MOOREBANK PRECINCT EAST (SSD 6766)

Stage 1: Construction Compliance Report - #11

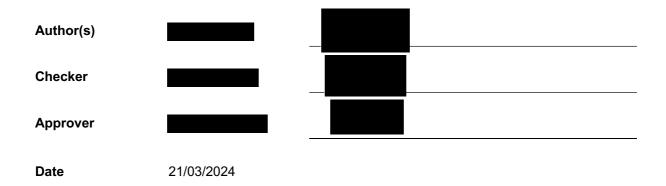

December 2022 - December 2023

Moorebank Precinct East (SSD 6766)

Stage 1: Construction Compliance Report – #11

December 2022 - December 2023

Limitations on use and reliance

Aspect Environmental Pty Ltd has prepared this report solely for the use of the Client and those parties with whom a warranty / end-user agreement or licence has been executed, or with whom an assignment has been agreed. Should any third party wish to use or rely upon the contents of the report, written approval must be sought from Aspect Environmental Pty Ltd; a charge may be levied against such approval.

Aspect Environmental Pty Ltd accepts no responsibility or liability for:

- a) the consequences of this document being used for any purpose or project other than for which it was commissioned, and
- b) the use of, or reliance on, this document by any third party with whom an agreement has not been formally executed.

The work undertaken to provide the basis of this report comprised a study of available documented information from a variety of sources (including the Client).

Should additional information become available which may affect the opinions expressed in this report, Aspect Environmental Pty Ltd reserves the right to review such information and, if warranted, to modify the opinions accordingly

1. Introduction

This twelve-month construction compliance report (CCR) has been prepared to meet the requirements of the Moorebank Precinct East (MPE) Stage 1 (SSD 6766) Development (The Development) consent, specifically condition of consent (CoC) C4. Approval was received for a Request for Minor Amendment (RfMA) to the Construction Environmental Management Plan (CEMP) and Compliance Tracking Program (CTP) on the 31 May 2022 to change the frequency of compliance reporting from six-monthly to annual. The reporting period for this CCR is December 2022 to December 2023.

Operational activities on MPE S1, which commenced in 2020 are outside the scope of this CCR.

1.1 Moorebank Intermodal Precinct Overview

The MPE Development and Moorebank Precinct West (MPW) Development are being developed into the Moorebank Intermodal Precinct (MIP). When completed, the MIP will move 1.55 million shipping containers annually by rail instead of road. It will also feature Australia's largest purpose-built warehouse and distribution precinct serviced by the latest automated technology which will see driverless shuttle carriers collect and transport containers around the precinct to be processed, unpacked and stored on site or distributed in smaller consignments.

1.2 MPE Stage 1 Development

The MPE Stage 1 (SSD 6766) Development generally involves the construction and operation of an intermodal terminal facility including truck processing and loading areas, rail loading and container storage areas, an administration facility and associated carparking, a rail link connecting the southern end of the site to the Southern Sydney Freight Line (SSFL), and associated works including rail sidings, vegetation clearing, remediation and levelling works, and drainage and utilities installation; and is being delivered under the following State approval:

State significant development consent (SSD 6766) granted by the (then) NSW Planning Assessment Commission on 12 December 2016 for the first stage of the MPE Development under Part 4, Division 4.1 (now Division 4.7 as of 1 March 2018) of the Environmental Planning and Assessment Act 1979.

The MPE Stage 1 Development Consent (SSD 6766) was amended by the NSW Land and Environment Court on the 13 March 2018.

1.3 Site Location

The MPE Stage 1 Development is located on Moorebank Avenue, in the Liverpool local government area in New South Wales, approximately 27km south-west of the Sydney central business district and approximately 4km south of Liverpool CBD.

The site is generally described as the land immediately to the east of Moorebank Avenue and to the north of the East Hills Passenger rail line. The site comprises the following lots:

- Lot 2 DP 1197707
- Lot 4 DP 1197707
- Lot 1 DP 825352
- Lot 2 DP 825348
- Lot 1 DP 1061150
- Lot 6 DP 833516
- Lot 7 DP 833516
- Lot 1 DP 712701
- Lot 1 DP 1197707
- Lot 91 DP 1155962
- Lot 5 DP833516

- Georges River
- Lot 103 DP 1143827
- Lot 104 DP 1143827
- Lot 52 DP 517310
- Lot 51 DP 515696
- Lot 4 DP 1130937
- Lot 101 DP 1143827
- Lot 102 DP 1143827
- Lot 1 DP 1130937
- Lot 4 DP 1186349
- Crown Road
- Public road reserve of Moorebank Avenue to the north of Anzac Road.

The location of MPE 1 construction activities during the reporting period is detailed in Figure 1-1 below.

Figure 1-1 Location of MPE 1 construction activities during the reporting period

1.4 Scope of Works

The MPE Development comprises an intermodal terminal facility, including an intermodal rail terminal (IMEX), rail link connection to Southern Sydney Freight Line,

warehouse and distribution facilities, freight village (ancillary site and operational services), stormwater, landscaping, servicing and associated works on the eastern site of Moorebank Avenue, Moorebank.

The MPE Stage 1 (SSD 6766) Development has two main components:

- 1. Rail access comprising:
 - A northbound connection and a southbound connection to the SSFL
 - A bridge over the Georges River
 - A culvert crossing over Anzac Creek
 - New Moorebank Avenue overbridge
 - Signalling systems
 - Security fencing.

2. IMEX terminal comprising:

- Truck processing, holding and loading areas entrance and exit from Moorebank Avenue
- Rail loading and container storage areas including installation of four rail sidings with adjacent container storage area serviced by manual handling equipment initially and overhead gantry cranes progressively
- Administration facility and associated car parking light vehicle access is from Moorebank Avenue.

1.5 Works Undertaken December 2022 – December 2023

The following construction activities have been undertaken during the compliance reporting period:

- Construction of the southern maintenance bay
- Construction of crane rails for the Automatic Stacking Crane and Cantilevered Automated Stacking Cranes on the western side of the terminal
- Installation of container plates, container beams, fencing, gates and maintenance bays.

1.6 Scope and Purpose

This compliance report, as required by CoC C4, has been prepared for the compliance reporting period of December 2022 to December 2023. The report outlines the compliance status of the MPE Stage 1 Development against the CoC (SSD 6766), as required by CoC C4 (c)(ii).

The information within this compliance report relates to the IMEX scope of works only. Rail access construction works were finalised in 2020 and are now operational.

Table 1-1 Requirements for compliance reporting

CoC	Condition	Reference	
C4	The Applicant shall prepare and implement a Compliance Tracking Program, to track compliance with the requirements of this approval. The Program shall be submitted to the Secretary for approval prior to the commencement of construction and operate for the duration construction.	The Compliance Tracking Program (CTP) was prepared by Aspect Environmental to satisfy this condition. The CTP (Rev E) was approved by the Department of Planning and Environment on 21 February 2017 prior to the commencement of early works. An RfMA was submitted to The Development ER on 26 May 2022, to reduce the frequency of construction compliance reporting and auditing from six monthly to annually. The RfMA was approved by the ER on 31 May 2022.	
C4	Provision for periodic reporting of compliance status to the Secretary, including but not limited to:	This annual compliance report has been prepared to satisfy this condition and identifies the compliance status of The Development for the period December 2022 to December 2023. The finalised report will be provided to the Secretary for information.	
(c)	(ii) six monthly, or other timing as agreed by the Secretary, Construction Compliance reports, for the duration of construction		

1.7 Compliance Report Structure

This compliance report has been prepared in accordance with the CTP. The Compliance Reporting – Post Approval Requirements (CRPAR) (Department of Planning and Environment 2018) have also been referenced in the preparation of this report. The structure of the compliance report is as follows:

- Section 1 Introduction: Provides a summary of the MPE Stage 1
 Development, scope of works and the works undertaken during the
 compliance reporting period.
- Section 2 Development Compliance: This includes details of progress against previous compliance report actions, including internal and external audit results, any environmental incidents and non-compliances and details of community complaints (if received) and response.
- Section 3 Compliance Summary: Provides a review of the compliance status of The Development.

Appendix A - SSD 7628 Compliance Tracking Table contains the compliance tracking table for SSD 6766 conditions of consent (CoC).

1.8 Methodology for Data Collection

This compliance report has been prepared in accordance with the requirements of the CTP.

This report integrates information collated from regular compliance activities, such as progress meetings, inspections, client surveillance, and monitoring undertaken in accordance with the relevant environmental management plans and sub-plans.

2. Development Compliance

2.1 Previous Actions and Independent Audits

No non-compliances were identified by the previous CCR (CCR #10: December 2021-December 2022).

An independent audit was conducted during the compliance reporting period on 7 December 2023. The audit report was finalised outside the reporting period and was submitted to Department of Planning, Housing and Infrastructure (DPHI) on the 22 January 2024. The audit did not identify any non-compliances. The next independent audit is scheduled to be completed in 2024.

2.2 Environmental Incidents

No reportable environmental incidents occurred during the compliance reporting period.

On the 30 November 2022 a vactruck discharged a mix of stabilised road-base and rainwater onto asphalt near the south-eastern boundary of the Site. DPHI requested on 1 December 2023 that the event be reported under CoC E10. An incident investigation report was submitted to DPHI on the 7 December 2023. DPHI advised on 15 February 2024 that the Department had completed their consideration of the matter and advised that no further action would be taken at this time.

2.3 Conditions of Consent

Compliance against the CoC is outlined in Appendix A - SSD 7628 Compliance Tracking Table. The status of each compliance requirement during the reporting period is recorded using the descriptors prescribed by the CRPAR (DPE, 2018). These are provided in Table 2-1.

Table 2-1 Compliance status descriptors (CRPAR 2018)

Status	Description			
Compliant	The proponent has collected sufficient verifiable evidence to demonstrate all elements of the requirement have been complied with.			
Non-compliant	The proponent has identified a non-compliance with one or more element of the requirement.			
Not triggered	A requirement has an activation or timing trigger that has not been met at the phase of The Development when the compliance assessment is undertaken, therefore an assessment of compliance is not relevant.			

2.4 Non-Compliance

No non-compliances with the CoC were identified during the reporting period.

2.5 Complaints Management

Eleven community complaints were received during the reporting period. Complaints and enquiries are managed in accordance with the Community Communication Strategy (Rev 11, 19 March 2021).

A number of recorded complaints do not distinguish between construction and operational areas of the MIP or potential external sources of complaint subject matter. They have been included here for transparency and to confirm site actions undertaken in response, noting there may be no specific action available in respect of MPE 1 construction activities.

The details of these complaints, enquires and the subsequent responses are recorded in the community complaints register, which is maintained across the entire Moorebank Logistics Park Precinct, including the MPE Stage 1 Development. The register does not differentiate between development consents or work stages. Due to this, some complaints may be duplicated within the compliance reporting documentation across the MLP.

Table 2-2 summarises the nature of the complaints, the reporting mechanism and the total number of complaints. All complaints were closed out in the reporting period.

Table 2-2 Complaints received during the reporting period

Date	Complaint Type	Summary	Response
24/12/2023	Traffic	A road user made a complaint regarding a visibility issue caused by an unidentified substance on the caller's vehicle	An investigation is underway.
		surface while driving in the MIP area on 18 December 2023.	Complaint is open.
22/09/2023 Traffic		A road user made a complaint about traffic congestion at the intersection of Moorebank Avenue and Anzac Road during peak morning and evening hours. According to the complainant the congestion is attributed to an auto-sensor system on Anzac Road that causes delay for road users	The project team advised that these traffic signals are controlled by Transport for New South Wales (TfNSW) and not by the MIP, therefore the concern is to be raised with TfNSW.
		travelling on Moorebank Avenue.	Complaint is closed.
04/09/2023	Noise	A complainant reported noise in the late-night hours near the Fire and Rescue Station on Anzac Road.	The project team investigated the complaint and found no works that could have caused any excessive night-time noises, as described by the complainant, had been undertaken within the MIP during night-time hours at the time of the complaint. However, operational teams were reminded to stay vigilant when operating at night.
			Complaint is closed.
21/08/2023	Noise	A resident in Wattle Grove complained about night works noise (metallic clunking noise) believed to be MIP works.	The project team investigated the complaint and determined that no night works were being undertaken within the MIP at the time of the complaint. Complaint not related to Moorebank Intermodal Terminal works.
			Complaint is closed.

SSD6766_MPES1_CCR11_Rev02.docx

Date	Complaint Type	Summary	Response
27/06/2023	Dust	A resident in Wattle Grove complained about dust emissions on Moorebank Avenue.	The project team investigated the complaint and found there were no exceedances of the criteria for dust emissions in the last three months. A letter response explaining specific methods for the management and monitoring of dust generation at the MIP was provided to the complainant.
			Complaint is closed.
30/05/2023	Noise	A resident in Wattle Grove complained about early morning noise believed to be due to MIP works.	The project team investigated the complaint and determined that no early morning works were being undertaken within the MIP at the time of complaint, therefore not related to MIP works.
			Complaint is closed.
10/05/2023	Traffic	The complainant reported traffic congestion along Moorebank Avenue resulting in increased commute time.	The project team investigated and found traffic signals controlled by TfNSW had malfunctioned on the morning in question. A response was provided to the complainant advising of the signal outage and how to report future signal faults. Information about the closure of Chatham Road intersection was also provided.
			Complaint is closed.
27/04/2023	Road Condition	The complainant reported damage to their vehicle while driving on Moorebank Avenue.	Further information required to investigate the complaint was not provided.
			Complaint is closed.
07/02/2023	Road Condition	The complainant reported damage to their vehicle while driving on Moorebank Avenue.	The project team liaised with the vehicle owner to resolve the complaint.
			Complaint is closed.

SSD6766_MPES1_CCR11_Rev02.docx

Date	Complaint Type	Summary	Response
02/02/2023	Noise	Resident raised concern about specific locations of attended noise monitoring undertaken in 2022.	The resident was provided with further clarification regarding the location of the noise monitoring as well as details of the noise monitoring requirements under the Development CoC.
			Complaint is closed.
19/01/2023	Dust	Road user complained about construction dust and mud on Moorebank Avenue.	Resident was advised of initiatives to reduce impacts for community and was advised of the previous community consultation related to the Development, including height of warehousing.
			Complaint is closed.

SSD6766_MPES1_CCR11_Rev02.docx

3. Compliance Summary

It is considered that works were generally completed in compliance with the CoC during the reporting period.

Periodic review of compliance against the CoC will continue to be undertaken.

4. Compliance Report Declaration

Development Name	Moorebank Intermodal Precinct – MPE Stage 1		
Development Application Number	SSD 6766		
Description of Development	Development of an intermodal facility, including warehouse and distribution facilities, freight village (ancillary site and operational services), stormwater, landscaping, servicing and associated works on the eastern side of Moorebank Avenue, Moorebank.		
Development Address	Moorebank Intermodal Precinct, Moorebank Avenue, Moorebank		
Proponent	LOGOS Property		
Title of Compliance Report	Twelve-month Construction Compliance Report		
Date	21/03/2024		

I declare that I have reviewed relevant evidence and prepared the contents of the attached Compliance Report and to the best of my knowledge:

- the Compliance Report has been prepared in accordance with all relevant conditions of consent;
- the Compliance Report has been prepared in accordance with the Compliance Reporting Post Approval Requirements;
- the findings of the Compliance Report are reported truthfully, accurately, and completely;
- due diligence and professional judgement have been exercised in preparing the Compliance Report;
- the Compliance Report is an accurate summary of the compliance status of The Development. Notes:
- Under section 10.6 of the Environmental Planning and Assessment Act 1979 a person must not include false or misleading information (or provide information for inclusion) in a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is false or misleading in a material respect. The proponent of an approved project must not fail to include information (or provide information for inclusion) in a report of monitoring data or an audit report produced to the Minister in connection with an audit if the person knows that the information is materially relevant to the monitoring or audit. The maximum penalty is, in the case of a corporation, \$1 million and for an individual, \$250,000; and
- The *Crimes Act* 1900 contains other offences relating to false and misleading information: section 307B (giving false or misleading information maximum penalty 2 years' imprisonment or 200 penalty units, or both).

	(n) brining and responsibilities for the implementation of the provisions of the Package Package The Approved Biodiversity Offset Package shall be published on the Project Website within 7 days of its approval. Where land offsets cannot solely achieve compensation for the loss of habitat, additional measures shall be provided to collectively deliver an improved or maintained biodiversity outcome for the region. Where monitoring referred to in (e) above indicates that biodiversity outcomes are not being achieved, remedial actions shall be undertaken to ensure that the objectives of the Biodiversity Offset Package are achieved to the satisfaction of the Secretary. Such remedial actions shall be documented under an addendum to the Biodiversity Offset Package and the addendum be submitted to the satisfaction of the Secretary, prior to the implementation of that addendum. If the applicant can demonstrate to the satisfaction of the Secretary that the proposed offset land for between the southern boundary of the terminal site and the eastern side of the approved Moorebank Avenue Bridge has been secured, the Applicant shall within 12 months of the commencement of construction develop and implement the Biodiversity Offset Package to the satisfaction of the Secretary in accordance with Items (a) (h) above. Note: Where the Applicant has opted to develop a consolidated Biodiversity Offset Package covering both the Moorebank Intermodal Terminal (SSD 5068) and SIMTA sites, this must be submitted to the Secretary within 12 months of submitting the initial Biodiversity Offset Package in accordance with this condition unless otherwise agreed by the Secretary.				
C23B	The Applicant shall: (a) remove the disused rail spur traversing the Southern Boot Land, and remediate and rehabilitate the land containing the disused rail spur traversing the Southern Boot Land, which is identified in blue dotted outline on Attachment A to these conditions titled 'Figure 1 – Wattle Grove Offset Area'; and (b) once remediation of the disused rail spur is complete, apply within 2 months of completion of the remediation to amend the biobanking agreement to incorporate the land shaded yellow on Attachment A to these conditions titled 'Figure 1 – Wattle Grove Offset Area'; and (c) apply within 2 months of the issue of the biobanking agreement to amend the biobanking agreement to incorporate the land shaded red on Attachment A to these conditions titled 'Figure 1 – Wattle Grove Offset Area'. Nothing in this condition requires the Applicant to amend the biobanking agreement application lodged with OEH in February 2017.	Prior to Construction	An approved Biodiversity Offset Package	Northern rail spur removal approved as ER (through IMEX approval on 19 May 2019) was undertaken in accordance with the revised IMEX CEMP and sub-plans. The IMEX CEMP and sub-plans have been updated to include the removal of the southern rail spur and were submitted to DPE on 7 July 2021 and approved on 3 August 2021. Removal of southern rail spur has not yet commenced.	
C24	Transport and Access Prior to the commencement of construction, the Applicant shall undertake a Road Safety Audit in consultation with TRNSW and the relevant Council for the proposed construction vehicle access points on public roads. The audit shall be undertaken by an independent TRNSW accredited road safety auditor in accordance with the relevant Austroads guidelines to identify any safety issues for the proposed construction vehicle access. The audit shall recommend corrective actions for any identified safety issues and propose appropriate traffic management measures (i.e. temporary traffic signals).	Prior to Construction	Copy of Road Safety Audit Copy of road safety auditors independent TfNSW accreditation	A road safety audit was undertaken on 11/5/17. Consultation was undertaken with LCC, CCC and TNSW. Combined comments were received from TNSW and RMS on 27 June 2017. A response was submitted to RMS and TNSW on 11 August 2017. Consultation is now considered closed.	
C25	The design of new traffic signals (including modification of existing traffic signals) along Moorebank Avenue shall be designed to meet RMS requirements, Austroads Guide to Road Design and relevant RMS supplements (available on www.rms.nsw.gov.au). Plans shall be prepared in consultation with RMS, be submitted to the satisfaction of the Certifying Authority and provided to the Secretary for information.	Prior to Construction	Copy of design plans Copy of consultation with RMS Copy of submission to Certifying Authority and Secretary. Copy of correspondence with Certifying Authority affirming satisfaction of design plans	Detailed design of the WAD for the Moorebank Avenue Upgrade Works was executed in June 2022. The Major Works Authorisation Deed for MAUW was executed on 25 May 2020.	
C26 NOTE THIS IS A DUPLICATE OF C25	The design of new traffic signals (including modification of existing traffic signals) along Moorebank Avenue shall be designed to meet RMS requirements, Austroads Guide to Road Design and relevant RIMS supplements (available on www.ms.nsw.gov.au). Plans shall be and prepared in consultation with RMS, be submitted to the satisfaction of the Certifying Authority and provided to the Secretary for information	Prior to Construction	Copy of design plans Copy of consultation with RMS Copy of submission to Certifying Authority and Secretary Copy of correspondence with Certifying Authority affirming satisfaction of design plans	See CoC C25 above.

Approva (ID)	l Condition	Timing	Monitoring Methodology	Evidence and Comments	Compliance Status
Complia	nce Requirement				Compliant
Part D- C	Community Information and Reporting				Non-Compliant
	Community Communication Strategy				Not Triggered
	Prior to the commencement of construction, or as otherwise agreed by the Secretary, the Applicant shall prepare and implement a Community Communication Strategy (CCS) to the satisfaction of the Secretary. The Strategy shall provide mechanisms to facilitate communication between the Applicant (and its contractor(s)), the Environmental Representative (see condition E4), the relevant Council and community stakeholders (particularly adjoining landowners) on the design and environmental management of construction. The Strategy shall include, but not be limited to: a)identification of stakeholders to be consulted as part of the Strategy, including affected and adjoining landowners, key community and business groups, and community and social service organisations; b)procedures and mechanisms for the regular distribution of accessible information to community stakeholders on construction progress and matters associated with environmental management, including provision of information in appropriate community languages; c)procedures and mechanisms through which the community stakeholders can discuss or provide feedback to the Applicant and/or Environmental Representative in relation to the environmental management and delivery of the SSD; and diprocedures and mechanisms through which the Applicant can respond to enquiries or feedback from the community stakeholders in relation to the environmental management and delivery of the SSD; and eligoprocedures and mechanisms that would be implemented to resolve issues/disputes that that yarise between parties on the matters relating to environmental management and the delivery of the SSD; including but not limited to disputes regarding redification or compensation for images to third party property and infrastructure. These procedures and mechanisms may include the use of a suitably qualified and experienced independent mediator.	Prior to Construction	Copy of approved Community Communication Strategy (CCS) Copy of the submission correspondence of the CCS to the Secretary Copy of correspondence from the Secretary identifying approval of the CCS	Community Communication Strategy, addressing the requirements of this condition was approved by DPE on 11/5/17, and was updated on 11/01/19. Current CCS (rev 11,19 March 2021) is being implemented.	
D2	Complaints and Enquiries Procedure Prior to the commencement of construction, or as otherwise agreed by the Secretary, the Applicant shall ensure that the following are available for community enquiries and complaints for the duration of construction: a)a 24 hour telephone number(s) on which complaints and enquiries about the SSD may be registered; b)a postal address to which electronic complaints and enquiries may be sent; c)an email address to which electronic complaints and enquiries may be transmitted; and d)a mediation system for complaints unable to be resolved. The telephone number, the postal address and the email address shall be published in newspaper(s) circulating in the local area prior to the commencement of construction and prior to the commencement of operation. This information shall also be provided on the website (or dedicated pages) required by this approval. Prior to the commencement of construction, or as otherwise agreed by the Secretary, the Applicant shall prepare	Prior and During Construction	Copy of published telephone number, postal address and email address in newspapers and on the website Copy of Construction Complaints Management System	Current information, as specified in this condition is available on the Project website: (https://moorebankintermodalprecinct.com.au/). A community update newsletter was distributed to 10,000 residents in July, September and November 2016 outlining the current status of the Moorebank Precinct. The newsletters include project contact details. The Community Consultation Strategy (rev 11, 19 March 2021) highlights the complaints and enquires procedures in Section 3.4.6.	
	Prior to the commencement of construction, or as otherwise agreed by the Secretary, the Applicant shall prepare and implement a Construction Complaints Management System consistent with AS ISO 10002-2006 Customer satisfaction — Guidelines for complaints handling in organisations (ISO 10002-2004, MOD) and maintain the System for the duration of construction and up to 12 months following completion of construction. Information on all complaints received, including the means by which they were addressed and whether resolution was reached, with or without mediation, shall be maintained in a complaints register and included in the construction compliance reports required by this approval. The information contained within the System shall be made available to the Secretary on request. Provision of Electronic Information	Construction	Copy of complaints register	Inte CCS (Section 7, rev 11,19 Marter 2021) dutinies the complaints nandling process and 'Consultation Manager database' has been adopted as the complaints management system for the recording of all communication including complaints from stakeholders for the duration of project construction works. All complaints and enquiries are managed in line with Section 8.16 of the Communications and Engagement Strategy and Section 7 of the CCS.	

Prior to commencement of construction, or as otherwise agreed by the Secretary, the Applicant shall establish and	Prior to	Copy of website/pages that includes information associated with the	The project has a dedicated webpage which is to publish relevant documentation:

Approval	Condition	Timing	Monitoring Methodology	Evidence and Comments	Compliance Status
(10)					
	e Requirement nstruction Environmental Management				Non-Compliant
	Approved Plans to Be on Site				Not Triggered
E1		During Construction	Access to approved and certified plans, specifications and documents	Required documentation is available through either the Project website or Aconnex. Staff and contractors are provided with Aconnex access.	ind mggs.eu
	Site Notice				
	A site notice(s) shall be prominently displayed at the boundaries of the site for the purposes of informing the public of project details including, but not limited to the details of the Contractor, Certifying Authority and Structural Engineer. The notice(s) is to satisfy all but not be limited to, the following requirements: a)Minimum dimensions of the notice are to measure 841mm x 594mm (A1) with any text on the notice to be a minimum of 30 point type size; b)The notice is to be durable and weatherproof and is to be displayed throughout the works period; c)The approved hours of work, the name of the site/project manager, the responsible managing company (if any), its address and 24 hour contact phone number for any inquiries, including construction/noise complaint are to be displayed on the site notice; and d)The notice(s) is to be mounted at eye level on the perimeter hoardings/fencing and is to state that unauthorised entry to the site is not permitted.	During Construction	Copy of site notice displayed at boundaries	A site notice is located at site entrance gate.	
	Contact Telephone Number				
	The Applicant shall ensure that the 24 hour contact telephone number is continually attended by a person with authority over the works for the duration of the development.	During Construction	Copy of the complaints register	A single project information line will be utilised for the project (including all subcontractors) - 1800 986 465. The information will be filtered down to contractor(s) as relevant. Requirement is detailed within CCS (rev11, 19/03/2021) Section 3.1.	
	Environmental Representative				
	Prior to the commencement of construction, or as otherwise agreed by the Secretary, the Applicant shall appoint a suitably qualified and experienced Environmental Representative(s) that is independent of the design and construction personnel, and that has been approved by the Secretary. The Applicant shall employ the Environmental Representative(s) the Environmental Representative(s) the duration of construction of this stage, or as otherwise agreed by the Secretary. The Environmental Representative(s) shall: a)be the principal point of advice in relation to the environmental performance of construction; b)monitor the implementation of environmental management plans and monitoring programs required under this approval and advise the Applicant upon the achievement of these plans/programs; c)have responsibility for considering, and advising the Applicant on, matters specified in the conditions of this approval, and other licences and approvals related to the environmental performance and impacts of construction; d)ensure that environmental auditing is undertaken in accordance with the Applicant's Environmental Management System(s); e) be given the authority to approve/reject minor amendments to the Construction Environment Management Plan. What constitutes a "minor" amendment shall be clearly explained in the Construction Environment Management Plan; f) be given the authority and independence to require reasonable steps be taken to avoid or minimise unintended or adverse environmental impacts; and g) be consulted in responding to the community concerning the environmental performance of construction where the resolution of points of conflict between the Applicant and the community is required.	Prior to Construction	Copy of Environmental Representative's qualifications Copy of ER approval from Secretary	The appointment of the nominated Environmental Representative was accepted by DPHI on 21/12/2016. An alternate ER was appointed on the 22 November 2021.	

E5	The Environmental Representative's actions and decisions on matters specified in condition E4. The reports shall be submitted within seven (7) days for the end of each quarter for the duration of construction, or as otherwise agreed by the Secretary. Notwithstanding, the Environmental Representative shall be given the independence to report to the Secretary at any time and/or at the request of the Secretary.	During Construction	Copy of quarterly reports Copy of dated submission of quarterly reports	Quarterly ER reports were submitted to DPHI via email. The following quarterly reports were undertaken during the reporting period January - March 2023 Quarterly Report (Q1), submitted 05/04/2023 April - June 2023 Quarterly Report (Q2), submitted on 14/07/2023 Approval for late submission was sought on 30/6/23 for an extension until 14/7/23 which was granted on 3/7/23 July - September 2023 Quarterly Report (Q3), submitted on 06/10/2023 October - December 2023 Quarterly Report (Q4), submitted on 29/12/2023.	
	Construction Soil and Water Management				
E6	Soil and water management measures consistent with Managing Urban Stormwater - Soils and Construction Vols 1 and 2, 4th Edition (Landcom, 2004) shall be employed during construction to minimise soil erosion and the discharge of sediment and other pollutants to land and/or waters.	During Construction	Copy of Soil & Water Management Plan Copies of inspections and audit reports	The Managing Urban Stormwater - Soils and Construction Vols 1 & 2, 4th Edition (Landcom, 2004) (Bluebook) has been integrated into the project Construction Soil & Water Management Plan (CSWMP) as a mitigation measure for managing site activities. In addition, progressive sediment & erosion control plans (PESCP) are developed to comply with the Bluebook and is the primary project tool to be implemented on site to minimise runnoff of sediment and other pollutants offsite. A Construction Soil and Water Management Plan (CSWMP) was submitted to DPHI on 07/07/2021. The CSWMP (Rev 14, 07 July 2021) outlines the management measures for erosion and sediment control in line with Managing Urban Stormwater - Soils and Construction Vols 1 and 2, 4th Edition (Landcom, 2004). CoC requirements are addressed in section 2.3 of the CSWMP.	
E7	Construction shall be undertaken to comply with section 120 of the Protection of the Environment Operations Act 1997, which prohibits the pollution of waters.	During Construction	Copies of inspections and audit reports	The construction of the rail link was undertaken in accordance with the Environmental Protection Licence (EPL) 21054. Rail link construction is complete and EPL 21054 has been surrendered. Further, a Soil and Water Management Plan (SWMP) was submitted to DPH. The SWMP outlines the management measures for erosion and sediment control in line with Managing Urban Stormwater - Soils and Construction Vols 1 and 2, 4th Edition (Landcom, 2004) including measures to minimise the potential for pollution of controlled waters. Construction works to have an implemented PESCP to comptly with this condition. Pre-construction works (salvage) have been undertaken in compliance with this condition. A Construction Soil and Water Management Plan (CSWMP) was submitted to DPHI on 07/07/2021. The CSWMP (Rev 14, 07 July 2021) outlines the management measures for erosion and sediment control in line with Managing Urban Stormwater - Soils and Construction Vols 1 and 2, 4th Edition (Landcom, 2004). Addressed in section 2.1 of the CSWMP. No environmental incidents were reported.	
E8	Bunding The Applicant shall store all chemicals, fuels and oils used on-site in appropriately bunded areas in accordance with the requirements of all relevant Australian Standards, and/or EPA's Storing and Handling Liquids: Environmental Protection – Participants Handbook.	During Construction	Copies of inspections and audit reports	The requirements for chemical storage are detailed in the project CSWMP (Rev 14, 07 July 2021) and are to be provided in accordance with this condition. All hazardous materials are to be appropriately stored within chemical containers and sheds, or on bunding with 110% of the capacity of the largest container. The requirements are detailed in section 5.3 of the CSWMP (Rev 14, 07 July 2021).	
E9	Riparian Corridor Works All activities taking place in, on or under waterfront land, as defined in the Water Management Act 2000 should	During	Copies of inspections and audit reports	Guidelines and measures are outlined within section 5.5 and 7.8 of the	
	be conducted generally in accordance with the NSW Office of Water's Guidelines for Controlled Activities.	Construction	оорьо от пороснота ана авин герона	Construction Soil and Water Management Plan. No construction work in, on or under waterfront land occurred during the reporting period.	
	Incident Reporting				

Secretary is adviserable for case or impact of any social set and the secretary is adviserable for case or impact of any social set and the secretary is adviserable for case or impact of any social set and the secretary is adviserable for the secretary is advisera	E10	The Applicant shall notify the Secretary and relevant public authorities of any incident with actual or potential significant on-site or off-site impacts on human health or the biophysical environment within 24 hours of becoming aware of the incident. The Applicant shall provide full written details of the incident to the Secretary within seven days of the date on which the incident occurred. Note: Where an incident also requires reporting to the EPA and/or OEH, the incident report prepared for the purposes of notifying the EPA and/or OEH would meet this requirement. The Applicant shall meet the requirements of the Secretary or relevant public authority (as determined by the	During Construction	Copy of any notifications to the Secretary and relevant public authorities Copy of Incident Register Copy of Incident Register	This requirement has been addressed in the CEMP and reproduced into the project's incident & Emergency Management Plan for implementation as required. No reportable environmental incidents occurring during the reporting period. Should an incident occur, it will be managed as outlined within the CEMP Sections 8 and 9 (rev 19, 2 December 2022). On the 30 November 2022 a vactruck discharged a mix of stabilised road-base and rainwater onto asphalt near the south-eastern boundary of the site. DPHI requested on 1 December 2023 that the event be reported under CoC E10. An incident investigation report was submitted to DPHI on the 7 December 2023. DPHI advised on 15 February 2024 that the Department had completed their consideration of the matter and advised that no further action would be taken at this No reportable incidents occurred during the reporting period.

Copies of inspections and audit reports Copies of incident and NCR reports	2021) for implementation during construction (AQ20-23 of Table 18). Enforcement will be monitored during site inspections.	
		Waste Management				

E16	The reuse and/or recycling of waste materials generated on site shall be maximised as far as practicable, to minimise the need for treatment or disposal of those materials off site. All liquid and for one liquid usets conserted on the site shall be essented and along if it is appendiced with	During Construction	Copy of an approved Waste Management Plan Records/Copies of Waste Classifications	A project Waste Management Plan (WMP, rev 8, 7 July 2021) has been developed to manage project construction waste. Condition requirements is addressed in section 4.5 Reuse and Recycling in the Construction Waste and Resource Management Plan (CWRMP). Reuse and recycling of construction waste will be undertaken as per the Project EPL.	
E17	All liquid and/or non-liquid waste generated on the site shall be assessed and classified in accordance with Waste Classification Guidelines (Department of Environment, Climate Change and Water 2009).	During Construction	Records/Lopies of waste classifications	A project Waste Management Plan (WMP, rev 8, 7 July 2021) has been developed to manage project construction waste and this condition has been addressed in this plan. All material is pre-classified under the Waste Classification Guidelines. Project maintains a waste register that tracks construction waste, recyclables (glass, paper, plastic etc.), total waste to landfill, total recycled.	
E18	All waste materials removed from the subject site shall only be directed to a waste management facility or premises lawfully permitted to accept the materials.	During Construction	Copy of an approved Waste Management Plan	A project Waste Management Plan (WMP, rev 8, 7 July 2021) has been developed to manage project construction waste and this condition has been addressed in this plan. All material is pre-classified under the Waste Classification Guidelines. Addressed in section 4.7.1 of the CWRMP.	
	Construction Hours				
E19	Construction shall be undertaken during the following standard construction hours: a)7:00am to 6:00pm Mondays to Fridays, inclusive; and b)8:00am to 1:00pm Saturdays; c)at no time on Sundays or public holidays.	During Construction	Copy of an approved CEMP Copy of induction documentation Work start and finish logs	The project Construction Noise & Vibration Management Plans (CNVMP) (rev 16, 7 July 2021) have been developed to manage this condition. Approved construction hours are being communicated to construction personnel via induction materials. CoC requirement is also addressed in section 2.3 of the CEMP.	
E20	Activities resulting in a high noise impact shall only be undertaken: a) between the hours of 8:00 am to 5:00 pm Monday to Friday; b) between the hours of 8:00 am to 1:00 pm Saturday; and c)in continuous blocks not exceeding three hours each with a minimum respite from those activities and works of not less than one hour between each block. For the purposes of this condition, 'continuous' includes any period during which there is less than a one hour respite between ceasing and recommencing any of the work the subject of this condition.	During Construction	An approved CEMP Copy of induction documentation Work start and finish logs	The project Construction Noise & Vibration Management Plan (CNVMP) (rev 16, 7 July 2021) has been developed to manage this condition. Approved construction hours are being communicated to construction personnel via induction materials. CoC requirement is also addressed in section 2.3 of the CEMP.	
E21	Notwithstanding conditions E19 and E20, works may be undertaken outside the hours specified under those conditions in the following circumstances: a)construction works that cause LAeq (15 minute) noise levels that are: (i)No more than 6 dB above rating background level at any residence in accordance with the Interim Construction Noise Guideline (DECC, 2009); and (ii)No more than the noise management levels specified in Table 3 of the Interim Construction Noise Guideline (DECC, 2009) at other sensitive land uses; or b)for the delivery of materials required by the police or other authorities for safety reasons; or c)where it is required in an emergency to avoid the loss of lives, property and/or to prevent environmental harm; or d)construction works approved through an Out-Of-Hours Work Protocol prepared as part of the Construction Noise and Vibration Management Plan required by condition E34(b), provided the relevant Council, local residents and other affected stakeholders and sensitive receivers are informed of the timing and duration at least 48 hours prior to the commencement of the works; or e)identified works approved by the Secretary.	During Construction	Copy of an approved CEMP Copy of induction documentation Work start and finish logs	An out of hours works protocol has been developed and included in the project CNVMP (rev 16, 7 July 2021) for the review and approval of any proposed activities carried outside of construction hours in accordance with this condition. Three OOHW were undertaken during the reporting period. The OOH included; - OOHW 064 - 29/11/2023 - 19/02/2024 (Container Beam installation) - OOHW 63- 18/09/2023 - 27/10/2023 (Container Plater installation) - OOHW 62- 22/09/2023 - 25/09/2023 (Installation of track turnout and signal civil works). The approvals were determined to be low impact works that were managed in accordance with the mitigation measures in the out of hours work protocol.	
	Construction Noise and Vibration				

E22	The Applicant shall implement all feasible and reasonable noise mitigation measures with the aim of achieving the following construction noise management levels and vibration criteria: a)construction noise management levels established using the Interim Construction Noise Guideline (DECC 2009); b)vibration criteria established using the Assessing Vibration: a Technical Guide (DECC 2006) (for human exposure); and (plte vibration limits set out in the German Standard DIN 4150-3: Structural Vibration- effects of vibration on structures (for structural damage). Any construction activities identified as exceeding the construction noise management levels and/or vibration criteria shall be managed in accordance with the Construction Noise and Vibration Management Plan required by condition E34(b). Note: The Interim Construction Noise Guideline identifies 'particularly annoying' activities that require the addition of 5dB(A) to the predicted level before comparing to the construction Noise Management Level.	During Construction	Copy of Construction Noise and Vibration Management Plan (CNVMP)	The project Construction Noise & Vibration Management Plans (CNVMP) (rev 16, 7 July 2021) have been developed to manage this condition. Requirement is addressed in section 2.3 of the CEMP and section 2.2 of the CNVMP.	
	Construction Traffic Noise				
E23	The Applicant is to ensure that construction vehicles operate so as to minimise any construction noise impacts from the construction site. Measures that could be used include tooltox talks, contracts that include provisions to deal with unsatisfactory noise performance for the vehicle and/or the operator, and specifying non-tonal movement alarms in place of reversing beepers or alternatives such as reversing cameras and proximity alarms, or a combination of these, where tonal alarms are not mandated by legislation.	During Construction	A copy of Construction Traffic and Access Management Plan (CTAMP) A copy of CNVMP Copies of Toolbox Talks Copies of Contracts Copies of inspections and audit reports	Mitigation measures to address this condition have been included in the CNVMP (rev 16, 7 July 2021) for implementation during construction activities. All site personnel have been advised of noise requirements during pre-start meetings and induction. Requirement is addressed in section 8.6 of the CNVMP.	
E24	No use of compression brakes shall be permitted for construction vehicles associated with construction in the vicinity of the subject site.	During Construction	Copies of contracts Copies of inspection and audit reports	Restriction on compression braking has been addressed in the CTAMP (rev 15, 7 July 2021) at Table 14, TR 15 and the driver's code of conduct. Truck drivers have been advised of noise requirements during pre-start meetings and induction, including the driver's code of conduct.	
	Review of Operational Sleep Disturbance Impacts				
E25	The Applicant shall prepare a review of sleep disturbance impacts based on detailed design, including: a)An assessment of how often noise events occur, the time of day they occur and whether there are any times of day when there is a clear change in the noise environment; b)Confirm the operational sleep disturbance predictions identified in the documents listed under Condition A1; and c)Consider appropriate noise mitigation measures where required. The report shall be prepared in consultation with the EPA and be submitted to the satisfaction of the Secretary within 6 months of commencement of construction, unless otherwise agreed by the Secretary.	During Construction	Copy of consultation with the EPA Copy of operational sleep disturbance report	Review of Operational Sleep Disturbance Impacts (Wilkinson Murray, rev H, dated May 2018) approved by DPHI on 13/7/18.	
E26	Transport and Access	Durin -	Comment Commen	Don't Comment Linear and a series of	
	A Road Occupancy Licence (ROL) must be obtained from the Transport Management Centre (TMC) for any activity likely to impact on the operational efficiency of the road network, allowing the use of specified public road space at approved times. The Applicant must allow a minimum of 10 working days for processing from date of receipt and include a Traffic Control Plan with any application.		Copy of Road Occupancy Licence Copy of dated receipt of Road Occupancy Licence Copy of CTAMP	Road Occupancy Licence not required.	
E27	Construction shall be carried out, where feasible and reasonable, to avoid the use of local roads (through residential streets) by heavy vehicles to gain access to the site and/or ancillary facilities.	During Construction	Copy of CTAMP	Requirement has been included in the CTAMP (rev 15, 7 July 2021) at section 7.4.6 and is shown on the Heavy Vehicle Route map. Truck drivers have been advised of noise requirements during pre-start meetings and induction.	

E28	Construction vehicles (including staff vehicles) shall be managed to: a)minimise parking or queuing on public roads; b)minimise idling and queuing in local residential streets where practicable; c)adhere to the nominated haulage routes identified in the Construction Traffic and Access Management Plan required under condition E35(a); and d)ensure access and egress from construction compounds is undertaken in a safe and lawful manner.	During Construction	Copy of CTAMP	Drivers have been advised of noise requirements during pre-start meetings and induction. Addressed in Appendix B and Section 4.3 of the CTAMP (rev 15, 7 July 2021).	
E29	Safe pedestrian and cyclist access through or around worksites shall be maintained during construction. In circumstances where pedestrian and cyclist access is restricted due to construction activities, a satisfactory alternate route shall be provided and signposted, including provision of temporary footpaths where pedestrian access is reliant on grassed verges.	During Construction	Copy of approved CTAMP	Safe access is maintained for pedestrians and cyclists along Moorebank Ave. Internal site movements are maintained following an internal Vehicle Management Plan. IMEX No 1 works do not currently extend onto public roads to the extent where pedestrian and cycle access would be restricted. Access remains generally the same as prior to works. Addressed across CTAMP at section 4.1.6.	
E30	Access to all properties affected by the carrying out of construction shall be maintained, where feasible and reasonable, unless otherwise agreed by the relevant property owner or occupier. Any access physically affected by construction shall be reinstated to at least an equivalent standard, unless agreed with by the property owner.	During Construction	Copy of approved CTAMP	Works do not impact other private properties. This requirement has been included in the CTAMP (4.1.7) (rev 15, 7 July 2021).	
	Biodiversity				
E31	No threatened species or communities can be cleared other than that required for construction.	During Construction	Copy of approved Construction Flora and Fauna Management Plan (CFFMP)	Not applicable to IMEX, no threatened species. Threatened native vegetation is outside IMEX site, 'no go' flagging and fencing in place. Addressed in section 3.5 of the CFFMP (rev 17, 7 July 2021).	
F31 A	Where any lineatened flora species are to be cleared individual plants of enecies suitable for transformation shall	Prior to	An annoved Bindiversity Offset Parkage	No clearing undertaken	
E31A	Where any threatened flora species are to be cleared, individual plants of species suitable for translocation shall be considered for translocation into areas that have been identified as requiring rehabilitation within the Biodiversity Offset Package.	Prior to Construction	An approved Biodiversity Offset Package	No clearing undertaken.	
E31A	be considered for translocation into areas that have been identified as requiring rehabilitation within the	Prior to Construction	An approved Biodiversity Offset Package Copy of approved CFFMP	No clearing undertaken. Tree protection Report issued to PCA on 11/5/17 defining the type of tree protection that will be implemented. The trees on Moorebank Ave required for permanent access to site were removed in April 2018. The approved trees aligned with the approved Landscape Master Plan of the MPE Stage 1 UDLP. Addressed in section 3.1 of CFFMP (rev 17, 7 July 2021).	

(x)mechanisms for the monitoring, review and amendment of this plan.

b)a Construction Noise and Vibration Management Plan to detail how construction noise and vibration impacts will be minimised and managed. The Plan shall be consistent with the guidelines contained in the Interim Construction Noise Guidelines (Department of Environment and Climate Change 2009). The plan shall be developed in consultation with the EPA and shall include, but not be limited to:

(i)identification of the work areas, site compounds and access points;

(ii)identification of sensitive receivers and relevant construction noise and vibration goals applicable to the SSD and stipulated in the conditions above;

(iii)details of construction activities and an indicative schedule for works, including the identification of key noise and/or vibration generating construction activities (based on representative construction scenarios, including at ancillary facilities) that have the potential to generate noise and/or vibration impacts on surrounding sensitive receivers, particularly residential areas;

(iv)an Out-of-Hours Work Protocol for the assessment, management and approval of works outside of standard construction hours as defined in condition E19 of this approval, for the Secretary's approval. The Out-of-Hours Work Protocol must detail.

a)assessment of out-of-hours works against the relevant noise and vibration criteria;

b)detailed mitigation measures for any residual impacts (that is, additional to general mitigation measures), including extent of at- receiver treatments; and

c)proposed notification arrangements.

(v)identification of feasible and reasonable measures proposed to be implemented to minimise and manage noise impacts (including construction traffic noise impacts), including, but not limited to, acoustic enclosures, erection of noise walls (hoardings) and respite periods;

(vi)identification of feasible and reasonable procedures and mitigation measures to ensure relevant vibration criteria are achieved, including applicable buffer distances for vibration intensive works, use of low-vibration generating equipment/ vibration dampeners or alternative construction methodology, and pre- and postconstruction dilapidation surveys of sensitive structures where blasting and/or vibration is likely to result in damage to buildings and structures (including surveys being undertaken immediately following a monitored exceedance of the criteria;)

(vii)a description of how the effectiveness of mitigation and management measures would be monitored during construction, clearly indicating how often this monitoring would be conducted, the locations where monitoring would take place, how the results of this monitoring would be recorded and reported, and, if any exceedance is detected, how any noncompliance would be rectified; and

(viii)mechanisms for the monitoring, review and amendment of this plan

c)a Construction Heritage Management Plan to ensure construction impacts on Aboriginal and non-Aboriginal heritage will be appropriately avoided, minimised and managed. The Plan shall be developed in consultation with OEH, the relevant Council, the NSW Heritage Council (for non-Aboriginal State heritage items) and the relevant Local Aboriginal Land Councils (for Aboriginal heritage), and include, but not necessarily be limited to: (i)in relation to Aboriginal Heritage:

a)details of management measures to be carried out in relation to Aboriginal heritage, including a detailed methodology and strategies for protection, monitoring, and conservation of sites and Items; b)procedures for dealing with previously unidentified Aboriginal objects (excluding human remains), including cessation of works in the vicinity, assessment of the significance of the Item(s) and determination of appropriate mitigation measures, including when works can re-commence, by a suitably qualified and experienced archaeologist in consultation with the Secretary and Aboriginal stakeholders, assessment of the consistency of any Aboriginal heritage impacts against the approved impacts of the SSD, and, where relevant, registration in the OEH's Aboriginal Heritage Information Management System (AHIMS) register;

c)procedures for dealing with human remains, including cessation of works in the vicinity, notification of Secretary, NSW Police Force, OEH and Aboriginal stakeholders, and commitment to cease recommencing any works in the area unless authorised by the OEH and/or the NSW Police Force:

d)heritage training and induction processes for construction personnel (including procedures for keeping records of inductions) and obligations under the conditions of this approval including site

identification, protection and conservation of Aboriginal cultural heritage; and

e)procedures for ongoing Aboriginal consultation and involvement for the duration of construction; and (iii)in relation to non-Aboriginal Heritage:

a)identification of heritage items directly and indirectly affected by construction;

b)consideration of methods to prevent damage to any retained heritage items, including:

Liprocedures for identifying minimum working distances to retained heritage items (including, at minimum, vibration testing and monitoring).

II.detailed options for alteration of construction methodology should preferred values for vibration be exceeded, and

Ill.commitment to implementing those options if preferred values for vibration are likely to be exceeded. c)details of management measures to be implemented to prevent and minimise impacts on heritage items (including further heritage investigations, archival recordings and/or measures to protect unaffected sites during construction works in the vicinity):

d)details of monitoring and reporting requirements for impacts on heritage items;

e)procedures for dealing with previously unidentified heritage objects, (including cessation of works in the vicinity, assessment of the significance of the item(s) and determination of appropriate mitigation measures including when works can re-commence by a suitably qualified and experienced archaeologist in consultation

The project Construction Noise & Vibration Management Plan (CNVMP) was developed in consultation with stakeholders as specified by this condition. Approval of CNVMP provided by DPHI on 11/5/17. The CNVMP (rev 16, 7 July 2021) has been updated to include the removal of the southern extent of the disused rail spur, as required by Condition C23B of this consent, and submitted to DPHI. CHMP (rev 14, 7 July 2021) was submitted to DPHI for approval on 24 February 2017. Approval of the CHMP was issued by DPHI on 09/05/17 The CHMP has been updated to include the removal of the southern extent of the disused rail spur, as required by Condition C23B of this consent, and submitted to DPHI. The project Construction Flora & Fauna Management Plan was developed in consultation with stakeholders as specified by this condition. CFFMP was sent to DPHI on the 9/02/2017 for review and approval. Approval of CFFMP provided by DPHI (previously DPE) on The CFFMP has been updated to include the removal of the southern extent of the disused rail spur, as required by Condition C23B of this consent, and submitted to DPHI. The updated CFFMP (rev 17, 7 July 2021) is currently being implemented.

with the OED, Now Demage Council and the Secretary, assessment of the consistency of any nemage impacts against the approved impacts of the SSD, and, where relevant, notification of the Heritage Council of NSW in accordance with section 146 of the Heritage Act 1977; and fineritage training and induction processes for construction personnel (including procedures for keeping records of inductions and obligations under this approval including site identification, protection and conservation of non-Aboriginal cultural heritage: and (iii)mechanisms for the monitoring, review and amendment of this plan. d)a Construction Flora and Fauna Management Plan to detail how impacts on ecology (as detailed in the most ecent mapping endorsed by OEH) will be minimised and managed. The Plan shall be developed by a suitably qualified and experienced ecologist and in consultation with the OEH, and shall include, but not necessarily be (i)plans for impacted and adjoining areas showing vegetation communities; important flora and fauna habitat areas; areas of conservation value; locations where threatened species, populations or ecological communities have been recorded; including pre-clearing surveys to confirm the location of threatened flora and fauna species and associated habitat features; (ii)the identification of areas to be cleared and details of management measures to avoid residual habitat damage or loss and to minimise or eliminate time lags between the removal and subsequent replacement of habitat such as: a)clearing minimisation procedures (including fencing); b)clearing procedures (including nest box plan); c)removal and relocation of fauna during clearing; d)habitat tree management; e)construction worker education; and f)installationofexclusionfencingpriortocommencementof construction. (iii)rehabilitation details, including identification of flora species and sources, and measures for the management and maintenance of rehabilitated areas; (iv)a Weed Management Strategy, incorporating weed management measures focusing on early identification of invasive weeds and effective management controls (including for those related to aquatic and riparian zones); (v)a description of how the effectiveness of these management measures would be monitored; (vi)a procedure for dealing with unexpected EEC/ threatened species identified during construction, including cessation of work and notification to the OEH and DPI Fisheries, determination of appropriate mitigation measures in consultation with the OEH and DPI Fisheries (including relevant re-location measures) and updating of ecological monitoring and/ or biodiversity offset requirements; and (vii)mechanisms for the monitoring, review and amendment of this plan. e)a Construction Air Quality Management Plan to detail how impacts on local air quality will be minimise and managed. The Plan shall be developed in consultation with the EPA, and shall include, but not necessarily be limited to: (i)identification of sources (including stockpiles and open work areas) and quantification of airborne pollutants; (ii)key performance indicators for local air quality during construction; (iii)details of monitoring methods, including location, frequency and duration of monitoring; (iv)mitigation measures to minimise impacts on local air quality; (v)procedures for record keeping and reporting against key performance indicators; (vi)provisions for implementation of additional mitigation measures in response to issues identified during monitoring and reporting; and (vii)mechanisms for the monitoring, review and amendment of this plan. f)a Construction Soil and Water Management Plan to manage surface and groundwater impacts during construction. The plan shall be developed in consultation with, EPA, DPI Water, DPI Fisheries, and relevant

	Dangerous Goods				
G5	The quantities of Dangerous Goods present at any time on the site or transported from and to the terminal site shall be kept below the screening threshold quantities listed in the Hazardous and Offensive Development Guidelines Applying SEPP 33, (DP&E 2011). The screening threshold quantities for each Dangerous Goods shall be defined in accordance with Table 1: Screening Methods of Applying SEPP 33.	During Operation	Copy of Warehouse Operational Environment Management Plan(s) (WOEMP) or other operational documentation that detail screening threshold quantities of Dangerous Goods If appropriate, copies of Dangerous Goods Registers and Manifests detailing quantities	Not triggered This Compliance Report relates to construction only.	
	Operational Noise, Air Quality, Monitoring and Reporting				
G6	Port shuttle operations must use: a pl. comotives that incorporate available best practice noise and emission technologies. Prior to the construction of the rail link connecting to the site, the Applicant must submit a report to the Secretary for consideration and approval that has been prepared in consultation with TNSW and the EPA that justifies the technology proposed and how it meets the objective of best practice noise and emission technologies; and bib) Wagons that incorporate available best practice noise technologies such as "one-piece" freight bogies or three-piece freight bogies fitted with cross-bracing or steering arms; and including as a minimum permanently coupled "multi-pack" steering wagons using Electronically Controlled Pneumatic (ECP) braking with a wire based distributed power system (or better practice technology).	Prior to the commencement of construction of the Rail Link	Copy of OEMP Compliance reports	Not triggered This Compliance Report relates to construction only.	
G 7	The Applicant shall install and maintain a rail noise monitoring system on the rail link at the commencement of operation to continuously monitor the noise from rail operations on the rail link. The system shall capture the noise from each individual train passby noise generation event, and include information to identify: a) Time and date of freight train passbys; b) Imagery or video to enable identification of the rolling stock during day and night; c) Lea(15 hour) and Lea(ghour) from rail operations; and d) LAF(max) and SEL of individual train passbys, measured in accordance with ISO3095; or e) Other alternative information as agreed with, or required by, the Secretary. The results from the noise monitoring system shall be publicly accessible from a website maintained by the Applicant. The noise results from each train shall be available on the website within 24 hours of it passing the monitor, unless unforeseen circumstances (i.e. a system malfunction) have occurred. The Lea(15hour) and Lea(ghr) results from each day shall be available on the website within 24 hours of the period ending. Prior to the commencement of operation, the Applicant shall submit for the approval of the Secretary, justification supporting the appropriateness of the location for rail noise monitoring, including details of any alternative options considered and reasons for these being dismissed. The rail noise monitoring system shall not operate until the Secretary has approved the proposed monitoring location. The Applicant shall provide an annual report to the Secretary with the results of monitoring for a period of 5 years, or as otherwise agreed with the Secretary, from the commencement of operation of the IMEX terminal. The Secretary shall consider the need for further reporting following a review of the results for year 5.	Commencement of Operation	Records of installation / maintenance of rail noise monitoring equipment Records /copies of upload of results / live data on website. Compliance reports	Not triggered This Compliance Report relates to construction only.	

G7A	The applicant shall install and maintain a wayside angle of attack monitoring system on the rail link at the commencement of operation to continuously monitor the angle of attack to the rail of rolling stock wheels. The system shall capture the angle of attack from a wheel on each axle of every train, and include information to identify: a) Time and date of each axle passby, and b) The identification number of each item of rolling stock. The results from the angle of attack monitoring system shall be; accessible by train operators from a website maintained by the Applicant. Angle of attack results from each train shall be available on the website within 24 hours of it passing the monitor, unless unforeseen circumstances have occurred. *included in a six-monthly report to the Secretary. The report should at least identify the number of wagons with wheels that exceed the ASA standard angle of attack and the action taken by operators to improve steering performance. Prior to the commencement of operation, the Applicant shall submit for the approval of the Secretary, justification supporting the appropriateness of the location for angle of attack monitoring, the format of the information to be accessible to operators and the format of the public report. The angle of attack monitoring system shall not operate until the Secretary has approved the proposed monitoring location and reporting arrangements.	Prior to the commencement of operation	An approved Operational Noise and Vibration Management Plan (ONVMP)	Not triggered This Compliance Report relates to construction only.	
	Rail Link Noise Monitoring and Mitigation				
G7B	The Applicant shall: (a) not less than three months and not more than twelve months from commencement of operation, engage an appropriately qualified and experienced acoustic engineer to undertake a night-time noise survey at Glenfield Farm (or an equivalent location if access is denied). (b) the noise survey shall be conducted in accordance with the EPA's Rail Infrastructure Noise Guideline 2013 to determine: (i) the contribution of any new rail traffic travelling to and from the development, and, (ii) the increase in the total rail traffic noise level caused by any new rail traffic to and from the development. (c) the noise survey shall be conducted for not less than 12 contiguous days in the winter months (July, August or September). (d) if as a result of the noise survey there is a sustained increase in the total rail traffic noise level due to the noise level from rail traffic travelling to and from the development of more than 2dB(A) for more than 30% of nights surveyed, the Applicant shall within twelve months, construct a noise barrier along the relevant sections of rail link in accordance with the specifications provided by an appropriately qualified and experienced acoustic engineers os as to limit the increase in the total rail traffic noise level at Glenfield Farm caused by any new rail traffic to and from the development to not exceed 2dB(A). (e) the report of the noise survey including the results and recommendations shall be provided to the Secretary	Prior to the commencement of operation	An approved Operational Noise and Vibration Management Plan (ONVMP)	Not triggered This Compliance Report relates to construction only.	
G8	The following measures must be implemented during operation: a)The use of automatic rail fubrication equipment in accordance with ASA Standard T HR TR 00111 ST Rail Lubrication and top of rail friction modifiers, where required; and b)Measures to ensure the rail cross sectional profile is maintained in accordance with ETN-01-02 Rail Grinding Manual for Plain Track to ensure the correct wheel / rail contact position and hence to encourage proper rolling stock steering.	During Operation	Records of installation / maintenance of rail noise monitoring equipment	Not triggered This Compliance Report relates to construction only.	
G9	The transfer of containers between Port Botany and the IMEX terminal must not	During Operation	For reference	Not triggered	
G10	commence until the rail connection to the SSFL is operational. Containers must be transferred from Port Botany to the site and from the site to Port	During Operation	Copy of container transport documentation	This Compliance Report relates to construction only. Not triggered.	
	Botany by rail, unless there is planned track maintenance or where unforeseen circumstances have occurred (e.g. an incident, breakdown, derailment or emergency maintenance on the rail line). The Secretary may at any time request the Applicant to demonstrate that the transport of containers between the site and Port Botany container terminals is by rail. This is to be demonstrated upon request by the Secretary for the prior 12 month period.			This Compliance Report relates to construction only.	
G11	The Applicant shall prepare a six-monthly report to the Secretary with the results of container and vehicle monitoring for a period of 3 years, or as otherwise agreed with the Secretary, from the commencement of operation of the IMEX terminal. The Secretary shall consider the need for further reporting following a review of the results for year 3. The report shall include: a)The number of wenty foot equivalent units dispatched and received during the period; b)A record of heavy vehicle entry by date and approximate time; and c)The number of light vehicles turning right into the terminal site from Moorebank Avenue and turning left from the terminal site onto Moorebank Avenue for a representative day.	During Operation	Copy of report	Not triggered This Compliance Report relates to construction only.	
G12	All container handling equipment, purchased after 2019 must meet US EPA Tier 4 or EU Stage IV emission standard or achieve an equivalent emission control performance to those standards listed in this condition.	During Operation	Copy of equipment design specifications	Not triggered This Compliance Report relates to construction only.

	period.				
G15	Within 12 months of the commencement of operation of the project, or as otherwise	During Operation		Not triggered	
	agreed by the Secretary, the Applicant shall undertake operational noise monitoring to			This Compliance Report relates to construction only.	
	compare actual noise performance of the project against noise performance predicted in			· · · · · · · · · · · · · · · · · · ·	
	the review of noise mitigation measures predicted in documents specified under				
	condition A1 of this approval, and prepare an Operational Noise Report to document this				
	monitoring. The Report shall include, but not necessarily be limited to:				
	a)noise monitoring to assess compliance with the operational noise levels predicted in				
	documents specified under condition A1 of this approval;				
	b)a review of the operational noise levels in terms of criteria and noise goals established				
	in the NSW Road Noise Policy (EPA, 2011);				
	c)sleep disturbance impacts compared to those determined in Condition E25;				
	d)methodology, location and frequency of noise monitoring undertaken, including				
	monitoring sites at which project noise levels are ascertained, with specific reference to				
1	locations indicative of impacts on sensitive receivers;				
1	e)details of any complaints and enquiries received in relation to operational noise				
	generated by the project between the date of commencement of operation and the date				
	the report was prepared;				
	f)any required recalibrations of the noise model taking into consideration factors such as				
	actual traffic numbers and proportions;				
	g)an assessment of the performance and effectiveness of applied noise mitigation				
	measures together with a review and if necessary, reassessment of all feasible and				
	reasonable mitigation measures; and				
	h)identification of additional feasible and reasonable measures to those predicted in the				
	documents specified under condition A1 of this approval, that would be implemented with				
	the objective of meeting the criteria outlined in the NSW Road Noise Policy (EPA, 2011),				
	when these measures would be implemented and how their effectiveness would be				
	measured and reported to the Secretary and the EPA.				
	The Applicant shall provide the Secretary and the EPA with a copy of the Operational				
	Independent Environmental Audit
