).

The construction compliance tables include the following information for each compliance requirement:

- A unique identification number (ID)
- The compliance requirement to be complied with
- The monitoring methodology used to assess compliance
- The evidence to be collected to assess compliance with each compliance requirement.

## 5.1 Compliance Status Descriptors

The status of each compliance requirement in the tables will be determined using the relevant descriptors in Table 5-1 below.

Table 5-1: Compliance status descriptors

Status	Description
Compliant	The proponent has collected sufficient verifiable evidence to demonstrate that all elements of the requirement have been complied with.
Non-compliant	The proponent has identified a non-compliance with one or more elements of the requirement.
Not triggered	A requirement has an activation or timing trigger that has not been met at the phase of the development when the compliance assessment is undertaken, therefore an assessment of compliance is not relevant.

## **Appendix A - SSD 7628 Compliance Tracking Table**

Approval (ID)	Condition	Development Phase	Monitoring Methodology	Evidence and comments	Compliance Status
Complian	Ce Requirement				Compliant
	ministrative				Non Compliant
(ID)	Obligation to Minimise Harm to the Environment				Not Triggered
A1	In addition to meeting the specific performance measures and criteria established under this consent all reasonable measures must be implemented to prevent, and if prevention is not reasonable, minimise, any harm to the environment that may result from the construction and operation of the development, and any rehabilitation required under this consent.	At All Times	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers	Copies of completed checklists.  Records of inductions and toolbox meetings (e.g. training records, dated items list from toolbox talk.  Copies of incident notifications (e.g. spill notices) and action items in	
			meet on a fortnightly basis to review construction progress.	near miss and incident report forms.	
	Terms of Consent				
A2	The development may only be carried out: a) in compliance with the conditions of this consent; b) in accordance with all written directions of the Secretary in relation to this consent; c) in accordance with the EIS, Submissions Report, Consolidated assessment clarification responses, and updated Biodiversity Assessment Report; d) in accordance with the amended Development Layout Plans and Design Plans, amended WSUD plans and amended architectural plans to be submitted for the Secretary's approval as part of this consent; and e) in accordance with the management and mitigation measures at APPENDIX B of this consent and (f) in accordance with modification application SSD-7628-Mod-2 and supporting documentation; and (g) in accordance with modification application SSD-7628-Mod-6 and supporting documentation.	At All Times	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Records of audit results.  Completed compliance monitoring matrix.	
A3	The Secretary may make written directions to the Applicant: a) as a result of the Department's assessment of any strategy, plan, program, review, audit, notification, report or correspondence submitted under or in relation to this consent: b) as a result of the Department's assessment of any review, report or audit undertaken or commissioned by the Department regarding compliance with this consent or in relation to an incident (whether notified to the Department or not); and c) in relation to the implementation of any actions or measures contained in any of the documents listed in condition A2.	At All Times	Review of any directions issued by the Secretary.	Written direction from Secretary.  Completed internal review process.	
A4	The conditions of this consent and directions of the Secretary prevail to the extent of any inconsistency, ambiguity or conflict between them and a document listed in condition A2(c) or A2(e) to A2(f). In the event of any inconsistency, ambiguity or conflict between any of the documents listed in condition 2(c) and A2(e) to A2(f), the most recent document prevails to the extent of the inconsistency, ambiguity or conflict. For the purpose of this condition, there will be an inconsistency between documents if it is not possible to comply with both the condition or direction and the document.	At All Times	For reference.	For reference.	
	Limits of Consent				
A5	This consent lapses five years after the date from which it operates, unless the development has physically commenced on the land to which the consent applies before the date on which the consent would otherwise lapse under Section 95 of the EP&A Act.	Construction	Confirm commencement of development under the consent within 5 years of the date of consent.	Record date of commencement of works on site.	
A6	The total volume of spoil to be imported, including fill required to raise Moorebank Avenue and spoil imported during early works must not exceed 600,000m³.	Construction	Confirm records of volume and type of fill are maintained.	Fill records for source, volume and type of material brought to site.	
<b>A</b> 7	No works are permitted with the Defence Joint Logistics Unit site under this approval.	Construction	Monitor implementation of the CEMP during regular weekly inspections.	Copy of the approved CEMP.  Records of weekly inspections.	
A8	The container freight road volume must not exceed 250,000 TEUs p.a., subject to the exception identified in condition A9, which may only be considered under condition A9 after the facility has been in operation.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	Records of weekly inspections.  Completed compliance monitoring matrix.	
A9	The movement of container freight by road may exceed the 250,000 TEU limit p.a. by up to a further 250,000 TEU p.a., if the Secretary is satisfied that traffic monitoring and modelling of the operation of the facility demonstrate that traffic movements resulting from the proposed increase in TEU will achieve the objective of not exceeding the capacity of the transport network.		Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	Records of traffic volumes/monitoring during operations.  Completed compliance monitoring matrix.	
A10	In determining the TEU limit, the Secretary may take account any roadworks or mitigation measures proposed under a Voluntary Planning Agreement to minimise traffic impacts.	At All Times	For reference.	Copy of the approved Operational Traffic and Access Management Plan.	
A11	The maximum GFAs for the following uses apply: a) 300,000m <sup>2</sup> for the warehousing and distribution facilities; and b) 8,000m <sup>2</sup> for the freight village.	Operation	Review design layout plans and confirm GFAs for facilities are within limits.	Copies of facilities designs for construction detailing GFAs.	
A12	The warehousing and distribution facilities' must only be used for activities associated with freight using the MPE Stage 1 intermodal terminal.	Operation	Confirm uses of warehouses only associated with freight.	Record of leases/contract and related uses attached to each tenancy/operation.  Copies of approved Warehouse Operational Environmental Management Plans.	

A13	Freight village tenants and occupations are restricted to those activities that provide: a) ancillary support for the development, its tenants, worker population and visitors; b) a nexus with activities undertaken in relation to the warehouse, logistics functions of the IMT development and/or: c) provide aligned services to the intermodal functions.  Prior to occupancy of any freight village tenancy, and every subsequent occupation of these tenancies, details of the tenant and occupation activity is to be submitted to the Secretary demonstrating that the proposed activity complies with this condition.	Operation	Confirm uses of tenancies/occupations are related to intermodal operations/ activities.	Records of tenancy leases, uses, operations and activities.	
	Staged Submission of Strategies, Plans or Programs				
A14	With the approval of the Secretary, the Applicant may submit any strategy, plan or program required by this consent on a staged basis.	At All Times	For reference.	For reference.	
A15	If the submission of any strategy, plan or program is to be staged, then the relevant strategy, plan or program must clearly describe the specific stage of the development to which the strategy, plan or program applies, the relationship of the stage to any future stages and the trigger for updating the strategy, plan or program.	At All Times	Review if construction and operation of warehouses is to be staged.  If applicable, prepare and submit Staging Report to the Secretary for approval.	Record of application for construction staging.  Approval letter from the Secretary.  Copy of Staging Report.	
	Combined Submission of Strategies, Plans or Programs				
A16	With the approval of the Secretary, any strategy, plan or program required by this consent may be combined.	At All Times	Review if any strategy, plan or program can be combined.	Approval letter from the Secretary.	
			If applicable, prepare and submit the combined strategy, plan or program to the Secretary for approval.	The approved combined strategy, plan or program.	
A17	In seeking the Secretary's approval, a clear relationship must be demonstrated between the strategies, plans or programs that are proposed to be combined.	At All Times	For reference.	For reference.	
	Notification of Commencement				
A18	The of commencement of each of the following phases of the development must be notified to the Department, at least one month before that date: a) early works; b) fill importation; c) construction; d) operation; and e) occupation. If the construction, operation or occupation of the development is to be staged, then the Applicant must notify the Department in writing at least one month before the commencement of each stage, and clearly identify the development to be carried out in that stage.	Pre-Construction	Documented written notification of commencement provided to the Department prior to the commencement of each phase.  Confirmation of timing compared to commencement.	Written notification to the Department within required timing.  Compliance report.	
	Evidence of Consultation				
A19	Where conditions of this consent require a document to be prepared in consultation with an identified party, the Applicant must:  (a) consult with the relevant party prior to submitting the subject document to the Secretary for approval; (b) provide evidence that at least two weeks was provided for the relevant party to comment on the document; and (c) include in the document: (i) details of the consultation undertaken; (ii) a description of how matters raised by those consulted have been resolved to the satisfaction of both the Applicant and the party consulted; and (iii) details of any disagreement remaining between the party consulted and the Applicant and how the Applicant has addressed the matters not resolved.	At All Times	Review of consultation record within relevant consent documentation.	Documented consultation within relevant documents.	
A20	Statutory Requirements  All licenses, parmits approvals and consents as required by law must be obtained and maintained as required.	At All Times	Povious logal requirements for the development and maintain legal	Undated logal requirements register applicable to the site and ab	
AZU	All licences, permits, approvals and consents as required by law must be obtained and maintained as required for the development. No condition of this consent removes the obligation for the Applicant to obtain, renew or comply with such licences, permits, approvals and consents.  Demolition	At All Times	Review legal requirements for the development and maintain legal requirements register for the site.	Updated legal requirements register applicable to the site and phase of works (i.e. construction/operation).  Records/copies of relevant licenses, permits, approvals and consents.	

A22	All demolition work must be carried out in accordance with the latest version of Australian Standard AS 2601- 2001: The Demolition of Structures (Standards Australia, 2001) and the requirements of the Work Health and  Safety Regulation 2011.  Design Master Plans  Prior to construction, the Applicant must prepare amended Development Layout Plans and Design Plans to the  satisfaction of the Secretary which achieve the improvements and revisions referred to in conditions B140 and  444, including integration of Water Sensitive Urban Design (WSUD) and landscape design.	Pre-Construction  Pre-Construction	Confirm engagement of a suitably qualified person to review and provide a statement of compliance for the required work plans.  Confirm review process includes a checklist against these requirements prior to submission to the Secretary for approval.  Submission of amended Development Layout Plans and Design Plans to the Planning Secretary.  Confirm Secretary approval of the amended Development Layout Plans and Design Plans.	Work plans and requisite safety statements.  The qualifications of person(s) providing the safety statements.  Copy of correspondence and approval from Secretary.  Approved amended Development Layout Plans and Design Plans.	
	Water Sensitive Urban Design				
A23	Prior to commencement of early works and fill importation, the Applicant must prepare Amended WSUD plans that incorporate water sensitive urban design principles, be generally in accordance with relevant Council policies, plans and specifications, and address condition B40, to ensure that:  a) the stormwater and drainage systems for the development will operate independently of any works proposed as part of the MPW Stage 2 development application (SSD 7709) that have not been incorporated in this development, unless development consent has been granted to those works under SSD 7709 prior to commencement of early works and fill importation; b) adequate overland flow paths have been provided in the event of stormwater system blockages and flows in excess of the 1% ARI rainfall event; c) on site detention basins are visually unobtrusive; d) that the designs of the basins, and associated setbacks and fencing, ensures public safety; e) adequate site area has been provided for stormwater treatment; f) design of stormwater treatment systems minimises the risk of failure; and g) setback of drainage work and fencing has been finalised in consultation with TfNSW. Note: Notwithstanding modification application SSD-7628-Mod-2, all drainage on the site must comply with this condition.	Pre-Construction	Confirm review process includes a checklist against Council and RMS requirements prior to submission to the Secretary for approval.	Amended WSUD plans that incorporate water sensitive urban design principles.	
104	Architectural Plans	D 0 1 "	In a control of the c		
A24	Prior to commencement of permanent built surface works and/or landscaping, the Applicant must prepare amended architectural plans that reflect updated plans required under the conditions.	Pre-Construction	Monitor implementation of the sub-plan during regular weekly inspection	Approved Urban Design and Landscape Plan including architectural drawings.	
	Access for People with a Disability		The state of the s		
A25	The siting, design and construction of premises available to the public are to ensure an appropriate level of accessibility so that all people can enter and use these premises. Access is to meet the requiremst of the Disability Discrimination Act 1992, relevant Australian Standards and Building Code of Australia (BCA).	Detailed Design	Monitor implementation of the sub-plan during regular weekly inspections.	Approved Urban Design and Landscape Plan including architectural drawings.	
A26	Structural Adequacy  All new buildings and structures, and any alterations or additions to existing buildings and structures, that are part	Detailed Design	Confirm alignment with BCA.	Issued construction certificates from Principal Certifying Authority or	
	of the development must be constructed in accordance with the relevant requirements of the BCA.  Note:  Under Part 4A of the EP&A Act, the Applicant is required to obtain construction and occupation certificates for the proposed building works.  Part 8 of the EP&A Regulation sets out the requirements for the certification of the development.  Utilities and Services			equivalent.	
A27	Before the construction of any utility works associated with the development, approvals required from service providers must be obtained.	Pre-Construction	Document consultation with and confirm relevant approvals obtain from relevant service providers.		
A28	the site under section 73 of the Sydney Water Act 1994 must be obtained.	Pre-Operation	Confirm compliance certificate obtained.	A compliance certificate issued under Section 73 of the Sydney Water Act 1994.	
Δ29	Protection of Public Infrastructure Before the commencement of construction, the Applicant must:	Pre-Construction	Document and record consultation with relevant service	A consultation record. This should include identification from the	
747	(a) consult with the relevant owner and provider of utility services that are likely to be affected by the development to make suitable arrangements for access to, diversion, protection, and support of the affected infrastructure (b) prepare a dilapidation report identifying the condition of all public infrastructure between the M5 and the site and any local roads identified in the Heavy Vehicle Route Plan required under condition B2 (including roads, gutters and footpaths); and (c) submit a copy of the dilapidation report to the Secretary and Council.	i i e eonisuudun	providers/owners.	A consultation record. This should include identification from the owner/provider whether a dilapidation report is required or not, in order to support validating any subsequent absence of a dilapidation report.	

		[ * . *			
A30	Unless the Applicant and the applicable authority agree otherwise, the Applicant must:	At All Times		Pre-construction dilapidation report.	
	(a) repair, or pay the full costs associated with repairing any public infrastructure that is damaged by carrying out	l	contributions agreement to confirm extent of obligation as agreed.

Approval (ID)	Condition	Development Phase	Monitoring Methodology	Evidence and comments	Compliance Status
Complian	ce Requirement				Compliant
	nvironmental Performance and Management				Non-Compliant
					Not Triggered
B1	The Applicant must:  (a) prepare each plan, program and other documents in consultation with the specified stakeholders;  (b) not commence each phase of the project until the plans, programs and other documents required under this consent are approved by or, where not required to be approved, submitted to the Secretary specified within the timeframes; and	At all times	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers	Record of consultation included in all plans.	
	Traffic and Access				
B2	Prior to commencement of early works and construction, the Applicant must prepare a Construction Traffic and Access Management Plan (CTAMP) to the satisfaction of the Secretary. The Plan must form part of the CEMP required by condition C1 and must:  (a) be prepared by a suitably qualified and experienced person whose appointment has been endorsed by the Secretary;  (b) be prepared in consultation with Council, TNSW and TNSW;  (c) include datalis of all transport routes and traffic types to be used for development-related traffic, access and parking arrangements;  (i) include a protocol for undertaking dilapidation surveys to assess the existing condition of the transport routes prior to construction works; and  (ii) condition of the transport routes following construction works;  (d) include a protocol for the repair of any roads identified in the dilapidation surveys to have been damaged during construction and demolition works;  (e) include details of:  (i) staging of construction works;  (ii) construction vehicle routes;  (iii) heavy wholed movements associated with spoil and demolition material transport off-site;  (iv) construction traffic generation;  (v) parking for workers; and  (vi) parking for workers; and  (vii) access arrangements.  (i) include a Heavy Vehicle Route Plan detailing:  (i) the origin and destination of spoil / fill and demolition material; and  (ii) details of the heavy vehicle routes to and from the site within the Campbelltown and Liverpool Local Government Areas (LOAs).  (g) include details of the measures to be implemented to minimise traffic safety issues and disruption to local road users including pedestrians / cyclists during construction works, including:  (i) the proparty traffic controls, including detours and signage;  (iv) construction pedestrians / cyclists during construction works, including:  (ii) the proparty traffic controls, including detours and signage;  (iv) construction pedestrians / cyclists during construction works, including:  (ii) temporary traffic controls	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CTAMP.  Record of DPIE Approval.	
вз	The Applicant must: (a) not commence early works or construction until the Construction Traffic Management Plan	Pre- Construction	Monitor implementation of the sub-plan during regular weekly	An approved CTAMP.	
B4	required by condition B2 is approved by the Secretary; and (b) carry out the development in accordance with the most recent version of the Construction Traffic Management Plan approved by the Secretary.  A Road Occupancy Licence is to be obtained from the Transport Management Centre for any works that may	Pre- Construction	Inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers  Monitor implementation of the sub-plan during regular weekly	Record of DPIE approval.  Copy of the Road Occupancy Licence.	
	impact on traffic flows on Moorebank Avenue or the adjoining State road network during construction activities.	Sonosaduon	inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers	Early 2. 2.2. House Company Electron.	
B5	A construction zone will not be permitted on Moorebank Avenue without the express approval of TfNSW.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers	Copy of RMS Approval.	
В6	All demolition and construction vehicles must be contained wholly within the site and vehicles must enter the site before stopping.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CTAMP and OTAMP.  Copies of inspections and audit reports.	

B7	All vehicles are to enter and leave the site in a forward direction.	Construction	inspections, fortnightly ER inspections and ongoing compliance tracking	An Approved CTAMP and OTAMP.  Copies of inspection and audit reports.	
B8	All trucks entering or leaving the site with loads must have their loads covered and must not track dirt onto any public road.	At all times	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CTAMP.	
	Road Safety Audit				
В9	Prior to commencement of any importation of site fill, the Applicant must undertake a Road Safety Audit for heavy vehicle movements associated with the importation of fill, for construction vehicle sweet paths in and out of the development site via the proposed temporary construction access points along Moorebank Avenue, and for motorists and construction vehicle movements along Moorebank Avenue during the staged road upgrade works identified in condition B13. The Road Safety Audit is to be prepared by an independent TiNSW accredited road safety auditor in accordance with the relevant Austroads guidelines to identify any safety issues. The Road Safety Audit must consider road safety issues for the proposed construction access arrangements and affected vehicle movements during upgrade works on Moorebank Avenue.  The Applicant must recommend corrective actions for the identified safety issues and propose appropriate traffic management measures (i.e. temporary traffic signals and other traffic management measures) in consultation and with the approval of the relevant Council, TfNSW and TfNSW.	Pre- Construction	N/A	Copy of Road Safety Audit report.	
	Site Access and Layout Design Plans				
B10	The swept path of the longest vehicle entering and exiting the subject site, as well as manoeuvrability through the site, must be in accordance with Austroads requirements. Prior to commencement of construction on permanent infrastructure a plan must be submitted to the Secretary and TfNSW for approval, which shows that the proposed development complies with this requirement.		inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Plan submitted to the Secretary.	
B11	The layout of the proposed car parking areas associated with the subject development (including driveways, grades, turn paths, sight distance requirements in relation to landscaping and/or fencing, aisle widths, aisle lengths, and parking bay dimensions) must be in accordance with AS2890.1-2004 Parking facilities Off-street car parking, AS2890.6-2009 Parking facilities Off-street parking for people with disabilities and AS2890.2-2002 Parking facilities Off-street commercial vehicle facilities for heavy vehicle usage.	Detailed Design	N/A	Copy of detailed site access and layout design plans.	

B12	The development is to be designed so that:  (a) all vehicles are wholly contained on site before being required to stop;  (b) adequate parking for heavy vehicles is provided on-site to accommodate any potential delays in schedule time;	Detailed Design	N/A	Copy of detailed site access and layout design plans.
	(c) all loading and unloading of materials is carried out on-site; and (d) site roads accommodate buses, bus infrastructure and cyclist use for employees.			
	Road Infrastructure Upgrades to be undertaken by the Applicant			
B13	The Applicant is to undertake the following upgrades, in accordance with the specified timing requirements, as set	Detailed Design	N/A	Detailed design and consultation with RMS for Moorebank Avenue
Біз	out in Table 1.	Detailed Design	IN/A	Decinieu designi and Constitution with Kind for Modificatin Avenue Upgrade Works and Realignment.  Timing specified in CEMP.
B14	A Works Authorisation Deed(s) (WAD) with TfNSW is to be executed by the Applicant for the infrastructure listed in condition B13 the required timing for 100% design approval by TfNSW for the relevant upgrade required by	Construction	N/A	Copy of the WAD.
B15	Traffic Control Signal (TCS) plans must be drawn by a suitably qualified person and endorsed by a suitably qualified practitioner. The designs submitted to TINSW must be in accordance with Austroads Guide to Road	Detailed Design	N/A	Copy of the TCS plans.
	Design in association with relevant TfNSW supplements (available on www.rms.nsw.gov.au).			Copy of the qualifications of practitioner.
B16	TINSW fees for administration, plan checking, civil works inspections and project management must be paid by the Applicant prior to the commencement of works. The Applicant may be required to dedicate land for the maintenance of the traffic control lights. Further details will be included in the WAD process.	Detailed Design	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.	Approved Compliance Tracking Program.  Approved CTAMP.
			meet on a fortnightly basis to review construction progress.	An approved WAD.
B17	be designed to meet TfNSW requirements, and endorsed by a suitably qualified person(s). The design	Detailed Design	N/A	Approved design plans.
B18	The works associated with traffic lights and road upgrade works detailed in condition B13 are to be designed and delivered at no cost to TfNSW or TfNSW unless otherwise agreed by TfNSW and TfNSW.	Detailed Design	N/A	Approved design plans.
B19	The Applicant is responsible for all works required by public utility adjustment/relocation works necessitated by the road infrastructure upgrade works and as required by the various public utility authorities and/or their agents.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.	Approved CEMP.
			The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	
B20	All works/ regulatory signposting associated with the road infrastructure upgrades must be approved by TfNSW.	Construction	N/A	Approved CTAMP.
Road Infra	Istructure Upgrades - Monetary Contributions by Applicant			
B20A	The Applicant must:		IN/A	Monetary contribution receipt.
BZUA	The Applicant musi. (a) provide a contribution in the form of a monetary contribution and / or land dedication to the minimum value of \$20 million. The monetary contribution component must be		N/A	Copy of Transport Infrastructure Contribution Deed.
	provided by 31 December 2023 and dedication of land must be provided by the time to be set out in the Transport Infrastructure Contribution Deed to enable TfNSW to deliver the			Legal fees/ costs receipts.
	proposed M5 Motorway Westbound Traffic Upgrade, in lieu of the Applicant undertaking an upgrade of the Moorebank Avenue / M5 Motorway intersection, to mitigate the traffic impacts of the development; and			
	(b) enter into a Transport Infrastructure Contribution Deed with TNSW and any other relevant party, on terms acceptable to TNSW including in relation to security requirements, giving effect to this Condition B20A, by 1 November 2023, unless otherwise agreed by the			
	Secretary of Transport for NSW in writing. The Applicant is to pay TfNSW's costs associated with entry into the Transport Infrastructure			
B20B	Contribution Deed and any legal fees associated with the administration of the Transport  The Applicant must:		N/A	Manatary contribution receipt
D20B	The Applicant must.  (a) provide a monetary contribution in the amount of \$10,261,652 by 31 December 2023 for TRNSW to deliver the proposed M5 Motorway Westbound Traffic Upgrade, in lieu of the		IN/A	Monetary contribution receipt.  Copy of Transport Infrastructure Contribution Deed.
	Applicant undertaking road upgrade works at the Newbridge Road / Moorebank Avenue intersection and Moorebank Avenue / Heathcote Road intersection, to mitigate the traffic			Legal fees/ costs receipts.
	impacts of the development; and (b) enter into a Transport Infrastructure Contribution Deed with TfNSW and any other relevant party, on terms acceptable to Transport including in relation to security requirements,			
	giving effect to this Condition B20B, by 1 November 2023, unless otherwise agreed by the Secretary of Transport for NSW in writing.

B39	Prior to commencement of early works and fill importation an Erosion and Sediment Control Plan required as part of the Soil and Water Management Plan must: (a) be prepared by a suitably qualified person; (b) be prepared by a suitably qualified person; (b) be prepared by a suitably qualified person; (b) be prepared in accordance with Volume 1 of Managing Urban Stormwater: Soils and Construction – Installation of Services, Volume 2A (OEH 2008) and Managing Urban Stormwater: Soils and Construction – Main Road Construction, Volume 2D (OEH 2008). The plan must consider likely stages of the works and provide for appropriate control of sediment and erosion for each stage. The plan must show:  (i) location and extent of all necessary sediment and erosion control measures for the site; (ii) catchment plan; (iii) sediment basin(s) locations including details showing how runoff from the entire site will be directed to the sediment basin(s); (iv) all relevant details and calculations of the sediment basins including sizes, depths, flocculation, outlet design, all relevant sections, pump out systems, and depths; (v) all details of basement and other excavation pump out and dewatering treatment systems including flocculation and any proposed discharge from the site from dewatering and pump out systems; (vii) identification and management of any stormwater run-on to the site from adjacent sites; (vii) location of any temporary stockpiles (soil, spoil, top soil or otherwise) and accompanying sediment and erosion control measures; (viii) location and details of all vehicle wash down bays and associated erosion and sediment control measures such as earthen bunds; and (ix) a daily and weekly site inspection checklist consistent with IECA Best Practice Erosion and Sediment Control documents.	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Erosion and Sediment Control Plan.	
B40	Stormwater Management Plan  Prior to commencement of early works and fill importation, an amended Stormwater Management Plan must be submitted and approved by the Secretary. The plans must be prepared by a suitably qualified person, and independently reviewed, to ensure it meets the following criteria for: (a) Drainage: (i) convey flows from low order events (up to and including the 10% AEP event from the main part of the site within the formal drainage system, with flows from rarer events (up to the 1% AEP event) conveyed in controlled overland flow paths; (ii) show the location and width of controlled overland flow paths; and (iii) provide levels to AHD confirming building floor levels are a minimum of 150 mm above the maximum design flow path levels. (b) Water Sensitive Urban Design: (i) incorporate water sensitive urban design principles, be generally in accordance with relevant Council policies, plans and specifications (ii) ensure that adequate overland flow paths have been provided in the event of stormwater system blockages and flows in excess of the 1% ARI rainfall event; (iii) ensure in excess of the 1% ARI rainfall event; (iii) ensure rainwater harvesting is provided for each warehouse; (v) ensure adequate site area has been provided for stormwater treatment; and (vi) ensure design of stormwater treatment systems minimises the risk of failure.	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Stormwater Management Plan.	

(vii) develop concept options for how 20% of the average annual volume of stormwater from the site can be	İ	İ	İ	Ī
reused via rainwater capture and reuse for activities including but not limited to:	İ			
- irrigation,	İ			
- all internal non-potable uses,	ĺ			
- washdown	ĺ			
- cooling towers,	ĺ			
- heating, ventilation, and air conditioning, and	ĺ			
- ground source heat exchange.	1			
The Applicant is to brief the Department on how these initiatives will be implemented prior too the completion of the Stormwater Management Plan.	ĺ			
(c) Water quantity:	1			
(i) on site detention is to be provided to attenuate peak flows from the development such that both the:	ĺ			
- 1 in 1 year ARI event post development peak discharge rate is equivalent to the pre-development (un-	ĺ			
developed catchment) 1 in 1 year ARI event	ĺ			
- 1 in 100 year ARI event post development peak discharge rate is equivalent to the predevelopment (un-	1			
developed catchment) 1 in 100 year ARI event;	1			
(ii) no new drainage infrastructure work within the Defence Joint Logistics Unit (DJLU) site;	1			
(iii) all on site detention basins to have maximum batter slopes of 1V:4H or, for works immediately adjacent to the	ĺ			
Moorebank Avenue upgrade, an alternate slope gradient agreed to by TfNSW)	1			
(iv) siting and design of on site detention basins to eliminate/ minimise excavation within the southern ordinance	ĺ			
burial pits; and	Í			
(v) maintenance access to be provided to each on site detention basin.	Í			
	ĺ			
(4) 0	ĺ			
(d) Connection to natural creek lines:	Í			
(i) on site detention basin outlets to natural drainage lines must be constructed of natural materials to facilitate natural geomorphic processes and to include vegetation as necessary (gabion baskets and gabion mattresses	1			
are not acceptable).	1			
(e) Stormwater Quality	ĺ			
(i) have a stormwater quality treatment train comprised of gross pollutant traps and biofiltration/ bioretention	ĺ			
systems designed to meet the following criteria compared to a base case if there were no treatment systems in	1			
place:	ĺ			
- reduce the average annual load of total nitrogen by 45%;	ĺ			
- reduce the average annual load of total phosphorus by 65%; and - reduce the average annual load of total	1			
suspended solids by 85%.	ĺ			
(ii) all stormwater quality elements are to be modelled in MUSIC as per the NSW MUSIC Modelling Guide.	1			
(iii) all stormwater quality elements are to be installed upstream of stormwater detention basins, unless it can be	1			
demonstrated that biofiltration/ bioretention systems within the OSD basins will not suffer damage from design	1			
flows and can be maintained to achieve the water quality criteria.  (iv) the area of biofiltration / bioretention systems is to be at least 1% of the catchment draining to the system, to	ĺ			
ensure there is no short-circuiting of the system.	1			
(v) bioretention systems which are greater than 1,000m2 in area, are to be divided into cells with no individual cell	1			
greater than 1.000m2.	ĺ			
(vi) all filter media used in stormwater treatment measures must:	1			
\''/	İ			
	İ			
(vi) all filter media used in stormwater treatment measures must:	ĺ			
- be loamy sand with an appropriately high permeability under compaction and must be free of rubbish,	1			
deleterious material, toxicants, declared plants and local weeds, and must not be hydrophobic;	ĺ			
- have an hydraulic conductivity = 100-300 mm/hr, as measured using the ASTM F1815-06 method  - have an organic matter content less than 5% (w/w)	Í			
<ul> <li>nave an organic matter content less than 5% (w/w)</li> <li>be provided adequate solar access, considering the design and orientation of OSD basins.</li> </ul>	Í			
A copy of the independent review must be submitted with the Plan. A statement from the reviewer confirming their	Í			
independence and declaring any actual, potential or perceived conflicts of interest must be provided as part of the	Í			
reporting of the findings and recommendations of the review.	ĺ			
Note: The development must comply with section 120 of the POEO Act, which prohibits the pollution of waters.	ĺ			
	ĺ

B41	Not withstanding condition B40, the Stormwater Management Plan does not require the Secretary to approve drainage works that would be designed, approved by TINSW, and delivered, in accordance with condition B13. However, the Stormwater Management Plan must:  a) include confirmation that any such works are proposed to be designed and delivered in accordance with condition B13; and b) incorporate, and be designed in consideration of, preliminary principles for that road drainage.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Stormwater Management Plan.	
B42	The amended numerical models are to be submitted to the Secretary with the Stormwater Management Plan.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of the numerical codes.  Copy of the Submission of the numerical codes to the Secretary.	
	Water Quality Monitoring Program				
B43	A Stormwater Monitoring Program must be prepared in consultation with Council and OEH prior to operation and must be implemented for 5 years following completion of construction to monitor performance of the stormwater treatment system. The Stormwater Monitoring Program must form part of the Biodiversity Monitoring Strategy required by condition B106, prepared with reference to Using the ANZECC Guidelines and Water Quality Objectives in NSW (DEC, 2006).	Pre-Operation	Manager.	An approved Stormwater Monitoring Program.  Copy of consultation record with Council and OEH.  Copy of submission of SMP to DPIE.	
B44	The Stormwater Monitoring Program must: (a) assess water quality and quantity performance for operation discharges and ongoing stormwater discharges from the development to ensure protection of the desired ecological values of Anzac Creek; and (b) include sampling locations and the frequency of sampling including wet weather sampling.	Pre-Operation	Manager.	An approved Stormwater Monitoring Program.  Copy of consultation record with Council and OEH.  Copy of submission of SMP to DPIE.	
	Stormwater Infrastructure Operation and Maintenance Plan				
B45	Conversion of any construction stage sediment and erosion control measures into permanent stormwater quality treatment elements must only occur once the civil works (roads and drainage) have been completed for the site to ensure the treatment measure is not compromised by sediment runoff.	Pre-Operation	Manager.	An approved Stormwater Management Plan.  Copy of SMP Approval by DPIE	
B46	All permanent stormwater infrastructure must be constructed in accordance with the Stormwater Management Plan approved by the Secretary and properly maintained on an ongoing basis.	Construction	Monitor implementation of this program during regular weekly inspections.	An approved Stormwater Management Plan.  Copy of SMP Approval by DPIE.	
B47	Written signoff from the design engineer(s) responsible for the construction drawings is to be provided to the Secretary certifying that the system has been constructed in accordance with the construction drawings or, where modified, this has not adversely affected the performance of the system.	Detailed Design	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Stormwater Management Plan.  Copy of SMP Approval by DPIE.

	Construction Hours				

B65	The construction hours detailed in Table 2 must be complied with, except where they may be undertaken under condition B66. See Table 2.  Table 2: Hours of Work  Activity: Early works and Construction  Days & Times: Monday – Friday (7am to 6pm) Saturday (7am to 1pm)  Time: 7 am to 6 pm 7 am to 1 pm  Activity: Moorebank Avenue upgrade  Days & Times: Monday – Friday (7am to 6pm) Saturday (7am to 1pm)	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.  Copy of any relevant OOHW requests.	
B66	Except as permitted by an EPL, activities resulting in high noise impact (including impulsive or tonal noise emissions) must only be undertaken:  (a) between the hours of 8:00 am to 5:00 pm Monday to Friday;  (b) between the hours of 8:00 am to 1:00 pm Saturday; and  (c) in continuous blocks not exceeding three hours each with a minimum respite from those activities and works of not less than one hour between each block.  Note: For the purposes of this condition, 'continuous' includes any period during which there is less than a one hour respite between ceasing and recommencing any of the work that is the subject of this condition.		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
B67	Works may be undertaken outside the hours detailed in Table 2 in the following circumstances:  (a) for the delivery or dispatch of materials as requested by the NSW Police Force or other public authorities for safety reasons;  (b) where it is required in an emergency to avoid the loss of lives, property and/or to prevent environmental harm;  (c) where different construction hours must be complied with;  (d) where these construction hours must be complied with;  (d) where they are undertaken in accordance with an Out-Of-Hours Work Protocol detailing the assessment, management and monitoring of noise as part of the Construction Noise and Vibration Management Plan.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, forhightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a forthightly basis to review construction progress.	Copy of the Out of Hours Protocol.	
B68	The Applicant must prepare an Out-Of-Hours Work Protocol for any work undertaken outside the hours specified in condition B64 or outside the circumstances specified under condition B67. An Out-Of-Hours Work Protocol must provide for the assessment, management and monitoring of out of hours work noise including:  (a) where works are shown to be inaudible at the nearest sensitive receivers and vibration levels do not exceed those stipulated by Table 2.2 and Table 2.4 of Assessing Vibration: a technical guideline (DEC, 2006);  (b) where a negotiated agreement has been arranged with affected receivers;  (c) where noise can be shown to satisfy the noise management levels specified in the Interim Construction Noise Guideline (ICNG, DECC, 2009) at non residential land uses; or  (d) where works are undertaken as part of an Extended Hours Work Plan approved as part of the Out Of Hours Work Protocol.		Monitor implementation of the sub-plan during regular weekly inspections, forhightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of the Out of Hours Protocol.	

B69	An Extended Hours Work Plan will be prepared for any construction undertaken during the extended hours	Construction	Monitor implementation of the sub-plan during regular weekly	Copy of the Extended Hours Work.	
	detailed in Table 3 as required by condition B68(d). The Extended Hours Work Plan must provide for:		inspections, fortnightly ER inspections and ongoing compliance tracking		
	(a) a three month assessment period, commencing at the start of extended hours construction works; (b) implementation of the Construction Noise and Vibration Management Plan;		and reporting.		
	(c) noise monitoring at a representative number of sensitive receivers (including closest and furthest) to confirm		The ER, contractors, environmental managers and project managers		
	the predicted noise levels;		meet on a fortnightly basis to review construction progress.		
	(d) targeted consultation with the noise affected sensitive receivers; (e) notification of the relevant Council, local residents and other affected stakeholders and sensitive receivers of				
	the timing and duration at least 48 hours prior to the commencement of the works.				
	(f) construction work timeframes and methods for investigation of noise complaints; (g) submission of monthly complaints reports to the Department for the life of extended hours activities;				
	(h) continual refinement of mitigation measures based on consultation with the noise affected sensitive receivers:				
	(i) implementation of work practices set out in section 5.2 of the ICNG;				
	(j) a final summary report submitted to the Secretary at the end of the assessment period in subcondition (a), detailing the outcomes of the assessment period, the resolution of complaints during the assessment period, and				
	demonstrate the acceptability of works outside standard hours. See Table 3.				
	Table 3: Extended Hours of Work				
	Activity: Early works and Construction (not including high noise impact, piling, spoil placement, rock breaking, concrete batching)				
	Monday – Friday: 6am to 7am and 6pm to 10pm.				
	Saturday- 1 pm to 5 pm.

B73	Any construction activities identified as exceeding the construction noise management levels and/or vibration criteria must be managed in accordance with the Construction Noise and Vibration Management Plan (CNVMP)	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking	An approved CNVMP. Copy of any noise related complaints.	
	required by condition B77. All feasible and reasonable noise mitigation and management measures must be		and reporting.	., ,	
1	implemented and any activities that could exceed the construction NMLs must be identified and managed in accordance with the CNVMP. Note: The INCG identifies 'particularly annoying' activities that require the addition		The ER, contractors, environmental managers and project managers		
	of 5dB(A) to the predicted level before comparing to the construction NML.		meet on a fortnightly basis to review construction progress.		
	Construction Traffic Noise				

B74	Where feasible and reasonable, construction traffic movements on public roads must aim to limit any increase in existing road traffic noise levels to no more than 2 dB LAeq,period, where 'period' is defined in the EPA's Road Noise Policy (RNP) for both day and night.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
B75	The Applicant is to ensure that construction contractor's vehicles operate so as to minimise impacts. Measures that could be used include:  (a) toolbox talks;  (b) contracts that include provisions to deal with unsatisfactory noise performance for the vehicle and/or the operator, and  (c) specifying non-tonal movement alarms in place of reversing beepers or alternatives such as reversing cameras and proximity alarms, or a combination of these, where tonal alarms are not mandated by legislation.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
B76	Use of compression brakes for construction vehicles associated with the project that are on site or on nearby roads is not permitted (e.g. Anzac Avenue).	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP. An approved CTAMP.	
B77	Construction Noise and Vibration Management Plan  A Construction Noise and Vibration Management Plan (CNVMP) must be prepared for the development to the satisfaction of the Secretary. The plan must form part of the CEMP required by C1 and detail how construction noise and vibration impacts will be minimised and managed. The Plan must be consistent with the guidelines contained in the ICNG (DECC, 2009). The plan must be developed in consultation with the EPA and include:  (a) identification of the work areas, site compounds and access points;  (b) identification of the type and number of plant and equipment expected on site at the same time; (c) identification of sensitive receivers (including heritage structures if frelevant) and relevant construction noise and vibration goals applicable to the project as stipulated in condition B71;  (d) details of construction activities and an indicative schedule for construction works, including the identification of key noise and/or vibration generating construction activities (based on representative construction scenarios) that have the potential to generate noise and/or vibration impacts on surrounding sensitive receivers, particularly residential areas;  (e) an Out-of-hours Work Protocol as referenced in condition B68 for the assessment, management and approval of works outside standard construction hours, for the Secretary's approval. The Out-of-hours Work Protocol must:  (ii) provide detailed mitigation measures for any residual impacts (that is, additional to general mitigation measures); including extent of at-receiver treatments;  (iii) include proposed notification arrangements; and  (iv) include an Extended Hours Work Plan as required by condition B69.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	

	(f) identification of feasible and reasonable measures to be implemented to minimise and manage construction noise impacts, including, but not limited to, acoustic enclosures, erection of noise walls (hoardings), respite periods; (g) management of the number of trucks accessing the site; (h) a truck driver protocol addressing designated routes, acceptable delivery hours, speed limits on site, no engine braking in the vicinity or on site, no extended periods of engine idling, avoiding queuing in or around the site and limiting the need for reversing on site; (i) identification of feasible and reasonable procedures and mitigation measures to ensure relevant vibration criteria are achieved, including applicable buffer distances for vibration intensive works, use of low vibration generating equipment vibration dampeners or alternative construction methodology, and pre and post construction dilapidation surveys of sensitive structures where vibration is likely to result in damage to buildings and structures (including surveys being undertaken immediately following a monitored exceedance of the criteria); (j) a description of how the effectiveness of mitigation and management measures would be monitored during the proposed works, clearly indicating how often this monitoring would be conducted, the locations where monitoring would take place, how the results of this monitoring would be recorded and reported, and, if any exceedance is detected, how any non-compliance would be rectified; (k) noise and vibration monitoring procedures (routine and complaints triggered monitoring); (l) a community consultation and complaints handling procedure; and (m) mechanisms for the monitoring, review and amendment of this plan.				
B78	Blasting is not permitted on the site.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
	Hours of Operation				
B79	The permitted hours of warehouse and distribution operation are detailed in Table 4. See Table 4.	Operation	Monitor implementation of the sub-plan during regular weekly	An approved OEMP.	
	Table 4: Hours of Operation Activity: Operation Monday to Sunday: 24 hours		inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.		
	Operational Noise Limits				
B80	Noise generated by operation of the development inclusive of MPE Stage 1 operations must not exceed the noise limits in Table 5. See Table 5.  Table 5: Noise Limits dB(A) Location (residential receivers)  Day LAeq 15 minute  Evening LAeq,15 minute  Night LAeq,15 minute  Night LAeq,15 minute  Night LA1, 1 minute)  Casula 35 dB 35 dB 52 dB  Glenfield 35 dB 35 dB 35 dB 52 dB  Wattle Grove 35 dB 35 dB 52 dB  Notes:  To determine compliance with the LAeq,15 minute noise limits, noise from the development is to be measured at the most affected point within 30 metres of a dwelling where the develling is more than 30 metres from the boundary, or at the most affected point within 30 metres of a dwelling where the develling is more than 30 metres from the boundary. Where it can be demonstrated that direct measurement of noise from the project is impractical, the EPA may accept alternative means of determining compliance (see Chapter 11 of the NSW Industrial Noise Policy). The modification factors in Section 4 of the NSW Industrial Noise Policy must also be applied to the measured noise levels where applicable.		Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved OEMP.	
	Review of Sleep Disturbance Impacts				
B81	The Applicant must prepare a Review of Sleep Disturbance Impacts based on detailed design, including:	Construction	N/A	An approved Review of Sleep Disturbance Impacts.	
	(a) an assessment of how often noise events occur, the time of day they occur and whether there are any times of day when there is a clear change in the noise environment; (b) confirm the operational LAmax predictions of the final design; and (c) consider appropriate noise mitigation measures where required.	Consultation		у и друго се потом от опосу впомочение вприсы.	

B82	The Review of Sleep Disturbance Impacts must be prepared in consultation with the EPA and to the satisfaction of [Construction   NI/A   An approved Review of Sleep Disturbance Impacts.

1							
		1	1				

B87	The Applicant must provide the Secretary and the EPA with a copy of the Operational Noise Report within 60 days of completing the operational noise monitoring referred to in (a) above or as otherwise agreed by the Secretary.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Operational Noise Management Plan.	
B88	To ensure the operational noise impacts are appropriately managed, the following measures apply: a) use of best practice plant; and by preparation of a risk assessment to determine if non-tonal reversing alarms can be fitted as a condition of site entry. Alternatively, site design may include traffic flow that does not require or precludes reversing of vehicles.	Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Operational Noise Management Plan.	
	Heavy Vehicles				
B89	For the duration of operation heavy road freight vehicles are not permitted to use Moorebank Avenue south of the East Hills Railway corridor. A main gate monitoring system (e.g. CCTV) must be installed to identify heavy wehicles turning left from the terminal site onto Moorebank Avenue, or furning right from Moorebank Avenue to the terminal site. The Secretary may at any time request the Applicant to provide a heavy vehicle monitoring report for the prior 12 month period.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	CCTV footage and monitoring report.	
	Continuous Improvement				
B90	For the duration of operation, the Applicant must: a) continue to implement all reasonable and feasible best practice noise mitigation measures; b) continue to investigate ways to reduce the noise generated by the development, including maximum noise levels which may result in sleep disturbance; and c) report on these investigations and the implementation and effectiveness of these measures in the Annual Review to the satisfaction of the Secretary.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Operational Noise Management Plan.	
	Archival Recording				
В91	Prior to Early Works and Fill Importation, archival recording of the entire former DNSDC site must be undertaken in accordance with the Non-Indigenous Heritage Assessment (artefact, 2016) by a suitably qualified and experienced person(s).	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of the Non- Indigenous Heritage Assessment.	
	Heritage Management Plan				
B92	Prior to commencement of Early Works and Fill Importation, the Applicant must prepare a Heritage Management Plan, to the satisfaction of the Secretary. The plan must form part of the CEMP required by C3 and must (a) be prepared by suitably qualified and experienced person(s); (b) be prepared in consultation with NSW Heritage Division, Council, relevant landowners and stakeholders including the Moorebank Heritage Group (MHG) and Department of Defence.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Heritage Management Plan.	

B93	The Heritage Management Plan must include:  (a) plans/strategies to monitor, mitigate and manage the effects of the development on identified PADs; (b) measure to ensure site workers receive suitable heritage inductions prior to carrying out any activities which may cause impacts to heritage, and that suitable records are kept of these inductions; (c) a program and description of the measures/procedures to be implemented for: (i) undertaking surface surveys and archaeological investigations (where subsurface disturbance is proposed) of any items of heritage significance; (ii) protecting heritage items located outside the disturbance area from the impacts of the development; (iii) managing any new heritage items discovered during the development; and (iv) additional archaeological excavation and recording of any significant heritage deposits uncovered during demolition.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Heritage Management Plan.
B94	Archaeological Monitoring and Recording  Prior to commencement of Early Works and Fill Importation, archaeological monitoring and recording must be	Pre- Construction	N/A	Copy of archaeological maniforing and recording regults
B94	Prior to commencement of Early works and a I importation, a ronaeological monitoring and recording must be undertaken at potential archaeological deposits (PADs) V and W in accordance with the Non-Indigenous Heritage Assessment (artefact 2016) by a suitably qualified and experienced archaeologist with Excavation Director Criteria qualifications.	Pre- Construction	N/A	Copy of archaeological monitoring and recording results.
B95	The results must be reported to the Secretary within one month of completion of monitoring and recording at PADs V and W, along with recommendations for further monitoring at additional sites, if significant archaeological deposits are encountered.	Pre- Construction	N/A	Copy of archaeological monitoring report to Secretary.
B96	Fill importation must not commence within 10 metres of PADs V and W until the results of any further monitoring and recording, along with any additional Non-Indigenous Heritage management measures, are submitted to the Secretary and included in an updated Heritage Management Plan to the satisfaction of the Secretary.	Pre- Construction	N/A	An approved Heritage Management Plan.  Copies of inspections and audits.
	Unexpected Finds Protocol			
B97	Before commencement of construction, the Applicant must prepare an Unexpected Finds Protocol for the development in consultation with the Registered Aboriginal Parties, OEH and the NSW Heritage Division and must implement the Protocol in accordance with its terms.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, forhightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Unexpected Finds Protocol.
	Discovery of Human Remains or Aboriginal Objects or Places			
B98	If human remains are discovered on site, then all work surrounding the area must cease, and the area must be secured. The Applicant must immediately notify NSW Police and OEH, and work must not recommence in the area until authorised by NSW Police and OEH.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copies of incident reports and investigations.
B99	If any Aboriginal object or Aboriginal place is identified on site, or suspected to be on site:  (a) all work in the immediate vicinity of the object or place must cease immediately;  (b) a 10m buffer area around the object or place must be cordoned off; and  (c) OEH must be contacted immediately.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, forthightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a forthightly basis to review construction progress.	Copies of incident reports and investigations.

B100	Work in the immediate vicinity may only recommence if. (a) the object or place is confirmed by OEH upon consultation with the Registered Aboriginal Parties, not to be an Aboriginal object or Aboriginal Place; or (b) an Aboriginal Cultural Heritage Management Plan is prepared in consultation with the Registered Aboriginal Parties and OEH to include the object or place and appropriate measures in respect of it, and the Plan is approved by the Secretary; or (c) OEH is satisfied as to the measures to be implemented in respect of the object or place and makes a written direction in that regard.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Aboriginal Cultural Heritage Management Plan.	
	Heritage Interpretation Plan				
B101	Prior to commencement of operation, the Applicant must prepare a Heritage Interpretation Plan based on the recommendations contained in the Heritage Interpretation Strategy (artefact, 2017) approved under MPE Stage 1. The plan must be prepared for the entire Moorebank Intermodal Precinct (MPE and MPW sites).	Pre-Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Heritage Management Plan.	
B102	The plan must form part of the OEMP required by condition C3 and must (a) be prepared by a suitably qualified and experienced person(s); (b) be prepared in consultation with NSW Heritage Division, Council, relevant landowners and stakeholders including the Moorebank Heritage Group (MHG), Department of Defence, as well as the Relevant Aboriginal Parties (RAPs) should themes relating to Aboriginal heritage be included for interpretation; and (c) be approved by the Secretary prior to the commencement of operation.	Pre-Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Heritage Management Plan.	
D400	Biodiversity The Account of the Acco	0 1 1		A LOFFILID	
B103	The Applicant must: (a) ensure that no more than 4.694.88 hectares of native vegetation is cleared for the development, and (b) minimise: i. the impacts of the development on hollow-bearing trees ii. the clearing of native vegetation and key habitat within the approved disturbance footprint.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
B104	Prior to the commencement of construction, unless the Secretary agrees otherwise, the Applicant must retire biodiversity credits of a number and class specified in Tables 6, and 4.7A and 7B below, and provide evidence to the satisfaction of the Secretary. The retirement of credits must be carried out in accordance with the NSW Biodiversity Offsets Policy for Major Projects, and can be achieved by (a) acquiring or retiring credits under the Biobanking scheme established under the-then Threatened Species Conservation Act 1995 (b) making payments unto an offset fund that has been established by the NSW Government; or (c) providing suitable supplementary measures.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Credit Retirement	
B104A	Prior to the commencement of construction, unless the Secretary agrees otherwise, the Applicant must retire biodiversity credits of a number and class specified in Table 7B and provide evidence to the satisfaction of the Secretary. The retirement of credits can be achieved by payment to the Biodiversity Conservation Fund of an amount equivalent to the class and number of species credits, as calculated by the Biodiversity Offsets Payment Calculator. Note that prices of credits in the Biodiversity Offsets Payment Calculator are subject to change. The amount payable to discharge an offset obligation will be determined at the time of payment.	Pre-Construction	Monitor implementation of the sub-plan during regular weekly inspections, forthightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Biodiversity credit retirement report. Biodiversity banking agreement. Biodiversity credit retirement report.	
B105	Not withstanding condition B103, the Applicant: (a) may elect to retire biodiversity credits in conjunction with the retirement of biodiversity credits for other developments on the MPE or MPW developments, prior to the commencement of construction of this development, or at another time agreed by the Secretary; and (b) is not required to retire credits for biodiversity impacts that it has already offset under another development consent, pending the provision of evidence of what credits were retired to offset which development.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Biodiversity banking agreement. Biodiversity credit retirement report.	
	Baseline Monitoring Program				
B106	Prior to early works, a baseline monitoring program must be prepared in consultation with OEH and DPI to define pre-development conditions for water quality, invertebrates and fish assemblages. The results of this monitoring program are to be used to: (a) develop a Biodiversity Monitoring Strategy to identify any changes between upstream and downstream sites as a result of the construction and operation of the development; and (b) set the stormwater water quality and quantity performance criteria referred to in condition B40.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Biodiversity Monitoring Strategy.	

B107	Any unavoidable indirect impacts as identified through the Biodiversity Monitoring Strategy required under condition B105, e.g., impacts of change hydrology on vegetation in boot land/biobank site must be identified and measures to address this must be developed in consultation with OEH and implemented to the satisfaction of the Secretary. Measures may include additional offsetting.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
	Construction Flora and Fauna Management Plan				
B108	Prior to clearing of native vegetation, the Applicant must prepare a Construction Flora and Fauna Management Plan (CFFMP) in consultation with OEH. The CFFMP must form part of the CEMP required by condition C1 and must include the following:  (a) measures to minimise the loss of key fauna habitat, including tree hollows; (b) measures to minimise the impacts on fauna on site, including conducting fauna pre-clearance surveys prior to vegetation clearing and building demolition; (c) controlling weeds and feral pests; (d) an Unexpected Finds Procedure detailing procedures and management measures to be implemented in the event that flora and fauna is uncovered in any area not identified in the updated Biodiversity Assessment (BAR); (e) to ensure biodiversity values not intended to be impacted are protected. These measures may include barriers and mapping of protected/ "no-go" areas; and (f) a program to monitor the effectiveness of the measures in the CFFMP.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
B109	Prior to removing/clearing any vegetation, pre-clearing surveys and inspections for threatened species, populations and ecological communities must be undertaken to confirm the on-site location of those entities. The surveys and inspections, and any subsequent relocation of species and associated management measures, must be undertaken under the guidance of a suitably qualified and experienced ecologist. Methodologies must be incorporated into the Construction Flora and Fauna Management Plan required under condition B107. The agreement of OEH, whichever is the relevant agency, is required for any proposed amendments to the location or reclassification of threatened species, populations and ecological communities as identified in the updated BAR.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.  Copy of a Clearing Protocol.	
	Operational Flora and Fauna Management Plan				
B110	Prior to operation, the Applicant must prepare an Operational Flora and Fauna Management Plan (OFFMP) in consultation with OEH. The OFFMP must form part of the OEMP required by condition C3 and must include measures to ensure biodiversity values not intended to be impacted are protected, including but not limited to: (i) weed control; (iii) feral animal control; (iii) pathogen management procedures; (iv) monitoring; and (v) rehabilitation actions.	Pre-Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Operational Flora and Fauna Management Plan.	
B111	Bushfire asset protection zones are to be contained wholly within the site boundary and management of the inner protection zone and must not impact on the Boot Land.	Detailed Design	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Operational Flora and Fauna Management Plan.	
	Dangerous Goods				
B112	The Applicant (the operator/occupant of each premises) must store and handle all chemicals, fuels and oils, including Dangerous Goods as defined in the Australian Code for the Transport of Dangerous Goods by Road & Rail, in accordance with:  (a) the requirements of all relevant Australian Standards; and (b) the NSW EPA's Storing and Handling of Liquids: Environmental Protection – Participants Handbook if the chemicals are liquids. In the event of an inconsistency between the requirements listed above, the most stringent requirement shall prevail to the extent of the inconsistency.	Construction		Copy of the site hazardous and contaminated materials management strategy.  Copy of environmental inspections detailing storage of dangerous goods.  Copy of dangerous goods volumes stored on site.	
B113	The Applicant (the operator/occupant of each premises) must ensure compliance with the Environment Protection Manual for Authorised Officers: Bunding and Spill Management – technical bulletin (EPA, 1997 and that for liquids, a minimum bund volume of 110% of the volume of the largest single stored volume within the bund is required.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	A copy of BCA certificate.	

B114	The quantities of Dangarous Goods present at any time within each premises or transported from and to the development must be kept below the screening threshold quantities listed in the Department's Hazardous and Offensive Development Guidelines Application Guidelines Applying SEPP 33 (January 2011). The quantities of Dangarous Goods present at any time within the development or transported to and from the development must not exceed the screening threshold quantities in the Department's Hazardous and Offensive Development Guidelines Application Guidelines Applying SEPP 33 except Warehouse 7. The storage of Dangerous Goods and combustible materials in Warehouse 7 must not exceed the quantities listed in Table 3-1 of the Preliminary Hazard Analysis prepared by Riskcon dated 11 October 2022 at all times.  The Applicant must prepare the studies set out under subsections (a) and (b). Storage of Dangerous Goods in Warehouse 7, must not commence until study recommendations have been considered and, where appropriate, acted upon. The Applicant must submit the studies to the Planning Secretary no later than one month prior to the commencement of the storage of Dangerous Goods in Warehouse 7, or within such further period as the Planning Secretary may agree.  (a) FIRE SAFETY STUDY		Include Condition requirements in management plans (where applicable).  Regularly monitor and review stored and transported quantities of dangerous goods.  Complete operational compliance tracking and reporting obligations.  Prepare and submit Fire Safety Study to Planning Secretary prior to commencement of storage of Dangerous Goods.  Confirm Fire Safety Study addresses required content on Condition B114A(a).  Prepare and submit Final Hazard Analysis to Planning Secretary prior to	A copy of Dangerous Goods Register, if available.  A copy of Hazardous Substances Register.  Operations compliance reports.  A copy of the submitted Fire Safety Study.  A copy of the submitted Final Hazard Analysis.  Record of recommendation implementation.
	A Fire Safety Study for Warehouse 7. The study must cover the relevant aspects of the Department's Hazardous industry Planning Advisory Paper No. 2, 'Fire Safety Study' and the New South Wales Government's Best Practice Guidelines for Contaminated Water Retention and Treatment Systems. The study must also satisfy the operational requirements of Fire and Rescue NSW, and include documentary evidence that a suitably qualified and experienced person is satisfied that the Applicant constructed Warehouse 7 in accordance with the fire safety systems and proposed designs assessed in the Fire Safety Study.	Operations	commencement of storage of Dangerous Goods.  Confirm implementation of appropriate recommendations occurs prior to storage of dangerous goods in Warehouse 7.	commencement date.
B114B	Prior to the storage of Dangerous Goods in Warehouse 7, the Applicant must develop and implement the plans and systems set out under subsections (a) and (b). The Applicant must submit to the Planning Secretary documentation describing the plans and systems no later than two months prior to the commencement of the storage of Dangerous Goods in Warehouse 7, or within such further period as the Planning Secretary may agree.  (a) EMERGENCY PLAN  A comprehensive Emergency Plan and detailed emergency procedures for Warehouse 7. This plan must include consideration of the safety of all people outside of the development who may be at risk from the development. The plan must be consistent with the Department's Hazardous Industry Planning Advisory Paper No. 1, 'Emergency Planning'.  (b) SAFETY MANAGEMENT PLAN  A document setting out a comprehensive Safety Management System, covering all on-site operations and associated transport activities involving hazardous materials for Warehouse 7. The document must clearly specify	Operations	Prepare and implement Emergency Plan.  Confirm Emergency Plan includes required content.  Prepare and implement Safety Management Plan.  Confirm Safety Management Plan includes required content.  Maintain safety management records on-site.  Comply with any Planning Secretary requests to inspect safety management records.  Submit Emergency Plan and Safety Management Plan documentation to the Planaging Secretary to management Plan and Safety Management Plan documentation to the Planaging Secretary to management Planagement copy of the current Emergency Plan.  A copy of the current Safety Management Plan.  Safety Management Plan records.  Evidence of submission of Emergency Plan and Safety Management Plan documentation to the Planning Secretary.  Confirmation of Warehouse 7 dangerous goods storage commencement date.	
B144D	HAZARD AUDIT Twelve months after the commencement of operations of Warehouse 7 and every five years thereafter, or at such intervals as the Planning Secretary may agree, the Applicant must carry out a comprehensive Hazard Audit of Warehouse 7 and within one month of each audit submit a report to the Planning Secretary. The audits must be carried out at the Applicant's expense by a qualified person or team, independent of the development, approved by the Planning Secretary prior to commencement of each audit. Hazard Audits must be consistent with the Department's Hazardous Industry Planning Advisory Paper No. 5, 'Hazard Audit'. The audit report must be accompanied by a program for the implementation of all recommendations made in the audit report. If the Applicant intends to defer the implementation of a recommendation, reasons must be documented.  FURTHER REQUIREMENTS	Operations	Attain Planning Secretary approval of independent auditor/s.  Conduct Warehouse 7 Hazard Audit 12 months after commencement of operations.  Conduct ongoing Warehouse 7 Hazard Audits at five-year intervals after the first Hazard Audit.  Submit Hazard Audit reports and program for implementation of all audit recommendations within one month of each audit to the Planning Comply with any reasonable requirements of the Planning Secretary.	Record of Planning Secretary approval of independent auditor/s prior to audit commencement.  A copy of each Hazard Audit report.  Evidence of Hazard Audit report and program for implementation of all audit recommendations submission to Planning Secretary.  Evidence of audit recommendation implementation.  A copy of requests received from the Planning Secretary.
B115	The Applicant must comply with all reasonable requirements of the Planning Secretary in respect of the implementation of any measures arising from the reports submitted in respect of conditions 114A to 114D properties to excupation of each premises and in each instance of occupation by a new occupant, a report must be	Operations Pre-Operation	N/A	Evidence that each request has been complied with.  Copy of report submitted to Secretary confirming that the premises will
	submitted to the Secretary confirming that the premises will be operated so as to comply with the requirements of conditions B112 and B114.  Notes: The total quantity of DG within a warehouse must be considered as part of the screening, not the size of one container and separation distances must be based on the Applying SEPP 33 guideline.			be operated so as to comply with conditions B112 and B114.
B116	Emergency Response Plan  Six months prior to operation, the Applicant must prepare an Emergency Response Plan, in consultation with FRNSW and NSW Police Force.  The Emergency Response Plan must include, but not be limited to: (a) protocols and procedures to be followed during emergency situations associated with the operation of the project (including fires and explosions). The protocols and procedures are to take into account the needs of people with a disability or who may experience access problems in emergency situations; (b) details of traffic management measures to be implemented during emergencies, where appropriate, to minimise the potential for escalation of the emergency; (c) design and management measures to address the potential environmental impacts of an emergency situation, including measures for containment of contaminated fire-fighting water, fuel spills and gaseous combustion products; and (d) details of a training and testing program to ensure that all operational staff are familiar with the Emergency Response Plan.  Construction and Demolition Waste Management	Pre-Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Emergency Response Plan.

B117	All waste generated by the project must be assessed, classified and managed in accordance with the Waste Classification Guidelines Part 1: Classifying Waste EPA 2014.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CDWMP.
B118	Prior to the commencement of early works, the Applicant must prepare a Construction and Demolition Waste Management Plan for the development to the satisfaction of the Secretary. The plan must form part of the CEMP required by condition C1 and must detail the quantities of each waste type generated during construction and the proposed reuse, recycling and disposal locations.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CDWMP.
B119	The Applicant must. (a) not commence construction until the Construction and Demolition Waste Management Plan is approved by the Secretary; and (b) carry out the development in accordance with the most recent version of the Construction and Demolition Waste Management Plan approved by the Secretary.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CDWMP.
	Operational Waste Management			
B120	Prior to the commencement of operation, the Applicant must prepare a Waste Management Plan for the development to the satisfaction of the Secretary. The Waste Management Plan must form part of the OEMP required by condition C3 and be prepared in accordance with condition C7. The Plan must: (a) detail the type and quantity of waste to be generated during operation of the development; (b) describe the handling, storage and disposal of all waste streams generated on site, consistent with the Protection of the Environment Operations Act 1997, Protection of the Environment Operations (Waste) Regulation 2014 and the Waste Classification Guidelines Part 1: Classifying Waste (EPA, 2014) (as may be updated or replaced from time to time); (c) detail the materials to be reused or recycled, either on or off site; and (d) include the Management and Mitigation Measures included in APPENDIX B.	Pre-Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Operational Waste and Resources Management Plan.
B121	Waste must be secured and maintained within designated waste storage areas at all times and must not leave the site or be deposited on or otherwise enter neighbouring public or private properties.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Operational Waste and Resources Management Plan.
	Statutory Requirements			
B122	All waste materials removed from the site must only be directed to a waste management facility or premises lawfully permitted to accept the materials.	At all times	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Waste management records.
B123	The Applicant must assess and classify all liquid and non-liquid wastes to be taken off site in accordance with the latest version of EPA's Waste Classification Guidelines Part 1: Classifying Waste (EPA, 2014).		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Waste management records.
B124	Waste generated outside the site must not be received at the site for storage, treatment, processing, reprocessing, or disposal unless it satisfies these condition	At all times	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Waste management records.

B125	The Applicant must retain all sampling and waste classification data for the life of the development in accordance with the requirements of EPA.		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Waste management records.
B126	The collection of waste generated during operation of the development must be undertaken between 7 am to 10 pm Monday to Friday.		Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	Waste management records.
B127	Pests, Vermin and Noxious Weed Management The Applicant must:	Construction	Monitor implementation of the sub-plan during regular weekly	An approved CFFMP.
5127	(a) take all reasonable steps to manage pests and vermin on the site; (b) manage declared noxious weeds on the site in accordance with the requirements of the Noxious Weeds Act 1993; and (c) inspect the site on a regular basis, no less than every 3 months, to ensure that these measures are working effectively, and that pests, vermin or noxious weeds are not present on site in sufficient numbers to pose an environmental hazard, or cause the loss of amenity in the surrounding area.  Note: For the purposes of this condition, noxious weeds are those species subject to an order declared under the Noxious Weed Act 1993.	Consaddion	inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	All approved CIT WIF.
	Contamination			
B128	The Applicant must provide the NSW EPA with a copy of all reports to date relating to the assessment of per- and poly-fluoroalkyl substances including perfluorooctanoate (PFAS) undertaken for the Site.	Construction		Copies of any reports relating to the assessment of per- and poly- fluoroalkyl substances including perfluorooctanoate (PFAS) undertaken for the Site.  Copy of submission of reports to NSW EPA.
B129	Prior to the commencement of early works or construction on site, the Applicant must engage a Site Auditor accredited under the EPA Contaminated Land Management Act 1997 NSW Site Auditor Scheme.	Pre- Construction	N/A	Copy of the Site Auditor's endorsement.
B130	Prior to an occupation certificate being issued, the Applicant must submit to the Secretary a Site Audit Statement, prepared in accordance with the NSW Contaminated Land Management - Guidelines for the NSW Site Auditor Scheme (3rd Edition, 2017), which demonstrates that the site is suitable for its intended land use (i.e. Section 'A'). The Site Auditor must consider the most up to date PFAS guidance.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	Copy of any Interim Occupation Certificates.  Copy of Site Audit Statement.
B131	If the Site Auditor determines that further assessment of PFAS contamination, the Applicant must contact the NSW EPA as soon as practicable to discuss requirements for community consultation and long term management.	Pre- Construction	N/A	Evidence of communication with EPA (where appropriate).
B132	Should the Applicant identify a potential risk to off-site receptors due to PFAS contamination, the Applicant must contact the NSW EPA as soon as practicable to discuss requirements for community consultation and long term management.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, forthightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a forthightly basis to review construction progress.	Evidence of communication with EPA (where appropriate).
B133	Prior to any demolition on the site, and entry and any subsurface activities within the southern burial pits, an UXO, EO and EOW Site Assessment Survey must be undertaken by an UXO contractor listed on the Defence Panel of suitably qualified UXO consultants and contractors and submitted to the Secretary.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of UXO, EO and EOW Site Assessment Survey.

B134	Prior to early works and fill importation, a Contamination Management Plan must be prepared to the satisfaction of the Secretary and form part of the CEMP required under condition C1. The Contamination Management Plan is to be based on the Environmental Management Plan prepared by GHD (2016) and results of the UXO, EO and EOW Site Assessment Survey and must take into account additional risks posed by the proposed works and in particular:  (a) excavation within the southern burial pits;  (b) removal/remediation of underground storage tanks;  (c) disturbance of soil containing asbestos material; and (d) demolition of buildings containing asbestos materials.  The Contamination Management Plan must include:  (a) an UXO, EO and EOW management and remediation plan, prepared by a qualified person(s) listed on the Defence Panel;  (b) an Asbestos Management Plan; and	Pre- Construction  Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.  Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.	An approved Contamination Management Plan.  An approved Contamination Management Plan.	
	(c) Unexpected Finds Procedure. The Contamination Management Plan must be approved by a NSW EPA Accredited Site Auditor prior to submission to the Secretary.		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.		
B136	Following demolition, a supplementary UXO, EO and EOW Site Assessment Survey is to be undertaken and an updated Contamination Management Plan is to be prepared to the satisfaction of the Secretary to address any additional contamination issues identified. Remediation works must only be carried out by suitably qualified and experienced contractor(s) including a contractor listed on the Defence Panel in the case of UXO, EO and EOW.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Contamination Management Plan.	
B137	Details of any contaminated cells located on the site following remediation shall be provided to the Secretary, including relevant GPS data on the extent of the cell and details of the long term management of the cells.	Construction	N/A	An approved Contamination Management Plan.  Records of communication of contaminated cells (if applicable).	
B138	All contaminant cells located on the site following remediation shall be registered on title including, details of relevant Contamination Management requirements.	Construction	NIA	An approved Contamination Management Plan.  Records of contaminated cells registered on land title (if applicable).	
	Urban Heat Island Mitigation Strategy				
B139	Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, an Urban Heat Island (UHI) Mitigation Strategy must be prepared and submitted to the Secretary for approval, in consultation with the NSW Government Architect. The UHIMS must be prepared by a suitably qualified and experienced person(s).  The UHI Mitigation Strategy must (a) review he current architectural details, building layout, landscaping provision, shading provision, landscape irrigation, stormwater water detention and WSUD, as well as building and paving material specifications; (b) make recommendations to mitigate the UHI effects generated by the development including but not limited to:  (ii) provision of WSUD elements; (iii) landscape coverage and screening; (iv) use of building material including reflectivity; (v) use of building material including reflectivity; (v) use of pavement material including reflectivity; (v) use of pavement material including reflectivity; NSW Government 25 Moorebank Intermodal Precinct East Stage 2 Department of Planning and Environment SSD 7628 (vi) improved green space maintained by independent, climate resilient water supplies, to achieve increased amenity and urban cooling; and  (vii) heat generation from operations; and (c) include a design strategy with the goal to achieve a 4°C degree decrease in temperature compared to neighbouring industrial developments; (d) details of where and how recommendations from the UHI Mitigation Strategy have been incorporated into the:  (i) updated final Development Layout Plans and WSUD Plans required by conditions A22 and A23; (iii) UDLP required by condition B140; (iv) CEMP required by condition C3.	Pre-Construction and Pre Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Urban Heat Island Mitigation Strategy.	

B140	Prior to commencement of permanent built surface works and/or landscaping, or as otherwise agreed by the Secretary, an Urban Design and Landscape Plan (UDLP) must be prepared. The UDLP must be prepared by a	Operation	Pre-Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed	An approved UDLP.	1	
	secretary, an urban Design and Landscape Plan (UDLP) must be prepared. The UDLP must be prepared by a suitably qualified and experienced person(s), in consultation with the relevant council(s). The UDLP must be	Operation	by Qube's Site Safety, Health, Environment and Quality (SHEQ)	Copy of approval of UDLP.		
	approved by the Secretary, in consultation with the relevant council(s). The UDLP must be		by Qube's Site Safety, Health, Environment and Quality (SHEQ)  Manager.	Copy of approval of UDLP.		
	integrated urban and landscape design for the development, and must include, but not be limited to:		Manager.

	(n) details of how the UHI Mitigation Strategy required by condition B140 has been incorporated into the UDLP and final Development Layout, Stormwater Management Plan and Architectural Details; (o) details of where and how recommendations from the Construction Flora and Fauna Management Plan for the adjoining offset area (condition B140) and the requirements of conditions B140(e) and (f) have been incorporated into the UDLP, (p) details of where and how recommendations from the Bushfire Management Plan (condition B144) have been incorporated into the UDLP, (q) details of where and how employee facilities including but not limited to secure bicycle parking, pedestrian paths, outdoor eating areas have been incorporated into the UDLP; and (r) evidence of consultation with the Relevant Council(s), prior to finalisation of the UDLP. The UDLP must be implemented prior to occupation of the warehouse and freight village, unless otherwise agreed by the Secretary.  Note:  The UDLP may be submitted in parts to address the built elements of the development and landscaping aspects of the development.				
B141	The Urban Design and Landscape Plan must include the following sub-plans:  (a) a Landscape Vegetation Management Sub Plan to assist in the monitoring and maintenance of landscape elements required to be delivered as part of the approval. The Plan must be prepared and approved by the Secretary within twelve months of the date of this approval, unless otherwise agreed by the Secretary. The Plan must provide details of the monitoring and maintenance procedures for the landscape vegetation elements, rehabilitated vegetation and landscaping (including weed and pathogen control) including performance indicators, identification of commitments, identification of the responsibilities of each entity involved in the management of the intermodal precinct including the overarching management responsibilities and obligations for common land and tenant responsibilities, timing and duration, as well as contingencies where rehabilitation of vegetation and landscaping measures fail.  The approved plan must be implemented prior to occupation of the warehouse and freight village.  b) a Lighting Sub Plan to assist in the control of lighting and reduce the visual impact of the 24 hour operational facility when viewed from residents within residential areas within the locality. The Plan must provide an assessment of the location, design specification and impacts of operational lighting associated with the development and measures proposed to minimise lighting impacts and standardise lighting design within the MPE development. The Plan must be prepared and approved by the Secretary. The Applicant must ensure that the lighting associated with the development:  (i) complies with the latest version of AS 4282-1997 - Control of the obtrusive effects of outdoor lighting (Standards Australia, 1997);  (ii) is mounted, screened and directed in such a manner that it does not create a nuisance to surrounding properties or the public road network; and  (iii) lessigned to reduce light spill and mitigate the visual impact of the 24-hour facility w	Pre-Construction and Pre Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved UDLP.  An approved Landscape Vegetation Management Sub Plan.  An approved Lighting Sub Plan.  An approved Employee Outdoor Meal Break Plan.  An approved Signage Sub Plan.  An approved Cycling and Pedestrian Access and Facilities Sub Plan.	
	(c) The Lighting Sub Plan must identify and provide details of the common and individual lighting throughout the development to reduce light spill and mitigate visual impact on the residential areas in the locality by: (i) eliminating upward spill light; (ii) directing light downwards, not upwards; (iii) using shielded fittings; (iv) avoiding 'over' lighting; (v) avoiding 'over' lighting; (v) switching lights off when not required; (vi) using energy efficient bulbs; (vii) using asymmetric beams, where floodlights are used; (viii) ensuring lights are not directed towards reflective surfaces; and (ix) using warm white colours.  The approved plan must be implemented prior to occupation of the warehouse and freight village.				

1	(d) Cycling and Pedestrian Access and Facilities Sub Plan to assist in safe cycling and pedestrian	I	1	1	1
	connectivity through the MPE precinct by providing dedicated linkages between the warehouses, the freight				
	village and Moorebank Avenue that will contribute to the quality and safety of the pedestrian and cyclist				
	environment associated with the development. The Plan must be prepared by a suitably qualified and				
	experienced person(s) and approved by the Secretary within twelve months of the date of this approval, unless				
	otherwise agreed by the Secretary.				
	NSW Government 27 Moorebank Intermodal Precinct East Stage 2				
	Department of Planning and Environment SSD 7628				
	The Plan must be prepared by a suitably experienced and qualified person(s) in the design and provision of Cycling and Pedestrian Access and Facilities. The Plan must detail the construction, timing and				
	responsibility for the delivery of Cycling and Pedestrian Access and Facilities and take into account the				
	following considerations:				
	(i) all relevant policies, guidelines and plans;				
	(ii) provide details for the provision of safe and efficient pedestrian and cyclist access connectivity within the				
	development and include integration with the existing and future pedestrian and cycling access in the				
	locality;				
	(iii) provide details of end of trip facilities available on-site at each warehouse which are to include under				
	cover bike storage, showers and change facilities sufficient to accommodate the needs of the forecast				
	number of employee; and				
	(iv) the layout, design and security of bicycle facilities must comply with the minimum requirements of Australian Standard AS 2890.3 – 1993 Parking Facilities Part 3: Bicycle Parking Facilities.				
	The approved plan must be implemented prior to occupation of the warehouse and freight village.				
l	The approved plan must be implemented prior to occupation of the warehouse and height village.				
i					
1	(a) Employee Outdoor Meel Breek Area out plan to provide a see least a see it a see				
l	(e) Employee Outdoor Meal Break Area sub plan to provide employee amenity associated with the development. The Plan must identify and facilitate the construction and establishment of employee outdoor				
	meal break area and be prepared by a suitably experienced and qualified person(s) and submitted to the				
	Secretary for approval.				
	The Plan must be prepared by a suitably experienced and qualified person(s) in the design and provision of				
	outdoor open space. The Plan must detail the construction, timing and responsibility for the delivery and				
	maintenance of an individual employee outdoor meal break areas for each warehouse and a communal				
	employee/visitor eating area at the freight village and take into account the following considerations:				
	(i) all relevant policies, guidelines and plans;				
	(ii) the type of facilities to be provided having regard to forecast future employee and visitor needs;				
	(iii) provide detail of the siting and design of outdoor eating areas including seating, lighting, paving,				
	landscaping, screening, shading, vermin proof waste storage and security; and				
	(iv) include details of the maintenance and waste collection responsibilities.				
	Where it can be demonstrated to the satisfaction of the Secretary, that an outdoor break area cannot be				
	accommodated on site for each warehouse, an internal eating/sitting area is to be provided within each warehouse and details provided within this subplan.				
	The approved plan must be implemented prior to occupation of the warehouse and freight village.				
	The approved plan must be implemented prior to occupation of the wateriouse and neight vinage.				
	(f) Signage Sub Plan to assist in the management of individual building, wayfinding and common directory				
	signage associated with the development. The Plan must be prepared by a suitably experienced and				
	qualified person(s). and submitted to the Secretary for approval.				
	The Plan must detail the design, illumination, construction, timing and responsibility for the delivery and				
	maintenance of individual building and common directory signage and take into account the following considerations:				
	(i) provision of wayfinding signage for internal streets to individual buildings and loading docks;				
	(ii) individual building signage integration within building forms <del>no higher than 3m above the finished</del>				
	ground;				
	(iii) no general advertising;				
	(iv) no form of moving or flashing signs;				
	(v) no east or south facing illuminated building signage is to be visible from residences;				
	(vi) details of the location and specifications of the common directory board;				
	(vii) signs are to display corporate logos and company names and must not to occupy more than 10% of any				
	façade or wall of building; and				
	(viii) internally illuminated signs that are visible from residences are not permitted.				
	The approved common directory board and wayfinding signs plan must be implemented prior to occupation				
	of the warehouse and freight village.

	Ecologically Sustainable Development				

B142	Warehouses and the freight village must be designed and operated to meet ESD principles including: (a) passive solar design; (b) use of energy efficient plant and equipment; (c) use of renewable energy sources; (d) cross-ventilation (e) selection of materials with lower energy manufacturing requirements; (f) use of locally sourced materials to reduce impacts associate with transport; (g) rainwater capture and reuse; (h) water efficient fixtures and fittings; and (i) waste minimisation and recycling.		Monitor implementation of the sub-plan during regular weekly inspections, forthightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a forthightly basis to review construction progress.	Copy of approved design plans.  Copy of sustainability audit reports.	
	Bushfire Management				
B143	Before the commencement of construction, the Applicant must ensure that a Bushfire Emergency and Evacuation Plan is prepared. The Plan must form part of the CEMP and OEMP required by conditions C1 and C3 and must:  (a) be prepared by a suitably qualified and experienced person(s);  (b) be consistent with the Development Planning – A Guide to Developing a Bush Fire Emergency Management and Evacuation Plan, December 2014 and Australian Standard AS3745 2010 Planning for Emergencies in Facilities; and  (c) a copy of the plan must be submitted to the Secretary, NSW Rural Fire Service, Council and the Certifying Authority prior to occupation.	Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.		
B144	The entire site must be managed as an inner protection area (IPA) as outlined within section 4.1.3 and Appendix 5 of the Planning for Bush Fire Protection 2006 and the NSW Rural Fire Service's document Standards for asset protection zones. An updated Bushfire Management Plan must be prepared by a suitably qualified person(s) having regard to the amended final plans and demonstrating that the bushfire asset protection zones can be contained wholly within the site boundary and that management of the inner protection zone will not impact on the Boot Land. The Bushfire Management Plan will be submitted to the Secretary prior to construction of permanent access or buildings, unless otherwise agreed by the Secretary.	Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Bushfire Management Plan.	
B145	Public road access must comply with section 4.1.3(1) of Planning for Bush Fire Protection 2006 except for the requirement for through-access.		Monitor implementation of the sub-plan during regular weekly inspections, forhightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	For reference.	
B146	The provision of water, electricity and gas must comply with section 4.1.3 of Planning for Bush Fire Protection 2006.  Ancillary Facilities		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of approved design plans .

The ER, contractors, environmental managers and project managers	undertaken should an ancillary facility be required.	

B150	Boundary screening must be erected around all ancillary facilities that are adjacent to sensitive receivers for the duration of construction unless otherwise agreed with relevant Council(s), and affected residents, business operators or landowners.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of the approved CEMP that outlines the procedure to be undertaken should an ancillary facility be required.  Copy of the approved Ancillary Facilities Management Plan.	
B151	Boundary screening required under condition B150 must minimise visual, noise and air quality impacts on adjacent sensitive receivers.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of the approved CEMP that outlines the procedure to be undertaken should an ancillary facility be required.	
	Food Preparation Areas				
B152	All food premises must be designed, constructed and operated to meet legislative requirements and Australian Standards including:  (a) the Australian New Zealand Food Standards Code including Food Safety Standard 3.2.2 Food Premises and Equipment;  (b) AS 4674-2004: Design, construction and fit out of food premises;  (c) AS 4322-1995: Quality and performance of commercial electrical appliances – Hot food storage and display equipment;  (d) AS ISO 22000-2005: Food safety management systems-Requirements for any organisation in the food chain.  The Applicant must obtain a certificate from a suitable qualified tradesperson, certifying that kitchen, food storage and food preparation areas have been fitted in accordance with Australian Standard AS4674. The Applicant must provide evidence of receipt of the certificate to the satisfaction of the Certifying Authority prior to occupation.		Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	Copies of detailed design for warehousing and freight village.  Copy of the approved Ancillary Facilities Management Plan.  Copies of detailed design for warehousing, Copy of BCA certificate.	
	Community Consultative Committee				
B154	Before early works and fill importation a Community Consultative Committee (CCC) must be established for the Moorebank Intermodal Precinct (MPE and MPW) in accordance with the Department's Community Consultative Committee Guidelines: State Significant Projects (2016). The CCC must function for the duration of construction and for at least 5 years following commencement of operation.  Notes:  * The CCC is an advisory committee only.  * In accordance with the guidelines, the Committee should comprise an independent chair and appropriate representation from the Applicant, Council and the local community.	Pre- Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	Copy of acknowledgement of CCC by DPIE.	
	Community Communication Strategy

A12	A non-compliance which has been notified as an incident does not need to also be notified as a non-compliance.	At all times.	*See A10	
Advisory N				
AN1	All licences, permits, approvals and consents as required by law must be obtained and maintained as required for the development. No condition of this consent removes any obligation to obtain, renew or comply with such licences, permits, approvals and consents.	At all times.	Updated legal requirements register applicable to the site and phase of works (i.e. construction/operation).	

Approval	Condition	Timing	Evidence and comments	Compliance Status
\·-/	Requirement			Compliant
	ific Environmental Conditions			Non-Compliant
	Requirements of Environmental Planning and Assessment Act 1979- Application for a Part 4A Certificate			Not Triggered
B1	In undertaking the subdivision approved under this consent, the Applicant must comply with the requirements of Part 4A of the Environmental Planning and Assessment Act 1979 in relation to the issue of a Subdivision Certificate.  For the purposes of this approval, the issue of a Subdivision Certificate is restricted to the subdivision defined by Condition A2.	At all times.	Copy of the Subdivision Certificate.	
	Subdivision Certificate			
B2	Before granting any Subdivision Certificate, the Certifying Authority must be satisfied that the Applicant has complied with all conditions of this consent that are required to be complied with and the relevant estate works (including but not limited to site services, internal roads, pedestrian paths, landscaping, lighting of common areas, emergency services including bushfire mitigation, OSD and Water Sensitive Urban Design elements) have been completed.	Prior to issue of Subdivision Certificate.	Copy of Subdivision Certificate.  Copy of Statement of Compliance.  Copy of submission of Statement of Compliance to Certifying Authority.  Evidence of lodgement and registration of the plan of subdivision with NSW Land and Property Information.	
	Statement of Compliance- Completion in Accordance with a Project Approval/ Development Consent			
В3	Prior to the issue of a Subdivision Certificate, a Statement of Compliance shall be provided to the Certifying Authority demonstrating that the proposed subdivision is consistent with relevant conditions of any relevant planning approval/development consent (to the extent that they are relevant and required for that stage), including but not limited to MPE Stage 1 development consent, MPE Stage 2 development consent, the conditions of this consent, and MPE Concept Plan approval.	Prior to issue of Subdivision Certificate.	Copy of Statement of Compliance.  Copy of submission of Statement of Compliance to Certifying Authority.	
	Easements			
B4	The Applicant must create and display on the subdivision plan those particular easements as required, inclusive of the requirements of conditions B5-B9 of this consent. The easements must include those easements described for the whole of the MPE site in the 'Form of easement Instrument for subdivided lots of Lot 1 DP1048263' included in Appendix B of the Subdivision Ancillary Report – Moorebank Precinct East Stage 2 (SSD 7628) (Aspect Environmental, August 2018) and updated in Plan of Proposed Final Subdivision (Tactic Group, 12 February 2019).	At all times.	Copy of subdivision plan.	
B5	The drainage easements must be consistent with the final drainage details approved by the Planning Secretary in relation to conditions A22, A23 and A24 of the MPE Stage 2 development consent.	At all times.	Copy of subdivision plan.	
В6	The access easements must be consistent with the final access details approved by the Planning Secretary in relation to condition A22 of the MPE Stage 2 development consent.	At all times.	Copy of subdivision plan.	
В7	Survey of drainage works (including OSD, channels and pipes and pits) and access works confirming the location of the works required in relation to the final approved versions of the amended development layout plans and design plans, amended WSUD plans and amended architectural plans required conditions A22, A23 and A24 of the MPE Stage 2 development consent shall be undertaken prior to the registration of the plan of subdivision.	At all times.	Copy of survey of drainage works.	
В8	Prior to the issue of a Subdivision Certificate, the Applicant must provide to the Certifying Authority and the Planning Secretary evidence from an independent subdivision engineer that the drainage and access easements are consistent with the final approved versions of the amended development layout plans and design plans, amended WSUD plans and amended architectural plans required conditions A22, A23 and A24 of the MPE Stage 2 development consent.	Prior to issue of Subdivision Certificate.	Copy of evidence from an independent subdivision engineer.	
В9	A section 88B instrument shall be placed on each lot requiring that the development of the lot shall be in accordance with the MPE Stage 1 development consent, MPE Stage 2 development consent and the conditions of this consent.	At all times.	Copy of each Section 88B instrument required.	
B10	As part of the Subdivision certification process and prior to lodgement of the Subdivision Plan at the NSW Land Registry Services (LRS), the Applicant must prepare a section 88B instrument as a component of the Subdivision Plan for the creation of all relevant easements, restrictions and covenants. The Subdivision plan shall provide to the Certifying Authority and the Planning Secretary evidence that all easements required by this approval, and other licences, approvals and consents, have been lodged for registration or registered at the NSW Land Registry Services.	Prior to lodgement of Subdivision Plan.	Copy of Section 88B instrument. Copy of Subdivision Plan. Copy of required evidence of lodgement or registration.	
	Utilities and Services

Approval	Condition	Timing	Monitoring methodology	Evidence and comments	Compliance Status
Complian	Le Requirement				Compliant
					Non-Compliant
0A	Pre-construction works would be undertaken subject to Environmental Work Method Statement (EWMS) (Appendix I of this RtS). Pre-construction works include the following:  * works within Works period A (pre-construction activities), including: — establishment of site access points — importation of fill for site preparation activities — installation of site fencing — remediation and UXO, EO or EOW management where required.  * survey: acquisitions; or building/ road dilapidation surveys; fencing; investigative drilling, excavation or salvage • clearing any native vegetation within the Amended construction area , with the exception of the southern and eastern swales located outside of the SIMTA site • satablishment of site compounds and construction facilities * installation of environmental mitigation measures * utilities adjustment and relocation that do not present a significant risk to the environment, as determined by the Environmental Representative * other activities determined by the Environmental Representative to have minimal environmental impact * all works as described in Works period A in Section 4 of the EIS and Appendix I of this RtS.	Pre-construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CEMP.	Not Triggered
0B	The Construction Environmental Management Plan (CEMP), or equivalent, for the Amended Proposal would be based on the PCEMP (Appendix G of the EIS), and include the following preliminary management plans:  Preliminary Construction Traffic Management Plan (PCTMP) (Appendix K of the EIS)  Air Quality Management Plan (AQMP) (Appendix M of the EIS)  Forsion and Sediment Control Plans (ESCPs) and Bulk Earthworks Plans (Appendix P of the EIS). As a minimum, the CEMP would include the following sub-plans:  Construction Noise and Vibration Management Plan (CTMP)  Construction Noise Guideline  Construction Air Quality Management Plan  Flora and Fauna Management Plan  Flora and Fauna Management Plan  A Soil and Water Management Plan (SWMP) and Erosion and Sediment Control Plan  Contamination Management Plan  Flood Emergency Response and Evacuation Plan  Hord Cempency Response and Evacuation Plan  Hord Agoli And EOW Management Plan  Haritage (Indigenous and Non-Indigenous) Management Plan/s  Bushfire Management Strategy  Community Information and Awareness Strategy.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, forthightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a forthightly basis to review construction progress.	An approved CEMP. An approved CTAMP. An approved SWMP. An approved FERP. An approved CAOMP. An approved CNVMP. An approved CHMP. An approved CFFMP. An approved CDWMP. An approved CDWMP. An approved CDWMP. An approved CMP. An approved BEEP.	
0C	The Operational Environmental Management Plan (OEMP), or equivalent, for the Amended Proposal would be based on the following preliminary management plans:  Preliminary Operational Traffic Management Plan (POTMP) (Appendix K of the EIS)  Air Quality Management Plan (Appendix M of the EIS)  Stormwater Drainage Design Drawings (Appendix P of the EIS)  As a minimum the OEMP would include the following sub-plans:  Operational Traffic Management Plan (OTMP)  Operational Noise and Vibration Management plan (ONVMP)  Air Quality Management Plan  Flora and Fauna Management Plan  Flora and Fauna Management Plan  Flooding and Emergency Response Plan  Emergency Response Plan in accordance with the requirements of Clause 153C of the POEO Act and the POEO (General) Regulation (CI. 98B)  Operational Hazard and Risk Management Plan  Bushfire Management Strategy  Community Information and Awareness Strategy.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved OEMP. An approved OAQMP. An approved ONVMP. An approved OFFMP. An approved SIOMP. An approved Preliminary Access Management Plan.

1G	Importation of fill to site during construction of the Amended Proposal is to not exceed a total of 22,000 m3 of material per day. This limit is to be further reduced by an amount equivalent to any fill being imported to the MPW Stage 2 Proposal (SSD 7709) on the same day such that the combined importation of fill to the Amended Proposal site and MPW site does not exceed 22,000 m3 on any given day.	Pre-construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CEMP.	
2A	A Construction Noise and Vibration Management Plan (CNVMP), or equivalent, would be prepared for the Amended Proposal in accordance with the Interim Construction Noise Guideline (DECC, 2009) (or equivalent), and will include the following: Identification of nearby residences and other sensitive land uses Description of approved hours of work Description and identification of construction activities, including work areas, equipment and duration Description of what work practices (generic and specific) will be applied to minimise noise and vibration Consider the selection of plant and processes with reduced noise emissions A complaints handling process Noise and vibration monitoring procedures Overview of community consultation required for identified high impact works Induction and training will be provided to relevant staff and sub- contractors outlining their responsibilities with regard to noise Procedure for approval of any works undertaken outside of the following hours: Standard hours of 07:00 am to 18:00 pm Monday to Friday, and 08:00 am to 13:00 pm Saturday, Out of hours (OOH) work periods: OOH Period 1 is 6:00 m – 7:00 pm weekdays; OOH Period 3 is 7:00 pm – 8:00 pm Saturday, and OOH Period 4 is 1:00 pm – 6:00 pm Saturday.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
2В	Any works undertaken outside of the hours prescribed in mitigation measure 2A would be undertaken in consultation with relevant authorities. Works outside these hours that may be permitted would include:  • Any works which would not result in audible noise emissions at any nearby sensitive receptors.  • The delivery of oversized plant and/or structures that police or other authorities determine require special arrangements to transport along public roads  • Emergency work to avoid the loss of lives, property and/or to prevent environmental harm  • Maintenance and repair of public infrastructure where disruption to essential services and/or consideration of worker safety do not allow work within standard construction hours.  • Public infrastructure works that shorten the length of the project and are supported by noise-sensitive receivers.  • Construction works where it can be demonstrated and justified that these works are required to be undertaken outside of standard construction hours.  • Any other work as approved through the CNVMP.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
2D	in the event of any noise or vibration related complaint or adverse comment from the community, noise and ground vibration levels (as relevant) would be investigated. Remedial action would be implemented where feasible and reasonable. The procedures for managing complaints would be provided within the Community Information and Awareness Strategy.	Pre-construction, Construction and Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CNVMP.	
2E	An Operational Noise Management Plan (ONMP) would be prepared which includes a framework for regular monitoring of operational noise. Monitoring would begin at the commencement of the operation of the Amended Proposal and would be conducted on an annual basis for up to 2 years (after commencement of operations of the Amended Proposal).	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved ONVMP.	
3A	The Air Quality Management Plan (Ramboll, 2016), included within Appendix M of the ElS, would be further progressed and incorporated into the CEMP for the Amended Proposal. Specifically, the following key aspects would be addressed in the CEMP:  - Procedures for controlling/managing dust - Roles, responsibilities and reporting requirements - Contingency measures for dust control where standard measures are deemed ineffective	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CAQMP.	
3В	The Air Quality Management Plan (Ramboll, 2016), included within Appendix M of the EIS would be further progressed and integrated into the OEMP for the Amended Proposal. In accordance with the Air Quality Management Plan the following key aspects would be addressed in the OEMP:  Implementation and communication of anti-idling policy for trucks  Complaints line for the community to report on excessive idling and smoky vehicles  Procedures to reject excessively smoky trucks visiting the site based on visual inspection.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved OAQMP.	
3C	During construction and operation, real-time boundary monitoring would be used to measure site emissions and alert site personnel when dust triggers are breached. This monitoring would determine if the best practice measures are effective and/or if additional reactive controls are needed on any particular day.	Construction and Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved CAQMP. An approved OAQMP.	

4A	A Construction Flora and Fauna Management Plan (CFFMP) would be prepared as part of the CEMP for the Amended Proposal. Native vegetation clearing for southern and eastern swales located outside of the MPE site would not occur until the Flora and Fauna Management Plan is approved. This would include the following:  • Clear identification of vegetation exclusion zones  • Site induction procedure, including briefings regarding the local threatened flora and local fauna of the site and protocols to be undertaken if they are encountered  • A pre-start up check for sheltering native fauna of all infrastructure, plant and equipment and/or during relocation of stored construction materials  • Application of speed limits in areas adjacent to native vegetation	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
4B	The threatened plant populations identified within the Boot lands (to the south) would be protected by a minimum 10 metre buffer between the edge of the area of occupied habitat and the Amended construction area.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
4C	Potential bat roosting locations in buildings to be demolished would be checked, as far as is practicable, by a qualified ecologist or wildlife carer for presence of bats prior to demolition. Any bats found would be relocated	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.  Copy of pre-clearance surveys.	
4D	A two-stage approach would be undertaken to clearing:  Remove non-hollow bearing trees at least 48 hours before habitat trees are removed.  Hollow bearing trees are to be knocked with an excavator bucket or other machinery to encourage fauna to evacuate the tree immediately prior to felling.  Felled trees must be left for a short period of time on the ground to give any fauna trapped in the trees an opportunity to escape before further processing of the trees.  Felled hollow bearing trees must be inspected by an ecologist as soon as possible (not longer than 2 hours after felling).	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.  Copy of pre-clearance surveys.	
4E	Directional lighting will be used where lighting is required in construction areas to avoid impact on fauna.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
4F	if possible minimise stress to the animal and reduce the risk of further injury by:  - Handling fauna with care and as little as possible.  - Covering larger animals with a towel or blanket and placing in a large cardboard box.  - Placing small animals in a cotton bag, tied at the top.  - Keeping the animal in a quiet, warm, ventilated and dark location	Pre-construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CFFMP.	
4G	A Flora and Fauna Management Plan would be prepared as part of the OEMP for the Amended Proposal. This FFMP would focus on minimising impacts on biodiversity values on the adjacent Boot land.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved OFFMP.	

5A	A Soil and Water Management Plan (SWMP) and Erosion and Sediment Control Plan (ESCP), or equivalent, would be incorporated into the CEMP for the construction of the Amended Proposal. The SWMP and ESCPs would be developed in accordance with the principles and requirements of Managing Urban Stormwater – Soils & Construction Volume 1 ('Blue Book') (Landcom, 2004) and Volume 2 (DECC 2008). and consider the Prelliminary ESCPs (Appendix P of the EIS). The following aspects would be addressed within the SWMP and ESCPs:  - Construction traffic restricted to delineated access tracks, and maintained until construction complete - Appropriate sediment and erosion controls to be implemented prior to soil disturbance - Stormwater management to avoid flow over exposed soils which may result in erosion and impacts to water quality - Location of stockpiles outside of flow paths on appropriate impermeable surfaces as well as outside of riparian corridors - Inspection of all permanent and temporary erosion and sedimentation control works prior to and post rainfall events and prior to closure of the construction area - Wheel wash or rumble grid systems installed at exit points to minimise dirt on roads.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Construction Erosion and Sediment Control Plan (CERSEDP).  An approved Construction Soil and Water Management Plan (CSWMP).	
5B	To minimise potential flood impacts as a result of construction of the Amended Proposal, the following measures would be implemented and documented in the SVMMP:  *The existing site catchment and sub-catchment boundaries would be maintained as far as practicable  *To the extent practicable, site imperviousness and grades should be limited to the extent of existing imperviousness and grades under existing development conditions.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Soil and Water Management Plan (SWMP).	
5C	A Flood Emergency Response and Evacuation Plan, or equivalent, would be prepared and implemented for the construction phase of the Amended Proposal to allow work sites to be safely evacuated and secured in advance of flooding occurring at the Amended construction area.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved FERP.	
5D	Stormwater quality improvement devices management measures would be designed and installed on site as presented in the Stormwater and Flooding Environmental Assessment (Appendix P of the EIS), including:  - Gross pollutant traps (GPTs) at Section 6.2.1  - Rain gardens in the base of the OSD channels, as shown in Figure 6-1 of Appendix P of the EIS. Stormwater quality improvement devices would be designed to meet the performance targets identified in Georges River Estuary CZMP	Detailed Design and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved SWMP.	
5E	A water quality monitoring program for the operational phase of the Amended Proposal would be prepared as part of the OEMP for the Amended Proposal and would detail:  - The frequency and duration of sampling - Background water quality conditions - Sampling methodology - Reporting requirements Water quality monitoring would be undertaken for both Anzac Creek and the Georges River and would include the following parameters: - Total suspended solids - Total phosphorous - Total intogen - Oils and grease.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Stormwater infrastructure Operation and Maintenance Management Plan (SIOMP).	

5F	A Flood Emergency Response Plan (FERP) would be developed for the operational phase of the Amended Proposal. The FERP would take into consideration, site flooding and broader flood emergency response plans for the Georges River and Anzac Creek floodplains and Moorebank area. The FERP would also include the identification of an area of safe refuge within the Amended Proposal site that would allow people to wait until hazardous flows have receded and safe evacuation is possible.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved ERP which includes the BEEP, BMP and FERP.
6A	Excavated material would be reused on site where possible. Any excavated material that requires disposal would be subject to waste classification under the Waste Classification Guidelines 2014 (NSW EPA, 2014) and would be disposed of at an appropriately licensed facility.		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CWMP.
6B	Stockpile sites established during construction are to be managed in accordance with stockpile management principles set out in Appendix G of this RtS.	Pre-construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved SWMP. An approved Construction Spoil Management Plan.
6C	A Contamination Management Plan (CMP) (or equivalent) would be prepared and included within the CEMP for the Amended Proposal. The CMP would be prepared in consideration of the outcomes of the Environmental Management Plan (GHD, 2016) and Site Audit Statement and Site Audit Report (JBS&G, 2016) and would contain procedures on the following:  + Handling, stockpiling and assessing potentially contaminated materials encountered during the development works.  • A management tracking system for excavated potentially contaminated materials to ensure the proper management material movements at the Amended construction area, particularly during excavation  • Assessment, classification and disposal of waste in accordance with relevant legislation  • A contingency plan for unexpected contaminated materials (unexpected finds protocol), such as materials that are odorous, stained or containing anthropogenic materials, that may be encountered during construction	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Contaminated Management Plan (CMP).
6D	A site-wide UXO, EO, and EOW Management Plan (or equivalent) would be developed for the Amended construction area. This plan would be included within the CEMP and address the unexpected discovery of UXO, EO or EOW during construction	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CMP.
6E	An Emergency Response Plan would be prepared and implemented. The plan would meet the requirements of Clause 153C of the POEO Act and the POEO (General) Regulation (Cl. 98B) and specify the procedure to be followed in the event of a spill, including the notification requirements and use of absorbent material to contain the spill. A spill kit would be provided on the Amended operational area at all times.	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved ERP which includes the BEEP, BMP and FERP.
6F	In order to accept fill material onto site, the following will be undertaken:  • Material characterisation reports/certification showing that the material being supplied is VENM/ENM must be provided.  • Each truck entry will be visually checked and documented to confirm that only approved materials that are consistent with the environmental approvals are allowed to enter the site. Only fully tarped loads are to be accepted by the gatekeeper. Environmental assurance of imported fill material will be conducted to confirm that the materials comply with the NSW EPA Waste Classification Guidelines and the Earthworks Specification for the MPW site. The frequency of assurance testing will be as nominated by the Environmental assuror/auditor.	Pre-construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Construction Spoil Management Plan.
6G	The CEMP would include an Earthworks Specification, which would include details on earthworks material criteria, handling and placement requirements, embankment and cutting formation (including foundation, batter and ben	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CEMP.
7A	Hazards associated with operation of the Amended Proposal would be identified through a Hazard and Operability Study (HAZOP), which would be undertaken as part of the detailed design.	Operation	N/A	An approved HAZOP.

7B	The following measures would be included in the CEMP (or equivalent) to minimise hazards and risks:  - Construction works, including the storage, handling and use of hazardous construction materials would be undertaken in accordance with the provisions of the Work Health and Safety Act 2011 and Work Health and Safety Regulation 2011.  - All demolition activities would be undertaken in accordance with Australian Standard AS2601-1991 —  Demolition of Structures  - Safe operational access and egress for emergency service personnel and workers will be provided at all times, and specified in the CEMP.  - Regular maintenance and inspection of all environmental and safety protection controls would be undertaken.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CEMP.
70	An Asbestos Management Plan would be prepared for the Amended Proposal in accordance with the Code of Practice: How to Manage and Control of Asbestos in the Workplace (WorkCover NSW, 2011). The plan would include, but not be limited to:  I Identification of potential (suspected or confirmed) asbestos areas  an outline of how asbestos risks would be controlled  the identification of each person with responsibilities and details of their responsibilities under this plan.  Reference the asbestos register and risk assessment, which would also be prepared prior to construction being undertaken	Construction	Asbestos management is monitored in accordance with the CMP.  Unexpected Asbestos Finds are recorded and reported in quarterly compliance reporting.	An approved Asbestos Management Plan.
7D	All asbestos removal works, including the demolition of the eight structures identified as containing asbestos (refer to Figure 14-1 of the EIS) will be undertaken in accordance with the Environmental Management Plan (GHD, 2016) and the following:  • The Code of Practice for the Safe Removal of Asbestos (NOHSC, 2005)  • Code of Practice: How to Safely Remove Asbestos (WorkCover NSW, 2011)  Asbestos removal would be carried out by an appropriately licensed asbestos removalist. The licensing requirements for asbestos removal are specified in the Code of Practice How to Safely Remove Asbestos (WorkCover NSW, 2011)	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Asbestos Management Plan.
7E	Dangerous goods entering or leaving the Stage 2 site must be notified in advance in accordance with the International Maritime Organisation (IMO) and regulations pertaining to the International Convention for the Safety of Life at Sea (SOLAS).	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved OTAMP.
7F	Handling of dangerous goods including unpacking from containers and storage within warehouses on the Amended operational area would be undertaken in accordance with the Storage and Handling of Dangerous Goods Code of Practice (WorkCover NSW, 2005).	Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Warehouse Occupation Environmental Management Plan (WOEMP).
7 <b>G</b>	Staff involved in the transport and handling of dangerous goods within the Amended Proposal site would receive training regarding the contents of the dangerous goods provisions and their roles and responsibilities. All training would be recorded and maintained in accordance with the appropriate competent authority (SafeWork NSW).	•	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved OTAMP.
7H	Design, installation and maintenance of gas reticulation infrastructure would be undertaken in accordance with Australian Standard AS 2944-1 (2007): Plastic pipes and fittings for gas reticulation – Polyamide pipes and Australian Standard AS 2944-2 (2007): plastic pipes and fittings for gas reticulation – Polyamide fittings	Operation	N/A	A copy of the BCA compliance certificate.
71	Storage of flammable/combustible liquids within the Amended operational area would be carried out in accordance with Australian Standard AS 1940: The Storage and Handling of Flammable and Combustible Liquids. Secondary containment measures would be implemented in a location away from waterways and drainage paths/infrastructure.	Detailed Design and Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved ERP which includes the BEEP, BMP and FERP.
7J	An Operational Hazard and Risk Management Plan would be developed for the Amended operational area and be implemented as part of the OEMP for the Amended Proposal. This plan would be reviewed regularly and updated should goods entering the site change. As a minimum, the plan would adopt the requirements of the Code of Practice for Storage and Handling of Dangerous Goods (WorkCover NSW, 2005).		N/A	An approved Operational Hazard and Risk Management Plan.
7K	Appropriate testing, alarm systems and work, health and safety (WHS) precautions would be implemented for the safety of personnel and infrastructure	Detailed Design and Operation	Will be monitored by warehouse occupants.	Copies of WHS and alarm testing records.

-					
7L	No hazardous or regulated wastes would be disposed of on site.	Pre-construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.	An approved Construction and Demolition Waste Management Plan.	
			The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.		
8A	The following mitigation measures would be implemented, where reasonable and feasible, to minimise the visual impacts of the Amended Proposal:  - Existing vegetation around the perimeter of construction sites would be retained  - The early implementation of landscape planting would be considered in order to provide visual screening during the construction of the Amended Proposal  - Elements within construction sites would be located to minimise visual impacts, e.g. setting back large equipment from site boundaries  - Construction lighting, on both ancillary facilities and plant and equipment, would be designed and located to minimise the effects of light spill on surrounding sensitive receivers, including residential areas and the proposed conservation area  - Design of site hoardings would consider the use of artwork or project information  - Regular maintenance would be undertaken of site hoardings and perimeter areas including the prompt removal of graffiti  - Re-vegetation/landscaping would be undertaken progressively  - Where required for construction works, cut-off and directed lighting would be used and lighting location considered to ensure glare and light spill are minimised.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CEMP.	
8B	The following mitigation measures would be implemented, where reasonable and feasible, for the landscaping of the Amended Proposal:  - Use of native shrubs and ground covers to form a screening barrier when mature.	Construction and Operation	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.	An approved UDLP.	
	A landscaping corridor of screening vegetation to provide informal street character along Moorebank Avenue.     Use of local species as understory planting to support and enhance local habitat values     Use of seeds collected within the local area for planting to reinforce the genetic integrity of the region, where     possible		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.		
8C	Light for the Amended Proposal would be designed to minimise any direct light spill and would comply with the requirements of Australian Standard AS4282-1997- Control of the Obtrusive Effects of Outdoor Lighting.	Detailed Design and Operation	Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved Lighting Sub-Plan of the UDLP.	
9A	An exclusion zone would be provided around previously identified MPE Isolated Artefacts 2, 3 and 4 (refer to Figure 16-2) to avoid potential disturbance of these artefacts during construction of the Amended Proposal.	Pre-construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Construction Heritage Management Plan (CHMP).	
9B	Management of Aboriginal heritage would be included in the CEMP for the Amended Proposal. Information within the CEMP would include:  - A summary of the findings of the Aboriginal Heritage Impact Assessment Report (provided at Appendix S of the EIS)  - Guidance on unexpected archaeological and cultural finds (including human remains).	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.	

9C	All relevant personnel and contractors involved in the design and construction of the Amended Proposal would be advised of the relevant heritage considerations, legislative requirements and recommendations in the Aboriginal Heritage Impact Assessment Report (provided at Appendix S of the EIS)	Detailed Design, Pre- construction and Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.	
10A	A Heritage Management Plan in adherence to NSW Heritage Council guidelines would prepared as part of the CEMP for the Amended Proposal.	Construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.	
10B	Archaeological monitoring and recording would be conducted at PADs V and W, which have the potential to contain archaeological remains of local significance. Monitoring and recording would be undertaken by a suitably qualified archaeologist, who would assess the likely significance of any archaeological deposits encountered, and provide advice regarding appropriate further action. If highly significant remains were identified during monitoring, it would be appropriate to conduct further monitoring for additional sites of former structures or test excavations.		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.  Copy of an Archaeological Method Statement (AMS).	
10C	A Heritage Interpretation Strategy should be prepared prior to the commencement of construction, outlining appropriate interpretive measure for the Amended construction area in the context of the MPE site as a whole.	construction	Monitor implementation of the sub-plan during regular weekly inspections, forhightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.	
10D	If unexpected finds are located during works an archaeological consultant would be engaged to assess the significance of the finds and the NSW Heritage Council notified	Pre-construction and construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.	
11A	Energy efficiency design aspects would be investigated, where practicable as part of the detailed design process in order to reduce energy and fuel consumption		N/A	Copy of the MLP Sustainability Strategy.	
11B	Project planning would be undertaken to ensure that the site vehicle movements and construction activities are efficient, to avoid double handling of materials and unnecessary fuel use where possible.	Pre-construction and construction	Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved CHMP.

Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed	
12B	Recycling will have priority over disposal  Earth excavated from the site will be used for fill material and landscaping where feasible  If possible concrete components will be crushed and reused onsite, with the remainder sent to a recycling facility  Waste generation will be minimised by ordering the correct quantity of materials  Selection of materials which maximise recycled content, while having low embodied water and energy use  Selection of materials which maximise durability and lifespan.  The following procedures and protocols will be considered within the CEMP regarding waste management:  Characterisation of construction waste streams  Management of any identified hazardous waste streams  Management of any identified hazardous waste streams  Procedures to manage construction waste streams, including handling, storage, classification, quantification, identification and tracking  Mitigation measures for avoidance and minimisation of waste materials  Procedures and targets for reuse and recycling of waste materials  Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for construction waste management  Measures to mitigate the effect of the operational waste streams would be incorporated into the Amended Proposal's OEMP, including the following information:  Addressing waste management requirements and goals in staff inductions  Provoding staff access to documentation outlining the facility's waste management requirements		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.  Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ)	
12B	Recycling will have priority over disposal  Earth excavated from the site will be used for fill material and landscaping where feasible  If possible concrete components will be crushed and reused onsite, with the remainder sent to a recycling facility  Waste generation will be minimised by ordering the correct quantity of materials  Selection of materials which maximise durability and lifespan.  The following procedures and protocols will be considered within the CEMP regarding waste management:  Characterisation of construction waste streams  Management of any identified hazardous waste streams  Procedures to manage construction waste streams, including handling, storage, classification, quantification, identification and tracking  Miligation measures for avoidance and minimisation of waste materials  Procedures and targets for reuse and recycling of waste materials.  Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for construction waste management  Measures to mitigate the effect of the operational waste streams would be incorporated into the Amended Proposal's OEMP, including the following information:  Addressing waste management requirements and goals in staff inductions  Providing staff access to documentation outlining the facility's waste management requirements  Appropriate areas shall be provided for the storage of waste and recyclable material including:		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.  Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ)	
128	Recycling will have priority over disposal  Earth excavated from the site will be used for fill material and landscaping where feasible  If possible concrete components will be crushed and reused onsite, with the remainder sent to a recycling facility  Waste generation will be minimised by ordering the correct quantity of materials  Selection of materials which maximise durability and lifespan.  The following procedures and protocols will be considered within the CEMP regarding waste management:  Characterisation of construction waste streams  Management of any identified hazardous waste streams  - Procedures to manage construction waste streams, including handling, storage, classification, quantification, identification and tracking  - Mitigation measures for avoidance and minimisation of waste materials  - Procedures and targets for reuse and recycling of waste materials.  - Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for construction waste management  Measures to mitigate the effect of the operational waste streams would be incorporated into the Amended Proposal's OEMP, including the following information:  - Addressing waste management requirements and goals in staff inductions  - Providing staff access to documentation outlining the facility's waste management requirements  - Appropriate areas shall be provided for the storage of waste and recyclable material including:  - Locating recycling bins in kitchen areas beside general waste bins to prevent contamination of recycling		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.  Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ)	
12B	Recycling will have priority over disposal  Earth excavated from the site will be used for fill material and landscaping where feasible  If possible concrete components will be crushed and reused onsite, with the remainder sent to a recycling facility  Waste generation will be minimised by ordering the correct quantity of materials  Selection of materials which maximise recycled content, while having low embodied water and energy use  Selection of materials which maximise durability and lifespan.  The following procedures and protocols will be considered within the CEMP regarding waste management:  Characterisation of construction waste streams  Management of any identified hazardous waste streams  Procedures to manage construction waste streams, including handling, storage, classification, quantification, identification and tracking  Mitigation measures for avoidance and minimisation of waste materials  Procedures and targets for reuse and recycling of waste materials.  Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for construction waste management trategies included in the Concept Plan Statement of Commitments for construction waste management  Measures to mitigate the effect of the operational waste streams would be incorporated into the Amended Proposal's OEMP, including the following information:  Addressing waste management requirements and goals in staff inductions  Providing staff access to documentation outlining the facility's waste management requirements  Appropriate areas shall be provided for the storage of waste and recyclable material including:  Locating recycling bins in kitchen areas beside general waste bins to prevent contamination of recycling  Positioning paper recycling bins close to printer / photocopyping equipment		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.  Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ)	
128	Recycling will have priority over disposal  Earth excavated from the site will be used for fill material and landscaping where feasible  If possible concrete components will be crushed and reused onsite, with the remainder sent to a recycling facility  Waste generation will be minimised by ordering the correct quantity of materials  Selection of materials which maximise durability and lifespan.  The following procedures and protocols will be considered within the CEMP regarding waste management:  Characterisation of construction waste streams  Management of any identified hazardous waste streams  Procedures to manage construction waste streams, including handling, storage, classification, quantification, identification and tracking  Miligation measures for avoidance and minimisation of waste materials  Procedures and targets for reuse and recycling of waste materials.  Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for construction waste management  Measures to mitigate the effect of the operational waste streams would be incorporated into the Amended Proposal's OEMP, including the following information:  Addressing waste management requirements and goals in staff inductions  Providing staff access to documentation outlining the facility's waste management requirements  Adpropriate areas shall be provided for the storage of waste and recyclable material including:  Locating recycling bins in kitchen areas beside general waste bins to prevent contamination of recycling  Positioning paper recycling bins close to printer / photocopying equipment  Establishing bays or containers for recyclable waste generated through de-stuffing		The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.  Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ)	
12B	Recycling will have priority over disposal  Earth excavated from the site will be used for fill material and landscaping where feasible  If possible concrete components will be crushed and reused onsite, with the remainder sent to a recycling facility  Waste generation will be minimised by ordering the correct quantity of materials  Selection of materials which maximise recycled content, while having low embodied water and energy use  Selection of materials which maximise durability and lifespan.  The following procedures and protocols will be considered within the CEMP regarding waste management:  Characterisation of construction waste streams  Management of any identified hazardous waste streams  Management of any identified hazardous waste streams  Procedures to manage construction waste streams, including handling, storage, classification, quantification, identification and tracking  Mitigation measures for avoidance and minimisation of waste materials. 	Waste management planning incorporating principles of the waste hierarchy All domestic waste shall be collected regularly and disposed of at licensed facilities By ensuring bins are placed in the correct location and access ways are clear waste collection vehicles will be able to service the development efficiently and effectively An education programme and on-going monitoring will to be implemented for training personnel to properly sort and transport waste into the right components and destinations Sewage waste will be discharged to Sydney Water sewerage infrastructure in accordance with Sydney Water requirements Trade waste will be discharged to the sewer through a trade waste agreement with Sydney Water Inclusion of the waste management strategies included in the Concept Plan Statement of Commitments for operational waste management.				
13A	A bushfire management strategy, or equivalent, will be prepared as part of the CEMP for the Amended Proposal. The strategy will include:  - Emergency response plans and procedures - Restrictions on activities (namely hot works) that cannot be undertaken on total fire ban days within areas of	Construction	Monitor implementation of the sub-plan during regular weekly inspections.	An approved BEEP. An approved Bushfire Management Plan.	
	In the standard of the standard strains, unless otherwise advised by the NSW Rural Fire Service.  All construction site offices and temporary buildings will be located outside buffer areas to ensure minimum setbacks of 10 m.  All construction site offices will be accessible via access roads suitable for firefighting appliances similar to NSW Rural Fire Service category 1 tankers.				
13B	A bushfire management strategy, or equivalent, would be prepared as part of the OEMP for the Amended Proposal. In particular, the strategy would ensure management of landscaped areas within the Stage 2 site would be undertaken to maintain minimum dry fuel loads.		Monitor implementation of the sub-plan during regular weekly inspections and ongoing compliance tracking and reporting managed by Qube's Site Safety, Health, Environment and Quality (SHEQ) Manager.	An approved ERP which includes the BEEP, BMP and FERP.	
14A	As relevant, further assessment of services demand, infrastructure requirements and augmentation works, in consultation with relevant infrastructure and service providers would be undertaken.	Detailed Design	N/A	Assessment reports.	
15A	A community information and awareness strategy would be included in the CEMP and would outline measures to maintain communication with the community and all relevant stakeholders throughout the construction process of the Amended Proposal.		Monitor implementation of the sub-plan during regular weekly inspections, fortnightly ER inspections and ongoing compliance tracking and reporting.  The ER, contractors, environmental managers and project managers meet on a fortnightly basis to review construction progress.	An approved Community Communication Strategy.	
15B	The Operational Environmental Management Plan (OEMP) would include measures to engage with stakeholders and to manage and respond to feedback received during the operation of the Amended Proposal.	'	Complaints and enquiries are managed by an independent third party.  Details of complaint/enquiry and responses will be recorded for the duration of the operations.	An approved OEMP.
